CT022	To: Project Team From: [REDACTED]	Email	Highway location	09/24/2020	<p>Hi.</p> <p>By the looks of the rendering online, it looks like the bypass will run right behind my backyard wall.</p> <p>What I can't determine is how close to my property the bypass will be. Can you help clarify?</p> <p>Thanks [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The alignment of 2002 EA Approved highway is situated within the highway right-of-way as shown in Exhibit 5-2, plate 4 (Pg. 203) from the Route Planning Study and EA. The Exhibit is available on the Overview Page of the project website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study). Refinement of the highway alignment and consideration for proximity to current developments is underway. The design alternatives will be presented at Public Information Centre #1 where you can learn more about the proposed highway alignment west of County Road 4.</p> <p>You will be notified through email of future public information centres and updates for this study.</p> <p>If you have any additional questions, please reach out to the project team at your earliest convenience.</p>
CT023	To: Project Team From: [REDACTED]	Comment Form- Website	New Stakeholder Comment Form Entry	9/24/2020	How will this intersection affect our residence?.	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>We have your address [REDACTED] on file per our contact list. Based on the proximity to the proposed interchange at County Road 4 (Yonge Street), the shared laneway providing access to the three properties will be considered with respect to grading options to maintain access.</p> <p>Given the shared nature of this laneway we would like to better understand the ownership and shared function of the laneway. Please let the project team know when we can speak to one or all three homeowners.</p> <p>The design alternatives will be presented at Public Information Centre #1 where you can learn more about the proposed highway alignment and the proposed interchange. You will be notified through email of future public information centres and updates for this study. We encourage you to visit the study website: www.bradfordbypass.ca to get additional information on the project</p> <p>If you require additional information, please reach out to the project team at your earliest convenience.</p>
CT024	To: Project Team From: [REDACTED]	Comment form- website	New Stakeholder Comment Form	9/25/2020	Person would like to be added to the mailing list.	Responded indicated person is on project contact list and thanked them for their response.

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
CT025	To: Project Team From: [REDACTED]	Comment form-website	New Stakeholder Comment Form	9/25/2020	Person would like to be added to the mailing list.	
CT026	To: Project Team From: [REDACTED]	Email	IO Response to Commencement	09/25/2020	<p>Thank you for sending us the Notice of Study Commencement for the Highway 400 – Highway 404 Link through the town of Bradford. While our initial scan indicates that property owned by the Minister of Government and Consumer Services identified by [REDACTED] is within your project's study area, it is the proponent's responsibility to verify if provincial government property is within the study area. Title documents may identify owners of provincial government property as any of the following:</p> <ul style="list-style-type: none"> • His Majesty the King • Her Majesty the Queen • Hydro One • Hydro One Networks Inc. • Management Board Secretariat (MBS) • Minister of Economic Development, Employment and Infrastructure (MEDEI) • Minister of Energy and Infrastructure (MEI) • Minister of Government and Consumer Services (MGCS) • Minister of Infrastructure (MOI) • Minister of Natural Resources and Forestry (MNR) • Minister of Public Infrastructure Renewal (PIR) • Minister of Public Works • Minister of Transportation (MTO) • Ontario Lands Corporation (OLC) • Ontario Realty Corporation (ORC) <p>If provincial government property in the study area is not required for the project, please continue to consult us as a directly affected stakeholder. However, if government property is required for the project, the proponent should contact us so that we can advise about requirements for obtaining government property.</p>	<p>Hi [REDACTED]</p> <p>Thank-you for your comments. The EA Study Team has made note of your feedback and will inform Infrastructure Ontario if any government land (non-MTO owned land) is required for the Bradford Bypass. In specific reference to [REDACTED] the Ministry has notified the tenant in writing that their lease will be terminated effective March 31, 2021.</p> <p>If you have any further questions about the study, please do not hesitate to reach out to the Project Team at your convenience.</p>
CT027	To: Project Team From: [REDACTED]	Email	Regarding the Map provided on the website	09/25/2020	<p>Hi, I'm a resident of [REDACTED] and would like a detailed map of the Bradford Bypass, specifically regarding the proposed Interchange at County Road 4/Yonge Street - between Line 8 and Line 9.</p> <p>I haven't been able to find a detailed map for this area on BradfordBypass.ca. We live in the neighborhood and I would like to understand the scope of impact if any to this area. I do understand that the design is scheduled for completion in 2023 and there may be changes to the plan/design along the way.</p> <p>Please let me know if you are able to provide this information to me.</p> <p>Thank you in advance for your assistance. Regards, [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>Details for the interchange on County Road 4/Yonge Street based on the EA Approved highway is shown in Exhibit 5-2, plate 4 (Pg. 203) from the Route Planning Study and Environmental Assessment. The Exhibit is available on the Overview page of the project website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study).</p>

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
					Sent from [REDACTED]	<p>We trust that this is helpful at this time while refinement of the highway design is undertaken. The design alternatives will be presented at Public Information Centre #1 where you can learn more about the proposed design for the County Road 4 interchange.</p> <p>You will be notified through email of future public information centres and updates for this study.</p> <p>If you have any additional questions, please reach out to the project team at your earliest convenience.</p>
CT028	To: Project Team From: [REDACTED] Enbridge	Email	Enbridge response to commencement	09/24/2020	[REDACTED] indicated that he is not the best contact for union gas.	<p>Emailing indicating we will update our contact list, by reconfirming the contact that covers the Bradford area and continue to engage with Enbridge Gas going forward.</p>
CT029	To: Project Team From: [REDACTED]	Email	New Stakeholder Comment Form	09/25/2020	<p>There is an [REDACTED] in Bradford on lands [REDACTED] to the study area. [REDACTED] is in the process of being designed. Any information on the project would be much appreciated.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team acknowledges your comments regarding the [REDACTED] to the Project Study Area. Refinement of the highway alignment and consideration for proximity to current developments is underway. The design alternatives will be presented at Public Information Centre #1 where you can learn more about the proposed highway alignment.</p> <p>We have included you on our project contact list. You will be notified via email of future public information centres and updates for this study.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT029 Con't	To: Project Team From: [REDACTED]	Email	Details regarding positioning of the school.	12/08/2020	<p>Good afternoon,</p> <p>The [REDACTED] is located at [REDACTED] (the address may change in the future), please see attached key map. We are currently in the process of working through the Site Plan Application with the Town, final approval has not yet been granted. The building will be pushed as close as possible to the road and a berm with a naturalized area and fence will be installed along our rear lot line, adjacent to the bypass lands. The fence will be chain-link and to MTO's specifications. Please let me know if you have any additional questions.</p> <p>Thank you,</p> <p>[REDACTED]</p>

CT030	To: Project Team From: [REDACTED]	New Stakeholder Comment Form	New Stakeholder Comment Form	09/25/2020	The Holland River is used as the legal outlet for Municipal Drains under the Ontario Drainage Act for the management of a number of drainage schemes in BWG and is the receiving watercourse for the majority of both the controlled and uncontrolled stormwater flows. Designs should be considered which will not impede the capacities or hydrological function of the Holland River. Other watercourses may be impacted as well.	Hello [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study. The Project Team acknowledges your comments on behalf of Bradford West Gwillimbury regarding the Holland River acting as the legal outlet for municipal drainage. As part of this study, a Hydrology and Drainage Assessment and an Erosion and Sediment Control Risk Assessment will be conducted and the findings/recommendations from these studies in relation to natural and municipal drainage will be considered as the design process progresses. If you have any additional questions, please reach out to the Project Team at your earliest convenience.
CT031	To: Project Team From: [REDACTED]	Email	Mailing List	09/25/2020	[REDACTED] asked to be added to the mailing list	Sent response indicating person will be added to list. Sent NOSC
CT032	To: Project Team From: [REDACTED]	Email	RE: MTO Notice of Study Commencement, Assignment 2019-E-0048, Bradford Bypass Preliminary Design and Class EA Study	09/25/2020	[REDACTED] asked to be removed from the mailing list and that the clerks email be added instead of hers.	Updated contact list to reflect this request.
CT033	To: Project Team From: [REDACTED]	Email	[EXTERNAL] Bradford Bypass	09/25/2020	Asked if he can set up a phone call to discuss matters related to the BBP and his property.	
CT034	To: Project Team From: [REDACTED]	Email	Helpful Information	09/25/2020	Hi there, as a stakeholder in the Bradford Bypass, here is the information I provided to [REDACTED] regarding my property. 1. The Corporate address for the [REDACTED] is: [REDACTED] All correspondence regarding the land should be sent to this address.	Hello [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. The Project Team acknowledges the information you have provided for your property. We will use the appropriate contact details to notify you of future Public Information Centres and updates for this study. If you have any additional questions, please reach out to the Project Team at your earliest convenience.

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
					<p>2. The Property Survey is attached, it is [REDACTED] acres in size. My company has owned the land since [REDACTED]. I am the only shareholder and there are no liens, debts, litigation, etc., involving the property..it is owned free and clear.</p> <p>3. The land was originally the first Sod Farm in East Gwillimbury, established in the 1860's. The land is environmentally friendly, with no contaminants of any kind , like fuel, oil , etc. stored on the property. Attached is a Phase One Environmental report completed in [REDACTED].</p> <p>4. The property is currently registered as a [REDACTED]. I received this registration several years ago through Transport Canada. It is a difficult registration to get and maintain, but can be removed by my company. Here is a link to the information that it is in the Canada Flight Supplement with respect to length and dimensions of Runways, etc.,</p> <p>[REDACTED]</p> <p>5. The property contains [REDACTED] of very valuable Whitebelt , non- flood plain land. Recently, the [REDACTED] recommended incorporating this land into the Urban Area. Attached is a background document dated , September 2020.</p> <p>6. The [REDACTED] will be closed for the season on October 1st, so any essential, non-invasive, environmental work, can be completed from October 1, 2020 through May 1, 2021.</p> <p>Please feel free to contact me should you have any other questions or require any more information</p>	
CT035	To: Project Team From: [REDACTED]	Email		9/25/2020	<p>I noticed on the Province's website (see link below) that an Exemption Regulation was being proposed for the Bradford Bypass (Highway 400 – 404 Link). Is this still being proposed and how will it affect your preliminary design and Class EA assignment? From your notice of commencement, it sounds like you propose to follow the standard MTO Class EA process. Will this change once an Exemption Regulation is passed?</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental (EA) Study.</p> <p>A proposal to exempt various MTO projects, including the Bradford Bypass, from the requirements of the Environmental Assessment Act has been posted by the Ministry of the Environment, Conservation and Parks (MECP) on the Environmental Registry of Ontario. However, because no regulation prescribing such an exemption has been proposed or enacted, the MTO is currently following the approved planning process for a Group 'A' project under the MTO Class Environmental Assessment for Provincial Transportation Facilities (2000). This is in accordance to the Notice of Approval issued for the 1997 Environmental Assessment Report (documenting the environmental assessment process for the route selection, right-of-way designation and future commitments for the Highway</p>

	Interphase Developments					
CT061	To: Project Team From: [REDACTED] Business Owner [REDACTED]	Comment Form- Website	New Stakeholder Comment Form Entry	9/29/2020	<p>Hi Project Team,</p> <p>Please see attached completed Stakeholder Comment and Contact Information Form.</p> <p>Best Regards,</p> <p>Comment Form:</p> <p>We don't know we need more information.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>The Project Team acknowledges your request for additional project information. The design alternatives and documented existing conditions will be presented at Public Information Centre (PIC) #1. Project Team members will also be in attendance to discuss any specific questions or concerns you may have.</p> <p>You will be notified through email of future PICs and updates for this study. Please continue to visit the project website (www.bradfordbypass.ca) as it will be updated throughout the study.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT062	To: Project Team From: [REDACTED]	Comment Form- Website	New Stakeholder Comment Form Entry	9/29/2020	<p>The study area is traversed by a number of watercourses. Due to the presence of these watercourses and the associated hazards, the study area is within an area regulated by the [REDACTED] and is subject to the Authority's Development, Interference with Wetlands, and Alterations to Shorelines & Watercourses Regulation (Ontario Regulation 172/06).</p> <p>During the preparation of the Environmental Screening Document detailing the existing biophysical environment, summary of design features, potential impacts of the undertaking, required mitigation procedures and commitments to future work, the [REDACTED] request that the following be considered:</p> <p>Stormwater Management</p> <p>[REDACTED] encourage inclusion of measures to treat stormwater runoff in accordance with [REDACTED] guidelines. Typically we request that the proponent provide treatment for all new proposed impervious areas and where possible existing road surfaces.</p> <p>Hydraulics</p> <p>Any alterations to any watercourse crossings may require a hydraulic analysis to ensure that there are no negative up or down stream impacts. In addition, any associated road improvements or reconstruction at a minimum should maintain existing depth flooding on the road or improve the road such that it is flood free under Regional Storm conditions.</p> <p>Erosion and Sediment Controls</p> <p>During the detailed design period of this project, all proposed methods to control sedimentation during construction and potential erosion following the completion of the project must be included. Erosion and sediment control will be an integral part of mitigation.</p> <p>Restoration</p> <p>All disturbed areas will need to be stabilized and restored with native/non-invasive seed mixes and woody species.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Study.</p> <p>The project team notes comments on behalf of the [REDACTED] and the environmental factors you have highlighted (watercourses, stormwater management, hydraulics, erosion/sediment control and restoration). During the environmental assessment process, the Project Team will conduct the following studies, among others:</p> <ul style="list-style-type: none"> - Agricultural Impact Assessment; - Air Quality Impact Assessment; - Drainage and Hydrology; - Erosion and Sediment Control Risk Assessment; - Fish and Fish Habitat Existing Conditions and Impact Assessment Report; - Fluvial Geomorphology; - Groundwater Impact Assessment; - Noise and Vibration Impact Assessment; - Preliminary Landscape Composition Plan; - Snowdrift Assessment; - Terrestrial Ecosystems Existing Conditions and Impact Assessment Report (including an assessment of vegetation and vegetation communities, wildlife and wildlife habitat, species at risk and designated natural areas); and, - Waste and Excess Materials Management Plan. <p>The findings of these assessments will be presented at future Public Information Centres and documented in reports which can be reviewed later in the study.</p>

					Conclusion. ██████ staff would like to be kept informed of future meetings and proceedings through the Detailed Design process. Please forward any detailed information/reports including any draft Environmental Screening Document when available to ensure that this Authority's policy and program interests are reflected in the planning and design components for this project.	We recognize the ██████ will have valuable input to the design and as such will continue to engage with the ██████ throughout the study. If you have any additional questions, please reach out to the Project Team at your earliest convenience.
CT063	To: Project Team From: ██████	Comment Form- Website	New Stakeholder Comment Form Entry	9/29/2020	Form asking to be added to the contact list	Sent email acknowledging person was already on list and would continue to receive notifications.
CT064	To: Project Team From: Outlook	Email	Email Bounceback: Undeliverable	9/30/2020	████████████████████ Undeliverable	Sent notice to office admin to see if there is a firewall preventing project emails.
CT065	To: Project Team From: Outlook	Email	Email Bounceback: Undeliverable	9/30/2020	████████████████████ Undeliverable	Spoke with admin from the town regarding email bounce backs. Reissued emails.
CT066	To: Project Team From: Outlook	Email	Email Bounceback: Undeliverable	9/30/2020	████████████████████ Undeliverable	Spoke with admin from the town regarding email bounce backs. Reissued emails.
CT067	To: Project Team From: Outlook	Email	Email Bounceback: Undeliverable	9/30/2020	████████████████████ Undeliverable	Spoke with admin from the town regarding email bounce backs. Reissued emails.
CT068	To: Project Team From: ██████ ██████	Email	New Stakeholder Comment Form Entry	09/30/2020	██████ would like to continue to be circulated on this project and would like to provide whatever supporting information is required by the project team as needed. We would particularly be interested in reviewing any environmental reports.	Hello ██████ Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. The Project Team notes that MNRF would like to receive updates moving forward. We recognize the MNRF will have valuable input to the design and as such will continue to engage with the MNRF throughout the study. During this Preliminary Design Study, the Project Team will conduct the following environmental studies which may be of interest to the MNRF: - Fish and Fish Habitat Existing Conditions and Impact Assessment; and - Terrestrial Ecosystems Existing Conditions and Impact Assessment (including an assessment of vegetation and vegetation communities, wildlife and wildlife habitat, species at risk and designated natural areas). The findings of these assessments will be presented at future Public Information Centres and documented in reports which can be reviewed later in the study. If you have any additional questions, please reach out to the Project Team at your earliest convenience.

						Sincerely,
CT069	To: Project Team From: [REDACTED]	Email	New Stakeholder Comment Form Entry	09/30/2020	Comment that it was great news and that it is about time this is built because traffic is an issue.	Sent email Acknowledging person is now added to contact list and will continue to receive notifications.
CT070	To: Project Team From: [REDACTED]	Email	New Stakeholder Comment Form Entry	9/30/2020	Form asking to be added to the contact list	Sent email indicating they are already on the contact list and will continue to receive notifications
CT071	To: Project Team From: [REDACTED]	Email	New Stakeholder Comment Form Entry	9/30/2020	Form asking to be added to the contact list	Sent email indicating they are already on the contact list and will continue to receive notifications.
CT072	To: Project Team From: [REDACTED]	Email	New Stakeholder Comment Form Entry	9/30/2020	With ever increasing truck and vehicle-traffic along the 8th line and proposed new development north of the 8th line. My feedback would to include a full interchange at sideroad 10 as well. In addition, an interchange at the sideroad 10 would also provide alternative routing for emergency services and north/south traffic should a hwy 400 closer occur in the event of an accident. Also suggest to remove Bradford by pass. Just call it 404-400 link. Hope my comments are helpful and will be considered.	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental (EA) Assessment Study.</p> <p>The Project Team acknowledges your comments regarding an additional interchange at Sideroad 10. As part of this Preliminary Design Study, the Project Team is evaluating design refinements of the 2002 EA-approved highway alignment and interchange locations, taking into consideration the current and projected traffic demands. We continue to engage with Simcoe County and Bradford-West Gwillimbury to understand current and future highway access needs.</p> <p>An evaluation of design alternatives to the EA-approved alignment will be presented at Public Information Centre #1. The date of the PIC will be posted on the project website, and a notification will be sent to you as part of the Project Contact List.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p> <p>Sincerely,</p>
CT094	To: Project Team From: [REDACTED]	Email	FW: Notice of Study Commencement, Assignment 2019-E-0048, Bradford Bypass Preliminary Design and Class EA Study	09/30/2020	<p>Good morning [REDACTED]</p> <p>This is to acknowledge reception of the email below regarding the Bradford Bypass Preliminary Design and Class EA Study.</p> <p>Please note that the Huron-Wendat Nation is formally requesting to be engaged in any further archaeological studies that will be initiated as part of this project.</p> <p>Could you also provide us with the Stage 1 archaeological report copy ?</p> <p>Thanks and best regards,</p>	<p>Hello/Bonjour [REDACTED]</p> <p>The ministry acknowledges your response to the Notice of Study Commencement for the Bradford Bypass. Per your request, attached is the digital copy of the archaeological assessment, which was completed by the Ministry in 2020 in advance of the preliminary design.</p> <p>We look forward to engaging with you as the project progresses. If you have additional questions or wish to schedule a meeting with the Project Team after your review of the archaeology assessment, please reach out to us at your earliest convenience.</p>

CT095	To: Project Team From: [REDACTED]	Email	Re: Bradford Bypass Preliminary Design Field Investigations Notification	8/19/2020	This is farm land rented to a tenant under cultivation. I have not asked the tenant for permission to access. I will try to do so now.	Hello [REDACTED] If there are any additional considerations we should note with respect to accessing this property to accommodate the tenant, please let us know. We could include them in the advanced notification if that would work for you and the tenant. It would be very helpful to understand what field staff should be aware of in order to avoid conflicting with farming operations or respect the tenants crops, and ensure safe access on or through the property. One of our project team can discuss this with you by phone if that would be helpful. Sincerely,
CT096	To: Project Team From: [REDACTED]	Email	Re: Bradford Bypass Preliminary Design Field Investigations Notification	09/11/2020	Response to a fieldwork notification: Hello, Thank you for the update. Is there a target date for the visit? Many Thanks,	Good Morning [REDACTED] There is some flexibility with the visits. They will be conducted now until the end of September with some possibility for visits in October as well. If you have any further questions please do hesitate to contact us. Sincerely,
CT097	To: Project Team From: [REDACTED]	Email	Re: Bradford Bypass Preliminary Design Field Investigations Notification	8/28/2020	Good Morning We are still waiting for a mailed copy of the package Thank you and have a great day	Good Afternoon [REDACTED] Hope all is well with you. Per your emailed request (see below), we trust that by now you will have received the mailed copy of the Permission to Enter Request for your property located at [REDACTED] Also, as of September 24, 2020 you should have also received the Notice of Study Commencement with additional information about the Bradford Bypass Project. Attached you will find an electronic copy of the Permission to Enter form. It will be greatly appreciated if you can please return the completed and signed form to us at your earliest convenience, preferably no later than Friday, October 23, 2020. You can send the signed form back to us by email or by mail using the postage-paid return envelope included in the package you would have received. Please note, we tried to reach you by phone-call today to discuss this matter. Please feel free to contact the Project Team should you have any questions or concerns. We thank you in advance for the signed form and look forward to continued communication with you throughout the study.

CT076	To: Project Team From: [REDACTED] [REDACTED] [REDACTED]	New Stakeholder Comment Form	Ontario Regulation 179/06 and Areas of Environmental Significance	10/01/2020	The proposed study areas include those that fall within areas governed by Ontario Regulation 179/06 as made my the Conservation Authorities Act. Additionally, there are areas of environmental significance (Significant Woodlands, wetlands, etc.) which should be examined. Through MOUs with our member municipalities, we review applications in the context of Natural Heritage matters on their behalf. We would appreciate the opportunity to discuss this project with your team	Hi [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Study. The Project Team notes comments on behalf of the Lake Simcoe Region Conservation Authority (LSRCA) and the environmental factors you have highlighted (significant woodlands, wetlands). The Project Team will undertake various environmental studies to inform the preliminary design and identify environmental concerns, commitments and recommend mitigation measures. A full list of these environmental studies is provided on the project website (https://www.bradfordbypass.ca/overview/). We will work with the LSRCA to find opportunities to the information collected, discuss the results and solicit your input and feedback in order to satisfy regulatory requirements. In addition, the findings of these assessments will be presented at future Public Information Centres, and documented in accordance with the EA. To better assist the Project Team's assessment of the potential impacts of the proposed highway on drainage and wetland areas throughout the Holland River Watershed, the Ministry kindly requests that the Authority's drainage modelling (HECRAS) be released in order to complete our drainage analysis. This type of information-sharing is mutually beneficial, and as a respective courtesy between government agencies, is typically accommodated without user fees. If LSRCA requires the Ministry to sign a user confidentiality agreement or similar document to assure the Authority that the data will only be used for the purposes of our EA Study, I can certainly make those arrangements upon request. I look forward to meeting with the LSRCA to discuss the project. If you have any additional questions, please reach out to the Project Team at your earliest convenience. Sincerely, [REDACTED] MTO Project Manager
CT077	To: Project Team From: [REDACTED] [REDACTED]	New Stakeholder Comment Form	New Stakeholder Comment Form Entry	10/1/2020	No Comments attached to form.	Hello [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study. We have included you on our project contact list. Please find attached Notice of Study Commencement for the Bradford Bypass Preliminary Design and Class Environmental Study. You will be notified through email of future public information centres and updates for this study.

CT078	To: Project Team From: [REDACTED]	Email	Re: MTO Notice of Study Commencement, Assignment 2019-E-0048, Bradford Bypass Preliminary Design and Class EA Study	10/02/2020	Good morning [REDACTED] I have read the email attached and would like to respond here regarding the water craft usage. On behalf of artesian and I, we would like to let you know that we do not use the Holland River what so ever. Sorry for not responding on the website, I find it much easier here. Also could I receive information and updates through my email instead of going on the website? That would be much appreciated. Thank you. Sincerely, [REDACTED]	Hello [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study. Thank you for providing your comments regarding usage of the Holland River. As you are already on the project contact list, you will be notified through email of future public information centres and updates for this study. For further information, visit the study website: www.bradfordbypass.ca Sincerely,
CT079	To: Project Team From: [REDACTED]	Email	Concerns regarding increase traffic within Queensville	10/02/2020	I would like to participate and receive information as my home has already been impacted by the increased traffic and noise caused by Highway 404 extension from Greenlane to Ravenshoe Road. Queensville is a quiet rural community, that has farms that we will expropriated for the proposed highway. These farms grow vegetables for Ontario families, corn, grains and hay for farmers, and businesses. The Province designated areas, Green and White belts and now breaking the rules and dumping highways on these protected lands. The owners of these lands will not get the true \$ value for their properties. I know as my uncle got hardly nothing for his farm land which was used for feed his livestock. The Ministry based the value on vacant land in another community outside of our municipality. Queensville does not need or want any more heavy traffic that does not adhere to the posted speed limits. There is no speed enforcement for heavy commercial vehicles through our area on Leslie Street from Ravenshoe Road to Queensville Sideroad, and we have a Montessori School next door to me, and the heavy commercial trucks come speeding up the road doing more than the posted 50km per hour. The Police do not stop them, that's the Ministry's job! We hear the constant traffic noise of the highway from our home on Leslie Street, Queensville and did not get the fancy noise buffers that the rich folks in Sharon received from from the Ministry of Transportation from Mount Albert Road to Green Lane. The town of Queensville is a quiet hamlet (main street is on Leslie Street near Queensville Side Road) but once the bypass is put through the traffic will even worse than it is now with the constant speeding dump trucks, and heavy traffic.	Hello [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. The alignment of the proposed highway was assessed and subsequently approved by the Minister of Environment in 2002, as a result of the Route Planning Study and Environmental Assessment undertaken by the Ministry in the 1990s. The study and exhibits are available on the Overview Page of the project website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study). This EA-Approved highway corridor was designated by the province as a Controlled Access Highway many years ago, based on the outcome of the Route Planning EA Study. Therefore, it is not the intention or scope of this Preliminary Design EA Study to assess or explore alternative routes for the Bradford Bypass, as this work was undertaken previously. However, some minor refinement of the highway alignment is underway, in order to mitigate potential impacts on stakeholders. Environmental and engineering assessment studies including (but not limited to), noise, air quality, agricultural impacts, snowdrift, land use and traffic modelling will all be updated and considered in the development of design alternatives for the highway. The Project Team is actively engaged with local municipalities and regional governments to consult on the design, where the results of these consultations will be incorporated into the Ministry's preliminary design study and presented to the public at key stages. The Project Team acknowledges your concerns about landowners being fairly compensated for their properties in the event that their land is required by the province for the new highway. The Ministry first makes an offer of compensation in the form of a Property Purchase Agreement, to acquire lands amicably. The offer is based on market value and other items of compensation, as per the Expropriations Act. A full narrative appraisal report is completed to determine the Highest and

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
					<p>When snowing the roads become difficult to say the least, as there are 2-3 steep hills just north of Queensville and there are quite a few accidents involving vehicles going into ditches.</p> <p>Holborn Road/ Leslie Street intersection is very dangerous, as there have been quite a few accidents and several fatalities and still no signalized intersection by York Region.</p> <p>The bypass would be better situated north of Bradford, closer to 12th line as the highway could go over Cooks Bay, hook up with Ravenshoe Road, and right onto Highway 404, at Woodbine Avenue expropriating farms that have been in families for generations.</p> <p>I don't see why people cannot use Highway 400 to Highway 89, down a bit and then across Cook's Bay/ bottom of Lake Simcoe and hookup with Ravenshoe Road. There use to be a small bridge that took farmers from Ravenshoe Road over Cooks Bay to the other side before hurricane hazel destroyed it.</p> <p>This will save hundreds of millions of dollars as most of the infrastructure is there now, and allow traffic from Barrie and Surrounding areas easier access.</p> <p>Just look at York Regions white elephant (Davis drive from Eagle street to Huron Heights Boulevard). All the properties expropriated, for what, an express bus lane, which is only used by Viva, not YRT or Go Transit. We call it the express route to Southlake Hospital for Emergency Vehicles only. A big was of taxpayers money!</p>	<p>Best Use of the subject property and provides a per acre rate and a final determination of compensation for the required land. If an amicable agreement is not reached, and/or if the ministry must initiate expropriation in order to meet timelines of construction works, the ministry does have the authority to commence expropriation. Negotiation does continue throughout the expropriation process.</p> <p>Consultation is an on-going component of the study. The Project Team will meet with key stakeholders, agencies, and property owners throughout the study to inform them of the design and solicit their input. There will also be opportunities through two Public Information Centres (PICs) to consult with and engage the general public on the proposed design. The design alternatives will be presented at PIC #1 where you can learn more about the proposed design and interchanges for the proposed highway. You will be notified of future public meetings and updates for this study, and encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>The Project Team acknowledges your concerns about traffic congestion and road safety in the Queensville area. The previous Route Planning EA Study completed in the 1990s concluded that the construction of the Bradford Bypass would generally help to alleviate traffic conditions on existing municipal roads. At present, there is no provincial highway connection between Hwy 404 and Hwy 400 in this area, which means that any east-west through traffic is forced to use local roads which were not designed for that purpose. As part of this Preliminary Design EA Study, the Project Team will be updating our traffic modelling to reflect the transportation system and land use changes which have taken place in York Region in recent years. Traffic impacts to the municipal road network (either positive or negative impacts) will be investigated and assessed as part of this EA Study.</p> <p>We understand that you have concerns about speed limit enforcement within your community. All existing roads within the Town of East Gwillimbury, with the exceptions of Hwy 404 and Hwy 48, are municipal roads under the jurisdiction of either the Town of East Gwillimbury or the Regional Municipality of York. The Ministry only has the jurisdiction to set speed limits on provincially-owned highways, such as Hwy 404. Municipalities are solely responsible to set appropriate speed limits on their road networks by passing local bylaws. Once municipal bylaws are in place, municipal police forces are legally empowered to issue Highway Traffic Act fines to any driver (including truck drivers) who are found to be in violation of the posted speed limit on a municipal road. However, police do have to balance their speed enforcement programs with other community policing needs, and we do appreciate that these competing demands on police resources can be very frustrating for residents.</p> <p>We have added you the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to</p>

	From: [REDACTED]				we need to understand that soon as possible and need to understand the details regarding the requirement and process involved.	<p>The Project Team acknowledges your concerns regarding potential business disruption due to the construction of the Bradford Bypass and they will be taken into consideration as the study progresses. The alignment of the 2002 EA approved highway and proposed interchanges can be viewed in Exhibit 5-2, plate 4 (Pg. 203) from the Route Planning Study and Environmental Assessment. The Exhibit is available on the Overview Page of the project website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study). Refinement of the highway alignment within the study limits and consideration of the highway's proximity to existing and approved developments is underway. The design alternatives will be presented at Public Information Centre (PIC) #1 where you can learn more about the proposed highway alignment in proximity to your property at [REDACTED] in [REDACTED]. The Project Team will also be consulting directly with impacted property owners throughout the study.</p> <p>We have added you to the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT089	To: Project Team From: [REDACTED]	New Stakeholder Comment Form	Concern regarding impact on navigation and customers	10/05/2020	Will affect nearby road traffic and navigation of the river for customers.	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team acknowledges your concerns related to navigation on the Holland River. The Preliminary design of the highway and bridge structures is currently underway. The design and future construction of the bridges will take into consideration navigability and maintaining access to the Holland River and Holland River East Branch. The Project Team is also actively engaging with Transport Canada to design the bridge structures to maintain compliance with the <i>Canadian Navigable Waters Act</i>. As part of our Notice of Study of Commencement, we asked stakeholders and members of the public to provide information about the types of vessels they use within the Holland River and Holland River East Branch to protect the existing navigable function of these waterways. The Project Team would appreciate receiving any additional information you may have regarding navigability.</p> <p>The design alternatives will be presented at Public Information Centre (PIC) #1 where you can learn more about the proposed highway and bridge designs.</p>

						<p>Members of the Project Team will be available at the PIC to discuss any specific concerns you may have.</p> <p>We have added you the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT090	To: Project Team From: [REDACTED]	New Stakeholder Comment Form	Concern regarding lack of interchange on Sideroad 10 and Sewer infrastructure	10/05/2020	<p>The bypass will be through Bradford and across three main arterial roads, SR 10, CR 4 and Artesian Parkway. Below are our initial comments on each main road</p> <ol style="list-style-type: none"> 1. SR 10 - Bradford official plan calls for an interchange from the bypass to SR 10. The initial bypass plan does not include an interchange at SR10. We wish this interchange included. 2. CR 4 - no comments 3. Artesian Parkway - eventually, Bradford will require additional services across the bypass. These will include a new sewer line and possibly water. We wish to engage on the best ways to get these across the highway, be that before construction, during construction or after. 	<p>Dear [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team acknowledges your comments on behalf of Town of Bradford West Gwillimbury regarding the three (3) main arterial roads you have highlighted. The Project Team has previously met with the Town of Bradford West Gwillimbury on October 13th, 2020. During discussions at this meeting, it was noted that the Town had an interest in provisions for an interchange at Sideroad 10. Requirements for future utility crossings at the Bradford Bypass to service the proposed development in the vicinity of Artesian Industrial Parkway were also noted and will be taken into consideration. Following on the request made at the October 13th meeting, would you be able to provide any data/information related to this proposed development and existing/proposed utility infrastructure and AT network plans?</p> <p>Our Team will continue to consult with the Town of Bradford West Gwillimbury as the Study progresses. We have added you the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT091	To: Project Team	Email	Concern regarding	10/5/2020	I am a resident of EG and I'm looking to understand the extend of the highway noise I will be subject to. I currently live [REDACTED] from highway 404 with no noise	<p>Hello [REDACTED]</p>

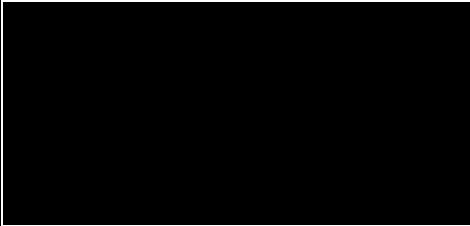

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
	From: [REDACTED]		increase in noise from the bypass.		barrier [REDACTED] I hear the highway pretty significantly. I'm concerned that this new highway is going to compound my noise issues. Can you please advise.	Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. You are listed on the Project Contact List and you will be notified through email of future PICs and updates for this study. A copy of the Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email If you have any additional questions, please reach out to the Project Team at your earliest convenience.
CT186	To: Project Team From: [REDACTED]	Email	Concern regarding increase in noise from the bypass.	12/02/2020	Hi There I am writing with regards to the 404 highway noise situation on Boag Rd. in East Gwillimbury. I've reviewed the noise report that was done 5 years ago where it was stated that a noise barrier would improve the noise situation on Boag rd (so clearly there was a noise issue) but was not economically feasible. I wanted to understand if any improvements would be made around the noise issue as part of the Bradford Bypass? Noise barriers were constructed at the time the 404 was extended for residents of Sharon, but not the residents of Queensville. What would constitute it being economically feasible in Sharon vs. Boag rd. (Queensville). It seems to be it would be a result clearly of the density vs. the actual noise levels as the noise in Sharon would not be any different than on Boag (at least now it is) as there are very few residential dwellings within 500 m from the highway where the current noise barriers are constructed. I understand the noise study is 5 years old and I'm sure the noise levels have changed since then to be even greater. I feel like it is warranted to do another noise study and if the noise study comes back conclusive that a barrier is required, that this should be included as part of the Bradford Bypass budget (for the northern part of the 404). Is there a possibility of another noise study being done? I feel like if there were more people on the road (ie. a subdivision decided to develop on Boag) there would be no question around installing a noise barrier but because we are rural, we don't get the same consideration as other members in society within the EG boundaries. Looking forward to your response [REDACTED]	See response above.
CT186	To: Project Team From: [REDACTED] Property Owner	Email	Concern regarding increase in noise from the bypass.	12/07/2020	Hi I am following up on this email. I have yet to receive a response. Trying to understand when sound barriers will be erected on Boag Rd. The traffic noise is so bad due to the fact that the government chose to build the highway above the road. The sound study done on 2015 clearly shows that we need sound barriers. It is the right thing to do for the residents but still nothing has been done. I am woken	*See response above

CT109	<p>To: Project Team</p> <p>From: [REDACTED]</p>	New Stakeholder Comment Form	Affect on OMAFRA Ministry Mandate	10/7/2020	<p>May impact ministry mandate specifically in regards to prime agricultural areas including specialty crop areas.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team acknowledges your comments on behalf of the Ministry of Agriculture, Food and Rural Affairs (OMAFRA). Your concerns regarding impacts to prime agricultural areas are noted.</p> <p>As part of this EA study, an Agricultural Impact Assessment will be completed by the Project Team, per the OMAFRA <i>Draft Agricultural Impact Assessment (AIA) Guidance Document</i> (March 2018). This assessment will include direct consultation with OMAFRA and local farming communities and identify potential impacts to farmlands and agricultural operations.</p> <p>We have added you as a direct contact for OMAFRA on the Project Contact List.</p>

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>Please advise us if there are additional or alternate contacts we should consult with through the design stages for the project.</p> <p>Going forward you will also be notified through email of future Public Information Centres (PICs) and updates for this study. The date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>If you have any additional questions or would like to schedule a meeting to discuss specific components of the project, please reach out to the Project Team at your earliest convenience. We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p>
CT110	To: Project Team From: [REDACTED]	Email	[REDACTED] Response: Highway 400 - Highway 404 link Bradford Bypass	10/08/2020	<p>Thank you for sending us notification regarding (Highway 400 - Highway 404 link Bradford Bypass). In our preliminary assessment, we have confirmed that [REDACTED] has existing high voltage Transmission facilities within your study area (see map attached). At this time we do not have sufficient information to comment on the potential resulting impacts that your project may have on our infrastructure. As such, we must stay informed as more information becomes available so that we can advise if any of the alternative solutions present actual conflicts with our assets, and if so; what resulting measures and costs could be incurred by the proponent. Note that this response does not constitute approval for your plans and is being sent to you as a courtesy to inform you that we must continue to be consulted on your project. In addition to the existing infrastructure mentioned above, the applicable transmission corridor may have provisions for future lines or already contain secondary land uses (e.g., pipelines, watermain, parking). Please take this into consideration in your planning.</p> <p>Also, we would like to bring to your attention that should (Highway 400 - Highway 404 link Bradford Bypass) result in a [REDACTED] station expansion or transmission line replacement and/or relocation, an Environmental Assessment (EA) will be required as described under the Class Environmental Assessment for Minor Transmission Facilities ([REDACTED] 2016). This EA process would require a minimum of 6 months for a Class EA Screening Process (or up to 18 months if a Full Class EA were to be required) to be completed. Associated costs will be allocated and recovered from proponents in accordance with the Transmission System Code. If triggered, [REDACTED] will rely on studies completed as part of the EA you are current undertaking.</p> <p>Consulting with [REDACTED] on such matters during your project's EA process is critical to avoiding conflicts where possible or, where not possible, to streamlining processes (e.g., ensuring study coverage of expansion/relocation areas within the current EA). Once in receipt of more specific project information regarding the potential for conflicts (e.g., siting, routing), [REDACTED] will be in a better position to communicate objections or not objections to alternatives proposed.</p>	<p>Hello,</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team confirms receipt of the provided map showing the location of [REDACTED] existing high voltage Transmission facilities within the Study Area.</p> <p>We also acknowledge and take into consideration the information you provided on potential provisions for future lines, the possibility of existing secondary land uses within [REDACTED] corridors, the potential requirement of an associated environmental assessment (if any), and the clearance requirements. If you are able, please kindly provide any available information for future lines or secondary land uses that you have at this time. At this time, the Project Team is reviewing the existing network that is currently in the field and are generating alternatives to avoid or mitigate impacts to [REDACTED] infrastructure.</p> <p>Our Team will continue to consult with [REDACTED] as the Study progresses. We have added this email addressed to the Project Contact List and you will be notified through email of future PICs and updates for this study. If you would like to notifications sent to a specific individual, please provide their contact information. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>If you have any additional questions or would like to schedule a meeting to discuss specific components of the project, please reach out to the Project Team at your earliest convenience. We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p>

					<p>If possible at this stage, please formally confirm that [REDACTED] infrastructure and associated rights-of-way will be completely avoided, or if not possible, allocate appropriate lead-time in your project schedule to collaboratively work through potential conflicts with [REDACTED] which ultimately could result in timelines identified above.</p> <p>In planning, note that developments should not reduce line clearances or limit access to our infrastructure at any time. Any construction activities must maintain the electrical clearance from the transmission line conductors as specified in the Ontario Health and Safety Act for the respective line voltage.</p> <p>Be advised that any changes to lot grading or drainage within, or in proximity to [REDACTED] transmission corridor lands must be controlled and directed away from the transmission corridor.</p> <p>Please note that the proponent will be held responsible for all costs associated with modifications or relocations of [REDACTED] infrastructure that result from your project, as well as any added costs that may be incurred due to increased efforts to maintain said infrastructure.</p> <p>We reiterate that this message does not constitute any form of approval for your project. [REDACTED] must be consulted during all stages of your project. Please ensure that all future communications about this and future project(s) are sent to us electronically to [REDACTED]</p> <p>Sent on behalf of [REDACTED]</p>

CT117	<p>To: Project Team</p> <p>From: [REDACTED]</p>	Email	<p>[REDACTED] Comments - Bradford Bypass -Concerns regarding lane closure and impact on the movement of goods</p>	10/8/2020	<p>[REDACTED] responses and comment regarding additional stakeholders who wish to be consulted.</p> <p>The east-west linkage will enable greater movement in terms of transport and logistics for existing industrial operations (i.e. support existing industrial operations within industrial/commercial corridor along Artesian Industrial Parkway and surrounding areas in Bradford West Gwillimbury) and also would benefit future employment uses such as the designated employment area in Queensville Sideroad and Woodbine Avenue in the Town of East Gwillimbury.</p> <p>During the construction phase scheduled to begin in 2023, however, there is the potential for goods movement to be impaired, particularly through lane closures and/or detours on Highway 400 as the interchange with the bypass is built. The supply chains of key manufacturing stakeholders could be impacted during this time. In particular, Honda of Canada Manufacturing, which relies on several suppliers in the area, has indicated that it would appreciate the identification of a contact for the project with whom it may discuss its concerns.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team acknowledges your comments on behalf of the Ministry of Economic Development, Job Creation and Trade (MEDJCT). We appreciate your support for the Bradford Bypass and its ability to support greater movement for people and goods throughout County of Simcoe and York Region.</p> <p>The Project Team is consulting with local municipalities to take into consideration transportation needs and master plans, in support of the traffic modelling studies and design refinement during preliminary design. We will continue to engage with local businesses, community representatives and residents within the project corridor to present the design and solicit feedback as part of the Class EA. The Project Team will also work with the municipalities and stakeholders to minimize/mitigate impacts to the travelling public during all stages of construction.</p> <p>Thank you for identifying Honda of Canada Manufacturing as a key stakeholder. We welcome their participation and feedback during the study. Their representative(s) can contact the Project Team via email (projectteam@bradfordbypass.ca), or by phone at 877-247-6036 at their earliest convenience. Comments may be addressed to [REDACTED], who is the overall MTO Project Manager for the Bradford Bypass EA Study.</p>

						<p>The Preliminary Design is anticipated to be completed in early 2023, allowing MTO to further refine the project through Detail Design with the possibility of advancing some components of the project for early construction. Construction of the Bradford Bypass is subject to funding, completion of detail design, and having permits, licenses, approvals, and authorizations in place prior to construction.</p> <p>Our Team will continue to consult with MEDJCT as the Study progresses and welcome opportunities to meet with representatives of MEDJCT to discuss the project. We have added you as a contact for MEDJCT to the Project Contact List to include you in receiving notification of future Public Information Centres (PICs) and updates for this study. The date of future PICs will also be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT118	To: Project Team From: [REDACTED]	New Stakeholder Comment Form	Potential impact on water and wastewater infrastructure	10/09/2020	The proposed by-pass will is to be constructed through York Region and as such may impact existing or future water and wastewater underground infrastructure.	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team acknowledges your comments regarding potential impacts of the Bradford Bypass on water and wastewater underground infrastructure within York Region. The Project Team will continue to consult with York Region to identify any potentially impacted existing or future utilities and take their locations into consideration as the design process progresses. If you are able, would you kindly provide any water/wastewater network plans (existing, future, abandoned) to the Project Team to reference during the study.</p> <p>We have added you the Project Contact List and you will be notified through email of future Public Information Centres (PICs) and updates for this study. Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
CT122	To: Project Team From: [REDACTED]	Email	Highway 400-404 link - Study comments-concerns regarding interchanges, usage of the Bypass	10/13/2020	<p>I am writing regarding the highway 400-404 study. First of all I want to make clear I believe the by-pass is needed. However, there are points which are unclear and based on the Ontario government one page notice do not make much common sense. I have called in the region to ask a few questions but never received a call back hence this email.</p> <p><u>1- Interchanges:</u> Interchange at Leslie Street and Bathurst do not make sense. As these may appear to make sense on paper, as part of the 'user group' they are impractical.</p> <p>Given that a major infrastructure project was completed on second concession, it has been widened and leads to a transportation hub, why isn't the interchange proposed at second concession? Do one interchange on the Second concession and remove Leslie and Bathurst street reducing environmental impact.</p> <p><u>2- User group usage:</u> Most people that will use this interchange need to head to Barrie, Bradford and the East Gwillimbury Go train.</p> <p>Bathurst street is a 60km residential zone with 2 lanes. Leslie street is too close to Hwy 404 to add an interchange. Heading south on Leslie it becomes a 50km zone with only 2 lanes, 1 Northbound and 1 Southbound (at least on Leslie street there are sidewalks)</p> <p>What will become of the residents along Bathurst street which currently due to the volume of traffic and lack of sidewalks can not leave their homes unless they are in a vehicle. It has become extremely unsafe and noisy.</p> <p>The Second concession currently has more undeveloped land and this gives more possibilities to address a higher volume of traffic by widening it now. There are less residences and usually set further into the property.</p> <p><u>3- Bathurst/Yonge/Go train/Toll Road street intersection:</u> This 3 way stop intersection would need to be reconfigured if an interchange at Bathurst is placed. More money to be considered. This is a highly congested and accident prone 3 way stop. It simply does not work. Creating an interchange on Bathurst street would increase traffic and generate a further traffic congestion. Currently the traffic starts to back up around 3:00pm all the way up towards Bathurst street and down Toll road.</p> <p>4- Has a user group analysis been done?</p> <p>I hope my comments are taken in a positive light and used to improve this proposal. In my work experience and as a resident in the area I do not see the user pattern being reflected in this proposal. Maybe there is something I am not seeing or is unknown to me, that can better explain the proposed strategy. Maybe there is more information you are willing to share.</p> <p>Yes, we should do environmental assessments but we should also do <u>resident life-quality impact assessments</u>.</p> <p>I hope my comments get through and not thrown to a spam inbox.</p> <p>Thank you for your time, [REDACTED]</p>	<p>For further information, visit the study website: www.bradfordbypass.ca</p> <p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study and we welcome your thoughtful and detailed questions on the project, design alternative evaluations and environmental assessment considerations.</p> <p>The Preliminary Design and Class Environmental Assessment of the Bradford Bypass, including the proposed interchanges at County Road 4, Bathurst Street and Leslie Street is based on the 2002 EA approved route planning study. Refinements to the design within the Study Area may be made during the study based on various factors including an updated traffic demand assessment, which is being prepared to confirm the feasibility of the proposed interchange locations. As part of that refinement, the project team is actively engaged with local municipalities and regions for consultations on the design. The results of these consultations will be incorporated into the Ministry's preliminary design study and presented to the public at key stages. At this time, MTO cannot make any commitments to an interchange at Second Concession without further analysis, advancing the study, and extensive consultation with impacted stakeholders.</p> <p>The intersection of Bathurst Street/Toll Road and Yonge Street are municipal roads under the jurisdiction of York Region. Any specific concerns about existing operational problems of the road or at the intersection would need to be discussed with York Region, as the MTO does not have jurisdiction over the intersection. In addition, future traffic impacts to the area's municipal roads resulting from the construction of the Bradford Bypass will be considered as part of the EA Study.</p> <p>This project is being undertaken as a Group "A" Environmental Assessment Study, which will evaluate the impact of the proposed transportation corridor based on various environmental factors. This includes, but is not limited to air quality, noise impacts, groundwater, surface water, fluvial geomorphology, landscaping, archaeology/built heritage features, terrestrial and fisheries impacts, and land use components. A full list of environmental discipline studies that will be carried out as part of this study can be found on the project website, under the 'Overview' tab (www.bradfordbypass.ca).</p> <p>Consultation is an on-going component of the study. The Project Team will meet with key stakeholders, agencies, and property owners throughout the study to inform them of the design and solicit their input. There will also be opportunities through two Public Information Centers (PIC) to consult with and engage the general public on the proposed design.</p> <p>The design alternatives will be presented at PIC #1 where you can learn more about the proposed design and interchanges for the proposed highway. You will be notified of future public meetings and updates for this study.</p>

					<p>Thank you for providing the [REDACTED] with the Notice of Commencement for the above-referenced project. [REDACTED] interest in this Environmental Assessment (EA) project relates to the following aspects of its mandate:</p> <ul style="list-style-type: none"> Conserving Ontario's cultural heritage, which includes: <ul style="list-style-type: none"> Archaeological resources, including land and marine; Built heritage resources, including bridges and monuments; and Cultural heritage landscapes; Protecting and stimulating tourism growth and investment, sport and recreational activities and facilities in Ontario. <p>The recommendations below are for a Group 'A' project under the MTO Class Environmental Assessment for Provincial Transportation Facilities (2000) (Class EA), as described in the notice of study commencement.</p> <p>We are aware that this project was subject to an Independent Environmental Assessment which was approved with conditions in 2002. We are also aware that the Ministry of the Environment, Conservation and Parks has proposed a regulation to exempt the Bradford Bypass Project from the requirements of the Environmental Assessment Act.</p> <p>Project Summary The proposal is to construct a new 16.2 km rural highway from Highway 400 between Lines 8 and 9 in Bradford-West Gwillimbury, across a small portion of King Township, and connecting to Highway 404 between Queensville Sideroad and Holborn Road in East Gwillimbury. There are proposed full and partial interchanges, and grade separated crossings at intersecting municipal roads and watercourses. The project will include the Preliminary Design for the replacement of the 9th Line structure on Highway 400.</p> <p>Identifying Cultural Heritage Resources Under the EA process, the proponent is required to determine a project's potential impact on cultural heritage resources. While some cultural heritage resources may have already been formally identified, others may be identified through screening and evaluation. Indigenous communities may have knowledge that can contribute to the identification of cultural heritage resources, and we suggest that any engagement with Indigenous communities includes a discussion about known or potential cultural heritage resources that are of value to these communities. Municipal Heritage Committees, historical societies and other local heritage organizations may also have knowledge that contributes to the identification of cultural heritage resources.</p> <p>Please note that the Standards and Guidelines for Conservation of Provincial Heritage Properties (S&G), prepared pursuant to Section 25.2 of the Ontario Heritage Act (OHA), came into effect on July 1, 2010. All Ontario government ministries and public bodies that are prescribed under Ontario Regulation 157/10</p>	<p>4 Archaeological Assessments will be completed as the Preliminary Design progresses, in consultation with [REDACTED]</p> <p>A Cultural Heritage Resource Assessment Report was prepared during a pre-work retainer assignment which identified a number of cultural resources. Further built/cultural heritage work may be undertaken as the Preliminary Design progresses. These studies will be carried out and submitted in accordance with provincial policies and guidelines in consultation with the [REDACTED]</p> <p>Our Team will advance the project in accordance with the MTO Class EA and continue to consult with [REDACTED] regarding Cultural & Built Heritage, Landscapes and Archaeological Resources as the Study progresses. The [REDACTED] will be retained on the Project Contact List and you will be notified through email of future Public Information Centres (PICs) and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
					<p>must comply with the S&Gs. They apply to property that is owned or controlled by the Crown in right of Ontario or by a prescribed public body.</p> <p>Archaeological Resources This project may impact archaeological resources. Our records show that a stage 1 archaeological assessment report covering the study area was submitted to MHSTCI on March 16, 2020 and is awaiting review, and a Project Information Form has been received for stage 2 archaeological assessment [REDACTED] of the study area.</p> <p>Built Heritage and Cultural Heritage Landscapes This project may impact built heritage resources and cultural heritage landscapes. Please confirm whether the study area has been screened for built heritage resources or cultural heritage landscapes and/or is the subject of a cultural heritage assessment. MTO's Environmental Guide for Built Heritage and Cultural Heritage Landscape (2007) and Ontario Heritage Bridge Guidelines for Provincially Owned Bridges and MHSTCI's Criteria for Evaluating Potential for Built Heritage Resources and Cultural Heritage Landscapes can assist you to determine if a Cultural Heritage Assessment Report (CHAR), Cultural Heritage Evaluation Report (CHER) and/or Heritage Impact Assessment (HIA) is needed.</p> <p>Environmental Assessment Reporting All technical cultural heritage studies and their recommendations are to be addressed and incorporated into EA projects. In addition to the archaeological assessments being prepared for the project, please let us know whether any CHAR, CHERs or HIA are being prepared, and provide them to MHSTCI before issuing a Notice of Completion or commencing any work on the site. If screening has identified no known or potential cultural heritage resources, or no impacts to these resources, please include the completed checklists and supporting documentation in the report or file.</p> <p>Protecting and Stimulating Tourism Growth and Investment Tourism supports regional and local economic development across the province through businesses and communities. Having an efficient road network in place to move not only residents, but visitors, supports the tourism industry. New transportation infrastructure can also negatively impact existing tourism businesses and any potential negative impacts identified should continue to be addressed through design and implementation.</p> <p>We note that the Bradford Bypass Study Area travels through Regional Tourism Organizations (RTO) 6 and 7 (http://www.mtc.gov.on.ca/en/regions/regions.shtml). Those RTOs can help to identify tourism operators that should be engaged as part of the economic development analysis.</p> <p>Thank you for consulting MHSTCI on this project and please continue to do so throughout the study and planning process. If you have any questions or require clarification, do not hesitate to contact me.</p>

CT136	To: Project Team From: [REDACTED]	Email	RE: 400/404 Link (Bradford By-Pass) [REDACTED]	10/16/2020	<p>I emailed as per below and haven't heard back.</p> <p>Regards</p> <p>[REDACTED]</p>	<p>Hi [REDACTED]</p> <p>The Bradford Bypass Study Team is currently in the process of preparing responses to all comments received after the official "Notice of Study Commencement" was issued at the end of September. This project is now undergoing a Group "A" MTO Class Environmental Assessment (EA) Study. The design of the highway is being further refined and evaluated at a greater level of detail than was done during the initial Route Planning EA Study completed back in the 1990s and approved in 2002. As the study has only just commenced, the Study Team does not have any updated drawings at the present time. Our first Public Information Centre (PIC) is scheduled for Spring 2021, at which time the Study Team will have more up-to-date drawings to share with stakeholders. However, the Study Team would be happy to answer any specific questions you may have about the project in the meantime.</p> <p>Thanks,</p> <p>[REDACTED] MTO Project Manager</p>
CT136 Con't	To: Project Team From: [REDACTED]	Email	RE: 400/404 Link (Bradford By-Pass) [REDACTED]	10/16/2020	<p>Thanks for the update and response.</p> <p>Yes, we may have some comments pertaining to the subject property. Certainly once we see updated designs we can provide pertinent comments.</p> <p>Our comments will focus on access and protecting our future development rights and functionality of site.</p> <p>Regards</p>	<p>Hi [REDACTED]</p> <p>Just to add, the general concept of the Bradford Bypass is not changing in the vicinity of County Road 4. MTO is still pursuing the design of a Controlled-Access Freeway with a full interchange at County Road 4 (Yonge Street) and a grade-separated crossing (but no interchange) at Artesian Industrial Parkway. The dimensions/geometry of the highway are being updated to meet current freeway design standards. The traffic modelling for the corridor is also being updated to confirm the number of lanes required on the new highway, given the significant changes in land use and population since the 1997 Route Planning EA Study.</p> <p>Thanks,</p>

CT136 Con't	To: Project Team From: [REDACTED]	Email	RE: 400/404 Link (Bradford By-Pass) [REDACTED]	10/21/2020	Re: Permission to Enter Letter- Landowners [REDACTED] As per the notice letter received dated September 24, 2020, I would like to understand whether the [REDACTED] intends to conduct Physical Fieldwork on the subject lands? Regards, [REDACTED]	[REDACTED] MTO Project Manager Hi [REDACTED] Earlier today, I spoke with [REDACTED] about the two properties his firm represents in the NW and SE quadrants on the County Road 4 Interchange. It was a positive and cooperative discussion. I took a few quick notes from today's call: <ul style="list-style-type: none">• He has requested a plan showing the areas we'd need to access for the PTE. The property fabric map with CAH/PINs on it might be the best bet, but we should confirm that none of this information is either confidential or proprietary. If we're not sure, a marked-up Google Map or something equivalent with the CAH shown would likely suffice. He seemed to be supportive of granting us PTE once he has this info.• A new development of single-detached homes is proposed in the SE quadrant, but the highway will severely limit potential access points to the property. His firm would like to know if MTO would be supportive of a right-in only (one way, inbound) access point from northbound County Road 4. I said it would be dependent on the design of the interchange and that nothing could be promised at this time, but that the request would be noted. This is a relatively "low risk" request in my opinion, provided that the access is positioned far enough back from the interchange and that the municipality was also on-board. I indicated that an outbound movement (a full RIRO) would not be something MTO could support.• Stage 2 work has been completed on parts of the property ([REDACTED]) with a recommendation for Stage 3 in certain areas in the vicinity of (but not within) the CAH limits. Apparently, the work was done in approximately 2010 by Archaeologist Rick Sutton. A pre-contact campsite was reportedly found on this property.• The contact at the firm below is doing the civil/municipal servicing layout for the site. I believe this is the same infrastructure that the municipality spoke of during the meeting earlier this week that might require a highway crossing.• They are very interested in seeing our SWM plans and highway design plates once they are available. If we can prepare that map for [REDACTED] relating to our PTE request, it sounds like we will make good headway in securing permission. Thanks, [REDACTED]

CT144	To: Project Team From: [REDACTED]	Email	RE: BBP PD/EA - Regional Municipal Meeting Invite	10/20/2020	[REDACTED] is requesting the slides from the meeting which was held.	Good Afternoon [REDACTED] Thank you for your recent email. Per your request, attached you will find a copy of the Joint Municipal Meeting held on October 20, 2020 for the Bradford Bypass Study. We trust this satisfies your request. If you require any additional information, please do not hesitate to reach out. Sincerely,
CT145	To: Project Team From: [REDACTED]	New Stakeholder Comment Form	New Stakeholder Comment Form Entry	10/20/2020	Would like to be added to the contact list.	Hello [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study. We have included you on our project contact list. Please find attached Notice of Study Commencement for the Bradford Bypass Preliminary Design and Class Environmental Study. You will be notified through email of future public information centres and updates for this study. For further information, visit the study website: www.bradfordbypass.ca Sincerely,
CT146	To: Project Team From: [REDACTED]	Email	Impacts of Bypass on Property	10/21/2020	Please notify us with all updates/changes. We'd like exact details of how our property will be affected by this by pass. [REDACTED]	Hi [REDACTED] Thank-you for taking the time to speak with me this morning about the Bradford Bypass Preliminary Design Study and EA Study. As discussed, the Project Team is still in the early design stages, but some initial assessments have been made with respect to your access to County Road 4 (Yonge Street). Although the proposed highway itself will run a fair distance to the south of your property, there will be some changes made to the profile and grade of County Road 4 in the vicinity of the shared driveway entrance to accommodate the future interchange between County Road 4 and the proposed Bradford Bypass. We are currently assessing the access point, with a vision of providing a safe entrance if it is technically feasible to do so. However, the location/grade of the existing entrance is expected to be impacted as a result of the interchange's construction. In the event that a safe access to your property cannot be maintained, then the ministry would be reaching out to you to begin negotiations to acquire your property. I am hoping that the Project Team will have some more definitive answers with respect to your questions on timing of the proposed work fairly soon – hopefully before our Public Information Centre targeted for Spring 2021. I can appreciate that you may have additional questions with respect to the project which may have come to mind after this morning's call. Please feel free to reach out to me directly if you have any further comments or questions – I would be happy to assist.

CT147	To: Project Team From: [REDACTED]	New Stakeholder Comment Form	Indicating Organization will be commenting	10/22/2020	We will be commenting	Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study. As you are already on the project contact list, you will continue to be notified through email of future public information centres and updates for this study. For further information, visit the study website: www.bradfordbypass.ca Sincerely,"
CT148	To: Project Team From: [REDACTED]	Email	RE: BBPPD/EA - Regional Municipal Meeting Invite	10/22/2020	To whom it may concern, Further to our meeting on Tuesday, would you kindly forward the presentation and video material? Thank you.	Good Afternoon [REDACTED] Thank you for your recent email. Per your request, attached you will find a copy of the Joint Municipal Meeting held on October 20, 2020 for the Bradford Bypass Study. We trust this satisfies your request. If you require any additional information, please do not hesitate to reach out.
CT148.1	To: Project Team From: [REDACTED]	Email	RE: BBPPD/EA - Regional Municipal Meeting Invite	11/06/2020	To whom it may concern, Would you kindly provide East Gwillimbury with the video fly-through of the highway alignment you showed us at the October 20th meeting? It is a great visualization tool that we would find valuable for internal discussions. Thank you. Regards,	*See below
CT148.2	To: Project Team From: [REDACTED]	Email	RE: BBPPD/EA - Regional Municipal Meeting Invite	11/26/2020	To whom it may concern, I am following up on my 2 questions related to this project being: <ul style="list-style-type: none">• [REDACTED] would like to receive a copy of the video fly-through that was shown at our meeting held on October 20th.• The Town would like to issue a letter to the project. Whom should this letter be addressed to and is their a mailing address over and above emailing it to projectteam@bradfordbypass.ca? Thank you. Regards,	*See below
CT148.3	To: Project Team	Email	RE: BBPPD/EA - Regional	12/10/2020	To whom it may concern,	Hi [REDACTED]

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
	From: [REDACTED]		Municipal Meeting Invite		<p>I have been trying to ask the following questions, which have been sent to projectteam@bradfordbypass.ca on multiple occasions and have had no response. Would any of you be able to answer them or forward them to the correct person?</p> <ul style="list-style-type: none"> • [REDACTED] would like to receive a copy of the video fly-through that was shown at our meeting held on October 20th. • The Town would like to issue a letter to the project. Whom should this letter be addressed to and what is the mailing address and email address for that individual? <p>Thank you.</p>	<p>Thank-you for your email! My apologies for the delayed response. Any official letters or other correspondence from the Town of East Gwillimbury can be addressed directly to me, as the MTO Project Manager. I will then circulate correspondence internally to the balance of the Project Team, as required. My normal work mailing address is contained in my email signature below, but an emailed copy of any correspondence is essential at the moment, as I am working remotely due to COVID-19.</p> <p>The “fly through” video run during our meeting was prepared very early in the design process, just to give stakeholders a rough idea of what the conceptual highway might look like. It was not to scale or intended to be circulated externally. As it happens, the video we presented is now out-of-date, due to several key modifications being considered as part of our Preliminary Design. The Project Team is in the process of preparing several design alternatives for the highway that will be shown to the public and other interested stakeholders at our first Public Information Centre (PIC), scheduled for April 2021. These design alternatives will be shown to municipal stakeholders in advance of this PIC. However, in the meantime, I would be happy to address any specific comments or questions the Town may have with respect to the highway’s proposed design.</p> <p>Sincerely, [REDACTED] MTO Project Manager <i>[Response provided December 23, 2020]</i></p>
CT148.3A	To: [REDACTED] Cc: Project Team	Email	Response to MTO email	12/24/2020	<p>Thank you [REDACTED]</p> <p>I wish you and your project team a happy and healthy holiday and new year.</p> <p>Regards,</p>	<p>No Further response [TRACKING ONLY]</p>
CT149	To: Project Team From: [REDACTED]	Email	Presentation from Municipal Meeting	10/23/2020	<p>Hello,</p> <p>Just wondering if the presentation from Tuesday’s meeting is available for sharing yet.</p> <p>Thanks</p>	<p>Good Afternoon [REDACTED]</p> <p>Thank you for your recent email. Per your request, attached you will find a copy of the Joint Municipal Meeting held on October 20, 2020 for the Bradford Bypass Study. We trust this satisfies your request.</p> <p>If you require any additional information, please do not hesitate to reach out.</p> <p>Sincerely,</p>
CT150	To: Project Team From: [REDACTED]	Phone	Calling regarding property shared with husband	10/26/2020	<p>Hello this is [REDACTED] I got a letter from the project team here. It says: [REDACTED] Maybe you can look it up. I do not have a computer. I would like updates if you could mail for me. I know I am late but I had lots of appointments. Please send me mail for what is going on. Please call me at: [REDACTED] I would appreciate a call, if you leave me a message I will get back to you.</p>	<p>Followed up by phone with [REDACTED]</p> <p>PTE pending.</p>

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
					I think that it is it, my address [REDACTED] [REDACTED] am sure you have it on your computer. Okay have a nice day thank you!	
CT151	To: Project Team From: [REDACTED]	Email	Media inquiry	10/26/2020	Hello – I was hoping to interview someone about the study that's being conducted for the Bradford Bypass for an article for simcoe.com and yorkregion.com. Let me know if that's possible. Thank you, [REDACTED]	<p>1. What is the timeline for the Environmental Assessment?</p> <p>The EA is expected to take approximately two years to complete. It is estimated that the study will conclude by the end of 2022.</p> <p>2. How much will this process cost?</p> <p>The EA Study is a statutory requirement. The ministry isn't able to disclose the cost of the process in order to ensure the integrity of our procurement process, however, we can say that a Preliminary Design/Environmental Assessment for a project of this size would typically be expected to cost between \$5.5-\$8.5 million. The cost of the process is dependent on the length of the highway as well as it's complexity (number of interchanges, number of bridges, and other environmental and engineering challenges).</p> <p>3. What is the next step after the Environmental Assessment?</p> <p>Detailed Design (the final highway design phase) is expected to begin after the EA Study is completed.</p> <p>4. What expected completion time for the Bradford Bypass?</p> <p>It is premature to discuss anything related to the construction schedule as construction funding for this project is yet to be approved. Construction start is dependent on the completion of the current EA Study and availability of provincial funding.</p> <p>5. How much will the Bradford Bypass cost in total?</p> <p>A cost estimate has not yet been determined. Following Detailed Design, the project will move into procurement and then construction. To ensure competitive tender bids, the ministry does not publish its project estimates. In order to obtain the best value bid for the project, we only release costs once the procurement process is complete.</p>
CT152	To: Project Team From: [REDACTED]	Email	Bradford Bypass Consultation	10/26/2020	Good afternoon, My organization, the Greenbelt Foundation, is interested in receiving updates on the Bradford Bypass study and information about opportunities for consultation. Please add me to your mailing list. Additionally, I just wanted to confirm what is the current stage for the study: is it that the bypass has been approved, and this consultation is to confirm the exact design/placement of the highway? Or, is your project team consulting on whether to construct the bypass at all?	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>We are currently in the Preliminary Design phase of the MTO Class EA process. An Environmental Assessment (EA) and Route Planning Study was completed in 1997 during which, several different routes were proposed and the current Bradford Bypass highway corridor was selected as the preferred option following evaluation</p>

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
					Thanks very much for your time.	<p>of technical and environmental factors. This route may be refined within the study limits</p> <p>The alignment of the 2002 EA approved highway and proposed interchanges can be viewed in Exhibit 5-2, plate 2-10 (Pg. 200-209, 1:10,000 scale) from the Route Planning Study and Environmental Assessment. The Exhibit is available on the Overview Page of the project website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study). Refinement of the highway alignment within the study limits and consideration of the highway's proximity to existing and approved developments is underway. The design alternatives will be presented at Public Information Centre (PIC) #1 where you can learn more about the proposed highway alignment.</p> <p>We have added you the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT153	To: Project Team From: [REDACTED]	Email	Inquiry on location of the bypass	10/26/2020	<p>Good afternoon</p> <p>I wanted to inquire if you had any information as to where the bypass will be going. We are looking at purchasing a home in the subdivision off the [REDACTED]. Particularly [REDACTED] I wanted to know approx how close the bypass would be.</p> <p>Thank you! [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The alignment of the 2002 EA approved highway and proposed interchanges can be viewed in Exhibit 5-2, plate 4 (Pg. 203) from the Route Planning Study and Environmental Assessment. The Exhibit is available on the Overview Page of the project website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study). Refinement of the highway alignment within the study limits and consideration of the highway's proximity to existing and approved developments is underway. The design alternatives will be presented at Public Information Centre (PIC) #1 where you can learn more about the proposed highway alignment in the area of Chelsea Crescent, west of Yonge Street.</p> <p>We have added you the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p>

CT153 Cont	To: Project Team From: [REDACTED]	Phone	Inquiry on location of the bypass	10/26/2020	<p>Hi there, my name is [REDACTED] and I'm calling cuz I wanted some information on the location of the Rockford bypass. We were looking at purchasing a home that is right off the [REDACTED] highway off of [REDACTED] and it does back onto a [REDACTED] [REDACTED]. But from what I can see from your plans and the bypass looks like it's going to go right behind there. I just wanted to know like Rusty if you knew how many feet from there it would be and if you could give me a call back. My number is [REDACTED]. Thank you.</p>	*Refer to CT153 for response
CT154	To: Project Team From: [REDACTED]	Email	Issue with Interchanges- Potential traffic issues	10/26/2020	<p>We live at [REDACTED] in a [REDACTED] [REDACTED] built in [REDACTED] and added to in 1855. Your proposed bypass Will be on the south side of our hedge.</p> <p>When [REDACTED] was resurfaced several years ago, our rubble foundation was inspected and it was determined that the vibration caused by the method proposed in resurfacing, would be damaging to our foundation as well as our neighbour' s house across the street. They didn't use vibration.</p> <p>Please consider this when you plan the construction.</p> <p>Apart from the fact that this new highway Will be farther north than would seem practical for maximum usage, there is already a roughed in interchange at Doane Rd and it seems financially irresponsible to add another interchange only a mile north of the existing Queensville Sdrd interchange for the proposed location.</p> <p>Even Green Lane makes more sense for guiding drivers from 404 to 400. It's already four lanes and on a direct route to 400.</p> <p>Drivers living in the new subdivisions in Sharon and Queensville Will use Leslie through those villages, to reach the bypass to get to 400. This will cause traffic chaos with public school zones on Leslie.</p> <p>This plan also destroys active farmland on both sides of Leslie between Queensville cemetery and Boag Rd.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team acknowledges your comments regarding vibration during construction. As part of this EA Study, a Noise and Vibration Impact Assessment will be conducted to identify and mitigation any potential increases in noise or vibrations caused by the proposed highway construction or operation.</p> <p>We acknowledge the information you have provided regarding the location of the proposed Bradford Bypass. An Environmental Assessment (EA) and Route Planning Study was completed in 1997 during which the preferred route for the Bradford Bypass was selected. Several different routes were proposed, and the current Bradford Bypass corridor was selected as the preferred option following evaluation of technical and environmental factors. Approval from the Minister of Environment was received in 2002.</p> <p>The study and exhibits, including Exhibit 5-2, plate 10 (Pg. 209), are available on the Overview Page of the project website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study). This EA-Approved highway corridor was designated by the province as a Controlled Access Highway many years ago, based on the outcome of the Route Planning EA Study. Therefore, it is not the intention or scope of this Preliminary Design EA Study to assess or explore alternative routes for the Bradford Bypass, as this work was undertaken previously. However, some minor refinement of the highway alignment within the study limits is underway, in order to mitigate potential impacts to stakeholders. Environmental and engineering assessment studies including (but not limited to), noise, air quality, agricultural impacts, snowdrift, land use and traffic modelling will all be updated and considered in the development of design alternatives for the highway. The Project Team is actively engaged with local municipalities and regional governments to consult on the design, where the results of these consultations will be incorporated into the Ministry's preliminary design study and presented to the public at key stages.</p>

CT155	To: Project Team From: [REDACTED]	New Stakeholder Comment Form	Issue with Leslie St interchange	10/29/2020	<p>Leslie St. is too close to the termination point at the 404 for any type of interchange. If anything it would make more sense for an interchange, either full or partial, at 2nd Concession. This would allow for easier access to the many developments slated for 2nd Con. and not bunch all the interchanges together. Currently there is a 404 interchange on Queensville Side Rd. between Leslie and Woodbine which would allow any residents on Leslie easy access to the bypass.</p>	<p>Hello [REDACTED]</p> <p>The Project Team acknowledges your comments regarding the proposed Leslie Street interchange, and they will be taken into consideration as the study progresses. Refinement of the highway alignment and interchanges within the study limits and consideration of the highway's proximity to existing and approved developments is underway. The alignment of the 2002 EA approved highway and proposed interchanges can be viewed in Exhibit 5-2, plates 2-10 (Pg. 201-209) from the Route Planning Study and Environmental Assessment. The Exhibit is available on the Overview Page of the project website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study). Refinement of the highway alignment within the study limits and consideration of the highway's proximity to existing and approved developments is underway.</p> <p>The design alternatives will be presented at Public Information Centre (PIC) #1 where you can learn more about the proposed highway alignment and interchange locations. Project Team members will also be in attendance to discuss any specific concerns you may have.</p> <p>We have added you the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. 					Please provide us with some possible dates. Best regards, [REDACTED]	Thanks, [REDACTED] MTO Project Manager
CT 180 Con't	To: [REDACTED] Huron Wendat From: [REDACTED] [REDACTED]	n/a	Meeting Request with the Project Team	n/a	n/a	Hi [REDACTED] [REDACTED] forwarded your November 4th email, requesting a meeting with the Bradford Bypass project team. I have done some calendar coordination and found three possible dates that work on our end; 1) November 27 2:00-4:00; 2) December 2, 3:00-5:00 and 3) December 3, 2:00-4:00 Please let me know which of these work for your attendees. Once I have your response I will send out a Teams invitation. Thanks! Talk soon, [REDACTED]
CT 180 Con't	To: Project Team From: [REDACTED] [REDACTED]	Email	Meeting Request with the Project Team	11/10/2020	Good afternoon and thanks for following-up [REDACTED] December 02 at 3:00 is fine. Stay safe, [REDACTED]	Meeting was held. Response closed.
CT148 Con't	To: Project Team From: [REDACTED] [REDACTED]	Email	RE: BBPPD/EA - Regional Municipal Meeting Invite	11/20/2020	To whom it may concern, I am following up on my request to receive a copy of the video fly-through that was shown at our meeting held on October 20th. Additionally, the Town would like to issue a letter to the project. Whom should this letter be addressed to and is their a mailing address over and above emailing it to projectteam@bradfordbypass.ca? Your prompt response is appreciated. Regards,	Hi [REDACTED] Thank-you for your email! My apologies for the delayed response. Any official letters or other correspondence from the [REDACTED] can be addressed directly to me, as the MTO Project Manager. I will then circulate correspondence internally to the balance of the Project Team, as required. My normal work mailing address is contained in my email signature below, but an emailed copy of any correspondence is essential at the moment, as I am working remotely due to COVID-19. The "fly through" video run during our meeting was prepared very early in the design process, just to give stakeholders a rough idea of what the conceptual highway might look like. It was not to scale or intended to be circulated externally. As it happens, the video we presented is now out-of-date, due to several key modifications being considered as part of our Preliminary Design.

						The Project Team is in the process of preparing several design alternatives for the highway that will be shown to the public and other interested stakeholders at our first Public Information Centre (PIC), scheduled for April 2021. These design alternatives will be shown to municipal stakeholders in advance of this PIC. However, in the meantime, I would be happy to address any specific comments or questions the Town may have with respect to the highway's proposed design.
CT181	To: Project Team From: [REDACTED]	New Stakeholder Contact Form	New Stakeholder Contact Form Entry	11/25/2020	Form no comments.	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>We have included you on our project contact list. CT185	To: [REDACTED] -Town From: [REDACTED]	Email	New Contact	11/30/2020	<p>Hi [REDACTED]</p> <p>Yes, the Bradford Bypass Project Team did have a brief introductory meeting with [REDACTED] several weeks ago, on October 13th. The meeting was really just to update everyone on the recently-commenced Preliminary Design EA Study, which will build upon the previous Route Planning EA Study work completed by MTO back in 1997. Plans for the proposed highway will be advanced to a much greater level of detail than the previous design work of the 1990s. Although the alignment of the Bradford Bypass will be optimized to meet current MTO highway design standards, it will not deviate appreciably from the previously-identified and EA-approved route. In other words, it is not MTO's intention to revisit the general route of the highway as part of this current EA Study. However, some notable changes from the 1997 EA Study's design will affect the freeway-to-freeway interchanges at either end of the Bradford Bypass (at Hwy 400 and Hwy 404) to permit the construction of a "fully-directional" interchange.</p> <p>According to our notes, the following staff members attended from [REDACTED]. I'm hoping that these were the correct attendees to have at the table, but we can certainly</p>	<p>Hi [REDACTED]</p> <p><i>As discussed earlier today, I was contacted via correspondence received though [REDACTED] who is [REDACTED]. [REDACTED] sounds like he is potentially a key decision-maker – he's asked us to invite him to any future meetings with [REDACTED]. His contact info is as follows:</i></p> <p>[REDACTED]</p> <p>Unfortunately, I've had to copy-and-paste my correspondence with [REDACTED] below. The email thread which triggered this discussion contained confidential matters that involve MTO and BWG, but on a separate issue not related to the EA Study. Just so you have it for your internal records, this is what I wrote back to him, along with his follow-up reply in blue italics shown below that. My email was sent Nov 24th, and the reply was received today (Nov 26th).</p> <p>Thanks, [REDACTED]</p>

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
					<p>have a separate meeting or informal call if there were any others who require a further update or information about the EA Study:</p> <p>[REDACTED]</p> <p>At this point, the Study Team is still collecting data, evaluating field conditions/environmental surveys and updating the traffic modelling. Our first PIC will be held in April 2021, by which time the Study Team will have some design alternatives to present to various stakeholders, including BWG. Prior to that time, the Study Team would like to discuss BWG's plans for the development hub surrounding the Hwy 400/88 Interchange (specifically, any proposed changes/provisions in the road network), so that we can assess how the Hwy 400/Bradford Bypass can interact with this surface street network. It is MTO's intention to grade-separate all existing crossing roads along the Bradford Bypass (i.e. no existing through roads will be closed off). A full interchange is proposed at County Road 4, as per the previous EA Study approval.</p> <p>Please feel free to contact me if you need any further info about the EA Study.</p> <p>Thanks,</p> <p>[REDACTED]</p>	
CT128 Con't	<p>To: [REDACTED]</p> <p>From: The Project Team</p>	Email	Phone Call Surrounding PTE	11/04/2020		<p>Hi [REDACTED]</p> <p>We've looked into the property ownership details. Do you have time at 1:30pm on Thursday November 5, 2020 for a call to go through the details that we have?</p> <p>Thank you,</p> <p>[REDACTED]</p>

CT186	To: Project Team From: [REDACTED]	Email	Installing a sound barrier	12/02/2020	<p>Hi There</p> <p>I am writing with regards to the 404 highway noise situation on Boag Rd. in East Gwillimbury. I've reviewed the noise report that was done 5 years ago where it was stated that a noise barrier would improve the noise situation on Boag rd (so clearly there was a noise issue) but was not economically feasible. I wanted to understand if any improvements would be made around the noise issue as part of the Bradford Bypass? Noise barriers were constructed at the time the 404 was extended for residents of Sharon, but not the residents of Queensville. What would constitute it being economically feasible in Sharon vs. Boag rd. (Queensville). It seems to be it would be a result clearly of the density vs. the actual noise levels as the noise in Sharon would not be any different than on Boag (at least now it is) as there are very few residential dwellings within 500 m from the highway where the current noise barriers are constructed.</p> <p>I understand the noise study is 5 years old and I'm sure the noise levels have changed since then to be even greater. I feel like it is warranted to do another noise study and if the noise study comes back conclusive that a barrier is required, that this should be included as part of the Bradford Bypass budget (for the northern part of the 404). Is there a possibility of another noise study being done? I feel like if there were more people on the road (ie. a subdivision decided to develop on Boag) there would be no question around installing a noise barrier but because we are rural, we don't get the same consideration as other members in society within the EG boundaries.</p> <p>Looking forward to your response</p> <p>[REDACTED]</p>	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: January 15, 2021 4:02 PM To: [REDACTED] Subject: RE: Sound Barrier - Boag Rd</p> <p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team acknowledges your concerns regarding potential noise impacts related to the Bradford Bypass. We understand that the Minister's Office recently sent a reply regarding your concerns as well. As part of this EA study, a Noise Assessment will be conducted to identify any potential impacts to sensitive noise receptors and recommend appropriate mitigation measures. The findings of this study will be presented at future Public Information Centres. However, please note that alignment of the 2002 EA approved highway terminates at Highway 404 south of Holborn Road. The EA approved alignment and proposed interchanges can be viewed in Exhibit S-2, plate 10 (Pg. 209) from the Route Planning Study and Environmental Assessment. The Exhibit is available on the Overview Page of the project website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study).</p> <p>We have added you to the Project Contact List and you will be notified through email of future PICs and updates for this study. A copy of the Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Airmail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p> <p>Sincerely,</p>

					<p>We are planning to begin to develop the site in 5 to 7 years into “destination” into Class A suburban business park for corporate head offices and regional offices (at the front) and selected light industrial tenants (at the back).</p> <p>We are very interested in participating in the process regarding the design of the Bypass and have engaged planner [REDACTED] as part of our project team.</p> <p>May I ask for your guidance and assistance, as we would like to work closely with your department before the Bypass is drawn and frozen.</p> <p>Best regards, [REDACTED] [REDACTED] [REDACTED] [REDACTED] [REDACTED]</p>	<p>The Bradford Bypass route was approved back in 2002 as part of an earlier Route Planning EA process carried out by MTO in the 1990s. The ministry subsequently designated the Bradford Bypass route as a Controlled-Access Highway in 2004. The Preliminary Design and Class EA Study began earlier this fall, with official Notices of Study Commencement issued on September 24th. The Project Team is currently developing design alternatives for the new interchange at Hwy 400 and the proposed Bradford Bypass, along with other elements of the highway’s design. It is our intention to present these design alternatives at our first PIC in Spring 2021. In the meantime, if you have any specific comments about the highway proposal or have any preliminary drawings of the planned use of your property, the Project Team would welcome your feedback.</p> <p>Sincerely, [REDACTED] MTO Project Manager</p>
CT192	To: Project Team From: [REDACTED] [REDACTED] [REDACTED]	Email	Lands within and adjacent the preferred route	12/17/2020	<p>Are lands located within and adjacent the preferred route currently restricted from any form of redevelopment? If so, at what point will these lands be released for redevelopment – following the completion of the preliminary design in 2023? What is the width of the corridor being protected for the future highway?</p> <p>Thank you</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>The alignment of the 2002 EA approved highway and proposed interchanges can be viewed in Exhibit 5-2, plates 2 - 10 (Pg. 201 - 209) from the Route Planning Study and Environmental Assessment. The Exhibit is available on the Overview Page of the project website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study). Refinement of the highway alignment within the study limits and consideration of the highway’s proximity to existing and approved developments is underway. The design alternatives will be presented at Public Information Centre (PIC) #1 where you can learn more about the proposed highway alignment, right-of-way and interchanges.</p> <p>As part of this Preliminary Design Class EA Study, the Project Team is building upon the design work conducted back in the 1990s to reflect present-day</p>

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>highway design standards and traffic requirements. Today, provincial freeways are typically designed with a basic right-of-way width of 110 m, with additional allowances made in some areas due to grading requirements. Therefore, the exact width of the corridor at any given point is determined by the surrounding topography of the area.</p> <p>[As a result of the 2002 EA Approval of the Bradford Bypass corridor, the Ministry prepared a Controlled-Access Highway (CAH) designation plan on the lands initially deemed to be required for the future construction of the Bradford Bypass. This CAH was designated by an Order-in-Council in May 2004. Since that time, the ministry has certain rights and obligations with respect to these CAH-designated lands, as prescribed under the provisions of the <i>Public Transportation and Highway Improvement Act</i>. Permits are required from MTO's Corridor Management Section for various activities within and adjacent to the proposed highway corridor. These permit requirements have been in effect since 2004 and shall remain in effect even after the highway is constructed. Any general questions with respect to permitting can be directed to MTO's Corridor Management Section, although the Project Team would be happy to respond to any specific questions you may have about the highway itself as it pertains to your properties.</p> <p>We have added you to the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT193	To: Project Team From: [REDACTED]	Email	Scheduling of the Bypass	12/19/2020	Good morning just curious on the scheduling on this bypass when are we expected to see this construction actually begin or we still years away from that...excited to see this get going	<p>Hello [REDACTED]</p> <p>Thank you for your interest and excitement in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>The project is currently undergoing the Preliminary Design process to refine the design elements approved in 2002 by examining design alternatives within the Study Area, considering environmental constraints and engaging the public</p>

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>for input. The Preliminary Design is anticipated to be completed in early 2023, allowing MTO to further refine the project through Detail Design with the possibility of advancing some components of the project for early construction. Construction of the Bradford Bypass is subject to funding, completion of detail design, and having permits, licenses, approvals, and authorizations in place prior to construction.</p> <p>The design alternatives being developed under the current Preliminary Design and Class EA Study will be presented at Public Information Centre (PIC) #1 where you can learn more about the proposed highway alignment, interchanges and structure designs.</p> <p>We have added you the Project Contact List and you will be notified through email of future PICs and updates for this study. January 2021 - Consultation Record

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
CT079 con't	To: Project Team From: [REDACTED]	Email	Concerns regarding increase traffic within [REDACTED]	01/06/2021	<p>*Comment from thread see OCT table for full thread.</p> <p>Happy New Year</p> <p>Have you considered that if there is an serious/fatal accidents on Yonge Street (hwy 11), traffic are bogged for hours with little or no way around it. Example Yonge street and Bathurst street just south of Bradford, cars cannot go anywhere when a vehicular fatality happens as there is no other arterial roads in the area.</p> <p>Since the Highway 404 extension north to Ravenshoe Road, there is considerably less traffic on Woodbine Avenue, but Leslie Street is more heavily travelled due to the subdivisions north of Ravenshoe Road who travel Leslie Street to go to Queensville side Road to get to Highway 400.</p> <p>My uncle is a farmer who has lived in the area for nearly 60 years and can see and hear the traffic noise which starts before 5 am.</p> <p>I still think that you need to consider the impact of having serious accidents and providing alternative routes to which currently are none.</p> <p>Thank you very much [REDACTED] Sent from my iPad</p>	<p>Hello [REDACTED]</p> <p>Thank you for your response. We acknowledge your additional comments regarding the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>The Project Team acknowledges your concerns regarding traffic collisions and noise impacts related to the Bradford Bypass. One of the transportation problems identified in this area is the lack of road continuity, which leaves the area's transportation network vulnerable to disruption due to various incidents (e.g. vehicular collisions or other emergencies, construction, poor weather). As part of this Study, the Project Team is developing a preliminary design for the proposed Bradford Bypass which factors in many elements including operations, geometrics, and safety features to help move people and goods safely, efficiently and sustainably. It is anticipated that the provision of this new transportation link will help to address some of these vulnerabilities in the area's existing transportation network.</p> <p>A Noise Assessment will be also conducted to identify any potential impacts to sensitive receptors and recommend appropriate mitigation measures. The findings of these and other studies will be presented at future Public Information Centres (PICs).</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional comments or questions, please feel free to reach out to the Project Team at your convenience.</p>
CT084 Con't	To: Project Team From: [REDACTED]	Email	Thank you	01/06/2021	<p>*Comment from thread see OCT table for full thread.</p> <p>Thank you for contacting us. flybridge Yachts General require a minimum height of 8 meters.</p>	<p>Hello [REDACTED]</p> <p>The Project Team acknowledges the information you have provided regarding vessel sizes to be considered during development of designs for bridge crossings of the Holland River and Holland River East Branch.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional comments or questions, please feel free to reach out to the Project Team at your convenience.</p>

						<ul style="list-style-type: none"> Worried about resale and asked for guidance/direction.; advised that we cannot provide recommendations or direction on his next steps. Additional information will be available to him about the project through the EA process that may aid him in his decision-making process Discussed general details about route alignment because he wondered if there was a route considered that "won't affect any houses", given the limit space through this area. Advised that alignment refinements at select locations are being reviewed and it is not known at this stage the full extent of potential impacts to properties throughout the corridor. He was provided with information on future consultation and engagement with the public and property owners through the study Provided with an overview of design process and advised that the exact timing for construction of the highway is not known as this depends on development of the design, approvals and funding to proceed. Acknowledged that his comments would be part of the public record for the project and comments received are factored into the study and design going forward. (personal information excluded from public record). Advised of the targeted timing for the PIC and that the format is being developed within a virtual platform. <p>Call log retained on-file for this contact.</p>

CT199	To: Project Team From: [REDACTED]	Email	Reconsider building the BPP for environmental reasons	01/18/2021	<p>Dear Mr. [REDACTED]</p> <p>I recently attended a virtual Environmental Defence online presentation. During this meeting I became aware of the Bradford bypass plan which will destroy precious farmland and natural areas. It has become increasingly alarming how our governments, both provincial and federal have not thought far enough ahead to realize we need to save every inch of farmland in Canada. We are too dependent on imported food already. Canada has the best soil and farming environment in the world, especially in the Holland Marsh, and at an alarming rate it is being destroyed. We have already felt what it's like to be dependent on other countries for PPE during the start of the Covid crisis. What are we going to do when we are dependent on other countries to feed everyone in Canada? Please reconsider the decision to build this highway.</p> <p>Regards, [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>The Project Team acknowledges your concerns regarding the construction of the Bradford Bypass and potential impacts on the environment.</p> <p>We are currently in the early stages of this Preliminary Design and Class EA Study. In preparation for Preliminary Design, various environmental studies are being undertaken to identify environmental concerns, commitments and recommend mitigation measures. An Agricultural Impact Assessment will be completed by the Project Team, per the OMAFRA <i>Draft Agricultural Impact Assessment (AIA) Guidance Document</i> (March 2018). This assessment will include direct consultation with OMAFRA and local farming communities and identify potential impacts to farmlands and agricultural operations.</p> <p>A full list of environmental studies that will be conducted during this EA is provided on the project website (https://www.bradfordbypass.ca/overview/). The findings of these assessments will be discussed at future Public Information Centres (PICs) and documented in reports which will be available for review later in the Study.</p> <p>We have added you to the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. CT170 Cont	To: Project Team From: [REDACTED]	Email	Response to 2948- Requesting more information	01/29/2021	<p>*Comment from thread beginning in October Thank you for your email. Is there someone who can tell me how my property will be affected by the highway please? I can't tell from [REDACTED] where my house sits exactly since I don't know the exact gradient of my homes location. Will my I be expropriated, or will my property not be affected? I haven't been able to get a straight answer from anyone regarding this. I received the notice asking permission for the environmental study to be on my property which I'm assuming means I'm affected in some way, which means I would like someone to give me a clear answer. There is no set date for this public information centre which is where I'm supposed to be able to get answers, however; people have already been on my property without giving me any indication of how my property will be involved. I've sent multiple emails to your office, to the town of Bradford, and to [REDACTED] office, all of which have provided no clear answer. Thank you for your help, [REDACTED]</p>	<p>Hi [REDACTED]</p> <p>Thank-you for taking the time to speak with me this morning about the Bradford Bypass Preliminary Design Study and EA Study. As discussed, the Project Team is still in the early design stages, but some initial assessments have been made with respect to your access to County Road 4 (Yonge Street). Although the proposed highway itself will run a fair distance to the south of your property, there will be some changes made to the profile and grade of County Road 4 in the vicinity of the shared driveway entrance to accommodate the future interchange between County Road 4 and the proposed Bradford Bypass. We are currently assessing the access point, with a vision of providing a safe entrance if it is technically feasible to do so. However, the location/grade of the existing entrance is expected to be impacted as a result of the interchange's construction. In the event that a safe access to your property cannot be maintained, then the ministry would be reaching out to you to begin negotiations to acquire your property. I am hoping that the Project Team will have some more definitive answers with respect to your questions on timing of the proposed work fairly soon – hopefully before our Public Information Centre targeted for Spring 2021.</p> <p>I can appreciate that you may have additional questions with respect to the project which may have come to mind after this morning's call. Please feel free to reach out to me directly if you have any further comments or questions – I would be happy to assist.</p> <p>Sincerely, [REDACTED] Project Manager</p>
CT201	To: Project Team From: [REDACTED]	Email	Question regarding what will happen to boats in the marina once the bypass is built.	01/29/2021	<p>Hello,</p> <p>I live on [REDACTED]. I am assuming that this marina will be expropriated due to the fact that the bridge spanning the river will be too low for the marina boats to navigate under the new bridge. The marina would then go out of business. My assumption is based on my prediction that the cost of high enough bridge to let boats navigate under the bridge would far out weigh the cost of expropriating the two marinas located south of the proposed bypass. Is this correct?</p> <p>If the marina next to me is to be expropriated, what would the land be used for? Would the docks and slips be dismantled?</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team acknowledges your concerns related to the South Bay Harbour Marina and navigation on the Holland River. Preliminary design of the highway and bridge structures is currently underway. The design and future construction of the bridges will take into consideration navigability and maintaining proper access to the Holland River and Holland River East Branch. The Project Team is also actively engaging with Transport Canada to design the bridge structures in compliance with the Canadian Navigable Waters Act. As part of this process, we are seeking input from</p>

						<p>left/right turn up Dufferin and the need to stop at two set of lights]. Davis Drive is already six lanes at times.</p> <p>Finally, please include on your website a response to [REDACTED] February 3rd letter. In case you haven't read it, I've included the url below.</p> <p>Thank you for your time, [REDACTED]</p> <p>https://lakesimcoewatch.ca/wp-content/uploads/2021/02/2021-02-03-Bradford-Bypass-EA-request.pdf</p>	<p>(documenting the environmental assessment process for the route selection, right-of-way designation and future commitments for the Highway 400-Highway 404 Link) by the Minister of Environment and Energy on August 28, 2002.</p> <p>Please note that this Preliminary Design will adhere to all relevant new and existing provincial and federal legislation, including, but not limited to, Endangered Species Act, Greenbelt Plan, Heritage Act, Fisheries Act, Species at Risk Act. Please visit the Overview Page of the project website (www.bradfordbypass.ca) for a list of environmental discipline studies that will be carried out during the current preliminary design study.</p> <p>The planning process for the 1997 EA study narrowed down alternatives from a broad range of potential solutions to the concept ultimately selected as the Technically Preferred Route to a Planning level of detail. The study required gathering relevant information with respect to the existing and future conditions in the analysis area so that the impacts (both positive and negative) of each alternative could be compared under different environmental factors. To allow a satisfactory and comprehensive comparison to be made, information was gathered and grouped under five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>The Technically Preferred Route, now the Bradford Bypass corridor under the current Preliminary Design study, was selected through the Route Planning study as the 2002 EA approved preferred alignment for a freeway in terms of highway network expansion, ease of construction, relationship to municipal land use planning, as well as having fewer negative impacts to residential and natural areas when compared to other options considered. As such, alternate locations for the highway are not being considered as part of this study.</p> <p>Environmental and engineering assessment studies including (but not limited to), noise, air quality, agricultural impacts, snowdrift, land use and traffic modelling will all be updated and considered in the development of design alternatives for the highway. The findings of these assessments will be discussed at future Public Information Centres (PICs) and documented in reports which will be available for review later in the Study.</p>

							<p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>The planning process for the 1997 EA study narrowed down alternatives from a broad range of potential solutions to the concept ultimately selected as the Technically Preferred Route to a Planning level of detail. The study required gathering relevant information with respect to the existing and future conditions in the analysis area so that the impacts (both positive and negative) of each alternative could be compared under different environmental factors. To allow a satisfactory and comprehensive comparison to be made, information was gathered and grouped under five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>The Technically Preferred Route, now the Bradford Bypass corridor under the current Preliminary Design study, was selected through the Route Planning study as the 2002 EA approved preferred alignment for a freeway in terms of highway network expansion, ease of construction, relationship to municipal land use planning, as well as having fewer negative impacts to residential and natural areas when compared to other options considered.</p> <p>Significant population growth is projected for both Simcoe County (increase to 416,000 residents by 2031) and the Regional Municipality of York (increase to 1.79 million residents by 2041). The Bradford Bypass has been proposed as a response to this dramatic growth in population and travel demand in the area and the forecasted increase in congestion on key east-west roadways linking Highway 400 to Highway 404. Places to Grow: Growth Plan for the Greater Golden Horseshoe (2019) enacted by the Government of Ontario identifies and supports planned transportation corridors which are required to meet projected travel demand needs, including the proposed Bradford Bypass.</p> <p>Environmental and engineering assessment studies including (but not limited to), noise, air quality, agricultural impacts, snowdrift, land use and traffic modelling will all be updated and considered in the development of design alternatives for the highway. The study findings will be discussed at future Public Information Centres (PICs) and presented in EA documentation for the Study.</p>

CT209		<p>To: Project Team</p> <p>From: [REDACTED]</p>	Email	Farmland Loss	02/10/2021	<p>Hi Project Team,</p> <p>Can you please tell me how many acres of farmland will be lost if the Bradford Bypass is built? In addition, can you please tell me how many of these lost acres will be in the Holland Marsh?</p> <p>Thanks,</p> <p>[REDACTED]</p> <p>[REDACTED]</p>	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Monday, April 19, 2021 10:37 AM To: [REDACTED]</p> <p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>We are currently in the early stages of this Preliminary Design and Class EA Study, and as such, the anticipated impacts to farmland within the highway corridor are not known at this time. In preparation for Preliminary Design, various environmental studies are being undertaken to identify environmental concerns, commitments and recommend mitigation measures. Through the EA study, the Project Team will assess these impacts and endeavour to refine the design and develop appropriate mitigation measures to reduce potential impacts to agricultural lands and other key environmental areas. An Agricultural Impact Assessment will be completed by the Project Team, per the OMAFRA <i>Draft Agricultural Impact Assessment (AIA) Guidance Document</i> (March 2018). This assessment will include direct consultation with OMAFRA, OFA and local farming communities and identify potential impacts to farmlands and agricultural operations. A Property Impact Report will also be completed, which will undertake a review of all impacts of the proposed works on each property and identify the required amount of land to be acquired.</p> <p>A full list of environmental studies that will be conducted during this EA is provided on the project website (https://www.bradfordbypass.ca/overview/). The findings of these</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>assessments will be discussed at future Public Information Centres (PICs) and documented in reports which will be available for review later in the Study.</p> <p>At this time, a cost forecast for the Bradford Bypass has not yet been determined. To ensure competitive tender bids for future construction, the Ministry does not publish its project estimates. In order to obtain the best value bid for the project, the Ministry only releases costs once the procurement process is complete.</p> <p>Implementation of the Bradford Bypass may allow drivers travelling between Highways 400 and 404 to make the trip up to 60 per cent faster compared to existing routes, saving up to 35 minutes each way. These projections may be considered in comparison to the current route travelled between Barrie and Keswick.</p> <p>We have added you the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT 209.1		To: Project Team From: [REDACTED]	Email	Financial Cost	02/10/2021	<p>Hi Project Team,</p> <p>Can you please tell me the forecast financial cost to the taxpayer of the proposed Bradford Bypass?</p> <p>Thanks,</p> <p>[REDACTED]</p>	[Response in 209]

CT-218.1		From: [REDACTED] MTO To: Project Team	New Stakeholder Comment Form	New Stakeholder Comment Form Entry	03/02/2021	Request to be added to the contact list. See comment above.	<p>Sent: March 4, 2021 2:34 PM To: [REDACTED] Cc: projectteam@bradfordbypass.ca Subject: RE: Bradford Bypass</p> <p>Hi [REDACTED]</p> <p>Thanks for taking the time to speak with me this morning. Just as a brief summary of our call, I wanted to outline some of the main points discussed:</p> <ul style="list-style-type: none"> • MTO is about 6 months into the Preliminary Design Environmental Assessment (EA) Study phase of the Bradford Bypass. This work is to update and build upon the Route Planning EA Study completed in the 1990s and approved in 2002. It is anticipated that the current Preliminary Design Study will be completed early in 2023. • The current Preliminary Design EA Study will update/refine the previously-approved 2002 design for Bradford Bypass, in recognition of the fact that there have been many changes made to highway design standards and environmental practices/policies/legislation since the previous Route Planning EA Study. • One of the more notable changes affects the western terminus of Bradford Bypass at Hwy 400, which will be reconfigured as a "fully directional" interchange with flyover connections. Although the ramp/interchange geometry is site-specific and still to be determined, general examples of this type of interchange configuration can be seen at Hwy 401 & Hwy 412, Hwy 407 & Hwy 412 and Hwy 407 & Hwy 418. • Several design alternatives for the Bradford Bypass/Hwy 400 Interchange are currently being developed by the Project Team. These designs will be shown to stakeholders and the general public at Public Information Centre (PIC) #1 later this spring for review and comments. Timing of PIC #1 will be posted on the EA Study's website, once the date is confirmed. • Both the Bradford Bypass and Hwy 400 are designated as Controlled-Access Highways (CAH) under the Public Transportation and Highway Improvement Act. Accordingly, direct access to any properties immediately

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>adjacent to these highways is not permitted. Access to this site would need to be from County Road 53 (5th Sideroad) or from 8th Line.</p> <ul style="list-style-type: none"> This property is within MTO's permit control area and will require permits and approvals from our Corridor Management Office. MTO's standard setback requirement is 14 m measured outwards from the proposed MTO property line. <p>Hope this information is helpful. If you have any other questions about the Bradford Bypass EA Study, please do not hesitate to contact either myself or the Project Team.</p>
CT-218.2		From: [REDACTED]	RE: Bradford Bypass	Email		<p>[REDACTED]</p> <p>It was great to speak with you this morning. Thank you so much for this excellent summary.</p> <p>Regards,</p> <p>[REDACTED]</p>	*No response required.

I facilitated the sale of the land between the current owner, [REDACTED] of [REDACTED] and the new purchaser, both friends of mine. The purchaser is looking for more information in regards to the expected expropriation that will be occurring on a portion of the property. Would you be able to help me with this? Any information would help. Or, if you or any of your staff would be willing to do so, potentially set up a Zoom call in regards to the matter.</p> <p>Looking forward to hearing from you.</p> <p>Many thanks!</p> <p>[REDACTED]</p> <p>[PTE Property [REDACTED] shown below]</p> <p>[REDACTED]</p>	<p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p> <p>Sincerely,</p> <p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Tuesday, May 25, 2021 10:38 AM To: [REDACTED] Subject: RE: [REDACTED]</p> <p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment.</p> <p>The Project Team notes that the property at [REDACTED] has been sold to a new owner. In order to update the ownership information for the property, please provide us with the following:</p> <ul style="list-style-type: none"> • contact information for the new owner(s); including full name(s), mailing address, email address, and phone number; and • date of property closing/change in ownership. <p>The Ministry will meet with individual landowners prior to Public Information Centre (PIC) #2 (anticipated for Fall 2022) to discuss impacts to individual properties, understand concerns from landowners and identify opportunities to mitigate impacts. The preferred approach is to negotiate in good faith with owners as early as possible to reach amicable agreements for the acquisition of any properties needed to support important infrastructure improvements like this. Expropriation is only used when agreements can't be reached within suitable project timeframes.</p> <p>The Ministry has established an alternate process for receiving comments from property owners about a proposed expropriation and for considering those comments. Under this process, any owner of lands who was served a notice of expropriation is given the opportunity to comment on the proposed expropriation. They can do so by submitting comments about the proposed expropriation to the Assistant Deputy Minister (ADM), Transportation Infrastructure Management Division, within thirty days of receiving the notice.</p> <p>The Ministry will review the comments for their technical/engineering information, having regard to the need for the land for the purposes of the project. A written response will be provided from the ADM to the property owner.</p>

						<p>Please note the first Public Information Centre (PIC) was hosted virtually in two (2) parts through the Project Website where you will be able to learn more about the preliminary design study. All materials from PIC #1 remain available on the project website.</p> <p>PIC Part 1: The purpose of the first stage was to showcase the study, update and summarize existing conditions, illustrate the preliminary design refinements as compared to the 2002 approved EA study, outline the evaluation criteria, and solicit input, feedback and comments on the preliminary design refinements. The PIC materials were made available on the Project Website for a two (2) week stakeholder review period beginning April 22, 2021 and ending on May 6, 2021.</p> <p>PIC Part 2: The Project Team held a PIC Webinar presentation on May 18, 2021 where attendees could learn more about key topics raised during the PIC's review period and receive additional project information. This session was recorded and is available through the project website.</p> <p>We have added you to the Project Contact List and you will be notified through email of future Public Information Centres (PICs) and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-222	<p>██████████</p> <p>To: Project Team</p> <p>From: ██████████</p> <p>██████████ Property Owner</p>	Email	Bradford Bypass Feedback Suggestions for improvement	03-06-2021	<p>Greetings,</p> <p>My name is ██████████. I am currently a resident of Barrie, Ontario. I am writing about the Bradford Bypass. I appreciate the Conservative government is proceeding with this badly needed project. I had suggested a number of years ago that this road should be a minimal toll road i.e. perhaps .50cent to 1.00 per use. I still think this is a good idea.</p> <p>I understand the great opposition to this project because of its traversing environmentally sensitive wetlands.</p>	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Monday, April 26, 2021 11:20 AM To: ██████████ Subject: RE: Bradford Bypass Feedback Suggestions for improvement</p> <p>Hello ██████████</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>We are currently in the early stages of this Preliminary Design and Class EA Study. No updated highway or bridge design information is available at the present time,</p>

Reference #	Assigned To/From to: /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
					<p>Rather than using pylon in the ground sort of "technology" or a lot of fill, may I suggest a special 2-3km span (or combination of spans) perhaps with a sort of raised "island" for a connection to a potential future interchange at Bathurst Road, using a suspension bridge with a minimum clearance of 20metres.</p> <p>With this a special road either to the south or north of the bypass bridge could be a special supplemental bridge span for a small service road and/or bicycle / walking trail across the marsh/river/wetlands area.</p> <p>I understand that this would greatly add to the construction cost but long term I think it would achieve the best results and most acceptance. If the spans are built for 3 lanes in each direction (at least 2 minimally) in addition to a 2 lane road + bicycle/walking span I believe this could be a very beautiful bridge that could attract tourism to the area. The Holland Wetlands Suspension bridge. The minimal toll for the highway traffic could be used to help pay for the extra service/bicycle trail road that could then pass under the bridge at either end and connect to local areas to the East in Queensville and West in Bradford.</p> <p>The special trail road could also be built with building special nests for migrating birds in the area.</p> <p>I would trust such a suspension structure would be more minimally invasive to environmentally sensitive wetland area.</p> <p>[REDACTED]</p>	<p>as these plans are still being developed by the Study Team. The Ministry has not yet made a decision regarding tolls at this time.</p> <p>The alignment of the 2002 EA approved highway and proposed interchanges can be viewed in Exhibit 5-2, plate 6 (Pg. 205) from the Route Planning Study and Environmental Assessment. The Exhibit is available on the Overview Page of the project website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study). Refinement of the highway alignment within the study limits and consideration of the highway's proximity to existing and approved developments is underway. The design alternatives can be viewed at Public Information Centre (PIC) #1 which is currently being hosted virtually in two (2) parts through the Project Website where you will be able to learn more about the preliminary design study.</p> <p>PIC Part 1: The purpose of the first stage is to showcase the study, update and summarize existing conditions, illustrate the preliminary design refinements as compared to the 2002 approved EA study, outline the evaluation criteria, and solicit input, feedback and comments on the preliminary design refinements. The PIC materials will be made available on the Project Website for a two (2) week stakeholder review period beginning April 22, 2021 and ending on May 6, 2021.</p> <p>PIC Part 2: The Project Team encourages you to attend the PIC Webinar presentation on May 18, 2021 where you will be able to learn more about key topics raised during the PIC's review period and receive additional project information. CT-223.1	<p>To: [REDACTED]</p> <p>From: [REDACTED]</p>	Email	Response to submission of the IAAC letter		<p>*Below is the [REDACTED] Response to email above</p> <p>Good afternoon:</p> <p>Thank you for your responses regarding the GTA West and Bradford Bypass Projects.</p> <p>The Agency would like to incorporate your input into our advice to the Minister and would still be able to do so, if you could get your input to us by March 19, 2021 on the designation requests for both the GTA West and Bradford Bypass Projects.</p> <p>Under the Impact Assessment Act, on designation requests, the Agency must conclude its analysis in a timely manner to provide sufficient time for the Minister of Environment and Climate Change to respond, with reasons, to the request. For the request to designate the above noted projects, the Agency must conclude its analysis soon (and by no later than March 19, 2021). The Minister's decision is expected to be issued on May 4, 2021.</p> <p>Please note, in accordance with subsection 9(1) of the Impact Assessment Act, the Agency's analysis is focused on adverse effects within areas of federal jurisdiction and public concerns in relation to those types of effects, and in accordance with subsection 9(2) the Agency will also consider potential impacts on the exercise of rights of potentially affected Indigenous groups. Public concerns that do not relate to adverse effects in areas of federal jurisdiction are not considered in scope for the analysis.</p> <p>Perhaps your Region's planning department would be able to provide comments on the specific questions raised in the Agency's correspondence by the March 19th deadline. Please contact me know if you have any questions or comments.</p> <p>Thank you,</p> <p>[REDACTED]</p>	<p>Response from [REDACTED]</p> <p>[REDACTED]</p> <p>Thank you for the follow-up with respect to the Region's input for both the GTA West and Bradford Bypass projects and letting us know about a revised intake deadline.</p> <p>Our Council will be considering additional reports on each project on March 18, 2021 and we will provide an update immediately following.</p> <p>Please let me know if you have any questions or comments.</p> <p>Regards,</p>
CT071 Cont	To: Project Team, [REDACTED] various BBP stakeholders	Email	Email for engineers of record for [REDACTED]	03-10-2021	<p>*thread begins in Sept Comment Table</p> <p>Good Afternoon All:</p>	<p>Hi [REDACTED]</p> <p>Thanks for the email! CT224	To: Project Team	Email	Letter of Support for the BBP	03-14-2021	<p>Thank you.</p> <p>I am writing this email to provide some of my personal feedback on the Bradford Bypass.</p> <p>I imagine you receive plenty of emails from concerned residents who are not in favour of this controversial route. However I wanted to share why I am in favour of this much needed route. I am a former resident of North Newmarket (Born and raised until 2014) Bradford (2014-2015) and Georgina (2017-2020). Currently, as like many others, I reside now further North in Orillia but commute everyday for employment in Newmarket. Having lived in all three regions that this proposed road directly affects, I would like to express that the road will benefit its residents in different ways. Many people in Bradford may not see the importance of an east/west route that connects Simcoe County to Northern York region due to their quick access to highway 400 for southbound commuters.. In the same way many Georgina residents may not see the viability of this project in their own backyard due to easy access to highway 404 for their southern commute. Many Newmarket residents may not realize how this will impact them, how this will alleviate the traffic congestion on Green Lane and Davis dr.</p> <p>Even for new residents to the area it won't take long to notice the traffic congestion in these areas. Long weekend Friday afternoons are often spent parked on highway 11 or Bathurst St heading north into Bradford. Or stuck waiting to turn from the queensville side road coming from the easter portions of East Gwillimbury or Georgina. It isnt uncommon for all arterial routes to be congested, even secondary routes like mt albert rd or holland landing road can be dramatically affected by this congestion.</p> <p>For the few of us unfortunate ones who have to commute east west and try to connect regions our options are sadly limited, and extremely time consuming. I am certain my personal story is something residents of all towns and regions could agree with, The bradford bypass would directly translate to more time spent with family, in fact for me, it would mean more time spent with my 2 year old daughter. I am a [REDACTED] father to a daughter who resides in Mt Albert with her mother. My time with her is greatly impacted by the lack of a fast moving corridor to connect highway 48, highway 404, highway 400. Snow storms, accidents, cottage goers and summer long weekends make this stretch of travel painstaking sometimes. The need for east west roadway has been increasing for ten years now with exponential population growth. Traffic studies from 10-15 years</p>	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Monday, April 26, 2021 11:30 AM To: [REDACTED] Subject: RE: Feedback regarding Bradford Bypass and its importance</p> <p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>We are currently in the early stages of this Preliminary Design and Class EA Study. In preparation for Preliminary Design, various environmental studies are being undertaken to identify environmental concerns, commitments and recommend mitigation measures. A full list of these environmental studies is provided on the project website (https://www.bradfordbypass.ca/overview/). The findings of these assessments will be discussed at future Public Information Centres (PICs) and documented in reports which will be available for review later in the Study.</p> <p>As a commitment of the 2002 Approved EA and required under the Greenbelt Plan (2017), an Agricultural Impact Assessment will be undertaken to the existing standards and with reference to the Ontario Ministry of Agriculture, Food and Rural Affairs (OMAFRA) Draft Agricultural Impact Assessment (AIA) Guidance Document (March 2018).</p> <p>The Project Team appreciates your comments related to your experience with the area and your support for the Bradford Bypass.</p> <p>Please note the first Public Information Centre (PIC) is currently being hosted virtually in two (2) parts through the Project Website where you will be able to learn more about the preliminary design study.</p> <p>PIC Part 1: The purpose of the first stage is to showcase the study, update and summarize existing conditions, illustrate the preliminary design refinements as compared to the 2002 approved EA study, outline the evaluation criteria, and solicit input, feedback and comments on the preliminary design refinements. 					<p>ago would have displayed these cracks in our infrastructure and public works. The region of Simcoe and Northern York region need to be connected and it needs to happen soon to help all of the hard working people in this area move to and from their homes to places of employment efficiently and safely.</p> <p>As with many residents, I agree with their environmental concerns, I understand the diversity of the south simcoe wetlands and its fragility. However, I am fully aware that our elected government can and should utilize the expertise of both environmental activists as well as the brilliant civil engineers to ensure this project comes off with a limited impact. By no means am I a civil engineer or urban planner, but I do understand the effects of construction practices in fragile environmental landscapes. If not already done so, one should consult the road grid that has been constructed in South Florida or Louisiana. Both of these areas have bridges, causeways, viaducts built over very fragile, flood prone wetlands and swamps. Of course the climate and natural wildlife is different, but the feasibility and principle remains the same. If they can do it, ten times over, connecting populous communities to each other why aren't we able to do it. If it means instead of concrete pillar bridges, instead utilize a causeway style system by back filling the land and creating culverts and diversions for water to continue to flow. Or if that becomes a water flow concern then we should consider viaducts and bridges or a mixture of all. I digress, the feasibility of effectively building this route far outweighs waiting another ten years and wasting taxpayer money just to perform environmental assessments and get caught up in municipal, provincial and federal red tape.</p> <p>I also firmly believe one way to combat the negative environmental impact of these projects is to keep development in the area very limited. The arable farm lands and unique wetland is important to maintain and keep in tact for generations to come. Building an east west highway to alleviate congestion and promote free movement between Simcoe and Northern York region DOES NOT have to mean building housing developments and commercial centers to promote urban sprawl. There are many other surrounding areas that can promote that goal. The goal of this road should be simply to assist and promote the movement of both Simcoe and York region residents in an efficient and safe manner in a 4 lane throughway. The benefits will spread over to residents of neighboring communities as well, stretching far east like Beaverton and Brock, Uxbridge and Markham/Stouffville as well as West towns like New Tecumseth and Orangeville. Many residents of the northern parts of Simcoe will also</p>	<p>topics raised during the PIC's review period and receive additional project information. Please register through the project website.</p> <p>We have added you the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional comments or questions, please feel free to reach out to the project team at your earliest convenience.</p>

					<p>welcome the importance of this road. Many Innisfil, Barrie and Orillia residents have to utilize highways 400 and 404 as part of their commute. It is also so important for the movement of goods and food within these regions to move efficiently.</p> <p>In summary, I am IN FAVOUR of the Bradford Bypass, and I am in the belief that this route is much overdue. My hope is that this opinion is taken into consideration. I am certain you receive many emails of people who are not in favour of this, but for many of us who are forced to do this commute as part of our daily, weekly or even monthly life. It would directly mean more time spent with family, less time spent idling and polluting on secondary roads in communities like Holland Landing, Bradford, Queensville etc. As we look towards the future, with the implementation and push for clean energy in Electric vehicles and solar power the carbon impact of a 404-400 connecting link will be drastically reduced in its update environmental impact. As a resident of Simcoe county, and a person who commutes 6 days a week to North York region for employment or to visit with family. Thank you for the opportunity to voice my opinion in this matter.</p>	
CT225	<p>██████████</p> <p>To: Project Team</p> <p>From: ██████████ ██████████</p>	Email	Requesting information on the BBP	03-19-2021	<p>Dear project team,</p> <p>In light of your stated commitment to an open and transparent EA process in your presentation to York Region council today, please provide me with the underlying study demonstrating that there will be a 35 minute average travel time savings including:</p> <ul style="list-style-type: none"> • Specifics of the projected 2041 increase in travel times and current average travel times. • The geographic area used to develop these projections • Specifics of the with/without Bradford bypass scenarios for 2041 used for this prediction 	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Tuesday, May 4, 2021 1:37 PM To: ██████████ Subject: Bradford Bypass PD/EA: Comment Response</p> <p>Hello ██████████</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. We thank you for your patience as the Project Team reviews and addresses comments in the order in which they are received. In an effort to minimize the number of responses you receive, we have consolidated your comments.</p> <p>Travel time savings and projections were calculated using the Provincial Greater Golden Horseshoe Model (GGHM) by comparing scenarios with and without the Bradford Bypass corridor in place. This assessment includes various key origin and destination locations within the corridor including municipal centres in the region. The model accounts for population and employment targets by region, as identified in the <i>Places to Grow Act</i>.</p> <p>Scenarios include: Existing Conditions Network, 2041 No Build Scenario, and 2041 Build Scenarios. Travel times under each scenario are calculated and compared to</p>

Reference #	Assigned To/From to: /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Request/ Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>obtain the anticipated travel time savings. To clarify your comment, travel time savings are not an average of 35 minutes, but rather a range between 10-35 minutes. Travel time savings are calculated utilizing the scenarios above based on the time of day and key origin and destination locations identified using an area-wide transportation model (with a 2041 horizon year).</p> <p>For all origin-destination pairs reviewed, the travel time comparison saw an average travel time of approximately 11 minutes with the Bradford Bypass corridor in place and 25 minutes without it, resulting in a net travel time savings of 14 minutes. The study is still on-going and additional information will be shared as the study progresses.</p> <p>The Ontario Ministry of Transportation (MTO) issued the formal notification for Public Information Centre (PIC) #1 for the Project on April 15, 2021. As a stakeholder on the project contact list, you would have received the PIC notification on April 15, 2021. This formal notification and invitation, with information on how to participate in the PIC is now available on the project website and has been published in local area newspapers in advance of the PIC.</p> <p>Please note the first PIC is currently being hosted virtually in two (2) parts through the Project Website where you will be able to learn more about the preliminary design study.</p> <p>PIC Part 1: The purpose of the first stage is to showcase the study, update and summarize existing conditions, illustrate the preliminary design refinements as compared to the 2002 approved EA study, outline the evaluation criteria, and solicit input, feedback and comments on the preliminary design refinements. The PIC materials are available on the Project Website for a two (2) week stakeholder review period beginning April 22, 2021 and ending on May 6, 2021.</p> <p>PIC Part 2: The Project Team encourages you to attend the PIC Webinar presentation on May 18, 2021 where you will be able to learn more about key topics raised during the PIC's review period and receive additional project information. Please register through the Project Website.</p> <p>In addition to formal PICs planned at key design stages, the MTO will continue to undertake consultation and engagement throughout the study. The process is carried out with the intent to keep an open dialogue regarding the goals and objectives of the project and solicit feedback. Consultation opportunities will include meetings with key stakeholders, properties owners, municipalities, regulatory agencies and Indigenous communities.</p> <p>Field investigations to support the EA is on-going through 2020 to 2022. The preliminary impact assessment, design evaluation and selection of the preferred</p>

						<p>preliminary design will be presented to the public at a future PIC, anticipated for the fall of 2022.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available, and we welcome your participation in the first PIC.</p> <p>If you have any additional comments or questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT225.1	<p>To: Project Team</p> <p>From: [REDACTED]</p>	Email	RE: Travel times [REDACTED]	03-26-2021	<p>Dear project team</p> <p>It has been over a week and we have received no response. You must have this information readily available as it was provided to York Region Council on March 17th and 18th.</p> <p>In addition to the below please provide the substantiation that the Bradford Bypass specifically would create seven jobs per one million dollars spent and 0.71 of GDP per dollar spent. Please provide a list of the jobs that would be provided and indicate what sectors these would be in, with supporting evidence.</p>	<p>[Response in CT225]</p>
CT225.2	<p>To: Project Team</p> <p>From: [REDACTED]</p>	Email	Travel Times inquiry follow up- Requesting additional info on public consultations	04-12-2021	<p>Dear Project team,</p> <p>As you may know I represent [REDACTED]. We have had no substantive response to my March 18 email below, nor a copy of the traffic studies your team referenced at the York Region Council meeting. Moreover we see in the East Gwillimbury council minutes from last week that there will be a public consultation later this month running from April 22 to May 6th but there is no other publically available information and those of us who have written to you asking for more information about public consultations have not been informed.</p> <p>Please provide more information on the public consultations that will be occurring later this month. Will they be covering any of the 15 studies or are they just regarding route alignment/refinements?</p> <p>When will public consultations occur on the 15 studies? Will this occur prior to the construction planned in the fall of 2021?</p> <p>[REDACTED]</p>	<p>Response in CT 225</p>

CT225.3	[REDACTED]	To: Project Team From: [REDACTED]	Email	Inquiry on late response, comment on date of PIC	04-13-2021	<p>Please advise why you are not providing the traffic study to us? If it was complete enough to cite at the March 18 York Region Council meeting and your March 17 York Region Council letter it is complete enough to provide to the public. It seems you are also refusing to provide it to the National observer:</p> <p>Although the government contends the bypass would save drivers up to 35 minutes, [REDACTED] declined to provide the study behind those figures to Canada's National Observer, saying it was still in progress.</p> <p>Why is my March 18 request for this study still "under review by the Bradford Bypass project team"? What is there to review? Please provide the study forthwith.</p> <p>Your consultation is set to commence next week, if people are to have adequate notice that it is occurring they need time to plan to participate, particularly during COVID and school shutdowns, notices should not be sent out only days before.</p> <p>Regards,</p>	Response in CT 225
CT226	[REDACTED]	To: Project Team From: [REDACTED]	Email	Question on construction timeline and exact alignment	03-22-2021	<p>Hello,</p> <p>I was interested in receiving a timeline for the construction of the Bradford bypass and connecting interchange at Leslie Street. Can you also tell me the exact location of the bypass as I own property at [REDACTED]</p> <p>Thank you,</p> <p>[REDACTED]</p>	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Monday, April 26, 2021 11:34 AM To: [REDACTED] Subject: RE: info regarding bypass</p> <p>Hi [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>The project is currently undergoing the Preliminary Design process to refine the design elements approved in 2002 by examining design alternatives within the Study Area, considering environmental constraints and engaging the public for input. The Preliminary Design is anticipated to be completed in early 2023, allowing MTO to further refine the project through Detail Design with the possibility of advancing some components of the project for early construction. Construction of the Bradford Bypass is subject to funding, completion of detail design, and having permits, licenses, approvals, and authorizations in place prior to construction.</p>

so this is added to their original CT#			alignment of the bypass		<p>I also have some questions:</p> <ul style="list-style-type: none"> - how current are the impact assessments on file in regards to this project, are older ones being used, or will a whole new set be generated? - has the Endangered Species Act been reviewed in regards to this project? - as the Holland River is within the geography of this bypass, and as you are aware this river flows into Lake Simcoe, has there been any outreach to the Indigenous groups, who call the Lake Simcoe home, for their input on this massive project? I would like to discuss this item further..... - overarching all these items, since the last major discussion took place regarding the installation of the bypass, there have been changes to many pieces of legislation which it has to comply with? I guess that is more of a statement than a question. Comments. <p>Finally, not yet knowing the exact path of the bypass, preliminary designs show several residential developments which will be adjacent to it. I do hope that a further discussion can be had about some mitigating steps that can be taken i.e. tree planting / sound dampening / etc.</p> <p>I look forward to your reply.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The planning process for the 1997 EA study narrowed down alternatives from a broad range of potential solutions to the concept ultimately selected as the Technically Preferred Route to a planning level of detail. The study required gathering relevant information with respect to the existing and future conditions in the analysis area so that the impacts (both positive and negative) of each alternative could be compared under different environmental factors. To allow for a satisfactory and comprehensive comparison, information was gathered and grouped under five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>The Technically Preferred Route, now the Bradford Bypass corridor under the current Preliminary Design study, was selected through the Route Planning study as the 2002 EA approved preferred alignment for a freeway in terms of highway network expansion, ease of construction, relationship to municipal land use planning, as well as having fewer negative impacts to residential and natural areas when compared to other options considered. As such, alternate locations for the freeway are not being considered as part of this study.</p> <p>Currently, the Approved EA from 2002 is being carried forward for the Bradford Bypass corridor. In August 2019, the Ontario Ministry of Transportation (MTO) approved the re-initiation of design activities for the Bradford Bypass. In advance of the current Preliminary Design assignment, AECOM completed preparatory work relating to the Engineering Design Update for the project, Environmental Existing Conditions Updates and initiated the process for securing Permission to Enter (PTE) for field investigations.</p> <p>The alignment and freeway interchanges from the previous Route Planning Study that received EA approval in 2002 can be viewed in Exhibit 5-2, plates 2 - 10 (Pg. 201 - 209). The Exhibit is available on the Overview Page of the Project Website (www.bradfordbypass.ca), under background information (1992-1997 Route Planning and Environmental Assessment Study). The design alternatives can be viewed at Public Information Centre (PIC) #1, which is currently being hosted virtually in two (2) parts through the Project Website where you will be able to learn more about the Preliminary Design and EA Study.</p> <p>PIC Part 1: The purpose of the first stage is to showcase the study, update and summarize existing conditions, illustrate the preliminary design refinements as compared to the 2002 approved EA study, outline the evaluation criteria, and</p>

						<p>solicit input, feedback and comments on the preliminary design refinements. The PIC materials will be made available on the Project Website for a two (2) week stakeholder review period beginning April 22, 2021 and ending on May 6, 2021.</p> <p>PIC Part 2: The Project Team encourages you to attend the PIC Webinar presentation on May 18, 2021 where you will be able to learn more about key topics raised during the PIC's review period and receive additional project information. Please register through the Project Website.</p> <p>MTO is currently in the early stages of this Preliminary Design and Class EA Study. As part of the Preliminary Design, various environmental studies are being undertaken to document existing conditions, assess potential impacts, and recommend mitigation measures.</p> <p>For this project, MTO is currently following the approved planning process for a Group 'A' project under the MTO Class Environmental Assessment for Provincial Transportation Facilities. This Preliminary Design will adhere to all relevant new and existing provincial and federal legislation, including, but not limited to, <i>Endangered Species Act</i>, <i>Greenbelt Plan</i>, <i>Heritage Act</i>, <i>Fisheries Act</i>, <i>Species at Risk Act</i>.</p> <p>A list of the environmental studies to address the environmental considerations for the project is presented in the material for PIC #1, including noise impacts, groundwater impact assessments, and drainage and hydrology studies. We encourage you to review the information related to the study process, environmental considerations and environmental protection and mitigation measures for the project. Here is a link to the key considerations in the PIC #1 materials (https://www.bradfordbypass.ca/2021/04/09/6-overall-environmental-considerations-bradford-bypass/), with mitigation measures and study information on subsequent sections of the material.</p> <p>MTO remains committed to fulfilling its duty to consult requirements and will engage with local Indigenous communities and consider their interests in the Preliminary Design.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p>

CT176.2	<p>To: Project Team</p> <p>From: [REDACTED]</p>	Email	Question regarding the EA exemption	03-26-2021	<p>I am very confused by information on your website and answers to questions provided by MOT staff at York Region's Council meeting on March 18. Could you please answer the following questions.</p> <p>1) Through the below ERO posting the Province has clearly indicated that they are proposing to be exempt from Condition 4 of the EA Approval.</p> <p>Proposal to exempt various Ministry of Transportation projects from the requirements of the Environmental Assessment Act. Environmental Registry of Ontario</p> <div data-bbox="615 499 956 679"> <p>Proposal to exempt various Ministry of Transportation projects from the ...</p> <p>We are proposing a regulation to exempt select Ministry of Transportation projects from the requirements of the ...</p> </div> <p>This is understood to mean they would exempt from the below. Is this correct? If not please clarify what the exemption request is required for?</p> <p>The government is proposing a regulation to exempt this project from certain requirements of the Environmental Assessment Act and its notice of approval.</p> <p>The proposed exemption would excuse the proponent, MTO, from Condition 4 of its EA Notice of Approval. As a result, MTO would not need to prepare an ESR or DCR(s), nor complete the associated 30-day consultation period. MTO would also be exempt from other technical design commitments made in the environmental assessment, including the completion of:</p>	<p>[Response in CT176.1]</p>

CT212.2	██████████ To: Project Team From: ██████████ ██████████	Email	Question on BBP Timelines	03-27-2021	Hi Can you give me a projected timeline for final approval, completed constructed? I appreciate we are looking at years but about how many? ██████████	*Resolved in a phone call Hello ██████████ Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study. The project is currently undergoing the Preliminary Design process to refine the design elements approved in 2002 by examining design alternatives within the Study Area, considering environmental constraints and engaging the public for input. The Preliminary Design is anticipated to be completed in early 2023, allowing MTO to further refine the project through Detail Design with the possibility of advancing some components of the project for early construction. Construction of the Bradford Bypass is subject to funding, completion of detail design, and having permits, licenses, approvals, and authorizations in place prior to construction. We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available. If you have any additional comments or questions, please feel free to reach out to the Project Team at your earliest convenience.
CT212.3	██████████ To: Project Team From: ██████████ ██████████	Phone			*transcribed from message recording Yes its ██████████ calling I sent a couple of emails to the website or email address you provided projectteam@bradfordbypass.ca . In my last email I just asked in terms of a timeline what are we looking at in terms of finishing up a final design as well construction I am just Looking for a horizon how many years are we away. I appreciate that if all the environmental issues have not yet been resolved then its difficult to give that timeline. I would like some idea is it 5 years or just 1 away. If you respond to my email its ██████████ or my phone number is ██████████	04-12-201 ██████████ Called ██████████ twice but he did not answer, left a voicemail indicating we received his message and he can call us back for a response.
CT230	██████████ To: Project Team From: ██████████ ██████████ - General Public	Phone Message	Requesting Call Back	03-29-2021	Hi good morning my name is ██████████ if someone can give me a quick call regarding the Bypass that would be greatly appreciated. My direct number is ██████████ that was ██████████ That is ██████████ ██████████ Thank you very much. Have yourself a great day and well talk to you soon. Take care bye bye.	Record from phone call conversation with ██████████ on 03/29/2021 at 11:40am. ██████████ How far are we from being completed? ██████████ indicated that she cannot speak to an exact date of construction or completion, but the Preliminary Design Anticipated Completion is Early 2023. ██████████ asked when people can get on the highway and start using the bypass. ██████████ re-iterated the information above

							The Bradford Bypass Project Team
CT234	█	To: Project Team From: █ █ █	Email	Properties for MTO acquisition	04-06-2021	Good afternoon, We represent a couple of owners in East Gwillimbury who may be interested to sell their lands to MTO for the Bradford Bypass. If this is of interest, kindly contact me to discuss. One property is listed and the other, we are contemplating putting on the market. █. Property 2 is █ Based on the preliminary plans (see enclosed), the bypass takes up a fair bit of these properties. Looking forward to hearing from you, █	Hello █ Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study. Thank you for the information regarding the █ properties. The Ministry of Transportation (MTO) is in the process of identifying impacted property parcels as a result of the Bradford Bypass study and will be contacting property owners accordingly to determine next steps. Should MTO wish to purchase either of the properties mentioned above, they will be in touch accordingly.
CT234 Con't	█	To: Project Team From: █ █ █	Phone	Contact information for Properties Above	04-28-2021		On April 28 th , 2021 █ reached out to █ via phone indicating that we were wondering if he would share the contact information for the █. █ indicated he would send the information by email. On April 28 th , 2021 █ issued █ copy of the auto response with information about the PIC and the project team email.
CT234 Con't	█	To					On June 3 rd , 2021 █ reached out to █ to follow up on the contact information for the above properties. █ indicated that he reached out to both property owner and gave them the project team contact information . █ indicated we have not yet heard back from the property owners and asked if █ would feel comfortable sharing the contact information with the team so that we may reach out to them directly. █ indicated that he would need to contact the property owners before giving out their information. █ asked what exactly we need the information for.

		[REDACTED]				As a longtime York Region resident, I support the Bradford Bypass. The highway is long overdue. I also support another 404 extension to Hwy 48 at the very least.	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study. The Project Team acknowledges and appreciates your expressed support for the Bradford Bypass. At this time, the plan is to refine the 2002 EA approved route planning study. Future extensions beyond the approved corridor (including along Highway 404) are not currently being considered as part of this study.</p> <p>We have noted that you do not wish to be added to the Project Contact list. Should you wish to receive information about the project, please let us know and we will add you to the Project Contact List at that time.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available. The preliminary design refinements and alternatives were presented during Public Information Centre (PIC) #1 and are available on the Project Website (https://www.bradfordbypass.ca/pic1/). Please review the PIC materials to learn more about the Preliminary Design Study.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT237	[REDACTED]	To: Project Team From: [REDACTED]	New Stakeholder Comment Form	Environmental Impacts of the BBP	04-08-2021	<p>Bradford Bypass and Need for Environmental Assessment</p> <p>The Bradford Bypass Highway is a proposed 16.2 kilometre, four-lane controlled access mega highway to connect Highways 400 and 404 located in Simcoe County and York Region in the Greater Toronto Area of Ontario, and adjacent to the south-westerly zone of Lake Simcoe. As a major transportation corridor, it requires a new right of way about 100 metres wide.</p> <p>The project would cross the lake bottom of the ancient Lake Algonquin, in an east-west direction across part of what is now the Holland River Marsh area, one of the most productive specialty crop agricultural areas in the country and one of the largest wetlands in the region. The project will lead to removal of approximately 39 hectares of wildlife habitat and large tracts of one of Ontario's most important</p>	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Thursday, June 10, 2021 10:09 AM To: [REDACTED] Subject: RE: New Stakeholder Comment Form Entry</p> <p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team acknowledges your concerns surrounding adverse effects on storm water and groundwater within the study area. Based on the Preliminary Design of the Preferred Route, a Drainage and Hydrology Assessment and Groundwater Impact Assessment will be completed as part of the study to identify</p>

						<p>areas of wetlands and farmlands. The devastating impact troubles me as an Ontario citizen.</p> <p>A previous controversial and disputed environmental assessment study under the Ontario Environmental Assessment Act was completed 23 years ago. It concluded that the project would cause adverse effects to aquatic habitat including severe stormwater and groundwater impacts. The environmental assessment did not evaluate the impacts on species at risk, migratory birds or climate change. The study has not been updated and a Bradford Bypass needs a new environmental assessment.</p> <p>The Bradford Bypass Highway proposal has resurfaced again, causing great concern about the negative impacts and impending destruction of farmlands, significant forests, natural areas and wetlands of the Holland River watershed and related healthy rural landscapes. Environmental assessment now must consider new impacts such as biodiversity & climate change.</p> <p>Previously, when the 1997 EA was approved, there was a further provincial EA process and a federal EA process that was required. As a result, the 1997 EA fails to assess the impacts of the project on the areas of federal jurisdiction or to propose adequate mitigation measures. Hence there is a lot of detailed assessment to be done before any formal project decisions are made.</p> <p>Due to the passage of time including the enactment of the federal Species at Risk legislation and Canada's engagement in further international agreements on global response to climate change, the provincial EA is inadequate. It needs to be updated to ensure that there are adequate protections for fish habitat, species at risk and migratory birds. And the project, as it is now proposed, needs to be properly re-assessed in light of Canada's climate change commitments. If this project had proceeded in the early 2000s it would have fallen under the rigour of federal Environmental assessment (EA) requirements and the same should apply today.</p>	<p>potential impacts of highway runoff and stormwater on surface water and groundwater and develop appropriate mitigation measures to protect the Holland River watershed.</p> <p>The Drainage and Hydrology Assessment will be undertaken in accordance with MTO's Environmental Reference for Highway Design (ERHD, 2013) and will include development of a Drainage Report to summarize stormwater management components, hydrologic/hydraulic assessments, proposed mitigation measures and Preliminary Design recommendations for potential stormwater management facilities (e.g. stormwater management ponds). Lake Simcoe Region Conservation Authority (LSCRA) and Nottawasaga Valley Conservation Authority (NVCA) will continue to be consulted throughout the study to maintain alignment with current policies and practices for their respective watersheds.</p> <p>As part of the MTO's ongoing commitment to minimize environmental impacts, MTO is undertaking Class EA studies for: agriculture, air quality, archaeology, cultural and built heritage, contamination and waste management, drainage & hydrology, erosion and sediment control, groundwater, fisheries, fluvial geomorphology, human health, landscaping, land use and property impacts, noise & vibration, terrestrial ecosystems, snow drift, species at risk, and surface water & stormwater management.</p> <p>These 15 environmental studies being carried out for the project are listed on the Project Website and in material presented for Public Information Centre (PIC) #1 (https://www.bradfordbypass.ca/2021/04/09/6-overall-environmental-considerations-bradford-bypass/). The investigations, analysis, assessment and development of mitigation strategies for the project will be documented in the individual environmental technical reports.</p> <p>A review of previous commitments made in the 2002 Approved EA will be carried forward to ensure all approvals and legislative requirements at both the federal and provincial levels are met. The results of the current studies will support the environmental approvals process and the results will be further documented in the EA documentation for the project.</p>

						<p>I agree with, endorse and support the discussion and recommendations in the letter of Feb. 03, 2021 from Ecojustice to Minister Wilkinson on behalf of over twenty (20) respected environmental not-for-profit groups and community-driven charities who object to this Bradford Bypass, as currently proposed, without a more up to date environmental assessment.</p> <p>The serious concerns for regional environmental health and resilience are also reflected in several fact sheets of pertinent and related environmental information from the bulletins, reports, and websites of Environmental Defence and Rescue Lake Simcoe Coalition, two of the Ecojustice clients, that are referenced in their Feb. 03, 2021 letter to Minister Jonathan Wilkinson.</p> <p>In summary and consistent with the above comments and discussion, it seems that the provincial process for the proposed Bradford Bypass highway project is inadequate for assessing negative impacts or ensuring they are mitigated.</p> <p>As a concerned Ontario citizen and as a York Region resident, I urgently request that this Bradford Bypass Highway project be properly designated pursuant to section 9(1) and/or other applicable sections of the Impact Assessment Act.</p> <p>Respectfully submitted,</p> <p>[REDACTED]</p>	<p>A Transportation Environmental Study Report (TESR) will be completed for the Preliminary Design to document the consultation, transportation and documentation principles under the MTO Class EA process for a Group 'A' project.</p> <p>On May 3rd, 2021, the Minister of Environment and Climate Change Canada announced that the Bradford Bypass Project, did not warrant designation under the federal <i>Impact Assessment Act</i>. The Minister of Environment and Climate Change (MOECC) considered the potential for the Project to cause adverse effects within federal jurisdiction, adverse direct or incidental effects, public concern related to these effects, as well as adverse impacts on the Aboriginal and treaty rights of the Indigenous peoples of Canada. The Minister also considered the analysis of the Impact Assessment Agency of Canada and decided that the provincial EA process was satisfactory to provide a framework to address potential adverse effects of the Project and public concerns raised in relation to those effects. The Minister's full response can be found on the Impact Assessment Agency of Canada website (https://iaac-aec.gc.ca/050/evaluations/document/138881).</p> <p>The Preliminary Design refinements and alternatives were presented during PIC #1 held through the Project Website (https://www.bradfordbypass.ca/pic1/). We encourage you to review the PIC material where you can learn more about the proposed highway.</p> <p>We have added you to the Project Contact List and you will be notified through email of future PIC #2 and updates to this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>

CT167.1	[REDACTED]	To: Project Team From: [REDACTED]	Email	unclear about how the studies you are currently undertaking are addressed under the new amended Environmental Assessment Act.	04-12-2021	<p>Good evening Bradford Bypass Project Team:</p> <p>The Bradford Bypass official website includes the following information:</p> <p>Ontario Environmental Assessment Act (OEAA) - MTO Class EA Process</p> <p>The Ontario Ministry of Transportation's (MTO) Class Environmental Assessment for Provincial Transportation Facilities (2000) outlines the Environmental Assessment process to be followed for specific groups of provincial transportation projects. The Class Environmental Assessment is approved under the Act and provides a streamlined process for which projects or activities within a defined "class" must follow. Provided that this process is followed, projects and activities included under the Class Environmental Assessment do not require formal review and approval under the Ontario Environmental Assessment Act.</p> <p>Four project groupings within the Class Environmental Assessment (Class EA) have been established for the purposes of guiding consultation and determining the process documentation. Based on the project type, the study advances under one of the following:</p> <ul style="list-style-type: none"> Group "A" - Projects involving new facilities Group "B" - Projects involving major improvements to existing facilities Group "C" - Projects involving minor improvements to existing facilities Group "D" - Activities that involve operation, maintenance, administration and miscellaneous work for provincial transportation facilities <p>The Bradford Bypass is subject to the Class EA as Group 'A' project, following the process for a new facility.</p> <p>For projects subject to the Class EA, the Project Team undertakes an environmental assessment that involves identifying and planning for environmental issues and effects prior to implementing a project. The process allows reasonable opportunities for public involvement in the decision-making process of the project. [emphasis added]</p>	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Friday, June 25, 2021 10:17 AM To: [REDACTED] Subject: RE: I'm hoping you can assist me with a question I have.</p> <p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>This Study will follow the approved planning process for a Group 'A' project under the MTO Class <i>Environmental Assessment for Provincial Transportation Facilities (2000)</i>. This current version of the MTO Class EA includes information from the original December 23, 1997 version, as well as revisions from the approved Order in Council 1653/99 (October 2, 1999) and July 14, 2000 amendment.</p> <p>With respect to the current proposal for the modernization and amendment of the MTO Class EA that MTO has submitted to the Ministry of Environment, Conservation and Parks (MECP) and the separate proposed exemption regulation should they come into force, the Project would be subject to the regulatory requirements outlined at that time. Additional information related to the Class EA as it relates to this project can be found here: https://www.ontario.ca/page/class-ea-provincial-transportation-facilities.</p> <p>The approved EA (2002) for the Bradford Bypass included proposed mitigation measures and future commitments and is subject to 15 conditions. MECP's proposed regulation would require MTO to fulfill all conditions except Condition 4, which directs MTO to follow the Class EA for Provincial Transportation Facilities during the design and construction of the undertaking. Instead of Condition 4 the new proposed regulation describes assessment requirements for the MTO to ensure strong environmental oversight. The proposed regulation also requires fulfillment of commitments made in the environmental assessment related to further work such as consultation requirements with agencies and submitting an Indigenous Consultation Plan to the ministry.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>The Class EA documentation is a Transportation Environmental Study Report (TESR), which will be prepared and made available for a 30-day public and agency review period at the completion of the Study. The TERS will document the following:</p> <ul style="list-style-type: none"> • The transportation needs, problems and opportunities; • Existing environmental conditions; • A summary of consultation undertaken throughout the Study • The generation, assessment and evaluation of alternatives within the Study Area; • The preferred alternative(s)/ recommended plan; and, • A summary of potential environmental issues and mitigation measures and environmental commitments to be carried forward through future design stages. <p>Other aspects of the environmental assessment process applicable to these project types are contained in the Class Environmental Assessment for Provincial Transportation Facilities (2000). Readers interested in these matters are encouraged to refer to that document.</p> <p>For related information, please see the following links:</p> <ul style="list-style-type: none"> • Ontario Ministry of Transportation: http://www.mto.gov.on.ca/ • Ontario Environmental Assessment Act: https://www.ontario.ca/page/ministry-environment-conservation-parks • Ministry of Transportation Class Environmental Assessment: http://www.mto.gov.on.ca/documents/english/engineering/Class_EA_2000.pdf <p>The Environmental Assessment Act has undergone a major amendment and I'm having difficulty understanding how it applies to the Bradford Bypass Class EA. The MTO Class EA 200.pdf link takes me to the following MTO document:</p> <p>Class Environmental Assessment for Provincial Transportation Facilities</p>	<p>The Ministry is currently in the early stages of this Preliminary Design and Class EA Study. As part of the Preliminary Design, various environmental studies are being undertaken to document existing conditions, assess potential impacts, and recommend mitigation measures. Detailed impact assessments will be completed to document the specific potential for adverse effects to the natural, socio-economic and cultural environments, including those directly linked to a federal or provincial authority (e.g. <i>Fisheries Act</i>, <i>Endangered Species Act</i>). Relevant provincial and federal agencies will continue to be consulted throughout the Preliminary Design and subsequent design stages to ensure compliance with provincial and federal legislation/policies. The results of these studies will be documented in the environmental assessment documentation, which for this project is a Transportation Environmental Study Report (TESR).</p> <p>A list of the environmental studies to address the environmental considerations for the project are presented in the material for Public Information Centre (PIC) #1, including groundwater impact assessments, and drainage and hydrology studies. We encourage you to review the information related to the study process, environmental considerations and environmental protection and mitigation measures for the project (https://www.bradfordbypass.ca/2021/04/09/6-overall-environmental-considerations-bradford-bypass/).</p> <p>The Preliminary Design refinements and alternatives were presented during PIC #1 held through the Project Website (https://www.bradfordbypass.ca/pic1/). We encourage you to review the PIC material where you can learn more about the proposed highway.</p> <p>Please note that the Project Team is currently preparing a formal response to your comments received on April 30th, 2021 as part of the PIC #1 review period. Please note that PIC #1 concluded on May 18th, 2021. To view the materials from the PIC including a recording of the webinar, please visit the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>As you are already on the Contact List, you will continue to be notified through email of future PIC #2 and updates for this study.</p>

CT240		To: Project Team From: [REDACTED]	Email	Question regarding noise cancellation methods	04-13-2021	<p>Hi there,</p> <p>As a resident just south of the proposed highway (Queensville Sideroad and Leslie), I was wondering what noise cancellation measures will be taken to not disturb our now quiet neighbourhood once the highway is up and running?</p> <p>Thanks in advance!</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>A Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's <i>Environmental Guide for Noise</i>. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barriers walls, where the proposed improvements to the project are expected to increase the ambient noise level by at least five decibels or result in a projected noise level of 65 decibels or more. For noise mitigation to be warranted, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide.</p> <p>Construction-related noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan. Further details are available in MTO's Noise Guide.</p> <p>In addition, MTO is continuously finding innovative solutions to address noise mitigation efforts through engineering of pavement materials and structures, which will be factored into the appropriate design phase.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future Public Information Centre (PIC) #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p>

						Just checking in. Has someone been able to review my questions?	
CT225.3		<p>To: Project Team</p> <p>From: [REDACTED]</p> <p>*CC the other people that were sent the OGN</p>	Email	Info on timing of webinar, if info will be available prior to PIC.	04-15-2021	<p>Hello,</p> <p>There is no information at the link about how to register for the May 18 webinar or any details such as the time of the webinar. When and how will these details be provided?</p> <p>Could you clarify why the information from the PIC will only be available for a two week period? If it is not interactive, it is not really necessary to time limit this information is it?</p> <p>Will any information at all on the project or the studies conducted to date be provided prior to the May 18 webinar? Will the traffic studies I have requested numerous times be provided prior to May 18th? Will any of the environmental studies or data be provided prior to the May 18 PIC? Will the Engineering Design update or the Environmental Technical update be provided to the public prior to May 18? What are the "key topics" that will be covered on May 18?</p> <p>Stakeholders cannot give meaningful feedback or participate in a meaningful way if the relevant information is not made available for a reasonable period before the consultation takes place.</p> <p>Regards,</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study, and for participating in the virtual Public Information Centre (PIC) and Webinar session.</p> <p>The first PIC was hosted virtually in two (2) parts through the Project Website where interested stakeholders were able to learn more about the preliminary design study. The two-week review period was instituted to gather feedback from stakeholders on the materials and information presented which would factor into the May 18th, 2021 Webinar presentation. The PIC #1 materials and a recording of the Webinar will remain on the Project Website for the duration of the study and comments on the materials will be accepted at any time.</p> <p>In response to your questions posed at the PIC #1 Webinar, the questions and key themes presented at the PIC #1 Webinar were selected based on feedback received from stakeholders during the PIC #1 review period (April 22 – May 6, 2021). The Project Team identified common themes (Species at Risk, surface water, groundwater, traffic impacts, etc.) from stakeholder comments and questions and developed the questions and answers to address as many of these themes as possible.</p> <p>The intent was not to provide a response to every question, but to speak to the individual themes and topics as a way of supplementing the virtual PIC information and provide an initial response to a larger group. The wording of the question was phrased using the theme or topic of several questions to avoid potential privacy concerns and to best capture a broader range of questions.</p> <p>The Project Team is developing and will provide a formal response to each commenter with information related to their specific question, comment or request. Responses will be provided to individuals who submitted comments during both the virtual PIC review period and the Webinar. We recognized that you have submitted comments during both of these sessions and</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>will provide a response to your questions in a subsequent response.</p> <p>The Project Team is continuing to conduct field investigations to support the EA study, and development of the design and environmental reports. Study results will be presented at PIC #2 and documented in the Transportation Environmental Study Report (TESR), which will be available for public review. As you are presently on the Project Contact List, you will be directly notified when the TESR is available for review. We look forward to your participation and feedback as study information is made available through meetings, PIC #2 and the TESR.</p> <p>The Project Team will consider minimizing impacts to wetland areas through engineering refinements. Some approaches to mitigation may include design refinements implemented in consultation with regulatory agencies including the LSRCA and NVCA to minimize potential impacts, supplement these refinements and develop appropriate mitigation strategies. Each conservation authority remains a key stakeholder with whom the Project Team will continue to consult throughout the study.</p> <p>We thank you for your continued participation in the Project consultation process and encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available. The Project Team is continuing to review and address comments as they are submitted and will follow up with you on additional questions and comments that you have share with us.</p> <p>We look forward to your continued participation and welcome your questions and comments as the study progresses.</p>
CT084.1		To: Project Team From: [REDACTED]	Email	Information on bridge heights	04-15-2021	<p>Hello , some information required/needed for bradford bypass study area , on bridge heights , if there has been an agreement as of yet , on the east and or west Holland river systems . thank you</p> <p>[REDACTED]</p>	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Tuesday, June 29, 2021 1:26 PM To: [REDACTED] Subject: RE: Navigation/waterways</p> <p>Hello [REDACTED]</p> <p>Thank you for your interest in the BradfordBypass Preliminary Design and Class Environmental Assessment (EA) Study.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>The design and future construction of the bridges for both the Holland River and East Holland River branches will take into consideration navigability and maintaining proper access for watercraft through this location.</p> <p>The Project Team will engage with and consult Transport Canada to design the bridge structures in compliance with the <i>Canadian Navigable Waters Act</i>. As part of this process, the Project Team continues to seek input from members of the public regarding information about the types of vessels in use within the Holland River and Holland River East Branch to better inform the design by understanding the existing navigable function of these waterways. The span of the structure will likely be substantially larger than the river itself to accommodate navigability and environmentally sensitive features. We would appreciate receiving any additional information you may have regarding navigability and the types of vessels being used on these waterways.</p> <p>The Project Team recently hosted a virtual Public Information Centre (PIC #1) on May 18, 2021, which included a two-week stakeholder review/comment period that began on April 22, 2021 and ended on May 6, 2021. The purpose of PIC #1 was to showcase the study, update and summarize existing conditions, illustrate the Preliminary Design refinements as compared to the 2002 approved EA study, outline the evaluation criteria, and solicit input, feedback and comments on the Preliminary Design refinements. We encourage you to visit the Project Website (https://www.bradfordbypass.ca/pic1/) where you can review the materials presented including the Webinar recording as well as feedback received during the PIC # 1 review period.</p> <p>You are presently on the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p>

CT251		To: Project Team From: [REDACTED] - <i>President and Director of Planning at Innovative Planning Solutions</i>	New Stakeholder Comment Form	Representing land owners in the area of the BBP	04-18-2021	<p>I am the planning consultant representing landowners within Community Plan Area 5 within the Bradford Settlement Area. The proposed bypass will run directly through this area and will impact a number of property owners.</p> <p><i>[Community Plan Area 5 (aka Special Policy Area 8) shown below]</i></p> 	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team notes your concern regarding the location of the Bradford Bypass relative to Community Plan Area 5 within the Bradford Settlement Area. As we understand, Community Plan Area 5 is identified as Special Policy Area 8 under the new Bradford West Gwillimbury Official Plan (March 2021) and is located in the vicinity of County Road 4/Yonge Street, north of the proposed Bradford Bypass. The Project Team notes that this area has been identified for future urban development and a secondary plan is being developed under the current Official Plan review. We would appreciate receiving proposed development plans on lands overlapping and adjacent to the 2002 EA Approved right-of-way for the Bradford Bypass.</p> <p>The Ministry will meet with individual landowners through 2021 and 2022 prior to Public Information Centre (PIC) #2 to discuss impacts to individual properties, understand concerns from landowners and identify opportunities to mitigate impacts. If you are interested in speaking to the Project Team regarding specific questions related to your property or development plans as it relates to the Bradford Bypass, please let us know and we can discuss your specific questions and concerns.</p> <p>The Preliminary Design refinements and alternatives were presented during PIC #1 through the Project Website (https://www.bradfordbypass.ca/pic1/). As part of this discussion we encourage you to review the available PIC material, including the preliminary highway alignment information in proximity to Special Policy Area 8 and interchange refinement alternative for the County Road 4 interchange (https://www.bradfordbypass.ca/2021/04/12/15-county-road-4-interchange/). Refinement of the highway alignment within the study limits and consideration for the proximity of the highway to existing and approved developments is underway.</p> <p>As you may be aware, the Ontario government 2021 Budget allocated funding for the Bradford Bypass early works, which includes a grade separation at County Road 4/Yonge Street.</p>

						sent some emails so you should have that address anyways. Anyways if you could send that, that would give me a better idea of what the timing is. Anyways if you can give me a shout at [REDACTED] that would be great thank you.	[REDACTED] asked why the project was delayed [REDACTED] indicated priorities for different governments have changed, so it was delayed in the past. [REDACTED] asked what happens after the preliminary design. [REDACTED] indicated she cannot speak to what exactly will happen after, however that could be when building is initiated. [REDACTED] indicated it would be a few more years before construction. [REDACTED] agreed with his statement [REDACTED] asked [REDACTED] if he had any additional questions. [REDACTED] said he did not [REDACTED] indicated [REDACTED] can email or call if he has any further questions, [REDACTED] said thank you for the information.
CT209.3	[REDACTED]	To: Project Team From: [REDACTED]	Email	Gantt Chart for the Project	04-22-2021	Thank You [REDACTED]	
CT257	[REDACTED]	To: Project Team From: [REDACTED] - General Public	Email	Timeline for project	04-20-2021	Good afternoon Can you please confirm what this project involves and what the timeline will be to proceed? Will it be dependent on the approval of the overall bypass project, or is it designated to be completed regardless of the bypass status? Thank you. [REDACTED]	From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Tuesday, June 29, 2021 2:20 PM To: [REDACTED] Subject: RE: Re 400/9th line structure replacement Hello, Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. The Bradford Bypass is a new 16.2 kilometre, controlled access freeway connecting Highway 400 and Highway 404 in the Regional Municipality of York and County of Simcoe. The main components of the Project include: <ul style="list-style-type: none"> Proposed full and partial interchanges at County Road 4, Bathurst Street and Leslie Street; Proposed grade separated crossings at intersecting municipal roads and watercourses; and, The project will include two river crossings over both the Holland River and Holland River East Branch. The first Public Information Centre (PIC) was recently held through the Project Website https://www.bradfordbypass.ca/pic1/ . We encourage you to

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>The planning process for the 2002 Approved EA narrowed down alternatives from a broad range of potential solutions to the concept, ultimately selected as the Technically Preferred Route to a Planning level of detail. The study required gathering relevant information with respect to the existing and future conditions in the analysis area, so that the impacts (both positive and negative) of each alternative could be compared under different environmental factors. To allow a satisfactory and comprehensive comparison to be made, information was gathered and grouped under five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>Alternate corridor locations for the freeway are not being considered as part of this study as the Technically Preferred Route for the Bradford Bypass was approved through the 2002 EA. This preferred alignment is technically preferred for a freeway in terms of highway network expansion, ease of construction, relationship to municipal land use planning, as well as having fewer negative impacts to residential and natural areas when compared to other route options considered.</p> <p>The purpose of the proposed Bradford Bypass is to improve connectivity to the region as well as to provide capacity to accommodate future demand in the region. The new freeway will relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and support urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404.</p> <p>Significant population growth is projected for both Simcoe County, with an estimated increase to 416,000 residents by 2031; and the Regional Municipality of York estimated increase to 1.79 million residents by 2041. The Bradford Bypass has been proposed as a response to this dramatic growth in population and travel demand in the area, and the forecasted increase in congestion on key east-west roadways linking Highway 400 to Highway 404. The "2019 Places to Grow: Growth Plan for the Greater Golden Horseshoe" enacted by the Government of Ontario identifies, and supports planned transportation corridors</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>that are required to meet projected travel demand needs, including the proposed Bradford Bypass.</p> <p>The preliminary design phase will include refinements to the Technically Preferred Route based on various factors, including an updated traffic demand assessment and current environmental impact assessments. As part of that refinement, the Project Team is actively engaged with local municipalities, regions, agencies and Indigenous communities for consultation on the design. The results of these consultations will be incorporated into the Ministry's preliminary design study and presented to the public at key design stages.</p> <p>Alternatives for the proposed design are available within the Public Information Centre (PIC) #1 materials on the Project Website (https://www.bradfordbypass.ca/pic1/). These alternatives outline proposed routes and interchanges to be used for the bypass.</p> <p>We have added you to the Project Contact List and you will be notified through email of future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. CT269		To: Project Team From: [REDACTED]	Email	Add to contact list	04-22-2021	We own a [REDACTED] to the [REDACTED] of the proposed bridge location and would like to be kept informed regarding how this will effect our business operations, both during the construction process and after as the river access is critical to the operation of the company and over 60 boats that we provide docking for.	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Thursday, June 3, 2021 1:47 PM To: [REDACTED] Subject: RE: Mailing list</p> <p>Hello,</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>Preliminary design of the highway and bridge structures is currently underway. The design and future construction of the bridges will take into consideration navigability and maintaining proper access to the Holland River and Holland River East Branch. The Project Team is also actively engaging with Transport Canada to design the bridge structures in compliance with the <i>Canadian Navigable Waters Act</i>. Transport Canada will be consulted throughout the study to maintain required navigability throughout construction and operation. As part of this process, we are seeking input from members of the public regarding information about the types of vessels in use within the Holland River and Holland River East Branch to better inform the design by understanding the existing navigable function of these waterways. We would appreciate receiving any additional information you may have regarding navigability, by providing us with the following information about your vessels:</p> <p>Type of vessel used:</p> <ul style="list-style-type: none"> • Canoe/Kayak length • Commercial vessels 8 m length • Motorized Boats <5 m • Motorized Boats 5 m to 8 m • Motorized Boats > 8 m • Other type (please provide written details) <p>The preliminary design refinements and alternatives being developed under the current Preliminary Design and Class EA Study were presented during Public Information Centre (PIC) #1 held through the Project Website</p>

CT239.1 *CT Carried over from previous comment		To: Project Team From: [REDACTED]	Email	Email	04-22-2021	<p>Hello</p> <p>This highway will be very close to homes especially on Yonge street. How to you plan on running a highway right beside peoples homes who have spent millions.</p> <p>Also the world is changing to working from home and this will be a future trend now that everyone sees it is possible so why build a highway that may not be used much in the future.</p> <p>[REDACTED]</p> <p>Sent from my iPhone</p>	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Tuesday, June 29, 2021 2:24 PM To: [REDACTED] Subject: RE: Bypass Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team acknowledges your concern regarding the construction of the freeway and the potential impact on residential homes. As part of this EA Study, 15 environmental studies are being undertaken to identify and evaluate potential impacts of the Project and recommend mitigation measures to reduce these impacts. These studies will include, but not limited to, a Noise Impact Assessment, Air Quality Impact Assessment,</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>Property Impact Assessment, Land Use Factors Assessment, and Human Health Assessment, which will all evaluate potential impacts of the freeway on adjacent landowners. The results of these investigations will be summarized in technical design and environmental reports, which will be available for public review later in the study.</p> <p>The Ontario Ministry of Transportation (MTO) will also work directly with individual property owners regarding direct impacts to their property as a result of the proposed project. Individual meetings will be held between the Project Team and directly impacted property owners to discuss property-specific concerns and establish next steps.</p> <p>The purpose of the proposed Bradford Bypass is to improve connectivity to the region as well as to provide capacity to accommodate future demand in the region. The new freeway will relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and support urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404.</p> <p>Significant population growth is projected for both Simcoe County, with an estimated increase to 416,000 residents by 2031; and York Region estimated increase to 1.79 million residents by 2041. The Bradford Bypass has been proposed as a response to this dramatic growth in population and travel demand in the area, and the forecasted increase in congestion on key east-west roadways linking Highway 400 to Highway 404. The "2019 Places to Grow: Growth Plan for the Greater Golden Horseshoe" enacted by the Government of Ontario identifies, and supports planned transportation corridors that are required to meet projected travel demand needs, including the proposed Bradford Bypass and to address the expected long-term travel demand in the area.</p> <p>You are presently on the Project Contact List and you will continue to be notified through email of the future Public Information Centre (PIC) #2 and updates for this study.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p>

							<p>Based on the Preliminary Design of the Preferred Route, a Noise Impact Assessment will be completed as part of the study to identify potential impacts and recommend mitigation measures/future commitments.</p> <p>The Noise Impact Assessment for the Preliminary Design of the Preferred Route will be undertaken according to the Ontario Ministry of Transportation (MTO) Environmental Guide for Noise (October 2006) (Noise Guide). Noise mitigation consideration is given to receptors that experience an increase in noise levels compared to the "no-build" alternative or predicted noise levels are over a given threshold. For noise mitigation to be warranted, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide. Noise mitigation options during construction considers the type/operation of equipment, hours of operation or proximity of equipment to Noise Sensitive Areas (NSAs). The technical and economic feasibility of various alternatives of noise mitigation options such as timing constraints, setback distances, quieter alternatives are evaluated prior to selection of a noise mitigation option. Further details are available in MTO's Noise Guide.</p> <p>Littering is prohibited under Section 180 of the <i>Highway Traffic Act (1990)</i>. MTO has contractors to remove litter along freeways to help keep it clean and free of litter.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. CT-PIC1-001		To: Project Team From: [REDACTED]	New Stakeholder Comment Form	Pollution of Waterways	04-22-2021	<p>*add to CL</p> <p>Each person is concerned about environmental impact. At this time, a learning situation about efforts to protect natural flora and fauna. Prevent soil erosion or other factors that can pollute existing waterways.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Project Team acknowledges your concerns regarding environmental impacts related to the natural environment, soil erosion and impacts to waterways.</p> <p>Preliminary Design for the Bradford Bypass will include a wide range of studies in accordance with EA and current legislative requirements.</p> <p>Studies being undertaken to address constraints and potential impacts to natural flora and fauna include: Fish and Fish Habitat Existing Conditions and Impact Assessment, including aquatic species at risk; Terrestrial Ecosystems Existing Conditions and Impact Assessment (including an assessment of vegetation and vegetation communities, wildlife and wildlife habitat, species at risk and designated natural areas); Drainage and Hydrology studies; Fluvial Geomorphology; groundwater impact assessments; and landscape design. These studies, along with an erosion and sediment control risk assessment, and waste and contamination studies will inform design decisions as they relate to erosion, scour and water quantity and water quality constraints.</p> <p>A complete list of EA studies is presented on the Project Website, with engineering and environmental studies outlined in the PIC #1 material. Please refer to the following areas:</p> <ul style="list-style-type: none"> https://www.bradfordbypass.ca/2021/04/08/3-refinements-and-alternatives-evaluation-process/ https://www.bradfordbypass.ca/2021/04/09/6-overall-environmental-considerations-bradford-bypass/ <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p>

							<p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-PIC1-002		<p>To: Project Team</p> <p>From: [REDACTED]</p>	Email	Impacts of Construction on Well water	04-22-2021	<p>To Whom It May Concern:</p> <p>I would like to be part of the mailing list and any updates.</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>I am concerned about my water well and if the the Highway construction will alter my water coming from my well. [REDACTED]</p> <p>Thanks</p> <p><i>[Property is located [REDACTED] impacts to their well are unlikely]</i></p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>As part of the Preliminary Design and EA study, a door-to-door well assessment of all properties that are within a 500 m radius of the construction area will be completed. As part of this assessment, homeowners would potentially receive a letter and questionnaire that will provide AECOM with a brief history/information of any water well(s) on your property. As part of this questionnaire, homeowners will be asked if they would like AECOM to come to the property (with COVID protocols) and test the rate of flow, take pictures of the well and collect an untreated groundwater sample for analysis against drinking water standards. This assessment can help to form a baseline of your water well condition prior to construction activities, this could potentially result in further monitoring/samples taken during and after construction of the new highway.</p> <p>Based on the Preliminary Design of the Preferred Route, a Drainage and Hydrology Assessment and Groundwater Impact Assessment will be completed as part of the study to identify potential impacts of highway runoff and stormwater on surface water and groundwater and develop appropriate mitigation measures to protect the Holland River watershed.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p>

CT-PIC1-003		To: Project Team From: [REDACTED]	Email	Construction Timeline	04-22-2021	<p>Assuming the current time-line is unchanged, what are anticipated construction start and completion dates.</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>Preliminary Design for the overall Bradford Bypass project is anticipated to be completed in early 2023. Detail Design and Construction will follow, subject to funding and approvals.</p> <p>The Project Team is also identifying opportunities for early works – Advanced Contracts as part of this project. Some preliminary early works activities that are currently being considered could include: new bridge construction (excluding watercourse crossings), bridge replacement or expansion, and utility relocation. As you may be aware, the Ontario government 2021 Budget allocated funding for the Bradford Bypass early works, which includes a grade separation at County Road 4/Yonge Street.</p> <p>Prior to the commencement of any early works, MTO is still required to gather information about environmental conditions, predict and mitigate impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous Communities, and document decision-making. Other provincial and federal legislative and permitting processes would still apply.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p>

CT-PIC-1-003.1		To: Project Team From: [REDACTED]	Email	Construction Timeline	04-23-2021	Now I am concerned. Do you have a working timeline? Is it a secret? What is there to consider? You must be working with timeline. Please provide this simple detail.	* See response above
CT-PIC-1-004		To: Project Team From: [REDACTED]	New Stakeholder Comment Form	Recommendations on the Design Alternatives	04-22-2021	<p>Comments about PIC materials:</p> <p>PIC #1 PG 9 I think "Refinement Alternative 2 – Tangent Transition East of River Crossing" is the most appropriate. The geometry of the other alternative seems odd and unnecessary to me. I ultimately agree with the realignment of the highway 150m to the south as displayed in the PIC materials regardless of which alternative is chosen.</p> <p>PIC #1 PG 10 I think "Refinement Alternative 1 – Alignment Shift To The North" is more suitable. An alignment flare requires a wider ROW in comparison to an alignment shift. Also, the eastbound roadway would be in between (and in close proximity to) the two adjacent hydro towers. The realignment shift to the north by 50m as shown in the PIC materials makes more sense as it offers the same level of service, yet minimizes additional ROW required. I ultimately agree it is not worth relocating the hydro towers.</p> <p>PIC #1 PG 12 I think "Highway 400 Refinement Alternative 3 - Directional Ramps Without Basketweave" is the best option. I don't think the basketweave is necessary as shown in Alternatives 1 & 2. c (Although, the diagrams do appear to show that auxiliary lanes will appear)</p> <p>PIC #1 PG 14 I am in support of Alternatives 1 or 3. The removal of the S-E/W at Queensville Sideroad would be detrimental to the community, and I think it would result in unacceptable traffic operations, as motorists would be forced to divert to Leslie Street and Woodbine Avenue. I also think that the proposed S-E/W ramp in Alternative 4 is not necessary, and would require not only a significant amount of</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Project Team acknowledges and appreciates your detailed feedback and preferences on the refinement alternatives presented and the PIC material. We will consider these comments as the study progresses through Preliminary Design.</p> <p>The Preliminary Design and Environmental Assessment of the Bradford Bypass includes proposed interchanges at County Road 4, Bathurst Street and Leslie Street. These interchange locations were identified in the 2002 Approved EA which were developed, evaluated, and selected through the evaluation process.</p> <p>The traffic demand assessment carried out as part of this study confirmed the locations of the proposed interchanges would serve the provincial needs. Interchange configuration refinements at the proposed locations within the Study Area are being considered during the current study based on 5 broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>It is noted that municipalities within the Study Area of the Bradford Bypass have generated Official and Transportation Master Plans based on the proposed Bradford Bypass as per the approved EA (2002) in order to address traffic demand as a result of population and employment growth projections. As a result, the Project Team will continue to engage municipalities and will support future municipal interchange initiatives.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>ROW acquired, but also a partial redesign of the carpool lot at Queensville Sideroad. Whether Alternative 1 or 3 is chosen should depend on whether the W-S ramp is 1 or 2 lanes wide. If it is only 1 lane, I would think that Alternative 3 is the most logical. If the ramp is 2 lanes wide, Alternative 1 makes more sense. Regardless of this, it would not matter to me whether Alternative 1 or 3 is chosen.</p> <p>PIC #1 PG 15 The proposed Parclo A4 interchange design is great, except that the S-E ramp should begin after the intersection with the W-N/S ramp. This is for two reasons: -The current design does not allow adequate distance/space for traffic turning LEFT onto County Road 4 from the 8th Line and for traffic travelling on Barrie Street, continuing north onto County Road 4, to merge over to the right lane and access the S-E ramp onto the new highway (especially with the E-N slip lane currently in place at the County Road 4 / 8th Line intersection). -This northerly shift in the S-E ramp entrance to beyond the intersection with the W-N/S ramp can allow the potential construction of a carpool lot in the southeast corner of the interchange area (outside of the S-E ramp, NOT in between the S-E ramp and the freeway). A final note: the section of County Road 4 between the 8th Line and the E-N/S intersection should have a speed limit of 50km/h. A sidewalk should be included on the east side of County Road 4 between the 8th Line and the W-N/S intersection, provided that a carpool lot is constructed as previously mentioned.</p> <p>PIC #1 PG 16 I think Alternatives 1 or 2 are good options, although I have a moderate preference of Alternative 2. The realigned entrance of the marina in Alternative 3 is unnecessary as neither the marina entrance road, or Bathurst Street north of the new bypass have/would have enough traffic to warrant such a connection. If it is determined that Hochreiter Road is required to be rebuilt for property access, Alternative 1 should be chosen, and the new Hochreiter Road would connect with Bathurst Street adjacent to the realigned marina entrance, as approved in the 2002 EA. If it is determined that Hochreiter Road DOES NOT need to be reconstructed, Alternative 2 should be carried forward. The section of Bathurst Street that the bypass would intersect does not have a lot of truck traffic, and it has an amount of traffic</p>	<p>This Preliminary Design study will include the consideration of carpool lots within the proposed highway corridor. Several considerations will be identified when determining the feasibility, and if applicable, the location of a potential carpool lot. The Project Team will continue to assess the feasibility of incorporating carpool lots in the next design phase.</p> <p>At this time, a decision on the name of the proposed new highway has not been made.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>where roundabouts are best suited. The construction of roundabouts would increase the flow of traffic, would optimally serve the required and more popular traffic movements, and would reduce vehicular gas emissions. I have a final detail that is not very significant, but is worth noting. The south roundabout could be constructed as a "dogbone" roundabout rather than a typical roundabout, since the northern section of the "circulatory roadway", between the north and southbound lanes of Bathurst is redundant.</p> <p>PIC #1 PG 17 I do not think the Leslie Street interchange should be built as a Parclo A2 because of additional property impacts, and that a potential left turn lane onto the N/S-W ramp would be better suited south of the intersection and onto the bridge, as opposed to north of the ramp. Instead, the interchange should retain the original design as approved in the 2002 EA, and/or as shown on PG 10 of this PIC.</p> <p>Miscellaneous Comments: An interchange should be constructed at the 10th Sideroad/County Road 54, as the Town of BWG has already requested. This new interchange would relieve pressure on the County Road 4 interchange, and would better serve nearby industrial lands, and new residential development. Since the time the original EA/design studies were conducted, rapid suburban growth has occurred on the west end of Bradford.</p> <p>A carpool lot should be constructed at County Road 4 as previously mentioned. This would be beneficial, as residents from Innisfil and South Barrie could meet here with Bradford residents, and carpool to Downtown Toronto, and the eastern Greater Toronto Area via the new Bradford Bypass and Highway 404. Residents in Bradford close by to this carpool lot could also walk/bike (provided that a sidewalk is constructed as also previously mentioned), either to carpool with someone else, or to catch a GO Bus or other public transportation. Carpool lots at other interchanges along the bypass route would not be beneficial.</p>

						<p>too close and will destroy current habitat in the fields and trees behind, and also a major concern is noise levels.</p> <p>How close will this bypass be to our homes? What is being planned to reduce noise levels? What are the plans to conserve the tree line?</p> <p>As a representative for concerned Wyman neighbors, please contact me via email or phone.</p> <p>██████████ ██████████ ██████████</p>	<p>The centerline or 'middle' of the BBP will be approximately 50-60m from the edge of the right-of-way. The proposed alignment of the Bradford Bypass and interchange refinement alternative at County Road 4/Yonge Street can be viewed as part of the PIC materials (https://www.bradfordbypass.ca/2021/04/09/8-general-design-refinements/). This image shows the approximate location of the alignment and interchange ramps in proximity to the Wyman Crescent subdivision to the south. Refinement alternative 1 proposes a slight northerly shift of the highway alignment, creating more separation between the highway and developed lands to the south of the highway right-of-way, compared to the 2002 Approved EA alignment.</p> <p>A Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's <i>Environmental Guide for Noise</i>. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barrier walls, where the proposed improvements to the Project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted as part of the design, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide. Construction-specific noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan. Further details are available in MTO's Noise Guide.</p> <p>In addition to current guides and best management practices, MTO is continuously finding innovative opportunities to address noise mitigation through engineering of various types and enhancements of pavement materials and pavement structures which will be factored into the appropriate design phase.</p> <p>The Project Team will work closely with municipalities, the MECP, the MNRF, and Conservation authorities to discuss mitigation and potential requirements for overall benefit measures to the landscape surrounding the Bradford Bypass, as a result of potential impacts to the natural environment, including woodlots and tree lines.</p> <p>As part of this Preliminary Design study, MTO will develop a preliminary landscape plan for the refined alternative through consultation with local municipalities and regulatory agencies. The landscape plan will address both municipal and natural environmental requirements and provide preliminary landscaping mitigation, compensation or enhancements within the project</p>

						<p>Professor Day Drive and Artesian Industrial Parkway/CN Rail line in Bradford.</p> <p>I suggest the Leslie Street interchange be relocated west to the second concession. Twenty years ago, the Leslie interchange made sense. Today second concession is an excellent arterial road. East Gwillemerry is growing significantly between Leslie and Yonge.</p> <p>The four lanes on Second concession should be extended from Mount Albert Rd. to the new link. Second concession is about half-way between the Bathurst interchange and the Link-404 interchange.</p> <p>This interchange would relieve the growing traffic on Green Lane and provide excellent access to central Newmarket from the Link. It also would reduce growing traffic on Yonge that will increase between Bathurst and Green Lane.</p> <p>The exchange at Leslie is problematic in the Sharon Village area - Leslie on Mount Albert. Moving the interchange west to second concession eliminates the need to upgrade Leslie to a proper arterial road.</p> <p>If users of the new link are going to Newmarket, they are likely to go to 404 and go south and exit at Green Lane or Davis. The second concession interchange would positively impact traffic flow in these areas.</p> <p>In addition it is desirable to include the building north side of the interchange at Mullock in the project, otherwise, traffic will increase on Davis west bound and Leslie south bound.</p> <p>Thank you for the opportunity to comment.</p> <p>Best regards,</p> <p>██████</p>	<p>At this time, a decision on the name of the proposed new highway has not been made.</p> <p>The Preliminary Design and Environmental Assessment of the Bradford Bypass includes proposed interchanges at County Road 4, Bathurst Street and Leslie Street. These interchange locations were identified in the 2002 Approved EA which were developed, evaluated, and selected through the evaluation process.</p> <p>The traffic demand assessment carried out as part of this study confirmed the locations of the proposed interchanges would service the provincial needs. Interchange configuration refinements at the proposed locations within the Study Area are being considered during the current study based on 5 broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>It is noted that municipalities within the Study Area of the Bradford Bypass have generated Official and Transportation Master Plans based on the proposed Bradford Bypass as per the approved EA (2002) in order to address traffic demand as a result of population and employment growth projections. As a result, the Project Team will continue to engage municipalities and will support future municipal interchange initiatives.</p> <p>Improvements to, and/or widening of, municipal/regional roads will be further considered and implemented by York Region and East Gwillimbury and are not being considered as part of this Preliminary Design and EA study at this time.</p> <p>The Bradford Bypass and associated interchanges will be designed based on current MTO design standards.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. CT-WEB-002		To: Project Team From: [REDACTED]	Q and A	Name of the BBP	05-18-2021	<p>"Why do the AECON folks call the project the 400-404 Link, but the MTO folks continue to call it the Bradford Bypass?</p> <p>The project should have one name — 400-404 LINK"</p> <p>The initial EA was a long time ago. MTO has new standards for 400 series highways. Will the project be built to the latest standards or those in place at the time of the EA?</p> <p>Will consider of moving the interchange at Leslie Ave to 2nd Concession be considered as an alternative in the the environmental study?</p>	*See response above
CT-PIC1-010	[REDACTED]	To: Project Team From: [REDACTED]	Email	Noise Mitigation Measures Proximity to a residential neighborhood	04-22-2021	<p>I reviewed all the info posted on the Bradford Bypass website for the Public Information Center 1. I have some questions regarding the alignment of the bypass in relation to the residential properties in [REDACTED]</p> <ol style="list-style-type: none"> 1. I see the alignment of the Bypass has been moved North by [REDACTED] What will be the exact distance between the the end of the residential properties and the Bypass roads? 2. Will there be any sound barriers or retaining walls built in this section behind [REDACTED] 3. Will the Bypass be built below grade so that there is a hill that acts as a natural sound barrier? I see on the site it mentions that there will be underpass at Professor Day drive. Does this mean that the portion of the bypass behind [REDACTED] will in fact be lower then the grade of [REDACTED] 	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The centerline or 'middle' of the BBP will be approximately 50-60m from the edge of the right-of-way. Refinement alternative 1 proposes a slight northerly shift of the highway alignment, creating more separation between the highway and developed lands to the south of the highway right-of-way, compared to the 2002 Approved EA alignment. The refinement of the highway alignment geometry considers environmental and engineering design constraints. The preferred alternative to the preliminary design with details in the area of [REDACTED] will be presented at PIC #2, and available for</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						Thanks,	<p>public review and comment. Building upon the preliminary design and environmental assessment study, further refinement of the design will be carried out and finalized during the detail design phase.</p> <p>A Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's Environmental Guide for Noise. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barriers walls, where the proposed improvements to the project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide.</p> <p>Construction-related noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan. Further details are available in MTO's Noise Guide.</p> <p>In addition, the Ministry is continuously finding innovative opportunities to address noise mitigation efforts through engineering of various types and enhancements of pavement materials and pavement structures which will be factored into the appropriate design phase.</p> <p>It is noted that the proposed overpass and underpass design/locations are preliminary in nature at this time and are subject to change during development of the Preliminary Design as well as subsequent phases of design. The freeway crossings of Professor Day Drive and County Road 4/Yonge Street are currently planned as underpasses, and the existing berm north of Chelsea Crescent is anticipated to act as a natural noise barrier.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p>

CT-PIC1-013		To: Project Team From: [REDACTED] General Public	Email	Opposition for the BBP	04-23-2021	<p>Hello,</p> <p>Based on the feedback provided by [REDACTED] and my own opposition to highway infrastructure in this location, I want to express my strong opposition to this project. The environmental argument that project proponents are pushing that the highway will reduce congestion, is flawed. Building additional highway capacity does not improve congestion and there is relevant research to support this. The logic that building highways solves congestion is outdated in my opinion.</p> <p>I am expressing my position to be recorded under public feedback.</p> <p>Thanks, [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Project Team acknowledges your opposition to the project. These comments will be recorded as part of the public record for the PIC and the Preliminary Design Study.</p> <p>MTO is undertaking a Traffic Study as part of the Preliminary Design and EA study. Travel time savings and projections were calculated using the Provincial Greater Golden Horseshoe Model (GGHM) by comparing scenarios with and without the Bradford Bypass corridor in place. This assessment includes various key origin and destination locations within the corridor</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>including municipal centres in the region. The model accounts for population and employment targets by region, as identified in the <i>Places to Grow Act</i>.</p> <p>Scenarios include: Existing Conditions Network, 2041 No Build Scenario, and 2041 Build Scenarios. Travel times under each scenario are calculated and compared to obtain the anticipated travel time savings. To clarify, travel time savings are not an average of 35 minutes, but rather a range between 10-35 minutes. Travel time savings are calculated utilizing the scenarios above based on the time of day and key origin and destination locations identified using an area-wide transportation model (with a 2041 horizon year).</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-PIC1-014	██████	To: Project Team From: ██████████ General Public	Email	Accessing PIC 2 Proximity to a residential neighborhood More information on proposed designs	04-23-2021	<p>I was wondering how to access the web session, as I have an older pc, and am not very knowledgeable on the iPad, (only used for emailing, surfing the net, and ebooks).</p> <p>I would like to see the design of the Leslie Street ramps specifically, as this is to be built ██████████ from my house, and go through farmland that has been in families for generations.</p> <p>Please how I can participate in the May 18 webinar.</p> <p>Thank you very much ██████████</p> <p>Sent from my iPad</p>	<p>[Includes comments from CT-PIC1-014.1]</p> <p>Hello ██████████</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The proposed alignment of the Bradford Bypass and interchange refinement alternatives at Leslie Street can be viewed as part of the PIC materials (https://www.bradfordbypass.ca/2021/04/12/17-leslie-street-interchange/).</p> <p>A Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's Environmental Guide for Noise. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barriers walls, where the proposed</p>

		From: [REDACTED] General Public	Comment Form	Request to make the BBP a toll route Noise Mitigation Measures		<p>I am concerned with the ramps affecting Leslie Street, as we have high traffic now, and we can hear the noise of the traffic from Highway 404 with our windows closed.</p> <p>We have issues with speeding in our area, and York Region Police are always pulling cars over in front of my house for speeding.</p> <p>We also have a [REDACTED] less than 1 kilometre from the proposed intersection.</p> <p>I would like to see this road tolled, money going to protect our wetlands, and our river from salt, brine, as our roads are heavily salted. The speed set no more than 70 or 80 kilometres per hour.</p> <p>We also want noise buffers installed to provide existing long term residents do not have to hear cars and heavy truck tire whinnying all hours of the night, which wake us up.</p> <p>We cannot sleep and leave our windows open as the noise at rush hour 4-8 am is deafening.</p>	
CT-PIC1-015	[REDACTED]	To: Project Team From: [REDACTED] Property Owner	New Stakeholder Comment Form	Opposition and Concern with the BBP	04-24-2021	<p>On April 18 we sent an email to the Project Team and to Minister Caroline Mulroney outlining our concerns and the lack of clarity from the Project Team. We so far have heard from a representative from Minister Mulroney but have not had a response from the Project Team ??</p> <p>Our position was made clear in our email and we await your response.7</p>	*Response to [REDACTED] being drafted by MTO 2021-05-10
CT-PIC1-016	[REDACTED]	To: Project Team From: [REDACTED]	Voicemail	Opposition and Concern with the BBP	04-24-2021	<p>Summary of Voicemail: [REDACTED] left a voice message on the toll-free line. She advised she lives at [REDACTED]. She also mentioned she has a broken hand and cannot type but wanted to talk about the bypass. She noted she doesn't think it is located properly and believes that it should be further north, north of 89 where the congestion starts, including where Bradford Street gets clogged up. She doesn't believe the bypass is going to help because the issue with traffic is those travelling north to Barrie. [REDACTED] also expressed concern with having the bypass go through the Marsh as there is a bird sanctuary, a lot of sensitive areas, it is a run off, and protects from the melt coming down the hills from the former glaciers. She expressed she is not happy that it has been pushed ahead. She believes it should be much further north</p>	<p>Good afternoon,</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The selected route for the Bradford Bypass as documented in the Approved 2002 EA, was chosen, in part, to mitigate impacts to environmentally sensitive areas. Alternative routes to the north were considered at that time. The preliminary design and EA study will review the recommended plans of the 2002 approved EA alignment and develop design refinements and alternatives</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>between Innisfil or just south of Innisfil and Barrie. She expressed that nobody addressed the fact that Bradford Streets are clogged when there are issues on the highway with people from the highway with people trying to cut through and go north on Yonge Street. [REDACTED] would like her input to be considered.</p> <p>Key Concerns/comments:</p> <ul style="list-style-type: none"> • Consideration for a different location and alignment for the highway, preferring a location to the north (Innisfil and Barrie) • Traffic and congestion • Consideration for birds, sensitive areas and the watershed (surface water) 	<p>for the mainline alignment, interchanges and crossings. Alternative locations for the highway are not being considered as part of this study. As this EA study advances, the Project Team will carefully consider impacts to sensitive cultural and natural areas, including wildlife, wetlands, and wildlife habitat within the study area. We will continue to work with environmental agencies, municipalities, conservation authorities and other concerned stakeholders to identify principles and recommendations for mitigating the potential impacts along the highway corridor.</p> <p>The Preliminary Design will also consider minimizing impacts to wetland areas, which will also consider wildlife and wildlife habitat, through engineering refinements and consider the following approaches and strategies:</p> <ul style="list-style-type: none"> • Design refinements implemented in consultation with regulatory agencies including the Ministry of Natural Resources and Forestry and Conservation Authorities (for example: Lake Simcoe Region Conservation Authority, Nottawasaga Valley Conservation Authority) to minimize potential impacts, supplement these refinements and develop appropriate mitigation strategies; • Adherence to conditions of environmental approvals applicable to project elements that interact with or influence provincially significant wetlands; • surface water conveyance and management measures; • strategic plantings to enhance the performance of proposed drainage and storm water management measures; • erosion and sediment control measures to be implemented during construction; • restricting construction-related activities to avoid sensitive periods for aquatic and wildlife species during life cycle stages; • measures for spill control/containment/contingency plans; and • a construction inspection and monitoring plan, including use of qualified personnel, reporting and response procedures. <p>In addition, the Project Team will work to understand and avoid where possible any potential impacts to species at risk within provincially significant wetland areas. Should potential impacts be confirmed to threatened or endangered species, the ministry will work with the MECP to obtain a permit under the <i>Ontario Endangered Species Act</i>. The permitting process may include additional mitigation and / or monitoring conditions, and consultation requirements as environmental conditions to the project.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>In recognition of your concerns about congestion and traffic, MTO is aware that even with all currently planned transportation and transit investments, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). For Ontarians in 2051, average travel speeds are expected to be 16 per cent slower when compared to 2016. This new transportation corridor will relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and support projected urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404. Motorists and trucks are anticipated to see more than a 60 per cent savings in travel time when using the new freeway compared to existing routes along local roads, saving up to 35 minutes each way.</p> <p>Travel time savings and projections were calculated using the Provincial Greater Golden Horseshoe Model (GGHM) by comparing scenarios with and without the Bradford Bypass corridor in place. This assessment includes various key origin and destination locations within the corridor including municipal centres in the region. The model accounts for population and employment targets by region, as identified in the <i>Places to Grow Act</i>.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-PIC1-016.1		To: Project Team From: [REDACTED] General Public	Voicemail	Opposition and Concern with the BBP	04-24-2021	[REDACTED] left a second message on the toll-free line. Her phone number is [REDACTED]. She noted she would also like to point out that Bradford is a growing city and has its own issues in terms of infrastructure and roads and the highway is not going to help them. If there are problems on the 400 highway which there are often, they will be plagued with surplus traffic that they cannot handle. She noted they are beginning to not be able to handle their own traffic. She expressed she believes it's a mistake and thinks city council is making a mistake here as well.	<p>*See Response Above</p> <p>*May 3rd 2021 [REDACTED] called the number that [REDACTED] left. [REDACTED] was not available but her husband asked we send an email to [REDACTED] with our auto response so that he can give this email to [REDACTED]. [REDACTED] will send back her email if she wishes. If she does not email us, her husband said to email the response to the email above.</p>

CT-PIC1-018		To: Project Team From: ██████████ General Public	Email	Land Expropriation Purchasing of Land	04-26-2021	<p>Hello,</p> <p>Has any work been completed yet on expropriation of land? Is there any estimate of the amount of land that would need to be expropriated and cost? What is the legislative process that will be followed to expropriate land? Has the MTO considered purchasing any lands in advance should they come up for sale and be required for the proposed highway route? Are there any studies or publicly available records of land currently owned by the MTO in the vicinity of the proposed route? Are there any Conservation Authority owned lands that will need to be expropriated?</p> <p>Thank you, ██████████</p>	<p>Hello ██████████</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>There are an estimated 80 private properties that will be partially or fully impacted by the Bradford Bypass expansion project. As part of the Preliminary Design, MTO will meet with individual landowners through 2021 and early 2022 to discuss potential or expected impacts to individual properties, working with them to understand their individual concerns and identify opportunities to mitigate impacts.</p> <p>Where appropriate and where there is an identified need, MTO has begun the process of acquiring lands from willing sellers. With respect to the purchase of properties, it is the MTO's preferred approach to negotiate in good faith with owners as early as possible to reach amicable agreements for the acquisition of any properties needed to support important infrastructure improvements like this. Expropriation is only used when agreements can't be reached within suitable project timeframes.</p> <p>MTO has established an alternate process to the former Hearings of Necessity for receiving comments from property owners about a proposed expropriation and for considering those comments. Under this process, any owner of lands who was served a notice of expropriation is given the opportunity to comment on the proposed expropriation. They can do so by submitting comments about the proposed expropriation to the Assistant Deputy Minister, Transportation Infrastructure Management Division, within thirty days of receiving the notice.</p> <p>Individuals can review property records of lands within the vicinity of the proposed Bradford Bypass alignment through their local Land Registry Office.</p> <p>Throughout the study the Project Team will continue to consult with both the Nottawasaga Valley Conservation Authority (NVCA) and Lake Simcoe Region Conservation Authority (LSRCA) where the project crosses through their respective watersheds and Ontario regulated limits. Based on current</p>

CT-PIC1-022		To: Project Team From: [REDACTED]	Email	Recommendations on Alternatives	04-27-2021	<p><u>Bradford Bypass Project Team:</u></p> <p>BA Group has been retained by the property owner of [REDACTED] to provide transportation consulting services. Our scope of work at this time is focussed on the impact on our client's property, of the future Bradford Bypass at Highway 400, in addition to options for future access if the property were to be developed into employment lands.</p> <p>We have reviewed the four Highway 400 refinement alternatives presented on the Bradford Bypass Project Website and we appreciate the opportunity to provide the following comments:</p> <ul style="list-style-type: none"> Although the property required by our client appears to be relatively similar between each of the 4 alternatives, it would be appreciated if the Bradford Bypass Project Team could provide us with the amount of property required from our client for each alternative, such that we have a better understanding with respect to how the project will impact future development opportunities. 	<p>Hello [REDACTED]</p> <p>Thank you for your interest for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>The Project Team thanks you for the opportunity to meet with you and your client on Friday May 21, 2021. Based on this meeting, the Project Team understands the following to be the key items discussed during the meeting.</p> <ul style="list-style-type: none"> Client/BA Consulting noted preference for Alternative Refinement 3 for the Highway 400 Interchange as this requires the least amount of property and maintains access to Highway 88. Public Information Centre (PIC) #2 will be held in Fall of 2022 with the filing of the Transportation Environmental Study Report anticipated to be end of 2022. Project Team will confirm how much property will be required once preferred alternative is selected and right-of-way/grading requirements are known. An appraisal and negotiations will follow. <p>MTO will work directly with individual property owners regarding direct impacts to their property as a result of the proposed project. Individual</p>

						<p>Alternatives 1 & 2: (Basket Weave)</p> <ul style="list-style-type: none"> As the basket weave design for these options does not allow access to Highway 88 for westbound vehicles from the Bypass, we are concerned that the limited access at Highway 88 would require westbound vehicles from the Bradford Bypass to travel 3 km further south on Highway 400 and exit the highway at the interchange at Line 5 and then backtrack north to our client's property. It would be inefficient and time consuming for westbound vehicles on the Bradford Bypass to access our client's site and may encourage motorists to exit the Bradford Bypass before Highway 400 to find a more efficient route. <p>Alternatives 3 & 4: (Continuous Weaving Lane)</p> <ul style="list-style-type: none"> As these alternatives allow access to Highway 88 for westbound vehicles from the Bypass, these alternatives provide more convenient access to our client's property. For this reason, our client's preference is either Alternative 3 or 4 (Continuous Weaving Lane) dependent on property requirements. <p>We look forward to attending the Public Information Centre on May 18th. We have no further comments or concerns at this time.</p> <p>Thank you again for the opportunity to provide this feedback.</p>	<p>meetings will be held between the Project Team and impacted property owners to discuss property specific concerns and establish next steps.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We look forward to working with yourself and your client moving forward. Please feel free to reach out to the Project Team should you have any further questions.</p>

CT-PIC1-25		To: Project Team From: [REDACTED] General Public	Email	Impacts of COVID-19 on traffic projections	04-27-2021	<p>What impact will COVID 19 have on the commute patterns in the future, if people continue to work from home ? Let's focus on what is important, which is the health of our citizens. Time to rethink priorities.</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>Simcoe County is expected to experience rapid population growth over the next 10 years, with the Regional Municipality of York growing to 1.79 million by 2041. Building the proposed Bradford Bypass is necessary to relieve existing congestion on local east-west local roads and to address the expected long-term travel demand in the area.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>Even with all currently planned transportation and transit investments and an anticipated increase in the number of people working remotely, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). For Ontarians in 2051, the average travel speeds are expected to be 16 per cent slower when compared to 2016.</p> <p>Congestion costs Ontario billions in lost productivity, adds to the costs of goods and creates harmful carbon emissions. Ontario needs new infrastructure to help move people and goods or the region will quickly become overwhelmed.</p> <p>MTO is undertaking a Traffic Study as part of the Preliminary Design and EA study. Travel time savings and projections were calculated using the Provincial Greater Golden Horseshoe Model (GGHM) by comparing scenarios with and without the Bradford Bypass corridor in place. This assessment includes various key origin and destination locations within the corridor including municipal centres in the region. The model accounts for population and employment targets by region, as identified in the <i>Places to Grow Act</i>.</p> <p>Scenarios include: Existing Conditions Network, 2041 No Build Scenario, and 2041 Build Scenarios. Travel times under each scenario are calculated and compared to obtain the anticipated travel time savings.</p> <p>This new transportation corridor is expected to relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and support projected urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404. Motorists and trucks are anticipated to see more than a 60 per cent savings in travel time when using the new freeway compared to existing routes along local roads, saving up to 35 minutes each way.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p>

							If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.
CT-PIC1-26		To: Project Team From: [REDACTED] General Public	Email	BBP Impacts on Natural Environment	04-27-2021	<p>Hello, I was walking at Scanlon Creek this week and came across this information about the valley and water quality. I read that the initial environmental assessment for the Bradford Bypass project concluded there would be severe impacts to water quality. How will the Bradford Bypass affect the water and the valley at Scanlon Creek given this sign states that pollutants from outside the conservation area are flushed to the bottom of the valley?</p> 	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/. This letter provides information in response to your question on April 27th during the PIC review period, as well as the two questions you submitted during the webinar.</p> <p>The EA approved in 2002 was conditional and done to a planning level of detail. The EA required the proponent to complete additional studies to address specific concerns – among them, included general conditions related to the commitments made in the EA and requirements for future EA phases, applied mitigation conditions during the design phase pertaining to several environmental factors, including stormwater and groundwater, as well as future monitoring of commitments and conditions.</p> <p>As part of our ongoing commitment to understand the relationship between the project and the environment, MTO is undertaking current environmental studies in accordance with the MTO Class EA and present day environmental legislations, to document existing conditions, identify design constraints,</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>WEBINAR QUESTION: Can you please explain how the proposed exemptions will affect the TESR and process?</p>	<p>potential impacts and develop mitigation measures and strategies to be carried forward through design and construction of the project. These environmental studies will consider: agriculture, air quality, archaeology, cultural and built heritage, contamination and waste management, drainage & hydrology, erosion and sediment control, groundwater, fisheries, fluvial geomorphology, human health, landscaping, land use and property impacts, noise & vibration, terrestrial ecosystems, snow drift, species at risk, and surface water & stormwater management.</p> <p>The Bradford Bypass is located primarily within the Lake Simcoe Region Conservation Authority (LSRCA) regulation limits, south of Lake Simcoe. For those stormwater management facilities that may occur within the jurisdiction of the Nottawasaga Valley Conservation Authority (NVCA) and potentially influence the subwatershed, the MTO will apply NVCA water quantity and quality control guidelines.</p>
						<p>WEBINAR QUESTION: Is the 10th side road overpass a new addition to the design? Why is another overpass being included here?</p>	<p>The project will not directly impact Lake Simcoe or Scanlon Creek, however, MTO will assess impacts with respect to the <i>Lake Simcoe Protection Act</i> and the Lake Simcoe Protection Plan through consideration of water quality and quantity, stormwater management, groundwater management, landscaping and ecological restoration measures. Additionally, the MTO will evaluate the fluvial geomorphological designs for watercourses, erosion and sediment control and spills prevention and protection measures. The studies will be undertaken to satisfy the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual and other provincial and regulatory requirements.</p> <p>The Project Team will undertake drainage and hydrology engineering studies to develop an efficient and effective drainage system for the freeway, while addressing potential impacts relative to runoff and the change in impervious cover in consultation with conservation authorities and provincial agencies. Findings from previous studies will be factored into the Preliminary Design for drainage and stormwater management.</p> <p>It is expected that several stormwater management ponds will be required as part of the design to meet the MTO Highway Design Standards and the very stringent LSRCA requirements for water quantity and quality control of discharges to Lake Simcoe, within the jurisdiction of the LSRCA.</p> <p>The Ministry of Environment Conservation and Parks (MECP) has been evaluating an exemption to the Class EA for the Bradford Bypass (https://ero.ontario.ca/notice/019-1883). The MECP is considering the results</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>of consultation on a regulatory proposal for a streamlined process to complete the EA, tailored to the specifics of the project and the procurement and delivery models planned. The regulation, if approved, will still require MTO to gather information about environmental conditions, predict and mitigate impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous peoples, and document decision-making. Other provincial and federal legislative and permitting processes would still apply. Please refer to MECP for details on the regulatory proposal.</p> <p>The proposed overpass structure at 10th Sideroad represents the recommended bridge structure type required to carry the proposed Bradford Bypass across 10th Sideroad. This crossing is not a new addition to the design. It represents a design refinement, which determines if the grade-separated crossing structure (bridge) would be an overpass (freeway going over) or an underpass (freeway going under), allowing the freeway to best fit within the topography of the area and meet design requirements for the freeway and local roads.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>

CT-PIC1-028		To: Project Team From: [REDACTED] [REDACTED] General Public	Email	Concern Regarding Speeds on the BBP Noise Concerns	04-28-2021	<p>Hello,</p> <p>I wanted to provide just two pieces of feedback that would mitigate concerns for me. I wasn't sure how to bring this information forward as the form online is targeted towards organizations and not residents.</p> <p>I would like to see this highway have a lower speed limit than other 400 series routes due to its proximity to town. Something like the section of controlled access highway 7. Additionally I feel that sound will be a huge concern especially with so many interchanges for such a short stretch of road. Sound barriers should be considered across the entire length of the highway and especially at interchanges in town as transport trucks using engine breaks and try to accelerate is very loud.</p> <p>Thank you,</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Project Team acknowledges your comments regarding the speed limit on the proposed Bradford bypass. As part of the current Preliminary Design study the Project Team is reviewing the recommended plans of the 2002 approved EA mainline alignment, interchanges, and crossings in accordance with current Highway Design and Safety standards. The posted speed for the Preferred Alternative of the Bradford Bypass and the corresponding posted speed limit will be set in accordance with various components such as the classification of the freeway, design, and safety standards.</p> <p>A Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's Environmental Guide for Noise. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barriers walls, where the proposed improvements to the project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide.</p> <p>Construction-related noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan. Further details are available in MTO's Noise Guide.</p> <p>In addition, the MTO is continuously exploring innovative opportunities to address noise mitigation efforts through engineering of various types and enhancements of pavement materials and pavement structures which will be factored into the appropriate design phase.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to</p>

CT-PIC1-031	[REDACTED]	To: Project Team From: [REDACTED] General Public	New Stakeholder Comment Form	Concern with Environmental Impacts of the BBP	04-28-2021	Firstly, it's shameful that nearly 20 years have passed since the original EA and therefore no alternative routes north or south are being considered.	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
				Concerns regarding noise mitigation		<p>If it's a bypass, are all of the intersections required? Loss of Bathurst St intersection would reduce impact on woodland, for example.</p> <p>Some more specific points about sections -</p> <p>Road should be pushed further north from Wyman Crescent and Chelsea Crescent - smaller loss of wooded area, and would allow for a larger buffer with noise walls/trees/landscaping for the adjacent residential uses. Such a move slightly north would also decrease loss of wooded habitat west of Chelsea Crescent.</p> <p>Bridge crossings - Noise walls on bridge parapets, to reduce noise/light spill to habitats? Potential of pedestrian bridges at these locations?</p> <p>I'd welcome some additional woodlots throughout the corridor area - purchasing existing woodlots for their protection and planting new ones.</p> <p>With regard to the loss of woodland around Holland River crossing - purchase additional agricultural land for woodland planting either adjacent to highway or further north/south.</p> <p>Other general improvements to the local roads - investigate slowing local traffic, roundabouts, improved pedestrian crossings, road safety audits etc. If "through traffic" is being removed by this bypass, improve the roads that will remain.</p> <p>More information please on protecting the amenity for local residents (noise walls and landscaping etc), environmental mitigation (landscaping, additional tree planting and wildlife crossings) and other improvements for the local area.</p>	<p>from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>Refinement of the freeway alignment within the study limits and consideration of the freeway's proximity to existing and approved developments is underway. Localized and minor alignment shifts may be considered as part of this study based on the outcome of environmental studies and consultation; however, the location of the Bradford Bypass corridor was selected during the 2002 Approved EA study in consideration of a number of factors, and therefore, alternative routes for the freeway are not being considered as part of this study.</p> <p>This alignment is technically preferred for a freeway in terms of highway network expansion, ease of construction, relationship to provincial and municipal land use planning and the preferred route is already included in Official and Transportation Master Plans, as well as the <i>Places to Grow Act</i>), as well as having fewer negative impacts to residential and natural areas when compared to other route options considered.</p> <p>Proposed interchanges were identified and selected during the 2002 Approved EA study to allow improved access to the freeway to local residents and visitors to the local communities. The Project Team continues to engage with local municipalities to gain feedback on the locations and designs of the proposed interchanges within the project corridor to ensure that they are in line with municipal and regional initiatives and goals.</p> <p>Under the Preliminary Design and Environmental Assessment study of the project, we are reviewing refinement alternatives and designs, including the proposed design for the Bathurst Street interchange. More information on this interchange can be viewed here: https://www.bradfordbypass.ca/2021/04/12/16-bathurst-street-interchange/.</p> <p>The centerline or 'middle' of the BBP will be approximately 50-60m from the edge of the right-of-way. Refinement alternative 1 proposes a slight northerly shift of the freeway alignment in proximity to Wyman Crescent/Chelsea Crescent, creating more separation between the freeway and developed lands to the south of the freeway right-of-way, compared to the 2002 Approved EA alignment. The refinement of the freeway alignment geometry considers environmental and engineering design constraints. The preferred alternative to the preliminary design with details in the area of Wyman Crescent/Chelsea Crescent will be presented at PIC #2, and available for public review and comment. Building upon the preliminary design and EA study, further</p>

							<p>refinement of the design will be carried out and finalized during the detail design phase.</p> <p>Preliminary Design for the Bradford Bypass will include a wide range of environmental studies in accordance with EA and current legislative requirements. These studies include:</p> <ul style="list-style-type: none"> • Terrestrial Ecosystems Existing Conditions and Impact Assessment Report (including an assessment of vegetation and vegetation communities (including woodlands), wetlands, wildlife and wildlife habitat, species at risk and designated natural areas). MTO will work closely with municipalities, regulatory agencies, and conservation authorities to discuss mitigation measures and potential requirements for overall benefit measures to the landscape surrounding the Bradford Bypass, as a result of potential impacts to the natural environment. • Noise and Vibration Impact Assessment: To determine the likely sources of noise from the development, predicting the overall impact of such noise sources on the Noise Sensitive Areas and sensitive receivers adjacent to the project. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barriers walls, where the proposed improvements to the project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide. • Preliminary Landscape Composition Plan: To identify and assess impacts and mitigation on various landscape features. The landscape plan will address both municipal and natural environmental requirements and provide preliminary landscaping mitigation, compensation or enhancements within the project corridor to support the MTO's mandate towards meeting climate change and sustainability requirements. <p>The design of bridge and engineering components of the project will be developed through a collaborative process considering inputs from environmental factor-specific specialties to understand existing conditions, develop appropriate recommendations for noise mitigation measures, lighting, wildlife considerations and the conceptual landscape plan. The process for selection of the appropriate location, methods of exclusion or wildlife passage opportunities will be refined through consultation and engagement with regulatory agencies (Ministry of Environment Conservation and Parks (MECP); Ministry of Northern Development, Mines, Natural Resources and Forestry (MNDMRNF); conservation authorities). Using data</p>

							<p>Your property located adjacent to the highway right-of-way and currently outside the project limits, but within the study area for the design and environmental assessment.</p> <p>The Project Team acknowledges your concerns regarding the construction of the freeway and the potential impact on your property. As part of this EA Study update, environmental and design studies are being undertaken to identify and evaluate potential impacts of the project and recommend mitigation measures to reduce these impacts. These studies will include a Noise Impact Assessment, Air Quality Impact Assessment, Property Impact Assessment, Land Use Factors Assessment, Property Impacts and Human Health Assessment, which will all evaluate potential impacts of the freeway on adjacent landowners. A Reasoned Argument (trade-off) method of evaluation will be used to identify the advantages to select the preferred refinements and alternatives. This considers evaluation criteria that includes consideration for direct and indirect impacts to residential properties. The MTO and Project Team work closely with property owners within and immediately adjacent to the project, and you will be contacted if your property is identified as being impacted as the design is advanced and refined.</p>

CT-PIC1-37	████	To: Project Team From: ██████████	Email	Concerns regarding water quality	04-30-2021	*Add to CL Our community organization has been involved in preserving and improving water quality and quantity on the Lake Simcoe watershed for over 10 years. We will be submitting comments on the project	<p>Hello ██████</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Project Team welcomes comments from the public on the Preliminary Design. You may provide your comments by email to ProjectTeam@BradfordBypass.ca or through the Contact Us page of the Project Website (https://www.bradfordbypass.ca/contact-us/).</p> <p>To provide some additional background for your organization, the Bradford Bypass is located primarily within the Lake Simcoe Region Conservation Authority (LSRCA) regulation limits, south of Lake Simcoe. For those stormwater management facilities that may occur within the jurisdiction of the Nottawasaga Valley Conservation Authority (NVCA) and potentially influence the subwatershed, the MTO will apply NVCA water quantity and quality control guidelines.</p> <p>The project will not directly impact Lake Simcoe or Scanlon Creek; however, the MTO will assess impacts with respect to the <i>Lake Simcoe Protection Act</i> and the Lake Simcoe Protection Plan through consideration of water quality and quantity, stormwater management, groundwater management, landscaping and ecological restoration measures. Additionally, the MTO will evaluate the fluvial geomorphological designs for watercourses, erosion and sediment control and spills prevention and protection measures. The studies will be undertaken to satisfy the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual and other provincial and regulatory requirements.</p> <p>The Project Team will undertake drainage and hydrology engineering studies to develop an efficient and effective drainage system for the freeway, while addressing potential impacts relatives to runoff and the change in impervious cover in consultation with conservation authorities and provincial agencies. Findings from previous studies will be factored into the Preliminary Design for drainage and stormwater management.</p>

The PIC materials will be made available on the Project Website for a two (2) week stakeholder review period beginning April 22, 2021 and ending on May 6, 2021.</p> <p>PIC Part 2: The Project Team encourages you to attend the PIC Webinar presentation on May 18, 2021 where you will be able to learn more about key topics raised during the PIC's review period and receive additional project information. Please register through the Project Website.</p> <p>For more specific concerns or questions, your inquiry is currently under review by the Bradford Bypass Project Team. A response will be provided as soon as possible; we appreciate your patience.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p> <p>Sincerely,</p> <p>The Bradford Bypass Project Team Email: projectteam@bradfordbypass.ca Toll-Free: 1 (877) 247-6036</p>
CT-PIC1-040		To: Project Team From: [REDACTED]	Email	Impacts on Indigenous Peoples Environmental Impacts	05-01-2021	<p>*Please see digital copy for full comment</p> <p>Gentlemen:</p> <p>Attached are my comments concerning the subject project.</p> <p>As my comments are quite lengthy and detailed, the following key issues are provided for your convenience:</p>	<p>Hello [REDACTED],</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>On May 3rd, 2021, the Minister of Environment and Climate Change determined that the Bradford Bypass Project, proposed by the Ontario</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>1. Your choice of route crossing the East Branch of the Holland River set out in slide # 9 triggers the federal Impact Assessment Act: As I understand it, the implications of the attached 1914 deed are:</p> <ol style="list-style-type: none"> Because the Bradford Bypass will pass over federal land the Impact Assessment Act is triggered. The Impact Assessment Act is also applicable because: The project impacts an Indigenous Peoples of Canada cultural heritage landscape, (the Lower Landing) with historical or archaeological significance. <p>2. The 1997 EAS only addressed potential solutions within MTO's mandate to build highways. It did not consider regional road enhancements such as bridges over the Holland River at Hochreiter Road and Ravenshoe Road. No other alternative method of implementing the proposed undertaking was identified because MTO refused to consider any alternatives other than four lane highways. I am not aware of any provision in the Environmental Assessment Act that permits this exclusionary approach to the analysis of reasonable alternatives.</p> <p>3. Reasonable "Alternatives To" The bulk of the originally anticipated travel demand for this four lane freeway is now being addressed by the Barrie GO Train. This is why the previous Liberal Government cancelled the Bradford Bypass and excluded it from their Places To Grow Plan. Today, the residual travel demand for the Bradford Bypass study area can likely be appropriately addressed by connecting Queensville Sideroad, via Bathurst St. and Hochreiter Road with 8th line in Bradford. If further east / west travel demand remains, this would best be addressed by connecting Ravenshoe Road to Line 12 or resurrecting MTO's previously preferred, substantially EA approved, Highway 89 Extension route to Ravenshoe Road. MTO has a legal obligation to consider these reasonable alternatives. – [MTO Class EA for Provincial Transportation Facilities s.4.4.2 – duty to assess alternatives beyond the existing study area.]</p> <p>These alternatives are significantly less costly and environmentally intrusive. They will have minimal carbon emissions compared to those coming from both the construction and operation of the Bradford Bypass.</p>	<p>Ministry of Transportation, does not warrant designation under the Impact Assessment Act. The Minister of Environment and Climate Change considered the potential for the Project to cause adverse effects within federal jurisdiction, adverse direct or incidental effects, public concern related to these effects, as well as adverse impacts on the Aboriginal and treaty rights of the Indigenous peoples of Canada. The Minister also considered the analysis of the Impact Assessment Agency of Canada.</p> <p>The Minister reached the decision that the designation of the Project is unwarranted for the following reasons:</p> <ul style="list-style-type: none"> the regulatory review processes that apply to the Project and related consultations with Indigenous peoples provide a framework to address the potential adverse aforementioned effects and public concerns raised in relation to those effects. These include: <ul style="list-style-type: none"> provincial approvals and permits pursuant to the Environmental Assessment Act, Endangered Species Act, Environmental Protection Act, Ontario Heritage Act, Ontario Water Resources Act, and Safe Drinking Water Act. the Project must comply with relevant provisions of federal legislation, including the Canadian Navigable Waters Act, the Fisheries Act and the Explosives Act. <p>Further details on the decision can be found here: https://iaac-aeic.gc.ca/050/evaluations/proj/81382?culture=en-CA Supporting documentation can be found here: https://iaac-aeic.gc.ca/050/evaluations/document/exploration/81382?type=1&culture=en-CA</p> <p>The planning process for the 2002 Approved EA narrowed down alternatives from a broad range of potential solutions to the concept, ultimately selected as the Technically Preferred Route to a Planning level of detail. The study required gathering relevant information with respect to the existing and future conditions in the analysis area so that the impacts of each alternative could be compared under different factors (both positive and negative impacts). Information was gathered and grouped under five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment to facilitate a comprehensive and transparent comparison of each factor group. Under the current Preliminary Design and EA study, alternate corridor locations for the highway are not being considered as the Technically Preferred Route for the Bradford Bypass was approved through 2002 EA. This alignment is preferred for the freeway in terms of highway network expansion, ease of construction, relationship to provincial and municipal land use planning (Official and Transportation Master</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>All of these alternative routes conform to MTO's stated preference to separate long distance travel from local traffic. The Bradford Bypass will combine this traffic.</p> <p>I have copied a number of other parties in on this email so that they may get a fuller understanding of the consequences of these Ford Government, developer friendly, policy decisions.</p> <p>Sincerely.</p> <p>██████████</p> <p>P.S. Footnotes can be seen by double clicking on the footnote number at the end of any of the above appropriate sentences.</p>	<p>Plans, Places to Grow Act), as well as having fewer negative impacts to residential and natural areas when compared to other route options considered.</p> <p>The Preliminary Design and EA study will include development of design refinements and alternatives to the 2002 Approved EA alignment. These refinements and alternatives are based on various factors, including current engineering design standards; an updated traffic demand assessment; current environmental legislation and planning policies; and, data collected during the current environmental impact studies within the study area. As part of PIC # 1, refinements and alternatives to the 2002 Approved EA alignment were developed for the Bradford Bypass mainline, freeway-to-freeway interchanges, and arterial/crossing road interchanges.</p> <p>Similar to the previous EA, the Preliminary Design and EA process will evaluate the Preliminary Design alternatives and refinements to select the recommended Preliminary Design by comparing them within the context of the evaluation factors for Transportation, Natural Environment, Social Environment, Economic Environment and Cultural Environment. The Project Team is undertaking site investigations and an assessment of potential impacts within the study area to inform the evaluation process and propose mitigation measures, strategies and identify future commitments for the proposed project. This includes undertaking archaeological investigations in collaboration with Indigenous Communities to identify and document archaeological resources within the project, which will factor into the evaluation criteria for selection of the preferred preliminary design.</p> <p>As part of the consultation process to evaluate the preliminary design refinements and alternatives, the Project Team is actively engaged with Indigenous communities, local municipalities and regions, provincial and federal agencies, and public stakeholders to solicit input on these proposed designs. The results of these consultations will be incorporated into the MTO's Preliminary Design study and presented to the public at key design stages, including PIC #2 and EA documentation.</p> <p>The MTO recognizes the need for consideration of current and future transportation and transit options. The proposed Bradford Bypass is one element of many transportation options being developed by the MTO to keep people and goods moving through the Region. Simcoe County is expected to experience rapid population growth over the next 10 years, with the Regional Municipality of York growing to 1.79 million by 2041. Building the proposed Bradford Bypass is necessary to relieve existing congestion on local east-west local roads and to address the expected long-term travel demand in the area.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>Even with all currently planned transportation and transit investments and an anticipated increase in the number of people working remotely, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). For Ontarians in 2051, the average travel speeds are expected to be 16 per cent slower when compared to 2016.</p> <p>Congestion costs Ontario billions in lost productivity, adds to the costs of goods and creates harmful carbon emissions. Ontario needs new infrastructure to help move people and goods or the region will quickly become overwhelmed.</p> <p>To further understand the future traffic demands within the study area, MTO is undertaking a Traffic Study as part of the Preliminary Design and EA study. Travel time savings and projections were calculated using the Provincial Greater Golden Horseshoe Model (GGHM) by comparing scenarios with and without the Bradford Bypass corridor in place. This assessment includes various key origin and destination locations within the corridor including municipal centres in the region. The model accounts for population and employment targets by region, as identified in the <i>Places to Grow Act</i>.</p> <p>Based on current traffic analysis, this new transportation corridor is expected to relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and support projected urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404. Motorists and trucks are anticipated to see more than a 60 per cent savings in travel time when using the new freeway compared to existing routes along local roads, saving up to 35 minutes each way.</p> <p>Scenarios for the traffic analysis include: Existing Conditions Network, 2041 No Build Scenario, and 2041 Build Scenarios. Travel times under each scenario are calculated and compared to obtain the anticipated travel time savings. For clarification, the indicated travel time savings are not an average of 35 minutes, but rather a range between 10-35 minutes. The travel time savings are calculated utilizing the scenarios above based on the time of day and key origin and destination locations identified using an area-wide transportation model (with a 2041 horizon year).</p> <p>The Project Team is establishing targeted project committees to work and communicate directly with representatives from the Project Team to discuss opportunities, concerns, needs, issues and risks related to the Bradford Bypass. These three (3) groups are:</p>

							<ul style="list-style-type: none"> Community, Greenbelt and Environment Committee (CGEC) Municipal Advisory Committee (MAC) Government Advisory Committee (GAC) <p>A representative from Forbid Roads Over Green Spaces (FROGS) will be invited to participate as a member of the CGEC group session.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of the future PIC #2 and updates for this study, and we look forward to FROGS' participation in project consultation events and opportunities. For future reference, an Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email. The next PIC will be scheduled prior to the completion of the Transportation Environmental Study Report (TESR) to allow feedback to be considered and the results of the EA study, preliminary design and consultation process to be documented. In accordance with the MTO Class EA for a Group 'A' project, the TESR will be made available for a 30-day public review period.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any further questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-PIC-041		To: Project Team From: [REDACTED] General Public	New Stakeholder Comment Form	Request for an interchange at sideroad 10 Emergency Routes	05-01-2021	The current information does not show an interchange at Sideroad 10 and the Bradford By-pass. An interchange should be included as part of the project or part of the planning and design for future construction. Only one interchange at County Rd. 4 for the urban area of Bradford is insufficient when the Town is to grow through intensification of existing areas. The one interchange to the By-pass and the nearby 8th Line/Barrie Street intersection will be congested. Also, Sideroad 10 is an identified Emergency Detour Route therefore must have access to the Bradford By-pass to avoid routing traffic to the only other access at County Rd. 4. The necessary land requirements should be identified in the study and obtained by the Province to allow for a Sideroad 10 interchange and the highway designed to accommodate an interchange.	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Project Team acknowledges your comment about including an interchange at Sideroad 10 in addition to the one identified at County Road 4. The Preliminary Design and Environmental Assessment of the Bradford Bypass includes proposed interchanges at County Road 4, Bathurst Street and Leslie Street. These interchange locations were identified in the 2002 Approved EA which were developed, evaluated, and selected through the evaluation process.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>The traffic demand assessment carried out as part of this study confirmed the locations of the proposed interchanges would service the provincial needs. Interchange configuration refinements at the proposed locations within the Study Area are being considered during the current study based on 5 broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>It is noted that municipalities within the Study Area of the Bradford Bypass have generated Official and Transportation Master Plans based on the proposed Bradford Bypass as per the approved EA (2002) in order to address traffic demand as a result of population and employment growth projections. As a result, the Project Team will continue to engage municipalities and will support future municipal interchange initiatives.</p> <p>Additional information on the proposed interchanges can be found on the Project Website under PIC 1 materials, or by accessing the following link: https://www.bradfordbypass.ca/pic1/</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-PIC1-042		<p>To: Project Team</p> <p>From: [REDACTED] -General Public</p>	Email	<p>Updating the EA</p> <p>Change in Travel Demand from COVID 19</p>	05-01-2021	<p>Good morning Project Team,</p> <p>I have been a resident of Bradford for the past 35 years and I am very concerned about the steps you have taken to follow through with the Bradford Bypass.</p> <p>I know this project has been studied for many years and it may have seemed like a good idea back in the 1970's, 1990's, and in 2002. However, our environment has changed drastically since then and our society's understanding of the environmental</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The EA approved in 2002 was conditional and required the proponent to complete additional studies to address specific concerns – among them,</p>

						<p>impact our choices have (locally and globally) has also changed drastically.</p> <p>Before seriously considering starting this project, we need to at least have a current environmental assessment completed by the Ministry of Environment and Climate Change. I do not feel the MTO can responsibly determine what needs to be updated in an Environmental Assessment that was closed nearly 20 years ago in 2002.</p> <p>We are living in a climate emergency. I want to know exactly how this bypass will affect the groundwater, surrounding agriculture, Holland River, and the species that rely on the natural environment surrounding us. I think we need to understand the impact it will have now and in the future.</p> <p>Things have changed in our lives, and I think COVID-19 has proven that many of us can work from home and do not need to travel on a daily basis. The environmental health of our local communities has become increasingly important as we spend more time accessing the natural spaces at our doorsteps. I believe it is grossly irresponsible to move forward with this project without a clear understanding of how our region's needs have changed over the last year (as well as the last two decades). I also believe that our money would be better spent on improved access to environmentally friendly public transit.</p> <p>We must consider the holistic needs of our future community and not just provide for growth, but provide for responsible growth. I would like to see people moving to Bradford not because we have the fastest commute time, but because they can look around and say, "This is where we want to live, raise a family, and maybe even retire."</p> <p>I do not feel reducing our commute by 35 minutes is as important as the impact this bypass will have on our environment.</p> <p>If you feel the benefits of this bypass outweigh the environmental impact, I ask you to at least prove it with a current environmental assessment done by the Ministry of Environment and Climate Change.</p> <p>I look forward to hearing from you.</p>	<p>included general conditions related to the commitments made in the EA and requirements for future EA phases, applied mitigation conditions during the design phase pertaining to archaeology, stormwater, groundwater, and noise, as well as future monitoring of commitments and conditions.</p> <p>As part of our ongoing commitment to understand the relationship between the project and the environment, MTO is undertaking current environmental studies in accordance with the MTO Class EA and present day environmental legislations, to document existing conditions, identify design constraints, potential impacts and develop mitigation measures and strategies to be carried forward through design and construction of the project. These environmental studies will consider: agriculture, air quality, archaeology, cultural and built heritage, contamination and waste management, drainage & hydrology, erosion and sediment control, groundwater, fisheries, fluvial geomorphology, human health, landscaping, land use and property impacts, noise & vibration, terrestrial ecosystems, snow drift, species at risk, and surface water & stormwater management will be considered. From an engineering and design perspective, MTO will continue to conduct engineering design studies that will consider structural elements, highway design, pavement engineering, geotechnical and foundations, traffic, electrical, Advanced Traffic Management Systems, and land surveys.</p> <p>The results of the environmental studies and engineering design will be presented to the public for review and comment in PIC #2 and documented in the Transportation Environmental Study Report (TESR), which will be available for public review at the end of the preliminary design in 2022.</p> <p>Our ongoing work, including supporting field investigations, consultation and preliminary assessments, consultation and documentation are continuing throughout 2021 and will be carried out till the end of 2022.</p> <p>As part of this, a review of previous commitments made in the 2002 Approved EA will be carried forward and built upon through preliminary and detail design stages to ensure all approvals and legislative requirements at both the federal and provincial levels are met.</p> <p>As we continue to refine and evaluate alternatives throughout the preliminary design and EA process, MTO will continue to consult and engage with the public, key stakeholders, regulatory agencies and Indigenous communities to discuss the project and solicit feedback on the design and EA study. The results of these consultations, preliminary EA, design evaluation for the</p>

CT-PIC1-045	[REDACTED]	To: Project Team From: [REDACTED] General Public	Email	Concerns regarding environmental impacts Impacts of salt Policies and plans and the BBP	05-03-2021	<p>There needs to be stronger protections for the natural environment if this highway is to be built. Proposing wildlife awareness signs on a 400-series highway is a joke and will not help either motorists or wildlife since no one is able to stop or avoid a collision going 100 km/hr. There needs to be continuous wildlife exclusion fencing along the roadway as well as actual wildlife ecopassages (not just culverts) to allow wildlife to safely pass under the roadway. These need to be sited in appropriate locations, and maps of wildlife corridors and wildlife-vehicle collision hotspots, as well as other resources, are available from the conservation authority to guide their development.</p> <p>Additionally, I didn't see any mention of mitigating the effects of road salt on adjacent natural areas. Rising chloride levels in the Holland River as well as Lake Simcoe is an increasingly big issue, and creating a highway which will be salted regularly through this area will only exacerbate the problem. Increased chloride levels were seen following the Highway 404 extension and a similar trend will be seen here if this highway is built. There needs to be protection from chloride as well as other contaminants and effective solutions exist to address it; they just need to be implemented rather than the usual design that doesn't mitigate the problem.</p> <p>I hope all applicable land use policies are being followed, including the Lake Simcoe Protection Plan, Greenbelt Plan and Provincial Policy Statement. Also, will there be compensation for</p>	<p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Project Team recognizes your concerns and comments regarding the protection of wildlife and motorists where there is the potential for collisions. The process for selection of the appropriate location, methods of exclusion or wildlife passage opportunities will be refined through consultation and engagement with regulatory agencies (Ministry of Environment Conservation and Parks (MECP); Ministry of Northern Development, Mines, Natural Resources and Forestry (MNDMNR); conservation authorities). Using data obtained during the Terrestrial Ecosystems studies, and through consultation with regulatory agencies, the MTO will identify appropriate opportunities and needs for exclusion fencing and wildlife passages.</p> <p>Detailed impact assessments will be completed to document the specific potential for adverse effects to the natural, socio-economic and cultural environments, including those directly linked to a provincial or federal authority (e.g. <i>Greenbelt Plan</i>, <i>Lake Simcoe Protection Act</i>, <i>Provincial Policy Statement</i>, <i>Endangered Species Act</i>, <i>Fisheries Act</i>, <i>Migratory Birds Convention Act</i>, <i>Species at Risk Act</i>, <i>Canadian Navigable Waterways Act</i>). Several provincial and federal agencies (e.g. MECP; MNDMNR; Transport Canada;</p>

						<p>the natural heritage features lost through this project? Losing a piece of forest/wetland/grassland not removes that piece of habitat, but also weakens the overall system, increases wildlife-human conflict, and decreases carbon sequestration. Are climate impacts being considered and offset? If this highway is built, it will have significant impacts on the the natural environment, and I'm not convinced that everything possible is being done to prevent or mitigate them. Do we really need another highway that's going to further degrade the environment and add to climate change? This could be an opportunity to build an innovative highway with minimal impact, but I don't see any of that in the design considerations.</p>	<p>Fisheries and Oceans Canada; Environment and Climate Change Canada; etc.) will be consulted throughout the preliminary design and subsequent design stages to ensure compliance with federal and provincial legislation/policies.</p> <p>The Bradford Bypass is located within the Lake Simcoe Region Conservation Authority (LSRCA) regulation limits, south of Lake Simcoe. For those stormwater management facilities that may occur within the jurisdiction of the Nottawasaga Valley Conservation Authority and potentially influence the subwatershed, the MTO will apply NVCA water quantity and quality control guidelines.</p> <p>The project will not directly impact Lake Simcoe; however, the MTO will assess impacts with respect to the <i>Lake Simcoe Protection Act</i> and the Lake Simcoe Protection Plan through consideration of water quality and quantity, stormwater management, groundwater management, landscaping and ecological restoration measures. Additionally, the MTO will evaluate the fluvial geomorphological designs for watercourses, erosion and sediment control and spills prevention and protection measures. The studies will be undertaken to satisfy the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual and other provincial and regulatory requirements.</p> <p>Preliminary design and detail design studies will build upon the environmental commitments from the 2002 Approved EA as it relates to water quality, drainage and stormwater management. The drainage and hydrology engineering studies undertaken for the project will develop an efficient and effective drainage system for the freeway, while addressing potential impacts related to runoff and the change in impervious cover. It is expected that several stormwater management features and infrastructure will be required as part of the design to meet the MTO Highway Design Standards and the very stringent LSRCA requirements for water quantity and quality control of discharges to Lake Simcoe, within the jurisdiction of the LSRCA. In addition, the design of the highway and stormwater management for the highway will meet the provincial legislative requirements for water quality and quantity under the <i>Ontario Water Resources Act</i> and <i>Environmental Protection Act</i>.</p> <p>The Project Team will work closely with municipalities, the MECP, the MNDMNR, and Conservation authorities to discuss mitigation and potential requirements for overall benefit measures to the landscape surrounding the Bradford Bypass, as a result of potential impacts to the natural environment.</p>

							<p>PIC Part 1: The purpose of the first stage is to showcase the study, update and summarize existing conditions, illustrate the preliminary design refinements as compared to the 2002 approved EA study, outline the evaluation criteria, and solicit input, feedback and comments on the preliminary design refinements. The PIC materials will be made available on the Project Website for a two (2) week stakeholder review period beginning April 22, 2021 and ending on May 6, 2021.</p> <p>PIC Part 2: The Project Team encourages you to attend the PIC Webinar presentation on May 18, 2021 where you will be able to learn more about key topics raised during the PIC's review period and receive additional project information. Please register through the project website.</p> <p>For more specific concerns or questions, your inquiry is currently under review by the Bradford Bypass Project Team. A response will be provided as soon as possible; we appreciate your patience.</p> <p>We encourage you to visit the project website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p> <p>Sincerely,</p> <p>The Bradford Bypass Project Team Email: projectteam@bradfordbypass.ca Toll-Free: 1 (877) 247-6036</p>
CT-PIC1-047		To: Project Team From: [REDACTED] General Public	New Stakeholder Comment Form	Impact on Recreation	05-03-2021	I am concerned about the impact of this project on recreational canoeing, kayaking, and boating.	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The design and future construction of the bridges will take into consideration navigability and maintaining proper access to the Holland River and Holland River East Branch.</p> <p>The Project Team is also actively engaging with Transport Canada to design the bridge structures in compliance with the <i>Canadian Navigable Waters Act</i>.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>As part of this process, the Project Team is seeking input from members of the public regarding information about the types of vessels in use within the Holland River and Holland River East Branch to better inform the design by understanding the existing navigable function of these waterways. If you have specific information on navigational uses, we encourage you to visit the "Contact Us" page on the Project Website and provide more details to the Project Team on navigation. This information is very helpful to the team. With respect to navigation for canoeing, kayaking and boating, the span of the structure will likely be substantially larger than the river itself to accommodate navigability and environmentally sensitive features.</p> <p>We have added you the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT-PIC1-49		To: Project Team From: ██████████ General Public	Email	Environmental Concerns Requesting information on the justification of the project	05-03-2021	<p>The public like me - wants to see the evidence to justify this project - where is the evidence to justify an expensive unnecessary highway. Where are the studies that justify the negative impacts to Lake Simcoe, groundwater, cultural sites possibly archaeological sites, fisheries from Holland River? Please consider alternate routes if you must. There are other ways to connect these two highways in a less costly way and less environmentally costly way</p> <p>The project was cancelled by a previous government in order to encourage the Barrie GO train. Given more scheduled runs a day and on weekends this train is a much better solution.</p> <p>The cost of this ill conceived 4 lane highway will hurt more than our pocketbooks - how can you put a cost on harms done for the future health of people, the Lake, the watershed, the HOLLAND MARSH AND WHAT FEW CONNECTIVE CORRIDORS STILL EXIST. . Today, Minister Wilkinson announced that the federal government will not be designating the Bradford Bypass for a</p>	<p>Hello ██████████</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Ontario government is addressing current and future transportation needs in Simcoe County and York Region and continues to advance planning for the Bradford Bypass project, a proposed transportation corridor connecting Highway 400 and Highway 404. Both the County of Simcoe and Regional Municipality of York are expected to experience rapid growth over the next 10-20 years and investing in this new 16-kilometre transportation corridor is needed to relieve congestion on existing east-west local roads and provide an improved connection between Highway 400 and Highway 404.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>Federal Environmental Assessment (EA), though they are designating Highway 413 or GTA West for Federal review.</p> <p>There will be many politicians and special interests that will use this as an opportunity to denigrate concerned citizens who have read the reports and the sorely lacking environmental studies for the Bypass. They will use this as an opportunity to twist the facts to validate studies that are over 20 years old without any consideration of the Lake Simcoe Protection Plan, Greenbelt Plan, climate change or alternatives to the highway. There are others who are eager to cash in and give nods to lobbyists and campaign donors.</p> <p>None of this changes the concerns of thousands of citizens who have sent into appeals to have this highway properly scrutinized or the facts of the case.</p> <p>Climate leaders don't build highways.</p> <p>Governments that are concerned about the environment don't put highways in sensitive ecosystems on the shores of a lake that is in declining health.</p> <p>Leaders who want to improve traffic congestion know that highways only increase congestion because they read the evidence and so they look for alternatives.</p> <p>The politicians who applaud this decision today are not the type of leaders we need to steer towards healthy, sustainable, climate resilient and just communities.</p> <p>Concerned citizens, planners and experts in the field concur that the Bradford Bypass is not in the best interest of the general public. It is in the best interest of developers who want to cash in on their land speculation and sprawling subdivisions.</p> <p>Where are the studies supporting the claims made by the province that say they will take care of Lake Simcoe and the local environment?</p> <p>Where is the evidence this decision was made on?</p> <p>With respect,</p>	<p>The Province is committed to making sure that our transportation system works for all the people of Ontario. The government is keeping its promise to build better public transit. Ontario is moving forward with two-way, all-day service every 15 minutes on key segments of the GO Transit rail network, improving access to transit and convenience for the people of Ontario. Through continued collaboration with Metrolinx and Infrastructure Ontario, the province continues to move forward with critical procurements, including additional infrastructure along all GO rail corridors.</p> <p>Even with all currently planned transportation and transit investments, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). Our government is committed to making sure that our transportation system works for all the people of Ontario. That's why we're making historic investments in transit and transportation infrastructure to dramatically expand and enhance the province's transportation network. The Bradford Bypass is one component of this investment in transit and transportation infrastructure.</p> <p>The Project Team acknowledges your concerns regarding the proposed freeway and the potential impact on the natural and cultural environment. As part of this current Preliminary Design and EA Study, the MTO is undertaking 15 environmental studies update and document existing conditions, identify and evaluate potential impacts of the project and recommend mitigation measures to reduce these impacts to meet current environmental legislative requirements. Environmental studies will be undertaken no matter what EA process is followed in order to evaluate potential impacts and identify mitigation measures for environmental protection. The results of these preliminary design studies will be presented during the next PIC (PIC #2) to be held during the fall of 2022, and documented in the EA documentation, which for this project is a Transportation Environmental Study Report (TESR).</p> <p>The Bradford Bypass is located within the Lake Simcoe Region Conservation Authority (LSRCA) regulation limits, south of Lake Simcoe. For those stormwater management facilities that may occur within the jurisdiction of the Nottawasaga Valley Conservation Authority and potentially influence the subwatershed, the MTO will apply NVCA water quantity and quality control guidelines.</p> <p>The project will not directly impact Lake Simcoe; however, the MTO will assess impacts with respect to the <i>Lake Simcoe Protection Act</i> and the Lake Simcoe Protection Plan through consideration of water quality and quantity, stormwater management, groundwater management, landscaping and</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>ecological restoration measures. Additionally, the MTO will evaluate the fluvial geomorphological designs for watercourses, erosion and sediment control and spills prevention and protection measures. The studies will be undertaken to satisfy the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual and other provincial and regulatory requirements.</p> <p>The Project Team will undertake drainage and hydrology engineering studies to develop an efficient and effective drainage system for the freeway, while addressing potential impacts relatives to runoff and the change in impervious cover in consultation with conservation authorities and provincial agencies. Findings from previous studies will be factored into the preliminary design for drainage and stormwater management.</p> <p>It is expected that several stormwater management ponds will be required as part of the design to meet the MTO Highway Design Standards and the very stringent LSRCA requirements for water quantity and quality control of discharges to Lake Simcoe, within the jurisdiction of the LSRCA.</p> <p>The Bradford Bypass is anticipated to cross the Holland Marsh Provincially Significant Wetlands at two points: along the Holland River and Holland River East Branch, for an approximate combined length of one kilometre, amounting to only 0.35 per cent of the entire PSW area. Through the Preliminary Design, the Project Team will carefully consider all impacts to wetland areas and will continue to work with environmental agencies, municipalities and other concerned stakeholders to identify principles and recommendations for mitigating the impacts of placing new or expanded provincial highways within wetland areas. The Preliminary Design will consider minimizing impacts to these wetland areas through engineering refinements and consider the following approaches and strategies:</p> <ul style="list-style-type: none"> • Design refinements implemented in consultation with regulatory agencies including the Ministry of Natural Resources and Forestry and Conservation Authorities (for example: LSRCA, NVCA) to minimize potential impacts, supplement these refinements and develop appropriate mitigation strategies; • Adherence to conditions of environmental approvals applicable to project elements that interact with or influence provincially significant wetlands; • surface water conveyance and management measures; • strategic plantings to enhance the performance of proposed drainage and storm water management measures;

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<ul style="list-style-type: none"> erosion and sediment control measures to be implemented during construction; restricting construction-related activities to avoid sensitive periods for aquatic and wildlife species during life cycle stages; measures for spill control/containment/contingency plans; and a construction inspection and monitoring plan, including use of qualified personnel, reporting and response procedures. <p>In addition, the MTO will work to understand and avoid where possible any potential impacts to Species at Risk within provincially significant wetland areas. Should potential impacts be confirmed to threatened or endangered species, the MTO will work with the MECP to obtain a permit under the Ontario Endangered Species Act. The permitting process may include additional mitigation and / or monitoring conditions, and consultation requirements as environmental conditions to the project.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience</p>
CT-PIC1-050		To: Project Team From: [REDACTED]	Email		05-03-2021	<p>Dear [REDACTED],</p> <p>Please accept these comments from the [REDACTED] on the Bradford Bypass.</p> <p>This project should not proceed with early works in the fall of 2021. The need for this particular project in this location has not been well justified, and there are too many outstanding questions and studies. The public consultation session did not provide any access to the original EA documents nor to any updated EA studies. Information justifying the need for the project was presented in a general high-level manner without any access to detailed information, such as traffic studies, that were requested numerous times. The purpose of the PIC is stated to be to 'respond to questions and feedback received from stakeholders' however we have received only form email</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>For reference, the 2002 Approved EA for the Bradford Bypass is available on the Project Website by accessing the link below: https://www.bradfordbypass.ca/wp-content/uploads/2020/09/BBP-RoutePlanningEA-1997.pdf</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>responses without any substantive information to every single question that has been asked. The public and journalists were not provided with the assumptions behind the 2041 road network scenarios, with MTO stating these are “incomplete” and refusing to provide them, yet they were presented to the public in the PIC as facts in the “considerations for the Bradford Bypass Project.” No information was provided on the growth assumptions used, the study area for the modelling, the projections for commuter or freight trips after COVID 19, or 407 travel times. These models, if accurate, show that the highway cannot solve Bradford or York Region’s congestion problems and that the new highway would be congested as soon as it is built. A proper, public and transparent needs and alternatives assessment is needed with current information and transparent assumptions for traffic, as well as a comparison to 407 road toll restructuring, truck route changes, regional road improvements, and planned or potential improvements to GO transit. It is not clear whether any of these were considered in the “road network without Bradford Bypass” scenario. These alternatives to the project need to be considered fully with updated traffic information, and transparent assumptions and study areas. Until these are provided to the public the PIC is unacceptable. Given the scale of the project, and the lack of information during the public consultation process, a 30 day public review of the TESR study is not adequate. It is not clear if the fall 2022 consultation will take place before or after the TESR updates are completed. Public consultations need to take place and questions need to be answered AFTER updated studies are made available and need to provide a reasonable time for the public to comment, in line with the scale and intensity of the project. Impacts to Lake Simcoe, groundwater, climate, archaeological and cultural sites, Federal fisheries, and human health are inadequately studied; therefore respondents to this consultation can only say we want to see current studies that address these concerns. To decide on a route refinement before these studies are complete is an irresponsible approach. It is impossible to comment on the proposed mitigation measures since basic engineering, surface and groundwater quality, hydrology, air quality, noise and terrestrial and aquatic wildlife surveys have not been completed or provided for public comment. What mitigation might be appropriate depends entirely on the findings in a fully updated TESR and DCR. Once these are provided to the public for review, we would like</p>	<p>With respect to traffic studies and travel information, the travel time savings were calculated using the Provincial Greater Golden Horseshoe Transportation Model (GGHM) by comparing scenarios with and without the new corridor in place. The model considers population and employment targets by region, as identified in the <i>Places to Grow Act</i>, and incorporates future projects including transit improvements and other infrastructure projects.</p> <p>The purpose of the proposed Bradford Bypass is to improve connectivity to the region as well as to provide capacity to accommodate future demand in the region. The new freeway will relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and support urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404.</p> <p>Significant population growth is projected for both Simcoe County, with an estimated increase to 416,000 residents by 2031; and the Regional Municipality of York estimated increase to 1.79 million residents by 2041. The Bradford Bypass has been proposed as a response to this dramatic growth in population and travel demand in the area, and the forecasted increase in congestion on key east-west roadways linking Highway 400 to Highway 404. The “2019 Places to Grow: Growth Plan for the Greater Golden Horseshoe” enacted by the Government of Ontario identifies, and supports planned transportation corridors that are required to meet projected travel demand needs, including the proposed Bradford Bypass.</p> <p>Traffic projections utilizing population and employment densities are derived from the Provincial Greater Golden Horseshoe Transportation Model, which considers population and employment targets by region, as identified in the <i>Places to Grow Act</i>.</p> <p>Scenarios assessed using the model include Existing Conditions Network, 2041 No Build Scenario, and 2041 Build Scenarios.</p> <p>The 2041 Build and No Build scenarios assume all committed and funded future projects within the wider study area are implemented and in place, including transit improvements and accounting for potential travel mode shift due to these improvements. Under the Build scenario, the base preferred 2041 configuration is coded with the planned connections in place. Under the No Build scenario, no corridor is coded. Travel times under each scenario are calculated and compared to obtain the anticipated travel time savings.</p> <p>The 2041 horizon year travel time savings of 10-35 minutes are calculated based on the time of day and origin/destination within the limits of the</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic /Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>another opportunity to comment on what proposed mitigation should look like. The original EA failed to include much of this information and a lot of this information will change if the highway is proposed to be six instead of four lanes. The PIC material is unclear whether it uses 4 or six lanes for many of the sections.</p> <p>In terms of preliminary comments on the design, we oppose the interchange at Bathurst Street, as this would destroy large portions of the wood lot and wetland area. Overall, the number of interchanges should be minimized or limited to the 404 and 400 interchanges to ensure that the highway is used for its intended purpose of facilitating long-distance travel and does not contribute to congestion on local roadways. However it is impossible to comment on the design in detail without more information on the size of the proposed highway, and the potential impacts on health and the environment including water quality and wildlife.</p> <p>This highway project was canceled by a previous government because they wanted to encourage the use of the Barrie GO train. That has likely addressed most of the originally anticipated travel demand.</p> <p>Sincerely, [REDACTED]</p>	<p>corridor using an area-wide transportation model. The model compared scenarios, with and without the Bradford Bypass corridor in place, for various key origin and destination locations, including municipal centers within the region.</p> <p>The Preliminary Design and Environmental Assessment of the Bradford Bypass includes proposed interchanges at County Road 4, Bathurst Street and Leslie Street. These interchange locations were identified in the 2002 Approved EA which were developed, evaluated, and selected through the evaluation process. More information on these interchanges can be found in the PIC #1 materials here: https://www.bradfordbypass.ca/pic1/.</p> <p>The traffic demand assessment carried out as part of this study confirmed the locations of the proposed interchanges would service the provincial needs. Interchange configuration refinements at the proposed locations within the Study Area are being considered during the current study based on 5 broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>It is noted that municipalities within the Study Area of the Bradford Bypass have generated Official and Transportation Master Plans based on the proposed Bradford Bypass as per the approved EA (2002) in order to address traffic demand as a result of population and employment growth projections. As a result, the Project Team will continue to engage municipalities and will support future municipal interchange initiatives.</p> <p>The government is keeping its promise to build better public transit. Ontario is moving forward with two-way, all-day service every 15 minutes on key segments of the GO Transit rail network, improving access to transit and convenience for the people of Ontario. Through continued collaboration with Metrolinx and Infrastructure Ontario, the province continues to move forward with critical procurements, including additional infrastructure along all GO rail corridors.</p> <p>The Project Team acknowledges your concerns regarding the proposed freeway and the potential impact on the natural and cultural environment. As part of this current Preliminary Design and EA Study, the MTO is undertaking 15 environmental studies update and document existing conditions, identify and evaluate potential impacts of the project and recommend mitigation measures to reduce these impacts to meet current environmental legislative requirements. Environmental studies will be undertaken no matter what EA process is followed in order to evaluate potential impacts and identify mitigation measures for environmental protection.</p>

						<p>Within the study area there are 11 locations within the area of interest for LSRCA, as listed below and shown on the attached corresponding series of maps:</p> <p>Location 1</p> <p>At this location the highway crosses Frasier Creek watercourse and its associated flooding and erosion hazard. There is also an identified Wetland and Significant Groundwater Recharge area.</p> <p>Location 2</p> <p>This location has an identified watercourse (Frasier Creek) and associated erosion hazard limit.</p> <p>Location 3</p> <p>A wetland feature adjacent to Frasier Creek exists at this location. Based on the design, the wetland area is being avoided.</p> <p>Location 4</p> <p>A watercourse, erosion hazard and wetland existing at this location. The area is also identified as a significant ground water recharge area.</p> <p>Location 5</p> <p>This location contains a watercourse with associated erosion hazard limit.</p> <p>Location 6</p> <p>Within this section there is, provincially significant wetland, non evaluated wetlands (as identified by the Ministry of Natural Resources and Forestry), floodplain, and erosion hazard. Given this area will require a Metrolinx crossing, as well as a crossing for East Holland River, we would recommend spanning the entire wetland and watercourse feature.</p> <p>Location 7</p>	<p>The Project Team appreciates and acknowledges your comments on behalf of the Lake Simcoe Regional Conservation Authority, regarding areas of interest within the proposed study area. We have made note of the locations and the environmental features you have identified, and this information will be included as part of our environmental studies and technical reports.</p> <p>The Bradford Bypass is anticipated to cross the Holland Marsh Provincially Significant Wetlands at two points: along the Holland River and Holland River East Branch, for an approximate combined length of one kilometre, amounting to only 0.35 per cent of the entire PSW area. Through the Preliminary Design, the Project Team will carefully consider all impacts to wetland areas and will continue to work with environmental agencies, municipalities and other concerned stakeholders to identify principles and recommendations for mitigating the impacts of placing new or expanded provincial highways within wetland areas. The Preliminary Design will consider minimizing impacts to these wetland areas through engineering refinements and consider the following approaches and strategies:</p> <ul style="list-style-type: none"> Design refinements implemented in consultation with regulatory agencies including the Ministry of Natural Resources and Forestry and Conservation Authorities (for example: Lake Simcoe Region Conservation Authority, Nottawasaga Valley Conservation Authority) to minimize potential impacts, supplement these refinements and develop appropriate mitigation strategies; Adherence to conditions of environmental approvals applicable to project elements that interact with or influence provincially significant wetlands; surface water conveyance and management measures; strategic plantings to enhance the performance of proposed drainage and storm water management measures; erosion and sediment control measures to be implemented during construction; restricting construction-related activities to avoid sensitive periods for aquatic and wildlife species during life cycle stages; measures for spill control/containment/contingency plans; and, a construction inspection and monitoring plan, including use of qualified personnel, reporting and response procedures. <p>In addition, the MTO will work to understand and avoid where possible any potential impacts to Species at Risk within provincially significant wetland areas. Should potential impacts be confirmed to threatened or endangered</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>This area includes, provincially significant and non evaluated wetland, Simcoe Greenlands, floodplain and erosion hazard limits. The area is also identified as significant groundwater recharge area.</p> <p>Location 8</p> <p>Floodplain, provincially significant wetland, unevaluated wetland, watercourse and associated erosion hazard limit.</p> <p>Location 9</p> <p>Two watercourse crossings of the Holborn Drain and the Ravenshoe/Boag Drain exist at this location.</p> <p>Location 10</p> <p>Erosion hazard limits of Ravenshoe/Boag Drain are within this stretch.</p> <p>Location 11</p> <p>This area contains a watercourse (Ravenshoe/Boag Drain) and associated erosion hazard limit, wetland.</p> <p>The LSRCA provides the following suggestions to avoid or mitigate impacts associated with the proposed highway development within our areas of interest:</p> <ul style="list-style-type: none"> • Wherever possible, the floodplains, valleylands and wetlands be spanned to avoid impacts to the features • Any significant woodlands (map attached) be avoided or impact mitigation • Existing drainage and conveyance be maintained and or improved with no changed to upstream or downstream flows. • Quantity and quality storm water management controls be implemented to avoid impacting erosion, floodplains or pollution. • Any fill placement in the floodplain be avoided or compensated for with a incremental cut • All culverts be properly embedded and sized to avoid erosion of the banks 	<p>species, the MTO will work with the MECP to obtain a permit under the Ontario Endangered Species Act. The permitting process may include additional mitigation and / or monitoring conditions, and consultation requirements as environmental conditions to the project.</p> <p>Based on the Preliminary Design of the Preferred Route, a Drainage and Hydrology Assessment and Groundwater Impact Assessment will be completed as part of the study to identify potential impacts of highway runoff and stormwater on surface water and groundwater and develop appropriate mitigation measures to protect the Holland River watershed.</p> <p>The Drainage and Hydrology Assessment for Preliminary Design of the Preferred route is undertaken according to MTO's Environmental Reference for Highway Design (ERHD, 2013) and will include development of a Drainage Report to summarize stormwater management components, hydrologic/hydraulic assessments, proposed mitigation measures and Preliminary Design recommendations for potential stormwater management facilities (e.g. stormwater management ponds). Lake Simcoe Region Conservation Authority (LSRCA) and Nottawasaga Valley Conservation Authority (NVCA) will be consulted throughout the study to maintain alignment with currently policies and practices for the watershed.</p> <p>The Groundwater Impact Assessment for Preliminary Design of the Preferred route is undertaken according to MTO's ERHD and will include a desktop review of well records available from the Ontario Ministry of Environment, Conservation and Parks (MECP) as well as geological and hydrogeological maps and reports from secondary sources. Based on the information collected, the Project Team will verify the need and type of approval required for groundwater taking (i.e. MECP Environmental Activity and Sector Registry (EASR), Category 2 Permit-to-Take-Water (PTTW) or Category 3 PTTW). The required registration/permit will be obtained during the subsequent design phase of the study (detailed design).</p> <p>The Project Team will continue to communicate with the LSRCA as the project advances. We are establishing targeted community and advisory groups with sessions commencing in 2021. We would like to invite a representative from the LSRCA to participate in the Governmental Advisory Group. Please let us know if this would be yourself or another member of the LSRCA. Going forward, an Ontario Government Notice (OGN) announcing the date of the future PIC #2 will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p>

						<ul style="list-style-type: none"> Proper erosion and sediment control measures be undertaken to prevent sediment migration and impact to watercourses <p>Given the Ministry of Transportation is performing its functions for or on behalf of the Government of Ontario, Section 28 of the Conservation Authorities Act is not application. However we recommend further consultation through the detail detailed and undertaking or environmental discipline studies which will be carried out through the Preliminary Design including:</p> <ul style="list-style-type: none"> Drainage and Hydrology; Erosion and Sediment Control Risk Assessment; Fish and Fish Habitat Existing Conditions and Impact Assessment Report; Fluvial Geomorphology; Groundwater Impact Assessment; Preliminary Landscape Composition Plan; Terrestrial Ecosystems Existing Conditions and Impact Assessment Report (including an assessment of vegetation and vegetation communities, wildlife and wildlife habitat, species at risk and designated natural areas); and, 	<p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions or wish to meet directly with the Project Team, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-PIC1-53		To: Project Team [REDACTED]	New Stakeholder Comment Form	Species at Risk Farmland Loss	05-04-2021	<p>Hello,</p> <p>What is the plan to assess species presence, Species at Risk presence, protect and save wildlife (flora and fauna) populations? What is the plan to maintain, restore and enhance habitat and landscape connectivity for safe wildlife movement? What are the plans to ensure wildlife corridors are protected to facilitate safe wildlife movement as animals move to find suitable habitats as climate change causes resource availability to shift? What are the plans to mitigate noise and light pollution? How will runoff be dealt with? Where will the food that the region requires for a growing population be grown? How will greenhouse gas emissions be reduced? How will local produce be grown locally if local farm land is paved over?</p> <p>Thank you very much. I look forward to learning how this project will safeguard the community.</p> <p>0</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>Preliminary Design for the Bradford Bypass will include a wide range of environmental studies in accordance with EA and current legislative requirements. These studies include:</p> <ul style="list-style-type: none"> Terrestrial Ecosystems Existing Conditions and Impact Assessment Report (including an assessment of vegetation and vegetation communities, wildlife and wildlife habitat, species at risk and designated natural areas). The process for selection of the appropriate location, methods of exclusion or wildlife passage opportunities will be refined through consultation and engagement with regulatory agencies (Ministry of Environment Conservation and Parks (MECP); Ministry of Northern Development, Mines, Natural Resources and Forestry (MNDMRNF); conservation authorities). Using data obtained

CT-PIC-54		To: Project Team From: [REDACTED]	Email	Potential threats to migratory birds	05-05-2021	<p>Good afternoon [REDACTED] and review team,</p> <p>[REDACTED] is an organization aimed at protecting the lives of birds which are integral to our ecosystems.</p> <p>The team behind [REDACTED] focuses primarily on preventing bird-window collisions by raising awareness on this serious threat to migratory birds. We saw the need to write on this important issue, as it will also affect migratory birds. Our volunteers reported the notice regarding the Bradford Bypass proposal and so we wanted to provide a few comments:</p> <p>The proposal should be carefully considered in terms of its impact on the surrounding wildlife. All negative impacts due to the construction and use of this bypass should be taken into consideration.</p> <p>From reading Ecojustice's opinion on the matter, we have serious concerns that the bypass should go ahead at all: A news release from Ecojustice, representing a number of environmental and community groups, described the Environmental Assessment conducted for the project in 1997 as superficial, arguing it did not consider cumulative effects, climate change, or the impacts on natural heritage, migratory birds, fisheries, First Nations cultural heritage or air pollution, in detail. They argued that the significant impact on federally protected endangered species, migratory birds and aquatic life that will be caused by the highway, along with the associated increase in carbon emissions and strong local opposition to the project, all meet the conditions for a federal EA.</p> <p>Other options or routes for this project should be deliberated in order to prevent undue harm to species living in the wetlands and vicinity of the proposed Bradford Bypass.</p> <p>Additionally, preventative measures such as those demonstrated by the Ontario Road Ecology Group should be evaluated for this</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>Preliminary Design for the Bradford Bypass will include a wide range of environmental studies in accordance with EA and current legislative requirements.</p> <p>To address environmental commitments and conditions of the 2002 Approved EA related to terrestrial ecosystems and Species at Risk, including the specific requirement to evaluate potential wildlife crossings, the MTO will undertake a number of studies during the Preliminary Design. These studies include Terrestrial Ecosystems Existing Conditions and Impact Assessment Report including an assessment of vegetation and vegetation communities, wildlife and wildlife habitat, species at risk and designated natural areas. The terrestrial ecosystems assessment study and outcomes will be presented at PIC #2 and in the EA documentation.</p> <p>The MTO undertook advanced work prior to the preliminary design to update information related to Species at Risk (or SAR), and their habitat that may potentially occur within the project limits. Several sensitive species have the potential to be present within the study area, based on information gathered through the NHIC database, and consultation with Ministry of Natural Resources and Forestry, and MECP in early 2020. Sensitive species are those afforded protection under the relevant policies/legislation (<i>Endangered Species Act (ESA)</i>, <i>Migratory Birds Convention Act (MBCA)</i>, <i>Species at Risk Act (SARA)</i>).</p> <p>The MTO will continue field investigations initiated in 2020 to confirm species and habitats within the study area, identify constraints, assess potential impacts, and work with the design team to avoid potential impacts to SAR and their habitat where possible. Protection and mitigation measures will be implemented where practical and in consideration of the design evaluation</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>project, should it be approved. The safety of surrounding wildlife should be a top priority of the planning team behind the Bradford Bypass.</p> <p>Thank you for your time and consideration, [REDACTED]</p>	<p>criteria and legislative requirements. The MTO will aim to balance the technical and environmental constraints for the proposed design refinements and alternatives.</p> <p>Where required by MECP, or the needs of the project, species-specific surveys will be conducted by technical specialists during the appropriate season and design phase to confirm the presence of SAR or SAR habitat that may be impacted by the proposed works. This will further refine the potential or anticipated species-specific impacts and allow for development of species-specific mitigation strategies, which will be carried forward as environmental commitments, and requirements for environmental approvals, design refinements and construction measures.</p> <p>Where potential impacts to endangered or threatened species are identified, the MTO will work with regulatory agencies to meet the legislative requirements of the ESA and SARA. If required, the MTO will obtain the necessary permit or approvals for the project. The conditions of approvals, which may include mitigation and/or monitoring conditions, and consultation requirements, will become part of the environmental commitments for the project.</p> <p>The MTO recognizes that the species at risk legislation is updated regularly, and a species may be reclassified at any time. Should any species occurring within the study area be reclassified as either federal or provincial SAR prior to completion of the project, the MTO will consult with the regulatory agency for which the provincial and/or federal legislation applies, to confirm the legislative requirements. This may include changes to studies, impact assessments and mitigation strategies, and approval requirements.</p> <p>The process for selection of the appropriate location, methods of exclusion or wildlife passage opportunities will be refined through consultation and engagement with regulatory agencies (Ministry of Environment Conservation and Parks (MECP); Ministry of Northern Development, Mines, Natural Resources and Forestry (MNDMRNF); conservation authorities). Using data obtained during the Terrestrial Ecosystems studies, and through consultation with regulatory agencies, the MTO will identify appropriate opportunities and needs for exclusion fencing and wildlife passages.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area.</p>

							<p>Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-PIC-55		To: Project Team From: [REDACTED]	PIC 1 Comment Form	Update environmental studies More information for the PIC	05-05-2021	<p>The Public Information Centre content available on the Bradford Bypass Project Website is lacking in studies and concrete data. However, the environmental impacts of the potential highway as described are very concerning. Despite being a daily commuter from the area, the health of the Lake Simcoe watershed is of the greatest importance to me including protecting natural areas, water quality, and species at risk. The government had previously announced a plan to proceed with "early works" for the Bradford Bypass in Fall 2021 before the environmental assessment process and the Preliminary Design is completed (the website indicates that these will be finished in Spring 2023). Proceeding with early works before the environmental assessment process is unacceptable. All the needed studies must be complete so that citizens can understand the environmental impacts and the potential effectiveness of mitigation measures before there is any disturbance to the sensitive natural areas along the proposed highway route. More information is needed on the effectiveness of the planned highway. What assurances are there that this highway project will not simply create more bottlenecks for traffic and bring more idling cars to the community? Further, what assurance is there that the mitigation measures that would best protect the environment in the construction of this highway will be utilized over less expensive options? It is stated that the Bradford Bypass is necessary to accommodate the "massive" population growth that is anticipated in the upcoming decades. This projected population growth seems at odds with what we know is needed to protect the health of the Lake Simcoe watershed as outlined in the Lake Simcoe Protect Plan. It is disappointing that the only solution presented to alleviate traffic "congestion" in the area is to fragment environmentally protected areas of the Greenbelt including irreplaceable provincially significant wetland. Please provide up-to-date information, studies and data so residents can more accurately understand the impact of this highway on our community and comment accordingly.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Project Team acknowledges your concerns regarding the proposed freeway and the potential impact on the natural environment. As part of this current EA Study, 15 environmental studies are being undertaken update existing conditions, to identify and evaluate potential impacts of the project and recommend mitigation measures to reduce these impacts. Environmental studies will be undertaken no matter what EA process is followed in order to evaluate potential impacts and identify mitigation measures for environmental protection. One of the comprehensive environmental studies being undertaken will be documented in a Terrestrial Ecosystems Existing Conditions and Impact Assessment Report (including an assessment of vegetation and vegetation communities, wetlands, wildlife and wildlife habitat, species at risk and designated natural areas).</p> <p>The results of these studies will be presented during the next PIC (PIC #2) to be held during the fall of 2022, and documented in the EA documentation, which for this project is a Transportation Environmental Study Report (TESR).</p> <p>The Bradford Bypass is located within the Lake Simcoe Region Conservation Authority (LSRCA) regulation limits, south of Lake Simcoe. For those stormwater management facilities that may occur within the jurisdiction of the Nottawasaga Valley Conservation Authority and potentially influence the subwatershed, the MTO will apply NVCA water quantity and quality control guidelines.</p> <p>The project will not directly impact Lake Simcoe; however, the MTO will assess impacts with respect to the <i>Lake Simcoe Protection Act</i> and the Lake Simcoe</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>Protection Plan through consideration of water quality and quantity, stormwater management, groundwater management, landscaping and ecological restoration measures. Additionally, the MTO will evaluate the fluvial geomorphological designs for watercourses, erosion and sediment control and spills prevention and protection measures. The studies will be undertaken to satisfy the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual and other provincial and regulatory requirements.</p> <p>The Project Team will undertake drainage and hydrology engineering studies to develop an efficient and effective drainage system for the freeway, while addressing potential impacts relatives to runoff and the change in impervious cover in consultation with conservation authorities and provincial agencies. Findings from previous studies will be factored into the preliminary design for drainage and stormwater management.</p> <p>It is expected that several stormwater management ponds will be required as part of the design to meet the MTO Highway Design Standards and the very stringent LSRCA requirements for water quantity and quality control of discharges to Lake Simcoe, within the jurisdiction of the LSRCA.</p> <p>The Preliminary Design and Environmental Assessment of the Bradford Bypass includes proposed interchanges at County Road 4, Bathurst Street and Leslie Street. These interchange locations were identified in the 2002 Approved EA which were developed, evaluated, and selected through the evaluation process.</p> <p>The traffic demand assessment carried out as part of this study confirmed the locations of the proposed interchanges would service the provincial needs. Interchange configuration refinements at the proposed locations within the Study Area are being considered during the current study based on 5 broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>It is noted that municipalities within the Study Area of the Bradford Bypass have generated Official and Transportation Master Plans based on the proposed Bradford Bypass as per the approved EA (2002) in order to address traffic demand as a result of population and employment growth projections. As a result, the Project Team will continue to engage municipalities and will support future municipal interchange initiatives.</p> <p>MTO is undertaking a Traffic Study as part of the Preliminary Design and EA study. Travel time savings and projections were calculated using the Provincial</p>

							<p>Greater Golden Horseshoe Model (GGHM) by comparing scenarios with and without the Bradford Bypass corridor in place. This assessment includes various key origin and destination locations within the corridor including municipal centres in the region. The model accounts for population and employment targets by region, as identified in the <i>Places to Grow Act</i>.</p> <p>Scenarios include: Existing Conditions Network, 2041 No Build Scenario, and 2041 Build Scenarios. Travel times under each scenario are calculated and compared to obtain the anticipated travel time savings.</p> <p>We have added you the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-PIC-55		To: Project Team From: [REDACTED]	Email	Material used for the surface of the highway	05-06-2021	<p>Hello [REDACTED]</p> <p>I was wondering what material was planning to be used for the surface of the highway. In East Gwillimbury we've had excessive noise complaints caused the surface of the 404 extension to Keswick. Noise barriers were put up in the populated areas of Sharon but nothing was done for the rural home owners. although there are very few of us homeowners living close to the proposed route we would still like noise to be addressed. Thank you for your consideration. [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>A Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's Environmental Guide for Noise. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barriers walls, where the proposed improvements to the project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide.</p> <p>Construction-related noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan. Further details are available in MTO's Noise Guide.</p> <p>In addition, the MTO is continuously finding innovative opportunities to address noise mitigation efforts through engineering of various types and enhancements of engineering materials, construction technologies/ enhancements, and pavement structures (such as quiet pavements) which will be factored into this Preliminary Design study, and further examined during the subsequent Detail Design phase. The Project Team provided details on this during the East Gwillimbury council presentation on July 27, 2021. We encourage you to view the recorded session through the town website for additional information.</p> <p>We have added you the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-PIC-56		To: Project Team From: [REDACTED]	PIC 1 Comment Form	Issues with the options presented Changes to the survey in the PIC materials	05-06-2021	<p>I wish to object to the options in the answers to questions 6 and 7 on the survey. The questions are regarding travel on the proposed Bypass. For instance: How often do you anticipate using the Bradford Bypass for [] travel? The answer options include: Frequently/Occasionally/Rarely/Not Applicable. There is no option for never or I do not think the bypass should be built and therefore I do not need to take this route. This is an entirely applicable response for those of us who travel through this corridor and you are kneecapping/biasing results by refusing to acknowledge it as an option. I wish it to be registered in this survey that there are issues with the questions/offered responses. The proposed route runs through land that is environmentally sensitive, land used for agricultural purposes. We do not need this highway in order to travel through this region now or in the future.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>Thank you for your feedback regarding the answer options on the survey on the Project Website. The "Not Applicable" option was provided to capture those individuals who did not plan to use the proposed Bradford Bypass for a variety of reasons. Please note that the Project Team acknowledges your opposition of the project and we will consider your feedback for any future surveys that may be conducted as part of this study.</p>

CT-PIC-57		To: Project Team From: [REDACTED]	PIC 1 Comment Form	Noise mitigation Wildlife fencing	05-06-2021	<p>Under initial design updates section 4, you say that the road has been shifted 10 meters to the north between the 10th side rd and RR#4. This does not seem like it would be much help for the people living very close. I did not see much discussion of noise barriers under mitigation. You also mention pavement engineering but don't talk about what it would be. The noise level of the pavement /cement on highway 404 north of Green lane is horrendous and hurts my ears everytime I drive on it. People living in Sharon also find it terrible. Please don't use the same type of surface for this road. Under section 3 you mention a saving of 35 minutes attributable to the bypass. I drove from Rd 88 and the 400 to Queensville side Rd and 404 in 22 minutes. How could I save 35 minutes, by arriving before I left? In section 7 you talk about wildlife fencing. Would it be along the entire route or only certain areas. Would it include reptile and amphibian fencing? The size of interchanges in Ontario are always very large. In the U.S they often have much more minimal interchanges. The interchange at Bathurst street is in a sensitive area would it be a full blown interchange?</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The centerline or 'middle' of the BBP will be approximately 50-60m from the edge of the right-of-way. Refinement alternative 1 proposes a slight northerly shift of the freeway alignment in proximity to Wyman Crescent/Chelsea Crescent, creating more separation between the freeway and developed lands to the south of the freeway right-of-way, compared to the 2002 Approved EA alignment. The refinement of the freeway alignment geometry considers environmental and engineering design constraints. The preferred alternative to the preliminary design with details in the area of Wyman Crescent/Chelsea Crescent will be presented at PIC #2, and available for public review and comment. Building upon the preliminary design and EA study, further refinement of the design will be carried out and finalized during the detail design phase.</p> <p>Regarding your comment on noise levels and their relation to pavement type, a Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's Environmental Guide for Noise. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barriers walls, where the proposed improvements to the project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation</p>

							<p>to be warranted, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide.</p> <p>In addition, the MTO is continuously finding innovative opportunities to address noise mitigation efforts through engineering of various types and enhancements of engineering materials, construction technologies/ enhancements, and pavement structures (such as quiet pavements) which will be factored into the appropriate design phase. The Project Team provided details on this during the East Gwillimbury council presentation on July 27, 2021. We encourage you to view the recorded session through the town website for additional information.</p> <p>Construction-related noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan. Further details are available in MTO's Noise Guide.</p> <p>MTO is undertaking a Traffic Study as part of the Preliminary Design and EA study. Travel time savings and projections were calculated using the Provincial Greater Golden Horseshoe Model (GGHM) by comparing scenarios with and without the Bradford Bypass corridor in place. This assessment includes various key origin and destination locations within the corridor including municipal centres in the region. The model accounts for population and employment targets by region, as identified in the <i>Places to Grow Act</i>.</p> <p>Scenarios include: Existing Conditions Network, 2041 No Build Scenario, and 2041 Build Scenarios. Travel times under each scenario are calculated and compared to obtain the anticipated travel time savings. To clarify, travel time savings are not an average of 35 minutes, but rather a range between 10-35 minutes. Travel time savings are calculated utilizing the scenarios above based on the time of day and key origin and destination locations identified using an area-wide transportation model (with a 2041 horizon year).</p> <p>The process for selection of the appropriate location, methods of exclusion or wildlife passage opportunities will be refined through consultation and engagement with regulatory agencies (Ministry of Environment Conservation and Parks (MECP); Ministry of Northern Development, Mines, Natural Resources and Forestry (MNDMRNF); conservation authorities). Using data obtained during the Terrestrial Ecosystems studies, and through consultation with regulatory agencies, the MTO will identify appropriate opportunities and needs for exclusion fencing and wildlife passages.</p>

							<p>As we are currently in the Preliminary Design phase of the project, we are reviewing refinement alternatives and designs, including the proposed design for the Bathurst Street interchange. More information on this interchange can be viewed here: https://www.bradfordbypass.ca/2021/04/12/16-bathurst-street-interchange/. Proposed interchanges were identified and selected during the 2002 Approved EA study to allow improved access to the freeway to local residents and visitors to the local communities. The Project Team is engaged with local municipalities to gain feedback on the locations and designs of the proposed interchanges to ensure that they are in line with municipal and regional initiatives and goals.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-PIC-58		To: Project Team From: [REDACTED]	Email	More information and details within the PIC materials	05-06-2021	<p>There is no quantitative information here to be able to fully grasp and understand what is being proposed, potential impacts and how effective any mitigation measures may be. As a member of the public I am completely and utterly unable to make any informed decisions as to whether or not I could support or not support this project. There are no references to any sources of information or links. Are you asking the public to accept the highway upon blind faith? Also trying to shoehorn route from 24 yr. old approval, how much does the route have to change for the EA approval to be null and void?</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Project Team acknowledges your concerns regarding the proposed freeway and receiving more information. Information on the study, including previous EA reports, study timeline and process can be found through the Project Website (www.bradfordbypass.ca).</p> <p>In advance of the Preliminary Design, updates to the 2002 Approved EA were undertaken in 2019 to 2020 for Archaeology, Built Heritage, Fisheries, Groundwater, Land Use Factors, Terrestrial Ecosystems, and Waste and Contamination. Based on the findings of this work, an update to the</p>

							<p>environmental commitments to future work was noted and will be carried forward through Preliminary Design.</p> <p>Preliminary Design for the Bradford Bypass will include a wide range of environmental studies in accordance with EA and current legislative requirements. The 15 environmental studies are being undertaken to update existing conditions, identify and evaluate potential impacts of the project and recommend mitigation measures to reduce these impacts. Environmental studies will be undertaken no matter what EA process is followed in order to evaluate potential impacts and identify mitigation measures for environmental protection (refer to MECF Policy Proposal https://ero.ontario.ca/notice/019-1883 for further details). The results of these studies will be presented during the next PIC (PIC #2) to be held during the fall of 2022, and documented in the EA documentation, which for this project is a Transportation Environmental Study Report (TESR).</p> <p>As you are already on the Project Contact List and you will continue to be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience</p>
CT-PIC-59		To: Project Team From: [REDACTED]	Email	Consider public transit Concerns with species at risk	05-06-2021	<p>I have reviewed the information and am pleased to see the considerations for wildlife. My worry is that although this proposal does address destruction of habitat, eco-passages and fencing, what are the actual plans?</p> <p>In #9 (Holland River Bridge) and #16 (Bathurst Interchange) maps, there is significant destruction of habitat with the highway going through forested areas. That will displace an incredible number of species. Other options need to be considered.</p> <p>The proposal discusses "species at risk". How did these animals become "at risk"? Human activity - destruction of habitat, pollution, vehicle collisions, to name a few. Building this highway will only contribute to this issue. Wouldn't humans be smarter to put the money towards public transport rather than lining the pockets of construction moguls and pandering to people who</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>To address environmental commitments and conditions of the 2002 Approved EA related to terrestrial ecosystems and Species at Risk, including the specific requirement to evaluate potential wildlife crossings, the MTO will undertake a number of studies during the Preliminary Design. These studies include Terrestrial Ecosystems Existing Conditions and Impact Assessment Report including an assessment of vegetation and vegetation communities, wildlife and wildlife habitat, species at risk and designated natural areas. The</p>

						<p>want to get somewhere faster? Will it be too late when governments realize that our survival is closely linked to the survival of all critters? I have lived, worked, and played in this area for 40 years. There is no need for this highway. And I stress "need". Need and want are 2 very different things.</p> <p>When the proposal discusses eco-passages and fencing, that's great. However, how many, what form, and in what areas are they going to be? What companies have been consulted? Please consult the 4 sites that I have included. One is from the Ministry and 3 are from companies that work with governments in planning cost-effective, eco-friendly projects that respect wildlife habitats:</p> <p>http://www.roadsandwildlife.org/data/files/Documents/MTOEnvironmentalGuideforWildlifeMitigationFinal2015-ENGLISH(1).pdf</p> <p>https://www.aic.ca/wildlife-crossings-and-fish-passages/</p> <p>https://arc-solutions.org/new-solutions/</p> <p>https://eco-kare.com/about/</p> <p>I would appreciate answers to the questions I have asked. As you can see, I am a wildlife rehabber. However, what you might not realize is that all the work I do is volunteer. Why? Because it isn't just a hobby, it's because I know how important all the critters are in our world - they all have valuable jobs that keep humans healthy and alive.</p>	<p>terrestrial ecosystems assessment study and outcomes will be presented at PIC #2 and in the EA documentation.</p> <p>Preliminary Design for the Bradford Bypass will include a wide range of environmental studies in accordance with EA and current legislative requirements. These studies include Terrestrial Ecosystems Existing Conditions and Impact Assessment Report (including an assessment of vegetation and vegetation communities, wildlife and wildlife habitat, species at risk and designated natural areas). As part of the EA process, the terrestrial ecosystems assessment study and outcomes will be presented at PIC #2 and in the EA documentation, which will be made available for public review in accordance with Class EA requirements.</p> <p>The MTO undertook advanced work prior to the preliminary design to update information related to Species at Risk (or SAR), and their habitat that may potentially occur within the project limits. Several sensitive species have the potential to be present within the study area, based on information gathered through the NHIC database, and consultation with Ministry of Natural Resources and Forestry, and MECP in early 2020. Sensitive species are those afforded protection under the relevant policies/legislation (<i>Endangered Species Act (ESA)</i>, <i>Migratory Birds Convention Act (MBCA)</i>, <i>Species at Risk Act (SARA)</i>).</p> <p>The MTO will continue field investigations initiated in 2020 to confirm species and habitats within the study area; identify constraints, assess potential impacts, and work with the design team to avoid potential impacts to SAR and their habitat, where possible. Protection and mitigation measures will be implemented where practical and in consideration of the design evaluation criteria and legislative requirements. The MTO will aim to balance the technical and environmental constraints for the proposed design refinements and alternatives.</p> <p>Where required by MECP, or the needs of the project, species-specific surveys will be conducted by technical specialists during the appropriate season and design phase to confirm the presence of SAR or SAR habitat that may be impacted by the proposed works. This will further refine the potential or anticipated species-specific impacts and allow for development of species-specific mitigation strategies, which will be carried forward as environmental commitments, and requirements for environmental approvals, design refinements and construction measures.</p> <p>Where potential impacts to endangered or threatened species are identified, the MTO will work with regulatory agencies to meet the legislative</p>

							<p>making historic investments in transit and transportation infrastructure to dramatically expand and enhance the province's transportation network.</p> <p>We have added you the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-PIC-60		To: Project Team From: [REDACTED]	PIC1 Comment Form	Contamination of groundwater concern Noise and vibration concerns	05-06-2021	<p>I am really concerned with the newest proposal as the highway will be right beside my property. Main concerns for me are contamination of ground water; I am on a well and the highway will be right there. What if there is a catastrophic spill from an accident?? Noise and vibrations, and impacts to the Greenbelt (water, Marsh, wildlife) are also major concerns. I understand no environmental assessment will be done and the last was in 2002. That is grossly negligent. I am unimpressed with the Ford Government (disregard for the environment and climate) and will be voting them out in the next election if this highway proceeds with this flagrant disregard for our environment.</p> <p><i>[NOTE: This property is located at [REDACTED] and is directly adjacent to our [REDACTED] (see image below). This well is captured in our Groundwater Existing Conditions Report from Retainer Assignment and will be included in door-to-door well surveys during this PD study]</i></p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>Based on the Preliminary Design of the Preferred Route, a Drainage and Hydrology Assessment and Groundwater Impact Assessment will be completed as part of the study to identify potential impacts of highway runoff and stormwater on surface water and groundwater and develop appropriate mitigation measures to protect the Holland River watershed.</p> <p>The Drainage and Hydrology Assessment for Preliminary Design of the Preferred route is undertaken according to MTO's Environmental Reference for Highway Design (ERHD, 2013) and will include development of a Drainage Report to summarize stormwater management components, hydrologic/hydraulic assessments, proposed mitigation measures and Preliminary Design recommendations for potential stormwater management facilities (e.g. stormwater management ponds). Lake Simcoe Region Conservation Authority (LSCRA) and Nottawasaga Valley Conservation Authority (NVCA) will be consulted throughout the study to maintain alignment with currently policies and practices for the watershed.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>The Groundwater Impact Assessment for Preliminary Design of the Preferred route is undertaken according to MTO's ERHD and will include a desktop review of well records available from the Ontario Ministry of Environment, Conservation and Parks (MECP) as well as geological and hydrogeological maps and reports from secondary sources. Based on the information collected, the Project Team will verify the need and type of approval required for groundwater taking (i.e. MECP Environmental Activity and Sector Registry (EASR), Category 2 Permit-to-Take-Water (PTTW) or Category 3 PTTW). The required registration/permit will be obtained during the subsequent design phase of the study (detailed design).</p> <p>The Greenbelt Plan recognizes that infrastructure is important to Ontarians' economic well-being, human health, and quality of life. The Bradford Bypass corridor will put people to work, help Ontario's businesses remain competitive in an increasingly global marketplace, and make it easier for people to move around the GGH for work or leisure.</p> <p>The route selected for the Bradford Bypass was chosen, in part, to mitigate impacts to environmentally sensitive areas. As the project's EA study update moves ahead, the Project Team will carefully consider all impacts and will continue to work with environmental agencies, municipalities, conservation authorities and other concerned stakeholders to identify principles and recommendations for mitigating the impacts of placing new or expanded provincial highways and transitways within areas of the Greenbelt.</p> <p>Preliminary Design for the Bradford Bypass will include a wide range of environmental studies in accordance with EA and current legislative requirements. The 15 environmental studies are being undertaken to update existing conditions, identify and evaluate potential impacts of the project and recommend mitigation measures to reduce these impacts. Environmental studies will be undertaken no matter what EA process is followed in order to evaluate potential impacts and identify mitigation measures for environmental protection. The results of these studies will be presented during the next PIC (PIC #2) to be held during the fall of 2022, and documented in the EA documentation, which for this project is a Transportation Environmental Study Report (TESR).</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area.</p>

						<p>sounds of the birds etc. Or sleep with the windows open on a warm night. No longer possible due to the constant traffic sounds. An alarm clock is not necessary as the sound id traffic can be heard through closed windows. The sounds from this bypass will only add to this. The peace and tranquility of the conservation will also be shattered as the excessive noise will carry there as well</p>	<p>available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>Preliminary Design for the Bradford Bypass will include a wide range of environmental studies in accordance with EA and current legislative requirements. The 15 environmental studies are being undertaken to update existing conditions, identify and evaluate potential impacts of the project and recommend mitigation measures to reduce these impacts. Environmental studies will be undertaken no matter what EA process is followed in order to evaluate potential impacts and identify mitigation measures for environmental protection. As part of this study, a Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's Environmental Guide for Noise. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barriers walls, where the proposed improvements to the project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide.</p> <p>Construction-related noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan. Further details are available in MTO's Noise Guide.</p> <p>In addition, the MTO is continuously finding innovative opportunities to address noise mitigation efforts through engineering of various types and enhancements of pavement materials and pavement structures which will be factored into the appropriate design phase.</p> <p>The results of the preliminary design and environmental assessment studies will be presented during the next PIC (PIC #2) to be held during the fall of 2022, and documented in the EA documentation, which for this project is a Transportation Environmental Study Report (TESR).</p> <p>We have added you the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post. Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p>

CT-PIC-65		To: Project Team From: [REDACTED]	Email	Request to received reports and more info on noise mitigation	05-07-2021	<p>Thank you for your excellent presentation at our Council meeting a few weeks ago. It was very helpful. I have received a few requests from constituents hoping to access the latest route maps, particularly with respect to the proposed interchanges near County Rd 4 in Bradford. These are nearby property owners. Would it be possible to send me the latest maps.</p> <p>As well, I want to reiterate from our discussion at the Council meeting that noise mitigation and sound barriers will be important, particularly along homes in my ward abutting onto Dissette (Wood Cres, Orsi Ave, Turner Crt, Colborne St), as well as the subdivision north of Line 8, just east of County Rd 4. These are established subdivisions and so there are existing yard fences, but if sound barriers are required at their properties, that would be a good discussion to engage in sooner than later.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>Currently, MTO is preparing an advance works contract in partnership with Simcoe County and the Town of Bradford West Gwillimbury which is based on the approved Municipal Class EA prepared for the widening of County Road 4 from the existing 2 lanes to 4 lanes. Prior to the commencement of construction of this advance works contract, MTO is required to complete a study of the existing conditions including environmental conditions and mitigation to impacts to the extension practical. This also includes consultation with the public, stakeholders and indigenous peoples, and documentation of decision making. All applicable provincial and federal legislative and permitting processes will be completed as required.</p> <p>Attached is the Key Plan map for your reference to the County Road 4/Yonge Street advanced works/widening. Future designs/mapping related to the early works on County Road 4 will be available through the collaboration with municipal and county staff as designs are advanced.</p> <p>We acknowledge your comments regarding the importance of sound barriers. As part of the Bradford Bypass study, a Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's Environmental Guide for Noise. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barriers walls, where the proposed improvements to the project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide.</p>

							<p>include a Noise Impact Assessment, Air Quality Impact Assessment, Property Impact Assessment, Land Use Factors Assessment, and Human Health Assessment, which will all evaluate potential impacts of the freeway on adjacent landowners. The results of these studies will be presented during the next PIC (PIC #2) to be held during the fall of 2022, and documented in the EA documentation, which for this project is a Transportation Environmental Study Report (TESR).</p> <p>The Project Team will be holding a Value Engineering Workshop as part of this study, currently anticipated for Spring 2022.</p> <p>At this time, there are no plans in place to create dynamic charging systems for vehicles who choose to use the proposed Bypass. However, this may be explored further during the subsequent Detail Design phase.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-WEB-004		To: Project Team From: [REDACTED]	Q and A	TESR	05-18-2021	<p>Can you please explain how the proposed exemptions will affect the TESR and process?</p> <p>Is the 10th side road overpass a new addition to the design? Why is another overpass being included here?</p>	<p>*See response included in CT-PIC-26</p> <p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>An updated TESR is proposed for completion in 2022. MECP has been considering the results of consultation on a regulatory proposal (https://ero.ontario.ca/notice/019-1883) for a streamlined process to complete the EA for Bradford Bypass, tailored to the specifics of the project</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>and the procurement and delivery models planned. The regulation, if approved, will still require MTO to gather information about environmental conditions, predict and mitigate impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous peoples, and document decision-making. Other provincial and federal legislative and permitting processes would still apply. Please refer to MECF for details on the regulatory proposal.</p> <p>The 10th sideroad overpass is not a new addition to the study. The planning process for the 2002 Approved EA narrowed down alternatives from a broad range of potential solutions to the concept, ultimately selected as the Technically Preferred Route to a Planning level of detail. As part of this Preferred route, an overpass was required at 10th sideroad.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-WEB-005		To: Project Team From: [REDACTED]	Q and A	Cloverleaf Interchange	05-18-2021	<p>Please provide additional background and rationale for MTO highway design standard revisions eliminating former clover leaf interchange designs and the previously approved partial clover leaf interchange design at Highway 400 and the Bradford Bypass? The former approved interchange design provided access to properties located within OPA#15 Employment Lands on west side of Highway 400 from the Bradford Bypass which provided access for future employment uses and logistical highway access. The four (4) Highway 400 Interchange Alternatives provided cut off all access to the west side of Highway 400 Employment Lands in OPA#15 and require additional lands to complete the three (3) tiered overpasses?</p>	<p>Helld [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The design recommended as part of the Approved 2002 EA and Route Planning study was developed in accordance with highway design and safety</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>The proposed four (4) alternative interchange designs at Highway 400 and the Bradford Bypass will devalue planned employment lands since there is no direct access to the west side of Highway 400 as per previous approved interchange partial clover leaf design. Property owner's purchased lands based upon previous approved MTO Class EA. New interchange design alternatives will take more property from these adjacent property owners and make several 100 acres farms reduced in value and reduce land use options.</p> <p>What is the plan for future construction phasing of the Bradford Bypass? We assume MTO will start with proposed interchange at Highway 400 and move east towards Yonge Street?</p> <p>Has MTO and AECOM considered proposed future OPA#15 Employment Lands Sanitary Trunk Sewer design proposed along west side of Highway 400 from County Road 88 north to service 400 acres of employment lands located within OPA#15? The proposed interchange at Highway 400 and the Bradford Bypass will impact the proposed sanitary trunk sewer alignment that will need to be considered in the final interchange design.</p>	<p>standards applicable at that time. A partial cloverleaf interchange that would provide direct access to the lands adjacent to the interchange was not proposed as part of the route planning study in this location, only a freeway-to-freeway connection between Highway 400 and the Bradford Bypass was proposed.</p> <p>In advance of the Preliminary Design Study, the MTO undertook advance works to identify areas where the 2002 Approved EA required updates to meet current design standards. One such location occurred at the proposed freeway to freeway interchange with Highway 400. Freeway-to-freeway interchange updates were identified to correct the proposed loop ramp and provide directional freeway-to-freeway ramps to meet current design standards.</p> <p>At the proposed Highway 400 and Bradford Bypass interchange, Alternatives #1 and #2 provide access to the Simcoe County Road 88 interchange to vehicles travelling southbound on Highway 404 through which employment lands west of Highway 400 can be accessed. Alternative #3 and #4 provide access to both vehicles travelling southbound on Highway 400 and westbound on the Bradford Bypass to Highway 400 southbound. The Project Team continues to consult with local municipalities and takes into consideration land use planning information within the study area. The MTO will also meet with individual landowners throughout the study to discuss impacts to individual properties, understand concerns from landowners and identify opportunities to mitigate impacts.</p> <p>Construction phasing for the larger Bradford Bypass is still being evaluated at this time, but the MTO is also identifying opportunities for early works – Advanced Contracts as part of this project. Some preliminary early works activities that are currently being considered could include: new bridge construction (excluding watercourse crossings), bridge replacement or expansion, and utility relocation. As you may be aware, the Ontario government 2021 Budget allocated funding for the Bradford Bypass early works, which includes a grade separation at County Road 4/Yonge Street.</p> <p>Prior to the commencement of any early works, MTO is still required to gather information about environmental conditions, predict and mitigate impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous Communities, and document decision-making. Other provincial and federal legislative and permitting processes would still apply.</p>

							<p>As part of this study, the Project Team is in consultation with utility companies and municipalities to confirm any potential utility impacts related to the proposed Bradford Bypass. The Project Team will also be undertaking a Land Use Factors Assessment and Property Impact Assessment to identify future development areas and any potential impacts.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you would like to meet with the Project Team to discuss specific concerns or questions you may have about the properties linked to property owners you represent, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-WEB-006		To: Project Team From: [REDACTED]	Q and A	Additional Interchange At Yonge Street	05-18-2021	A comment related to the proposed interchanges: Wouldn't an interchange at Yonge Street (York Road 51) be more useful than at Bathurst (York Road 38)? Yonge Street directly serves the community of Holland Landing, meanwhile Bathurst Street doesn't go to any major community directly. Unless there's plans for Bathurst to cross the river into Simcoe County, I don't understand why Bathurst was chosen	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Preliminary Design and Environmental Assessment of the Bradford Bypass includes proposed interchanges at County Road 4, Bathurst Street and Leslie Street. These interchange locations were identified in the 2002 Approved EA which were developed, evaluated, and selected through the evaluation process.</p> <p>The traffic demand assessment carried out as part of this study confirmed the locations of the proposed interchanges would service the provincial needs. Interchange configuration refinements at the proposed locations within the Study Area are being considered during the current study based on 5 broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>It is noted that municipalities within the Study Area of the Bradford Bypass have generated Official and Transportation Master Plans based on the proposed Bradford Bypass as per the approved EA (2002) in order to address traffic demand as a result of population and employment growth projections. As a result, the Project Team will continue to engage municipalities and will support future municipal interchange initiatives.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-WEB-007		To: Project Team From: [REDACTED]	Q and A	BBP will not relieve congestion on the 404	05-18-2021	More than half of respondents said they would not use the highway or rarely use it. Why is this being put in? Who is commuting to Keswick? And the 404 is already jammed. What will be done to resolve congestion the 404?	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The purpose of the proposed Bradford Bypass is to improve connectivity to the region as well as to provide capacity to accommodate future demand in the region. The new freeway will relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and support urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404.</p> <p>Significant population growth is projected for both Simcoe County, with an estimated increase to 416,000 residents by 2031; and the Regional Municipality of York estimated increase to 1.79 million residents by 2041. The Bradford Bypass has been proposed as a response to this dramatic growth in population and travel demand in the area, and the forecasted increase in congestion on key east-west roadways linking Highway 400 to Highway 404.</p>

						<p>stopped or interrupted for this project. If there is a risk this project would mean our plant had to be relocated, we need to understand that as soon as possible and need to understand the details regarding the requirements and the process involved. We are on Artesian Ind Pkwy in the area of refinement.</p>	<p>from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>We recognize that your property is in close proximity to the right-of-way limits of the project. As the design progresses to determine the limits of grading and design for the overpass structure to carry the Bradford Bypass over Artesian Industrial Parkway, more information will be available to the public and adjacent property owners. Access along Artesian Industrial Parkway will be maintained. We encourage you to view the design refinement information at Artesian Industrial Parkway in the PIC materials here: https://www.bradfordbypass.ca/2021/04/09/8-general-design-refinements/. The ROW limits and alignment in this area can be viewed in the last image file on this page.</p> <p>The MTO will meet with individual landowners prior to PIC #2 to discuss impacts to individual properties, understand concerns from landowners and identify opportunities to mitigate impacts.</p> <p>The Project Team has received questions from [REDACTED] about communications with individuals from AGC Automotive. As we have multiple contacts for this property, it would be helpful to update our communication protocols and contact information to ensure the correct individuals are included going forward. Please let us know if we are to include you as part of the communications with AGC Automotive representatives. If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-WEB-010		<p>To: Project Team</p> <p>From: [REDACTED]</p>		<p>Q and A</p> <p>Construction Timeline</p> <p>Defining Design Refinement</p> <p>Expropriation</p>	05-18-2021	<p>When do you expect to start construction of this project? What is the timeline for this project? What exactly is a "design refinement"? Will MTO expropriate blocked off design refinement areas? At what point will MTO approach landowners for land that will be expropriated?</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Project Team is identifying opportunities for early works as part of this project. Currently, MTO is preparing to advance early works, which includes a grade separation at County Road 4/Yonge Street. Some of the other early works activities in the corridor that are currently being considered could include new bridge construction, bridge replacement or expansion, fencing, grading works, or utility relocation.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>Prior to the commencement of any early works, MTO is still required to gather information about environmental conditions, investigate and mitigate impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous peoples, and document decision-making. Other provincial and federal legislative and permitting processes would still apply.</p> <p>Design refinements are developed to bring previous designs, in this case those from the 2002 Approved EA, up to current design standards and consider factors such as adjustments to highway and road profiles at road crossings, traffic volume, demand, accessibility and safety, constructability, utility conflicts & property impacts, natural environment, social, economic & cultural sensitivities.</p> <p>MTO has already begun the process of acquiring lands from willing sellers for properties that have been identified as necessary to acquire. MTO will meet with individual landowners prior to PIC #2 to discuss impacts to individual properties, understand concerns from landowners and identify opportunities to mitigate impacts.</p> <p>MTO's preferred approach is to negotiate in good faith with owners as early as possible to reach amicable agreements for the acquisition of any properties needed to support important infrastructure improvements like this. Expropriation is only used as a backstop measure when agreements can't be reached within suitable project timeframes.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>The Project Team has been in communication with individuals from AGC Automotive, including Ryan Russell. As we have multiple contacts for this property, it would be helpful to update our communication protocols and contact information to ensure the correct individuals are included going forward. Please let us know if we are to include you as part of the communications with AGC Automotive representatives. If you have any other</p>

CT-WEB-010.1		To: Project Team From: [REDACTED]	Q And A	Potential Impacts to Business	05-18-2021	Hi, [REDACTED] operates a glass car window plant in the design refinement and we have yet to be contacted by MTO. When will we be contacted as you stated we would be contacted as early as possible? Thank you.	* Responses to this comment is reflected in the row above
CT-WEB-011		To: Project Team From: [REDACTED]	Q And A	Disapproving of the webinar How will impacts to the Holland marsh be mitigated	05-18-2021	<p>The plan is to place a highway through the Holland Marsh.... How do you "mitigate" that if the highway goes through?</p> <p>Improve traffic conditions or induced demand</p> <p>Very disappointing "PIC" webinar. Nothing more than a rote reading of carefully written statements in response to previously asked questions.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The webinar was presented by members of MTO and AECOM through Zoom to provide an initial summary of the first Part of PIC 1 and provide additional information related to the key comment and feedback themes submitted to the project team within the two-week review period from April 22 to May 6, 2021. The webinar was recorded and is available through the Project Website for those who were unable to attend the presentation on May 18th. Comments received during the PIC and webinar are reviewed and responded to by the project team as part of the consultation process.</p> <p>The Bradford Bypass is anticipated to cross the Holland Marsh Provincially Significant Wetlands at two points: along the Holland River and Holland River East Branch, for an approximate combined length of one kilometre, amounting to only 0.35 per cent of the entire PSW area. Through the Preliminary Design, the Project Team will carefully consider all impacts to wetland areas and will continue to work with environmental agencies, municipalities and other concerned stakeholders to identify principles and recommendations for mitigating the impacts of placing new or expanded provincial highways within wetland areas. The Preliminary Design will consider minimizing impacts to these wetland areas through engineering refinements and consider the following approaches and strategies:</p> <ul style="list-style-type: none"> Design refinements implemented in consultation with regulatory agencies including the Ministry of Natural Resources and Forestry and Conservation Authorities (for example: Lake Simcoe Region Conservation Authority, Nottawasaga Valley Conservation Authority)

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>to minimize potential impacts, supplement these refinements and develop appropriate mitigation strategies;</p> <ul style="list-style-type: none"> Adherence to conditions of environmental approvals applicable to project elements that interact with or influence provincially significant wetlands; surface water conveyance and management measures; strategic plantings to enhance the performance of proposed drainage and storm water management measures; erosion and sediment control measures to be implemented during construction; restricting construction-related activities to avoid sensitive periods for aquatic and wildlife species during life cycle stages; measures for spill control/containment/contingency plans; and, a construction inspection and monitoring plan, including use of qualified personnel, reporting and response procedures. <p>In addition, the MTO will work to understand and avoid where possible any potential impacts to Species at Risk within provincially significant wetland areas. Should potential impacts be confirmed to threatened or endangered species, the MTO will work with the MECP to obtain a permit under the Ontario Endangered Species Act. The permitting process may include additional mitigation and/or monitoring conditions, and consultation requirements as environmental conditions to the project.</p> <p>The purpose of the proposed Bradford Bypass is to improve connectivity to the region as well as to provide capacity to accommodate future demand in the region. The new freeway will relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and support urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404.</p> <p>Significant population growth is projected for both Simcoe County, with an estimated increase to 416,000 residents by 2031; and the Regional Municipality of York estimated increase to 1.79 million residents by 2041. The Bradford Bypass has been proposed as a response to this dramatic growth in population and travel demand in the area, and the forecasted increase in congestion on key east-west roadways linking Highway 400 to Highway 404. The "2019 Places to Grow: Growth Plan for the Greater Golden Horseshoe" enacted by the Government of Ontario identifies, and supports planned transportation corridors that are required to meet projected travel demand needs, including the proposed Bradford Bypass. Traffic projections utilizing population and employment densities are derived from the Provincial Greater</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>Golden Horseshoe Transportation Model, which considers population and employment targets by region, as identified in the Places to Grow Act.</p> <p>The 2041 horizon year travel time savings of 10-35 minutes are calculated based on the time of day and origin/destination within the limits of the corridor using an area-wide transportation model. The model compared scenarios, with and without the Bradford Bypass corridor in place, for various key origin and destination locations, including municipal centers within the region.</p> <p>All design options being considered will be done in coordination with the Towns of Bradford West Gwillimbury, East Gwillimbury, the Township of King, County of Simcoe and York Region.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-WEB-012		<p>To: Project Team</p> <p>From: [REDACTED]</p>	Q And A	Interchange at 2 nd Concession	05-18-2021	Making the interchange at 2nd concession makes more sense than Bathurst st. as it has already been widened. wouldnt you agree?	<p>Hello [REDACTED]</p> <p>Thank you for your participation in Public Information Centre (PIC) #1 for the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study. Please note that PIC #1 concluded on May 18th, 2021. The materials from the PIC, including a recording of the Webinar, will continue to be available through the Project Website at https://www.bradfordbypass.ca/consultation/.</p> <p>The Preliminary Design and Environmental Assessment of the Bradford Bypass includes proposed interchanges at County Road 4, Bathurst Street and Leslie Street. These interchange locations were identified in the 2002 Approved EA which were developed, evaluated, and selected through the evaluation process.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>The traffic demand assessment carried out as part of this study confirmed the locations of the proposed interchanges would service the provincial needs. Interchange configuration refinements at the proposed locations within the Study Area are being considered during the current study based on 5 broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>It is noted that municipalities within the Study Area of the Bradford Bypass have generated Official and Transportation Master Plans based on the proposed Bradford Bypass as per the approved EA (2002) in order to address traffic demand as a result of population and employment growth projections. As a result, the Project Team will continue to engage municipalities and will support future municipal interchange initiatives.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT-WEB-013		To: Project Team From: [REDACTED]	Email	Webinar Recording	05-18-2021	<p>Hi,</p> <p>I don't think I'll be able to attend the webinar live tonight. Could you please send me the link and a note regarding when the taped version will be available.</p> <p>Thanks,</p> <p>[REDACTED]</p>	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Friday, May 21, 2021 3:37 PM To: [REDACTED] Subject: RE: PIC Webinar</p> <p>Hello [REDACTED]</p> <p>Thank you for your interest for the Bradford Bypass Preliminary Design and Class Environmental Assessment Study.</p> <p>You can view a recording of the PIC Part 2 Webinar by accessing the Project Website or by using the link below: https://vimeo.com/552517791/2d251c9a34</p>

May 2021 - Consultation Record

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
CT272		Email	To: Project Team From: [REDACTED]	Loss of Farmland Impact on Holland Marsh Wildlife/SAR	05-07-2021	<p>I realize this is a day late, but I just saw the paper and wanted to respond, so I hope this is read.</p> <p>I live on a 5th generation farm; my son working with his dad. This is my son's response as well as mine. We're totally AGAINST the Bradford bypass!!! It's proposed that this will help eliminate congestion, traffic will move quicker. We disagree, it will make more. What we need is more rail travel. Studies have found it's more efficient and has less impact on the environment. It's more costly. By the time you've done all the environmental studies concerning water sheds, the green belt, farms, construction costs etc.....you know that the total amount will exceed what you've projected. You know that's true because it ALWAYS happens!!!</p> <p>So, what about all of these issues. The Holland Marsh is a unique area. It has some of the best soil for agriculture. The green belt and the water shed acts as a filtering system for Lake Simcoe as well as a home for an abundance of wildlife, plant and animal. So many farms are being developed, trees and fence rows removed...what a waste! Not only does it eliminate fields for growing produce but the fence rows provide a barrier for wind erosion and home for a multitude of plants, insects, trees, birds and animals some of which might be threatened or endangered species. I'm sure this investigation has NEVER been done. This one fence row along our field has hundreds of trilliums blooming right now....our province's flower. Wild violets and Trout lilies can be found as well and soon Jack in a Pulpits and flowers on wild apple trees will show themselves. That's only the start. Many of the birds are just arriving. I'm particularly fond of the Pileated Woodpecker, Canada's largest. Some of our arrivals need farm fields...The Killdeer, field sparrows, flycatchers, swallows, many insects, especially honey bees!! Our prized Monarch butterfly, which need milkweeds for survival is decreasing. The Eastern Meadowlark and the Bobolink are seldom seen anymore. So much is dependent on farm fields(open spaces) and fences rows. We take it for granted that they'll always be here but not if we keep paving them over and tearing them up WATER...vital to everything for survival! A creek runs thru the back part of the field. Herons and ducks often make a stop, Tree and Cliff Swallows swooping down for mosquitoes and a myriad of other flying insects appear. Won't be</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Project Team acknowledges your opposition to the project. These comments will be recorded as part of the public record for the Preliminary Design Study.</p> <p>In recognition of your concerns about congestion and traffic, MTO traffic analysis shows that even with all currently planned transportation and transit investments, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). For Ontarians in 2051, average travel speeds are expected to be 16 per cent slower when compared to 2016. This new transportation corridor will relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and support projected urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404. Motorists and trucks are anticipated to see more than a 60 per cent savings in travel time when using the new freeway compared to existing routes along local roads, saving up to 35 minutes.</p> <p>The Greenbelt Plan recognizes that infrastructure is important to Ontarians' economic well-being, human health, and quality of life. The Bradford Bypass corridor will put people to work, help Ontario's businesses remain competitive in an increasingly global marketplace, and make it easier for people to move around the GGH for work or leisure.</p> <p>The route selected for the Bradford Bypass was chosen, in part, to mitigate impacts to environmentally sensitive areas. As the project moves ahead, the Project Team will carefully consider all impacts and will continue to work with environmental agencies, municipalities, conservation authorities and other concerned stakeholders to identify principles and recommendations for mitigating the impacts of placing new or expanded provincial highways and transitways within areas of the Greenbelt.</p> <p>During the preliminary design study, the Ministry is committed to completing the project-specific assessment of environmental</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
						<p>long before the chorus of Spring Peepers will sing in the night and perhaps the a Great Horned or Barred Owl will join in. But for now, I'll enjoy the magnificent early morning song of the Brown Thrasher, what a treat to hear. I'm so lucky!</p> <p>My son has often noticed how during this covid pandemic, seldom is the farmer or people in agriculture thanked for all the work they do. They grow our food, they're as important!!! But if we continue tearing up and paving over the fields, guess we'll import our food. Might cost a bit more and most likely won't be as fresh or taste as good.</p> <p>We seem to think that we'll just put a road /highway in here or have it go over there and everything will be fine. We can fix the river that we had to move, or put in some new plants or trees and all will be the same...good as new! NO!!!!</p> <p>Again I say NO!!! I don't need a degree in science to understand this. You can't do all these changes and expect to "put it back to it's original state" a phrase I've often heard. Makes me laugh! So, you've studied everything that was there.. types of plants, insects, birds, animals, and trees, all the species in the water not to mention how deep it is, how fast it flows etc. the chemical composition of the soil...SOMEHOW I DOUBT IT..that's a lot of work and time.</p> <p>The Ontario Gov't would rather not even do an environmental study...Ford keeps using the MZO's to push everything through. Developers are his best friends!! We don't need farm fields, or the Holland Marsh (the best growing area, unique in Ontario) or the green belt or water sheds...ALL THAT IS NOT IMPORTANT???? BUT, IT IS!! Once that's gone, it's GONE FOREVER!!!...you can't make it again, won't be the same! What a waste, and for what....A ROAD! REALLY, for a temporary solution....WHAT A WASTE!!</p> <p>WHY CAN'T YOU SEE THAT???</p> <p>SHAME on the people who represent the regions involved!!!!</p> <p>It took billions of years for the world to evolve, for the variety of life living here. We think so little of it when we destroy it!!!!!!</p> <p>As of now, humans are the world's worst enemy!</p> <p>AND....Ford said he WASN'T GOING TO TOUCH THE GREEN BELT!!!</p>	<p>impacts to understand the current relationship between the project and the environment. To accomplish this, the MTO is undertaking current environmental studies in accordance with the MTO Environmental Reference for Highway Design (ERHD) and present day environmental legislations, to document existing conditions, identify design constraints, potential impacts and develop mitigation measures and strategies to be carried forward through design and construction of the project. These environmental studies will consider: agriculture, air quality, archaeology, cultural and built heritage, contamination and waste management, drainage & hydrology, erosion and sediment control, groundwater, fisheries, fluvial geomorphology, human health, landscaping, land use and property impacts, noise & vibration, terrestrial ecosystems, snow drift, species at risk, and surface water & stormwater management.</p> <p>Based on your specific interest and connection to agriculture, we would like to note that as a commitment of the 2002 Approved EA and as a requirement under the Greenbelt Plan (2017), an Agricultural Impact Assessment (AIA) will be undertaken to the existing standards and with reference to the Ontario Ministry of Agriculture, Food and Rural Affairs (OMAFRA) Draft Agricultural Impact Assessment (AIA) Guidance Document (March 2018). This study will identify potential impacts to agricultural lands and recommend mitigation measures and strategies to be incorporated into the project design.</p> <p>Our team is pleased to hear your concerns and observations about wildlife and plants in the area, and your knowledge of the types of habitat they rely on. Our terrestrial specialists are undertaking studies to further document the plants, communities, wildlife and habitat for species occurring within the study area, and recognizing the importance of sensitive species and their habitats, including Eastern Meadowlark, Bobolink and others.</p> <p>A first step in this occurred prior to the Preliminary Design when the Ministry completed an initial review to update information related to Species at Risk (or SAR), and their habitat that may potentially occur within the project limits. Several sensitive species have been identified with the potential to be present within the study area, based on information gathered through the NHIC database, and consultation with Ministry of Northern Development, Mines, Natural Resources and Forestry (MNDMNRNF), and MECP in early 2020. Sensitive species are those</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
							<p>afforded protection under the relevant policies/legislation (<i>Endangered Species Act (ESA)</i>, <i>Migratory Birds Convention Act (MBCA)</i>, <i>Species at Risk Act (SARA)</i>).</p> <p>The MTO will continue field investigations initiated in 2020 to confirm species and habitats within the study area; identify constraints, assess potential impacts, and work with the design team to avoid potential impacts to SAR and their habitat, where possible. Where required by regulatory agencies, species specific or targeted studies will be undertaken. Based on the outcome of these studies and considering the proposed design, protection and mitigation measures will be implemented where practical and in accordance with legislative requirements. The MTO will aim to balance the technical and environmental constraints for the proposed design refinements and alternatives.</p> <p>Where required by MECP, or the needs of the project, species-specific surveys will be conducted by technical specialists during the appropriate season and design phase to confirm the presence of SAR or SAR habitat that may be impacted by the proposed works. This will further refine the potential or anticipated species-specific impacts and allow for development of species-specific mitigation strategies, which will be carried forward as environmental commitments, and requirements for environmental approvals, design refinements and construction measures.</p> <p>Where potential impacts to endangered or threatened species are identified, the MTO will work with regulatory agencies to meet the legislative requirements of the ESA and SARA. If required, the MTO will obtain the necessary permit or approvals for the project. The conditions of approvals, which may include mitigation and/or monitoring conditions, and consultation requirements, will become part of the environmental commitments for the project.</p> <p>The MTO recognizes that the species at risk legislation is updated regularly, and a species may be reclassified at any time. Should any species occurring within the study area be reclassified as either federal or provincial SAR prior to completion of the project, the MTO will consult with the regulatory agency for which the provincial and/or federal legislation applies, to confirm the legislative requirements. This may include changes to studies, impact assessments and mitigation strategies, and approval requirements.</p>

CT137	[REDACTED]	Email	To: project Team From: [REDACTED]	Potential Client Impact (Professor Day Drive)	05-10-2021	<p>Project Team [REDACTED]</p> <p>I hope everyone is doing well and staying safe and sane, hopefully some sunshine this week helps us all out.</p> <p>I downloaded the updated information for the Bradford By-Pass and noticed a couple of items that I believe may impact one of our clients lands in the vicinity of Professor Day Drive.</p> <p>- Potential re-alignment of the interchange to the east appears to have shifted slightly the ROW and it wasn't clear if</p>	<p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>We are currently in the Preliminary Design phase of the project, which involves refinement to the alignment at select locations. The latest available design was presented as part of PIC #1. PIC #1 materials continue to be available on the Project Website</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
						<p>there are some adjusted boundaries to the north side of the MTO ROW.</p> <p>- Also, it mentioned updates to design of a number of under/over passes. Is Professor Day Drive being updated, and if possible could we please get a copy of the new design for the crossing to ensure grading in the area has consideration for this update.</p> <p>Please let me know if you need anything from our office.</p>	<p>(https://www.bradfordbypass.ca/pic1/). It is noted that the proposed overpass and underpass locations are preliminary in nature and subject to change during development of the Preliminary Design as well as subsequent phases of design.</p> <p>The alignment shift near Professor Day drive, west of County Road 4 is situated within the existing MTO ROW. The proposed shift as shown in the PIC material does not involve an adjustment to the north side of the MTO ROW.</p> <p>The proposed freeway crossing of future Professor Day Drive is currently planned as an underpass. The preliminary grading limits will be developed with further refinement during Detail Design. Further details on the design of this crossing will be made available at PIC #2.</p> <p>As part of the current design phase, the Project Team is considering the feedback received from stakeholders and evaluating the design refinement alternatives that were identified. A Reasoned Argument (trade-off) method of evaluation will be used to select the preferred refinements and alternatives. Once selected, the Preferred Alternative and the results of the impact assessments will be presented to the public at PIC #2 in the fall of 2022. If you or your client wish discuss specific concerns related to a property, please let us know and we would be able to speak with you.</p> <p>As you are already on the Project Contact List you will continue to be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/Question/Request	Comment/Question/Request	PROJECT TEAM RESPONSE
CT120 Cont		Email	To: Project Team From: [REDACTED]	Would like a greenway for noise and pollution reduction	05-10-2021	<p>Good day,</p> <p>Thank you for your response.</p> <p>I would like to bring forward an item that I believe will help mitigate some of the concerns residents have regarding living next to the proposed highway.</p> <p>A quick search of vegetation/trees/greenwall and highway would yield a number of sites proving the effectiveness of such to reduce pollution, noise, etc. The features also beautify the environment and provide many environmental benefits.</p> <p>As I live close to the proposed cloverleaf on [REDACTED] I am interested in having these factors considered.</p> <p>I am not sure at what elevation the bypass will take with regards to the subdivision alongside it, but nonetheless environmental features would be a wonderful addition for many reasons.</p> <p>How may I proceed with a formal consideration request.</p> <p>Thank you for your time.</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Project Team acknowledges your comments regarding landscaping and greenwalls, and these will be taken into consideration during this Preliminary Design study.</p> <p>A Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's <i>Environmental Guide for Noise</i>. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barrier walls, where the proposed improvements to the Project are expected to increase ambient noise levels above acceptable levels. For noise mitigation to be warranted as part of the design, it must meet MTO's technical, economic and administrative feasibility criteria. Construction-specific noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan.</p> <p>In addition to current guides and best management practices, MTO is continuously finding innovative opportunities to address noise mitigation through engineering of various types and enhancements of pavement materials and pavement structures which will be factored into the appropriate design phase.</p> <p>The Project Team will work closely with municipalities, the MECP, MNDMNR, and Conservation authorities to discuss mitigation and potential requirements for overall benefit measures to the landscape surrounding the Bradford Bypass, as a result of potential impacts to the natural environment, including woodlots and tree lines.</p> <p>As you are already on the Project Contact List you will continue to be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed</p>

CT275		New Stakeholder Comment Form	To: Project Team From: [REDACTED]	Concerns regarding conservation Concerns regarding air pollution	05-10-2021	<p>[REDACTED] strongly advocates for protection and conservation of natural heritage systems and features while recognizing continued projected growth and development within York Region.</p> <p>To minimize impacts on the wetland areas and forested areas along the path of the proposed route, is an elevated roadway being considered to accommodate movement of wildlife and minimize impacts, as opposed to ground level highway and causeway design? We recognize that on bridges and sections of elevated roadway that the collection of road runoff with salt and oil residue a collection system would be required. What other design features are being considered to minimize impacts on natural heritage features.</p> <p>We note that the western portion of the proposed route runs very close to residential areas in Bradford. Would you consider moving the route further north away from residential community areas to reduce the impact of air pollution and noise impacts? What other design features and ideas are being considered to minimize the impact of poor air quality which can have a significant impact on human health over time?</p> <p>Thank you for your consideration of these ideas and concerns. We look forward to your responses. Sincerely, [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>Through the Preliminary Design the team will consider minimizing impacts to wetland areas, which will include consideration for wildlife and wildlife habitat, through engineering refinements and consider the following approaches and strategies:</p> <ul style="list-style-type: none"> Design refinements implemented in consultation with regulatory agencies including the Ministry of Northern Development and Mines, Natural Resources and Forestry (MNDMNR) and Conservation Authorities (for example: Lake Simcoe Region Conservation Authority, Nottawasaga Valley Conservation Authority) to minimize potential impacts, supplement these refinements and develop appropriate mitigation strategies; Adherence to conditions of environmental approvals applicable to project elements that interact with or influence provincially significant wetlands; surface water conveyance and management measures; strategic plantings to enhance the performance of proposed drainage and storm water management measures; erosion and sediment control measures to be implemented during construction; restricting construction-related activities to avoid sensitive periods for aquatic and wildlife species during life cycle stages;

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
							<ul style="list-style-type: none"> measures for spill control/containment/contingency plans; and a construction inspection and monitoring plan, including use of qualified personnel, reporting and response procedures. <p>In addition, the Project Team continues to gather existing conditions information to assess potential impacts and recommend strategies to avoid or mitigate potential impacts to species at risk and provincially significant wetland areas. The ministry will work with the MECP to obtain applicable permit(s) under the <i>Ontario Endangered Species Act</i> as it relates to potential impacts to threatened or endangered species. The permitting process may include additional mitigation and/or monitoring conditions, and consultation requirements as environmental conditions to the project.</p> <p>The process for selection of the appropriate location, methods of exclusion or wildlife passage opportunities will be refined through consultation and engagement with regulatory agencies (Ministry of Environment Conservation and Parks (MECP); Ministry of Northern Development, Mines, Natural Resources and Forestry (MNDMNR); conservation authorities). Using data obtained during the Terrestrial Ecosystems studies, and through consultation with regulatory agencies, the MTO will identify appropriate opportunities and needs for exclusion fencing and wildlife passages.</p> <p>The Bradford Bypass is located within the Lake Simcoe Region Conservation Authority (LSRCA) regulation limits, south of Lake Simcoe. For those stormwater management facilities that may occur within the jurisdiction of the Nottawasaga Valley Conservation Authority and potentially influence the subwatershed, the MTO will apply NVCA water quantity and quality control guidelines.</p> <p>The project will not directly impact Lake Simcoe; however, MTO will assess impacts with respect to the <i>Lake Simcoe Protection Act</i> and the Lake Simcoe Protection Plan through consideration of water quality and quantity, stormwater management, groundwater management, landscaping and ecological restoration measures. Additionally, MTO will evaluate the fluvial geomorphological designs for watercourses, erosion and sediment control and spills prevention and protection measures. The studies</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
							<p>will be undertaken to satisfy the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual and other provincial and regulatory requirements.</p> <p>Preliminary design and detail design studies will build upon the environmental commitments from the 2002 Approved EA, and in accordance with Ontario Regulation 697/21 as it relates to water quality, drainage and stormwater management. The drainage and hydrology engineering studies undertaken for the project will develop an efficient and effective drainage system for the freeway, while addressing potential impacts related to runoff and the change in impervious cover. It is expected that several stormwater management features and infrastructure will be required as part of the design to meet the MTO Highway Design Standards and the LSRC requirements for water quantity and quality control of discharges to Lake Simcoe, within the jurisdiction of the LSRC. In addition, the design of the highway and stormwater management for the highway will meet the provincial legislative requirements for water quality and quantity under the <i>Ontario Water Resources Act</i> and <i>Environmental Protection Act</i>.</p> <p>Refinement of the freeway alignment within the study limits and consideration of the freeway's proximity to existing and approved developments is underway. Localized and minor alignment shifts may be considered as part of this study based on the outcome of environmental studies and consultation, however, the location of the Bradford Bypass corridor, as selected during the 2002 Approved EA study, considered a number of factors, and therefore, alternative routes for the freeway are not being considered as part of this study.</p> <p>This alignment is technically preferred for a freeway in terms of highway network expansion, ease of construction, relationship to provincial and municipal land use planning and the preferred route is already included in Official and Transportation Master Plans, as well as the <i>Places to Grow Act</i>, as well as having fewer negative impacts to residential and natural areas when compared to other route options considered.</p> <p>Preliminary Design for the Bradford Bypass will include a wide range of environmental studies in accordance with current legislative requirements. The 15 environmental studies are being undertaken to update existing conditions, identify and evaluate</p>

							<p>potential impacts of the project and recommend mitigation measures to reduce these impacts. Environmental studies will be undertaken in order to evaluate potential impacts and identify mitigation measures for environmental protection. These studies will include a Noise Impact Assessment, Air Quality Impact Assessment, Property Impact Assessment, Land Use Factors Assessment, and Human Health Assessment, which will all evaluate potential impacts of the freeway on adjacent landowners. The results of these studies will be presented during the next PIC (PIC #2) to be held during the fall of 2022 and documented in accordance with Ontario Regulation 697/21.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>

CT277	█	New Stakeholder Comment Form	To: Project Team From: █	Groundwater Protection	05-12-2021	<p>*Add to CL</p> <p>It is generally accepted that the Hwy 400 ditches are contaminated with arsenic, road salt and other contaminants. As well, the peat in the Marsh is typically 6 feet deep and extends for 4 km. This will mean working below the water table.</p> <p>How do you plan to protect the groundwater as well as the surface water flowing into Lake Simcoe?</p>	<p>Hello █</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>As part of the Preliminary Design, door-to-door well assessments of all properties within a 500 m radius of the construction area will be completed. As part of this assessment, homeowners received a letter and questionnaire provided AECOM with a brief history/information of any water well(s) on the property. As part of this questionnaire, homeowners were asked if they would like AECOM to come to the property (with COVID protocols) and test the rate of flow, take pictures of the well and collect an untreated groundwater sample for analysis against drinking water standards. This assessment created a baseline of the water well condition prior to construction activities and can potentially result in further monitoring/samples taken during and after construction of the new highway.</p>

CT282	[REDACTED]	Email	<p>To: Project Team</p> <p>CC: [REDACTED]</p> <p>From: [REDACTED]</p>	Updates to EA	05-19-2021	<p>Hello Bradford Bypass Project Team,</p> <p>I would like to confirm that there has been no update posted to the proposal to exempt the Bradford Bypass from the requirements of the Environmental Assessment Act. In order to proceed with the proposed exemptions and early works, the public must be notified of a decision through the Environmental Registry of Ontario through this posting: https://ero.ontario.ca/notice/019-1883</p> <p>I would also like to echo Irene's question in particular on the legislative authority MTO has to proceed with early works without this decision notice.</p> <p>Thanks,</p>	<p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>On October 7, 2021, Ontario Regulation 697/21 came into effect with respect to the exemption for the Bradford Bypass Project and under the <i>Environmental Assessment Act</i>. The regulation sets conditions for the assessment process going forward and for continued environmental protection and consultations for the Bradford Bypass Project and associated Early Works. The MTO remains responsible for gathering existing information about environmental conditions, predict and mitigate impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous peoples, and document decision-making.</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
							<p>Other provincial and federal legislative and permitting processes would still apply. Further information regarding the conditions of the exemption can be found at the link here: https://www.ontario.ca/laws/regulation/r21697?search=697.</p> <p>Early works components of the project are subject to Ontario Regulation 697/21. The Ministry will meet the requirements of the regulation prior to advancing to construction. Currently, the Ministry is working collaboratively with Simcoe County for early works at County Road 4 and the Bradford Bypass. This builds upon the Municipal Class EA undertaken by Simcoe County for widening of County Road 4 and preliminary design and environmental assessment for the Bradford Bypass project. As per O. Reg. 697/21, a Draft Early Works Report (EWR) for works completed at County Road 4 will be completed and will be made available to Indigenous communities, government agencies, and interested members of the public for review and comment.</p> <p>The Ontario government 2021 Budget allocated funding for the Bradford Bypass early works, which includes the grade separation at County Road 4/Yonge Street.</p> <p>We have added you to the Project Contact List and you will be notified through email of future Public Information Centres (PICs) and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT283		Email	To: Project Team From: [REDACTED]	Environmental impacts and mitigation	05-19-2021	<p>Hello,</p> <p>I wanted to know what environmental impact mitigation techniques are being considered for the application of salt to the highway during the winter months. The impacts to the water bodies adjacent to the highway will pay the price.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
						<p>The best mitigation technique is no highway at all, but if that doesn't happen, here are my thoughts..</p> <p>Obviously, there will be the water/salt mix that will runoff the highway and into the surface water, particularly at the river and marsh crossings, but the salt spray from vehicles will no doubt have an impact as well.</p> <p>As studies have shown, the chloride levels in all bodies of water in Ontario is rising.</p> <p>Maybe this new highway could have the requirement of an alternate de-icing system. A system that does not add to an already serious problem.</p> <p>As a property owner on Lake Simcoe, it is a large concern. We must consider this problem in everything we do going forward.</p> <p>I understand that Lake Muskoka has already risen to near dangerous levels of chloride in its water.</p> <p>I look forward to a response.</p> <p>Thank you, in advance,</p> <p> Ontario</p>	<p>The Project Team will undertake drainage and hydrology engineering studies to develop an efficient and effective drainage system for the freeway, while addressing potential impacts relative to runoff and the change in impervious cover in consultation with conservation authorities and provincial agencies. Findings from previous studies will be factored into the Preliminary Design for drainage and stormwater management.</p> <p>The Bradford Bypass is located primarily within the Lake Simcoe Region Conservation Authority (LSRCA) regulation limits, south of Lake Simcoe. For those stormwater management facilities that may occur within the jurisdiction of the Nottawasaga Valley Conservation Authority (NVCA) and potentially influence the subwatershed, MTO will apply NVCA water quantity and quality control guidelines.</p> <p>The project will not directly impact Lake Simcoe or Scanlon Creek, however, MTO will assess impacts with respect to the <i>Lake Simcoe Protection Act</i> and the Lake Simcoe Protection Plan through consideration of water quality and quantity, stormwater management, groundwater management, landscaping and ecological restoration measures. Additionally, the MTO will evaluate the fluvial geomorphological designs for watercourses, erosion and sediment control and spills prevention and protection measures. The studies will be undertaken to satisfy the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual and other provincial and regulatory requirements.</p> <p>The Project Team will undertake drainage and hydrology engineering studies to develop an efficient and effective drainage system for the freeway, while addressing potential impacts relative to runoff and the change in impervious cover in consultation with conservation authorities and provincial agencies. Findings from previous studies will be factored into the Preliminary Design for drainage and stormwater management.</p> <p>It is expected that several stormwater management ponds will be required as part of the design to meet the MTO Highway Design Standards and LSRCA requirements for water quantity and quality control of discharges to Lake Simcoe, within the jurisdiction of the LSRCA.</p>

							<p>The use of alternate de-icing systems may be considered as part of operations and maintenance following construction of the freeway, in line with current MTO policies.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT284	█	Phone	To: Project Team From: █		05-19-2021	<p>hi this is █ calling on May 19th just inquiring about the Bradford bypass if I can get a call back █ thank you</p> <p>█ called on May 21st 2021 and let █ know we received his message and were calling back. Indicated we would attempted to call again on Tuesday May 25th.</p> <p>May 21st █ called back and indicated he has two questions he would like brought forward to the project team. His questions are listed below:</p> <ol style="list-style-type: none"> 1. How far will the proposed alignment be located from Chelsea Crescent. Particularly what are the proposed distances between lines 8 and 9. 2. When is the exact date of construction for the bypass? 	<p>Hello █</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. Please see the below responses to your questions from your call with the Project Team on May 21, 2021.</p> <p>The proposed alignment of the Bradford Bypass in the area of Chelsea Crescent is best shown in the below image showing the Professor Day Drive preliminary design refinement alternative 1 presented on the General Design Refinements page of the PIC materials (https://www.bradfordbypass.ca/2021/04/09/8-general-design-refinements/).</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
							 <p>Refinement alternative 1 proposes a slight northerly shift of the highway alignment, creating more separation between the highway and developed lands to the south of the highway right-of-way, compared to the 2002 Approved EA alignment.</p> <p>The Preliminary Design preferred alternative will be presented at PIC #2, and available for public review and comment. Building upon the Preliminary Design and EA update study, further refinement of the design will be carried out and finalized during the Detail Design phase.</p> <p>Preliminary Design for the proposed Bradford Bypass is anticipated to be completed in early 2023. Detail Design and Construction will follow, subject to funding and approvals.</p> <p>The MTO intends to move ahead with Early Works as set out in Ontario Regulation 697/21 to construct a grade-separated bridge crossing for the future Bradford Bypass at County Road 4 (Yonge Street) and the potential to proceed in advance of the rest of the Bradford Bypass Project, provided that MTO completes an Early Works Assessment Process as set out in the regulation. MTO is required to complete all requirements set forth in the regulation, such as carrying out consultation, and obtaining permits and approvals for the project. Upon study completion of the County Road 4 works, a draft Early Works Report will be prepared to document the design and environmental study, which will be made available for public review and comment.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this</p>

							<p>study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT088		Email	To: Project Team From: [REDACTED]	Impact on business	05-19-2021	<p>Thank you for the PIC#1 webinar last night. We are an Automotive OEM supplier, and we are very concerned that we are falling within the area of refinement (blue dotted line). When are you planning on reaching out to the effected businesses? It appears that our associate parking lot, and truck receiving area will be impacted potentially by the construction. We are really hoping that we will not have to move, as this will impact our Automotive OEM customers.</p> 	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment (EA) Study.</p> <p>Based on the approved alignment and limits of the right-of-way (ROW), your property line abuts the proposed ROW limits. As part of the Preliminary Design, MTO will meet with individual landowners through 2021 and early 2022 to discuss potential or expected impacts to individual properties, working with them to understand their individual concerns and identify opportunities to mitigate impacts.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/Question/Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
CT062		Email	To: Project Team From: [REDACTED]	NVCA Comments - Bradford By-pass EA - NVCA ID # 43740	05-19-2021	<p>Good morning</p> <p>[REDACTED] is pleased to provide comments on the materials provided related to the Preliminary Design and Class Environmental Assessment study for the proposed 'Bradford Bypass' highway connection.</p> <p>Only the western-most interchange of the proposed highway connection is relevant to [REDACTED] jurisdiction, where the proposed connection meets the existing Highway 400. A Transportation Environmental Study Report (URS/Ontario 2003; TESR) was previously prepared in support of the original EA which evaluated the proposed alignment of the highway connection, and was subsequently approved. It's the understanding of NVCA staff that an updated study for the interchange is required to address updates in design standards and presumably other changes to the relevant policy framework.</p> <p>From a natural heritage perspective, the footprint of the proposed 400 interchange overlaps with the existing alignment of one or more tributaries of a watercourse known as Penville Creek. There are no mapped wetlands within the footprint of the proposed interchange. Agricultural lands and/or cultural environments adjacent to the existing Highway 400 alignment may serve as habitat for one or more Species at Risk. It would be expected that an updated TESR will address these and other potential constraints identified through preliminary review. It is noted that the 2003 TESR addresses additional natural heritage constraints (including additional watercourse crossings and wetland areas) associated with a potential widening of Highway 400 on either side of the proposed interchange. It is not clear if this highway widening aspect of the original EA is still relevant to the updated proposal. If so, further details would be required regarding potential encroachment into regulated features, including mitigation planning.</p> <p>Thank you for the opportunity to provide comments on this Environmental Assessment.</p> <p>Sincerely,</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Project Team appreciates and acknowledges your comments on behalf of the [REDACTED] regarding areas of interest within the proposed study area. We have made note of the locations and the environmental features you have identified, and this information will be included as part of our environmental studies and technical reports.</p> <p>As part of our ongoing commitment to understand the relationship between the project and the environment, MTO is undertaking current environmental studies in accordance with Ontario Regulation 697/21 to document existing conditions, identify design constraints, potential impacts and develop mitigation measures and strategies to be carried forward through design and construction of the project. These environmental studies will consider: agriculture, air quality, archaeology, cultural and built heritage, contamination and waste management, drainage & hydrology, erosion and sediment control, groundwater, fisheries, fluvial geomorphology, human health, landscaping, land use and property impacts, noise & vibration, terrestrial ecosystems, snow drift, species at risk, and surface water & stormwater management. From an engineering and design perspective, MTO will continue to conduct engineering design studies that will consider structural elements, highway design, pavement engineering, geotechnical and foundations, traffic, electrical, Advanced Traffic Management Systems, and land surveys.</p> <p>The results of the environmental studies and engineering design will be presented to the public for review and comment in PIC #2 and documented in accordance with Ontario Regulation 697/21 and will be available for public review at the end of the Preliminary Design in 2022.</p> <p>Refinements and alternatives to the Highway 400 and Bradford Bypass Freeway to Freeway interchange proposed in the 2002 EA and Route Planning Study are part of the current design study. The Project Team presented refinements and alternatives to this location based on current Highway Design and Safety standards</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
							<p>during PIC #1. Studies for the widening of Highway 400 are undertaken separately by the MTO. This study will build upon those proposed and final designs where the design elements intersect. Potential impacts and proposed mitigation measures for the proposed Bradford Bypass will be evaluated and developed.</p> <p>The Project Team will continue to communicate with the NVCA as the project advances. We are establishing targeted community and advisory groups with sessions. We would like to invite a representative from the NVCA to participate in the Governmental Advisory Group. Please let us know if this would be yourself or another member of the NVCA. Going forward, an Ontario Government Notice (OGN) announcing the date of the future PIC #2 will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions or wish to meet directly with the Project Team, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT221		Email	<p>To: Project Team</p> <p>From: [REDACTED]</p>	New owner of property	05-25-2021	<p>Good afternoon!</p> <p>The property changed hands on [REDACTED]</p> <p>The purchaser's name is [REDACTED]</p> <p>The email and cell phone number of the purchaser is [REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for providing the Project Team with the contact information for the new owners of the property. CT194		Email	<p>To: Project Team</p> <p>From: [REDACTED]</p>	Noise Impacts		<p>Hello,</p> <p>I watched the webinar on May 18th and saw the Q and A but didn't see my questions specifically answered. Do you have specific answers to them? I put them below again. Thanks!</p> <ol style="list-style-type: none"> 1. I see the alignment of the Bypass has been moved North by 10m of Chelsea Cres. What will be the exact distance between the the end of the residential properties and the Bypass roads? 2. Will there be any sound barriers or retaining walls built in this section behind Chelsea Cres? 3. Will the Bypass be built below grade so that there is a hill that acts as a natural sound barrier? I see on the site it mentions that there will be underpass at Professor Day drive. Does this mean that the portion of the bypass behind Chelsea Cres will in fact be lower then the grade of Chelsea Cres? 	
CT285		Email	<p>To: Project Team</p> <p>From: [REDACTED]</p>			<p>Hi my name is [REDACTED] and my number is [REDACTED]</p> <p>I just wanted to talk to somebody about the fact that the overview for the Bradford bypass says you are doing a TESR but there is still a live ERO out there saying that the province is wanting an exemption from the TESR so I need somebody to explain that. Its been more than a month since we asked for this information about that we haven't heard anything.</p> <p>So it doesn't look good, it looks like you are trying to get out of work, if that is the case then that is terrible and we need to talk about it I just really need some clarity on this ERO. [REDACTED]</p>	<p>* [REDACTED] called [REDACTED] back on 06-02-2021</p> <p>[REDACTED] let [REDACTED] know her comments were under consideration. I let [REDACTED] know that we received her comments, and that the Project Team is working to provide a response to the comments.</p> <p>[REDACTED] asked if we had a timeline regarding the construction of the bypass</p> <p>I indicated the Preliminary Design is anticipated to be completed in 2023, that is the information that I have at this time.</p> <p>[REDACTED] said that she has heard different information from different sources regarding the timeline and the construction.</p> <p>I indicated that I only have information on the Preliminary Design at this time, however her comments are with the project team and if there is additional information regarding this then it will be provided to her.</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
							<p>██████ indicated that she was extremely disappointed in the work on the timeline and she did not understand why there are different answers for the questions or how we didn't know. At this time ██████ also used profanities to explain that she was angry and upset that there is no clear information on timelines.</p> <p>██████ went on to explain that she is writing press releases regarding the issue, and that it is not okay that we do not have more information on timelines.</p> <p>I attempted to respond to her comment but she said thank you, goodbye and hung up.</p>
CT286	██████	Email	To: Project Team From: ██████	Support for BBP	05-27-2021	<p>*Add to CL</p> <p>Re: Proposed Bradford Bypass</p> <p>I am submitting my feedback on the proposed Bradford Bypass to connect Highways 404 to 400.</p> <p>This is long overdue in my opinion and will be a key piece of Ontario's highway infrastructure.</p> <p>So long as the environmental impacts around the Holland Marsh and river are mitigated, I am 100% in favour of the highway.</p> <p>I see this as improving traffic flow, reducing traffic congestion and improving road safety on existing Bradford streets and should help reduce pollution by eliminating the current stop/start at multiple traffic lights when driving from highway to highway.</p> <p>I currently drive through the area at least 20x or more per year and would be a regular user of the new highway.</p> <p>Thank you.</p> <p>██████</p>	<p>From: projectteam@bradfordbypass.ca <projectteam@bradfordbypass.ca> Sent: Monday, May 31, 2021 3:52 PM To: ████████████████████ Subject: RE: Bradford Bypass</p> <p>Hello ██████</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and Class Environmental Assessment Study. CT287		New Stakeholder Comment Form	To: Project Team From: [REDACTED]	Further studies	05-28-2021	would like to have the following environmental items added to your existing list of 15 items: Item 16 - please create a scale mock-up of the Bypass where it crosses from the West Holland River to the East Holland River. Item 17 - provide detail environmental testing concerning algae, duckweed and blue green algae on all water south of the Proposed Bypass. Item 18 - provide a bore hole analysis including water level on 25 foot centres from Artesian Parkway to east of East Holland River.	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>We understand your request for additional consideration for:</p> <ul style="list-style-type: none"> • Rendering or visual representation of the proposed river crossings at the Holland River and East Holland River branches • Water quality information upstream of the proposed highway corridor (south of the proposed Bradford Bypass) • Groundwater levels as they relate to geotechnical information <p>The Preliminary Design and project-specific assessment of environmental impacts is currently underway. This involves refinement to the 2002 EA approved alignment at select locations and the evaluation of design alternatives. This was presented in PIC #1 in April 2021. The materials for this first PIC continue to be available on the Project Website (https://www.bradfordbypass.ca/pic1/). The preferred alternative to the Preliminary Design, more detailed plans of the Holland River and Holland River Easy Branch crossing structures and environmental technical information, will be presented at PIC #2, and available for public review and comment. Upon completion of the Preliminary Design study, there will be further refinement of the design and environmental studies of that refined design carried out and finalized during the Detail Design phase.</p> <p>The Bradford Bypass is located within the Lake Simcoe Region Conservation Authority (LSRCA) regulation limits, south of Lake Simcoe. For those stormwater management facilities that may occur within the jurisdiction of the Nottawasaga Valley Conservation Authority and potentially influence the subwatershed, the MTO will apply NVCA water quantity and quality control guidelines.</p> <p>The project will not directly impact Lake Simcoe; however, the MTO will assess impacts with respect to the <i>Lake Simcoe Protection Act</i> and the Lake Simcoe Protection Plan through consideration of water quality and quantity, stormwater management, groundwater management, landscaping and ecological restoration</p>

Reference #	Assigned To	Format (Email, Phone, Fax)	To/From:	Topic/Theme Discussed	Date Comment/ Question / Request	Comment/ Question/Request	PROJECT TEAM RESPONSE
							<p>measures. Additionally, the MTO will evaluate the fluvial geomorphological designs for watercourses, erosion and sediment control and spills prevention and protection measures. The studies will be undertaken to satisfy the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual and other provincial and regulatory requirements.</p> <p>Preliminary design and detail design studies will build upon the environmental commitments from the 2002 Approved EA as it relates to water quality, drainage and stormwater management. The drainage and hydrology engineering studies undertaken for the project will develop an efficient and effective drainage system for the freeway, while addressing potential impacts related to runoff and the change in impervious cover. It is expected that several stormwater management features and infrastructure will be required as part of the design to meet the MTO Highway Design Standards and the LSRCA requirements for water quantity and quality control of discharges to Lake Simcoe, within the jurisdiction of the LSRCA. In addition, the design of the highway and stormwater management for the highway will meet the provincial legislative requirements for water quality and quantity under the <i>Ontario Water Resources Act</i> and <i>Environmental Protection Act</i>.</p> <p>As part of the Preliminary Design, door-to-door well assessments of all properties within a 500 m radius of the construction area were completed. As part of this assessment, homeowners received a letter and questionnaire provided AECOM with a brief history/information of any water well(s) on the property. As part of this questionnaire, homeowners were asked if they would like AECOM to come to the property (with COVID protocols) and test the rate of flow, take pictures of the well and collect an untreated groundwater sample for analysis against drinking water standards. This assessment created a baseline of the water well condition prior to construction activities and can potentially result in further monitoring/samples taken during and after construction of the new highway.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area.</p>

If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. Sincerely,
CT285		To: Project Team From: [REDACTED]	Email	Early Works details	06-03-2021	Hi, I'm just a citizen interested in this project. I noted that the schedule on the website suggests that construction would follow preliminary design, sometime in or after 2023. But I also observed that the Minister of Transportation has been quoted as suggesting work could begin early next year on Yonge Street. That leaves me a bit confused.	Hello [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. Preliminary Design for the overall Bradford Bypass project is anticipated to be completed in early 2023. Detail Design and Construction will follow, subject to funding and approvals. The Project Team is also identifying opportunities for early works – Advanced Contracts as part of this project. Some preliminary early

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>Could you clarify what construction, if any, is contemplated as early as next year?</p> <p>That would be much appreciated.</p> <p>Regards,</p>	<p>works activities that are currently being considered could include: new bridge construction (excluding watercourse crossings), bridge replacement or expansion, and utility relocation. As you may be aware, the Ontario government 2021 Budget allocated funding for the Bradford Bypass early works, which includes a grade separated crossing (bridge) at County Road 4/Yonge Street in the Town of Bradford West Gwillimbury.</p> <p>Prior to the commencement of any early works, MTO is still required to gather information about environmental conditions, predict and mitigate impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous Communities, and document decision-making. Other provincial and federal legislative and permitting processes would still apply. As per O. Reg. 697/21, a Draft Early Works Report for works completed at County Road 4 will be completed and will be made available to Indigenous communities, government agencies, and interested members of the public for review and comment.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>

CT288	[REDACTED]	To: Project Team From: [REDACTED]	Email	IAAC Decision	06-11-2021	<p>Hello,</p> <p>Today I noticed that the GTA West Project website posted their comments to the IAAC on the project designation request. I was wondering if those same comments have been posted on the Bradford Bypass website? If so could you please provide a link? If not will the MTO's comments be posted and/or are you able to provide a pdf copy?</p>	<p>*Includes responses to comments from CT288.1, 288.2 and 323</p> <p>Hello [REDACTED]</p> <p>We appreciate your patience and thank you for your continued interest and involvement with the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. This communication provides information to the requests received</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>Thank you,</p> <p>[REDACTED]</p>	<p>through the project email on June 11, June 13, June 18 and September 12, 2021.</p> <p>The website has been recently updated to include the Ministry's response to the Impact Assessment Agency of Canada (IAAC) IAA Designation Request. This information can be found on the EA Process page under the Impact Assessment Act (IAA) Federal IAA Process. To easily access this information please follow the link provided (https://www.bradfordbypass.ca/ea-process/). The updated section provides links to the Minister's Decision and the Canadian Impact Registry website page for this project.</p> <p>On October 7, 2021, Ontario Regulation 697/21 came into effect with respect to the exemption for the Bradford Bypass Project from the <i>Environmental Assessment Act</i>. The regulation sets conditions for the assessment process going forward and for continued environmental protection and consultations for the Bradford Bypass Project and associated Early Works. The MTO remains responsible for gathering existing information about environmental conditions, to predict and mitigate impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous peoples, and document decision-making. Other provincial and federal legislative and permitting processes still apply. Further information regarding the conditions of the exemption can be found at the link here: https://www.ontario.ca/laws/regulation/r21697?search=697.</p> <p>Early works components of the project are subject to Ontario Regulation 697/21. The Ministry will meet the requirements of the regulation prior to advancing to construction. Currently, the Ministry is working collaboratively with Simcoe County for early works at County Road 4 and the Bradford Bypass. This builds upon the Municipal Class EA undertaken by Simcoe County for widening of County Road 4 and preliminary design and project-specific assessment of environmental impacts for the Bradford Bypass project. As per O. Reg. 697/21, a Draft Early Works Report for works completed at County Road 4 will be completed and will be made available to Indigenous communities, government agencies, and interested members of the public for review and comment.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p>

CT288.1		To: Project Team From:	Email		06-13-2021	To Bradford Bypass Consultation Page, The Province must follow due process for all projects at present decisions are ad-hoc about the environmental assessment process. For the Bradford Bypass the Province's proposed changes to the regulation to exempt Condition 4 to enable less studies and early works construction is unacceptable. On top of this the the province of Ontario's current decisions and actions towards with regarding to environmental assessments is inconsistent and hypocritical. The Province just announced that the UYSS would be subject to a review by an expert advisory panel and the Province would not be making any decision, one that York Region government has spent \$100M on followed due process, yet the Province is unwilling to make a decision. It is nonsensical that the Province would have no issue proceeding with the Bradford Bypass and starting early works construction ahead of all of the required studies but is unwilling to make a decision when all the required information and due process has been followed by York region for the UYSS EA. On top of this the Province ignores the expert advisory panel for the GTA West Corridor, which concluded the Phase 1 conclusions of the EA recommending highway 413 are fundamentally flawed. The Province must follow due process and complete a new EA one that is completed that reflects the realities of today, the Greenbelt Plan, the Lake Simcoe Protection plan. Yours truly, 	*See CT288 Above
CT288.2		To: Project Team From:	Email		06-18-2021	I am just wondering if I should expect a response? Thank you, 	*See CT288 Above

						<p>We, at Bradford, are working on the plans for our future infrastructure along Artesian Parkway. These will have to cross the new highway.</p> <p>I wish some assistance with the following.</p> <ol style="list-style-type: none"> Will the highway be an overpass or underpass at Artesian? Can you share preliminary drawings at this location? I wish to determine the necessary depth of sewers at this location. That would impact our design and cost estimation for development charges. What is the desired separation between the highway and sewers/stm/water pipes? I presume these pipes will have to be in sleeves, please confirm 	<p>Subject: RE: Preliminary Drawings: Bradford Bypass & Artesian Parkway</p> <p>Hi [REDACTED]</p> <p>Thank you for reach out to us.</p> <p>There is some information currently available through our project website at Artesian Parkway that may be a good first step for general details at this location. https://www.bradfordbypass.ca/2021/04/09/8-general-design-refinements/</p> <p>Our project manager will connect with you to address your questions. I've copied [REDACTED] on this email to facilitate that discussion.</p> <p>Cheers, [REDACTED]</p>
CT149 Cont	[REDACTED]	To: [REDACTED] From: [REDACTED]	Email	[REDACTED] requesting messaging details on property impacts	06-16-2021	<p>[REDACTED]</p> <p>Hope you have been doing well. We have received a few inquiries from the public regarding what will happen for the properties that the Bypass is proposed to run through. Is there any strategy or messaging I may be able to relay in this regard? I am aware of the project website and consultation to date but just wondering if there is anything more specific I can direct anyone to at this point, or even reference to typical approaches done for other Highway projects/extensions.</p> <p>Thanks and appreciate any help you can provide.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>There are approximately 80 private properties that are anticipated to be partially or fully impacted by the Bradford Bypass expansion project. As part of the Preliminary Design, MTO will meet with individual landowners through 2021 and early 2022 to discuss potential or expected impacts to individual properties, working with them to understand their individual concerns and identify opportunities to mitigate impacts. If an individual who reaches out to you, owns property within the limits of the 2002 Approved EA alignment right-of-way, we recommend that they be directed to contact the Project Team directly. We currently have direct communication with all directly affected property owners through our project contact list and would also have received communications through the Permission to Enter requests.</p> <p>Where appropriate and where there is an identified need, MTO has begun the process of acquiring lands from willing sellers. With respect to the purchase of properties, it is the MTO's preferred approach to negotiate in good faith with owners as early as possible to reach amicable agreements for the acquisition of any properties</p>

						<p>mitigation plans, noise level comparisons and any other relevant information.</p> <p>Thank you kindly,</p> <p>[LOCATION BELOW]</p> 	<p>environmental impacts, the Ministry will evaluate potential impacts of the highway. A Reasoned Argument (trade-off) method of evaluation will be used to identify the advantages to select the preferred refinements and alternatives. This considers evaluation criteria that includes consideration for direct and indirect impacts to residential properties. The MTO and Project Team work closely with property owners within and immediately adjacent to the project.</p> <p>With respect to noise, the Ministry will undertake a Noise Impact Assessment of the refined Preliminary Design of the Preferred Route in accordance with MTO's Environmental Guide for Noise. This study will investigate potential noise impacts and identify noise mitigation efforts, including consideration for existing and future noise barrier walls, where the proposed improvements to the project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide.</p> <p>Construction-related noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan. Further details are available in MTO's Noise Guide (https://prod-environmental-registry.s3.amazonaws.com/2021-08/Environmental%20Guide%20for%20Noise%202021%20%28Aug%202021%29.pdf).</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>

CT295	[REDACTED]	To: Project Team From: [REDACTED]	Email	Former infrastructure for BBP and impacts	06-30-2021	<p>From: [REDACTED] Sent: Wednesday, June 30, 2021 4:08 PM To: projectteam@bradfordbypass.ca Subject: Bypass Proposal</p> <p>In the late 1950's (I believe) there was an approved Bradford bypass. The ironwork for the bridge across the Holland River at Cooks Bay had been delivered and the project was then halted for environmental concerns. The iron was left to rust into the ground along side of the river.</p> <p>Have you studied the failure of this past project and addressed any environmental issues before proceeding with further studies?</p> <p>Thank you,</p>	<p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>This Preliminary Design and EA Study was initiated in 1992 as part of the Route Planning and EA Study. In December 1997, an EA Report was submitted documenting the EA process for the route selection, right-of-way (ROW) designation and future commitments for the Highway 400-Highway 404 Link (Bradford Bypass). A Notice of Approval to proceed with the undertaking was issued by the Minister of Environment and Energy on August 28, 2002. Cook's Bay was not located within the Study Area for the 2002 Approved EA and therefore any proposed ironwork bridge from the 1950's at Cook's Bay is not within the limits of the study area and pre-dates both the 1997 Bradford Bypass EA study and the current Preliminary Design and project-specific assessment of environmental impacts.</p> <p>A copy of the 2002 Approved EA can be found on the Overview page of the Project Website (https://www.bradfordbypass.ca/overview/).</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p>

July 2021 - Consultation Record

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
CT296		To: Project Team From: [REDACTED]	New Stakeholder Comment Form	Requesting more information about the lands north and south of the BBP	07-03-2021	*add to CL As a resident (15+ yrs) the current Map of the bypass proposes a Hwy through the current "top" of Bradford. Highly unlikely this will be the case in 2025, 2035 or 2051. Bradford is rapidly growing N and E. As an active Senior, I travel extensively through Bradford - N and S to Newmarket / EG. The proposed Hwy by-pass, I feel will add significantly to the amount of light & heavy (truck) travel and more so at the interchanges and particularly in Winter (snow/ice/white-outs. etc.). Although I'm not in objection to a "by-pass" recognizing that population and industry drive the economy of ON. I would like to know more about the lands N of Bradford and E of the Holland River to understand more visually and the environmental impact to those areas. Thank you.	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Ontario government is addressing current and future transportation needs in Simcoe County and York Region and continues to advance planning for the Bradford Bypass project, a proposed transportation corridor connecting Highway 400 and Highway 404. Both the County of Simcoe and Regional Municipality of York are expected to experience rapid growth over the next 10-20 years and investing in this new 16-kilometre transportation corridor is needed to relieve congestion on existing east-west local roads and provide an improved connection between Highway 400 and Highway 404.</p> <p>Our government is committed to making sure that our transportation system works for all the people of Ontario. That's why we're making historic investments in transit and transportation infrastructure to dramatically expand and enhance the province's transportation network. The Bradford Bypass is one component of this investment in transit and transportation infrastructure.</p> <p>Preliminary Design for Bradford Bypass will include a wide range of environmental studies in accordance with EA and current legislative requirements, including a Traffic Study. The information, data and findings from the Traffic Study completed for this project will be summarized in the draft Environmental Conditions Report (ECR) and draft Environmental Impact Assessment Report (EIAR) prepared in accordance with Ontario Regulation 697/21.</p> <p>As part of this current Preliminary Design and project-specific assessment of environmental impacts, the MTO is also undertaking 15 environmental studies update and document existing conditions, identify and evaluate potential impacts of the project and recommend mitigation measures to reduce these impacts to meet current environmental legislative requirements. Environmental studies will be conducted in order to evaluate potential impacts and identify mitigation measures for environmental protection. The results of these preliminary design studies will be presented during the next Public Information Centre (PIC #2) to be held during the fall of 2022, and in the Environmental Conditions Report (ECR) and Environmental Impact Assessment Report (EIAR). The Environmental Conditions Report (ECR) and the Environmental Impact Assessment</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>Report (EIAR) will be prepared to document the final description of the freeway alignment and design, environmental impact evaluation results, mitigation measures, monitoring activities, and potentially required permits and approvals and will be made available to government agencies, Indigenous communities and interested members of the public for review and comment.</p> <p>To view the current proposed alignment in the area East of the Holland River, you may review the information provided during PIC #1 at the following link: https://www.bradfordbypass.ca/2021/04/09/9-bradford-bypass-mainline-refinement-holland-river-east-branch-crossing/.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website, and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT298		To: Project Team From:	Email	Time savings from BBP	07-05-2021	<p>How many people will this divert from the busy congestion now? I understand there is 30,000-40,000 Average daily traffic through Young street passing through Bradford.</p> <p>Do you guys have more information in the terms of the traffic that will be alleviated or the daily traffic currently vs what is expected?</p> <p>Thank, </p>	<p>Hello </p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Bradford Bypass would mainly divert vehicles from parallel east-west corridors within Bradford West Gwillimbury and surrounding areas. Increases in traffic volumes can be expected along crossing roads in vicinities of interchanges.</p> <p>As part of this current Preliminary Design and project-specific assessment of environmental impacts, MTO is undertaking a Traffic Study in accordance with the regulation. The information, data and findings from the Traffic Study completed for this project will be summarized in the draft Environmental Conditions Report (ECR) and</p>

CT304		To: MTO Project Team From: [REDACTED]	Email	Increasing public transit	07-21-2021	<p>To Whom It May Concern;</p> <p>I am writing to let you know I am opposed to the construction of the Bradford bypass. Not only is it proposed to be built on environmentally sensitive land, it sends the wrong message in this time of global warming. The individual car, even if electric, still makes a huge footprint environmentally. Every effort needs to be made to improve public transit and study after study shows that more roads lead to less money for public transit and less use of public transit by the public. Now is the time for bold measures and stopping this ill-advised bypass would be one small bold step. Construction needs to be stopped before it is begun.</p> <p>Yours Sincerely [REDACTED] [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Project Team acknowledges your concerns regarding the proposed freeway and the potential impact on the natural environment. As part of this current Preliminary Design and project-specific assessment of environmental impacts, the MTO is undertaking 15 environmental studies to update and document existing conditions, identify, and evaluate potential impacts of the project and recommend mitigation measures to reduce these impacts to meet current environmental legislative requirements. The results of these preliminary design studies will be presented in the study documentation and as part of the next PIC (#2) to be held during the fall of 2022.</p> <p>An Environmental Conditions Report (ECR) and an Environmental Impact Assessment Report (EIAR) will be prepared to document the final description of the freeway alignment and design, environmental conditions, preliminary impact assessments, proposed mitigation measures and monitoring activities, and identify the environmental permits and approvals required. These documents will be made available to government agencies, Indigenous communities and interested members of the public for review and comment in accordance with Ontario Regulation 697/21.</p> <p>The Ontario government is considering and addressing current and future transportation needs in Simcoe County and York Region. As part of this, they continue to advance planning for the Bradford Bypass project. Both the County of Simcoe and Regional Municipality of York are expected to experience rapid growth over the next 10-20 years and investing in this new 16-kilometre transportation corridor is needed to relieve congestion on existing east-west local roads and provide an improved connection between Highway 400 and Highway 404.</p> <p>The government is keeping its promise to build better public transit. Ontario is moving forward with two-way, all-day service every 15 minutes on key segments of the GO Transit rail network, improving access to transit and convenience for the people of Ontario. Through continued collaboration with Metrolinx and Infrastructure Ontario,</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>the province continues to move forward with critical procurements, including additional infrastructure along all GO rail corridors.</p> <p>Even with the currently planned transportation and transit investments, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). Our government is committed to making sure that our transportation system works for all the people of Ontario. That's why we're making historic investments in transit and transportation infrastructure to dramatically expand and enhance the province's transportation network. The Bradford Bypass is one component of this investment in transit and transportation infrastructure.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website, and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT306		To: Project Team From: [REDACTED]	Email	Works on County Rd 4	07-22-2021	<p>From: [REDACTED] Sent: Thursday, July 22, 2021 11:07 AM To: projectteam@bradfordbypass.ca Subject: Re: Request for information</p> <p>Good day, attached is a notice regarding the widening of county road 4. Is this in anticipation for the bypass? Also with the intensification, has any considerations on been given to buffer the adjacent neighbourhood with additional vegetation/barriers to combat noise/pollution. I have written several times and have only received canned response emails.</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The County of Simcoe has completed a separate Municipal Environmental Assessment (EA) for the widening of County Road 4 between Line 8 and County Road 89. As stated in the notice you provided, the County of Simcoe has initiated site preparation works for Phase I between Line 8 and Line 11. The Ontario government 2021 Budget allocated funding for the Bradford Bypass early works. As defined in Ontario Regulation 697/21, Early Works includes a grade separated structure (bridge) at County Road 4/Yonge Street, to be advanced by the Ministry.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>AECOM has been retained by the Ontario Ministry of Transportation (MTO) to undertake a Preliminary Design and project-specific assessment of environmental impacts for the new County Road 4 bridge over the future Highway 400 – Highway 400 Link (Bradford Bypass). The Early Works, (new bridge) will be designed to include the widening of County Road 4 which was approved through the County of Simcoe's separate Municipal Class EA study.</p> <p>With respect to noise concerns, a Noise Impact Assessment is being completed to focus on the Early Works, which will look to minimize impacts through adjustments to highway gradient and/or vertical alignment and evaluate mitigation measures in accordance with the MTO Environmental Guide for Noise. A separate noise study will be completed for the Bradford Bypass preliminary design. Additionally, landscaping plans will be developed for project as part of County Road 4 Early Works and as part of the Bradford Bypass project to provide plantings and vegetative buffering where appropriate for snowdrift, noise and aesthetics. Best management practices will be followed to minimize noise impacts during construction, as part of the construction of the Early Works.</p> <p>Upon completion of the County Road 4 Early Works study, an Early Works Report will be prepared to document the design and environmental study. The report will be made available for public review and comment.</p> <p>We have added you to the Project Contact List and you will be notified through email of Early Works Report and the future PIC #2 and updates for Bradford Bypass study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website, and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT309		To: Project Team From: [REDACTED]	Email	2nd Concession IC / Noise Control / Construction	07-24-2021 NOTE: Follow-up email and	I own and live at the above referenced property [REDACTED]. Please provide particulars re: the following issues: 1. plan for intersection with 2nd concession.	Hello [REDACTED]

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
				Timeline / Access Disruptions / Surface Water Impacts / Wildlife Impacts	phone call on 08-18-2021	<p>2. elevation of the highway above ground level west of 2nd concession to east holland river.</p> <p>3. plans (if any) for noise control along the section of road just south of my property.</p> <p>4. when is construction expected to start/end on the section near my property.</p> <p>5. plans (if any) for road access disruption during construction.</p> <p>6. plans to ensure north/south waterflow through marshland just south of western boundary of my property is not disrupted.</p> <p>7. plans to ensure wildlife is protected from the highway itself and the restriction it places on their movement.</p> <p>Thanks</p> <p>August 18 phone call message: "My name is [REDACTED]. My telephone number is [REDACTED]. I emailed the project team back on July 24 some questions I had about the project. I am an adjoining land owner and I'm going to be seeing this highway from the front door of my house. I sent specific questions and I haven't received anything back. July 24 from myself to project team, so if someone could give me a call that would be great [REDACTED]. The email was sent by [REDACTED]. That was the sender of the email that went to project team. Thanks, by for now."</p>	<p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Preliminary Design and project-specific assessment of environmental impacts of the Bradford Bypass includes proposed interchanges at County Road 4, Bathurst Street and Leslie Street. These interchange locations were identified in the 2002 EA approved Route Planning Study, which were developed, evaluated, and selected through an evaluation process. It is noted that municipalities within the Study Area of the Bradford Bypass have generated Official and Transportation Master Plans based on the proposed Bradford Bypass as per the approved EA (2002) in order to address traffic demand as a result of population and employment growth projections. As a result, the Project Team will continue to engage municipalities and will support future municipal interchange initiatives.</p> <p>Design profiles are currently in development and are preliminary in nature at this time. They are subject to change during development of the Preliminary Design as well as refinement through subsequent phases of design. Presently, the freeway crossings at Yonge Street and 2nd Concession Road are both planned as overpasses.</p> <p>A Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's <i>Environmental Guide for Noise</i>. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barrier walls, where the proposed improvements to the Project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted as part of the design, it must meet MTO's technical, economic, and administrative feasibility criteria as defined in MTO's Noise Guide. Construction-specific noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan. Further details are available in MTO's Noise Guide.</p> <p>Preliminary Design for the Bradford Bypass project is anticipated to be completed in early 2023. Detail Design and Construction will follow, subject to funding and approvals. MTO will follow the Early Works Assessment Process outlined in Ontario Regulation 697/21 for the County Road 4 Early Works. The regulation provides for</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>assessment on the grade separated bridge crossing at County Road 4 (Yonge Street) and the ability to proceed with this work in advance of the main Bradford Bypass Project. Provided that MTO completes an Early Works Assessment Process, MTO will still be required to complete all regulatory requirements set work in the regulation, including carrying out consultation, and obtaining permits and approvals for the project. The Ministry is working collaboratively with Simcoe County for early works at County Road 4 and the Bradford Bypass. This builds upon the Municipal Class EA undertaken by Simcoe County for widening of County Road 4 and preliminary design and environmental assessment for the Bradford Bypass project.</p> <p>Traffic management plans will be developed during detail design phases in consultation with municipalities and adapted during construction to outline appropriate methods for maintaining access and providing traffic disruption information. Access through the corridor along major or key roadways will be maintained during construction. This will include consideration for access along 2nd Concession through the project corridor.</p> <p>The Project Team will undertake fluvial geomorphology, drainage, and hydrology engineering studies to develop an efficient and effective drainage system for the freeway, while addressing potential impacts relative to runoff and surface water flow in consultation with conservation authorities and provincial agencies. Further information regarding the results of these studies will be presented as part of Public Information Centre #2 which will be held later in the Project.</p> <p>MTO will evaluate the fluvial geomorphological designs for watercourses, erosion and sediment control and spills prevention and protection measures. The studies will be undertaken to satisfy the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual, and other provincial and regulatory requirements.</p> <p>Wildlife mitigation and opportunities for exclusion fencing and wildlife passages will be investigated using data obtained during the Terrestrial Ecosystems studies, and through consultation with regulatory agencies.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website, and distributed via Canada Post Unaddressed</p>

							<p>Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT310		To: Project Team From: [REDACTED]	Email	Construction Timeline	07-29-2021	<p>Hi, Team workers,</p> <p>I am a resident of [REDACTED] is there any planned date of starting or finishing of the bypass?</p> <p>If there is, please kindly let us know.</p> <p>Thank you and have a nice day!</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>Preliminary Design for the Bradford Bypass project is anticipated to be completed in early 2023. Detail Design and Construction will follow, subject to funding and approvals.</p> <p>For Early Works, MTO will follow the Early Works Assessment Process outlined in Ontario Regulation 697/21 for the County Road Early Works. The regulation provides for assessment on the grade separated bridge crossing at County Road 4(Yonge Street) and the potential to proceed in advance of the rest of the Bradford Bypass Project. Provided that MTO completed an Early Works Assessment Process, MTO will still be required to complete all regulatory requirements set work in the regulation, including carrying out consultation, and obtaining permits and approvals for the project. The Design-Build Ready package for the Early Works was prepared and issued for tender in November 2021, with an anticipated award of the Early Works design-build for spring 2022.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>

August 2021 - Consultation Record

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
CT311		To: Project Team From: [REDACTED]	Phone [REDACTED]	Proximity to Property Coyote Den	August 3, 2021	<p>"Hi, it's [REDACTED] calling [REDACTED]. I have a couple of questions about the Bradford Bypass. I'm wondering how close it is to my property. I live on [REDACTED] and I just wondered how close it was to the backyard of my property. I've been looking online and it shows approximately where it is but it doesn't give me the measurements and I really want to know and I was wondering if it does go in are you going to plant trees along the back there and if anybody has mentioned concerns about the coyote den that's been there for quite awhile. It seems to look like the highway might run right into it so there's concerns about that too. Thanks, bye."</p> <p>PHONE CALL REQUIRED</p> <p>[REDACTED] called on 10-20-2021 at 12:41PM and received no answer.</p> <p>[REDACTED] called on 10-20-2021 at 4:55PM and [REDACTED] husband of [REDACTED] answered. He stated the following:</p> <ul style="list-style-type: none"> • Their address is [REDACTED] not [REDACTED] • Same questions as before: how far back from the property line would it be? Are we aware there's a coyote den 100 yards North of the Property. If the highway does go in, what noise mitigation measures will we be using? • Email this information to: [REDACTED] 	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts undertaken in accordance with Ontario Regulation 697/21.</p> <p>The centerline or 'middle' of the 2002 EA Approved alignment will be approximately 50-60m from the edge of the right-of-way. Refinement alternative 1, presented at PIC 1, proposes a slight northerly shift of the freeway alignment in proximity to [REDACTED] creating more separation between the freeway and developed lands to the south of the freeway right-of-way, compared to the 2002 Approved EA alignment. The proposed alignment of the Bradford Bypass and interchange refinement alternative at County Road 4/Yonge Street can be viewed as part of the PIC materials (https://www.bradfordbypass.ca/2021/04/09/8-general-design-refinements/). This image shows the approximate location of the alignment and interchange ramps in proximity to the [REDACTED] subdivision to the south.</p> <p>The refinement of the freeway alignment geometry considers environmental and engineering design constraints. The preferred alternative to the preliminary design with details in the area of [REDACTED] will be presented at PIC #2, and available for public review and comment. Building upon the preliminary design project-specific assessment of environmental impacts, further refinement of the design will be carried out and finalized during the detail design phase.</p> <p>Regarding noise mitigation measures, a Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's Environmental Guide for Noise. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barriers walls, where the proposed improvements to the project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted, it must meet MTO's technical, economic, and administrative feasibility criteria as defined in MTO's Noise Guide.</p>

						<p>In addition, the MTO endeavors to find innovative opportunities to address noise mitigation efforts through engineering of various types, enhancements of engineering materials, construction technologies/enhancements, and pavement structures (such as quiet pavements), which will be investigated for consideration in the appropriate design phase. The Project Team provided details on this during the East Gwillimbury council presentation on July 27, 2021. We encourage you to view the recorded session through the town website for additional information.</p> <p>Construction-related noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan. Further details are available in MTO's Noise Guide.</p> <p>Thank you for informing us of the coyote den. We have shared this information to our wildlife specialists to be considered as part of the terrestrial ecosystem study.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT312		To: Project Team From:		Construction start date	August 4, 2021	<p>Hi there, when is the start date planned for?</p> <p>Held</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>Preliminary Design for the overall Bradford Bypass project is anticipated to be completed in early 2023. Detail Design and Construction will follow, subject to funding and approvals.</p>

						<p>On October 7, 2021, Ontario Regulation 697/21 came into effect exempting the Bradford Bypass Project from the <i>Environmental Assessment Act</i>. The regulation sets conditions for the assessment process going forward and for continued environmental protection and consultations for the Bradford Bypass Project and associated Early Works. MTO will follow the Early Works Assessment Process outlined in Ontario Regulation 697/21 for the County Road Early Works.</p> <p>Upon study completion of the County Road 4 works, a draft Early Works Report will be prepared to document the design and environmental study, which will be made available for public review and comment.</p> <p>We have added you the Project Contact List and you will be notified through email of future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project and its schedule as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT313	████	<p>To: Project Team</p> <p>From: ██████████</p>	<p>Email: ██████████</p>	Structures and construction methods used	<p>August 5, 2021</p> <p>Hello Bradford By Pass team.</p> <p style="text-align: right;">August 5, 2021.</p> <p>I am interested in what types of structures are to be constructed throughout the length of the bypass. I was employed at the Town of EasyGwillimbury as the Operations Manager and retired in 2008. At the time I retired the Bradford bypass was a substantial part of traffic and development conversation and of course, as you are aware, it is still quite a hot topic today.</p> <p>The reason I am asking about the types of structures to be utilized, is that some people against the building of the bypass, have stated that much of the wildlife will lose their habitat. I am of the opinion that if the proper structures are</p>	<p>Hello ██████████</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design-and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>At this stage of the study, various engineering field investigations and assessments are underway including geotechnical, fluvial, and drainage and hydrological assessments. Upon the completion of these investigations and assessments, recommendations will factor into the determination of the preferred structure types and design. The structures will be designed in accordance with the latest design standards, guidelines, and policies. At this stage of the study, structural design information is limited to preliminary</p>

						<p>constructed then wildlife, including fish, will have an enhanced habitat. I am stating this as I am fully aware, as you are, that there is a major portion of the bypass area in East Gwillimbury and the eastern end of Bradford West Gwillimbury that is marshland or wetlands, or as I call it swamp. This area begins east of the 2nd Concession in East Gwillimbury and doesn't seem to end until north of Bradford.</p> <p>The construction methods used in Ontario have been to preload the wet area approaches with clay fill and then place a structure over the navigable waterway in order to build the roadway. In the U.S.A., especially in the southeastern states, where wetlands abound, they do not use the preloading method to the magnitude utilized in Canada and the northern U.S. They instead, construct lengthy low level structures as the approaches to the bridge over the navigable waterway, possibly only 1 to 1.5 metres above the wetland area. This area under those low level structures then creates wildlife habitat where, especially fish, tend to flourish. I have spoken to various road constructors and operations staff in the U.S. during my travels in recent years to acquire the information I have stated in this e-mail.</p> <p>I am curious, if this has been considered as a construction method on the Bradford bypass or not. I would think that both the environmentalists and the animal rights faction oppositions to the bypass may look at the project in a different or better light than their normal negative attitude to the bypass, if this was presented to them. I also am a realist and this method of constructing low level structures will most likely be more costly, however, it may speed up the opening of the Bradford bypass by being able to move forward and get it built.</p> <p>Please send me your comments on what I have provided here today.</p> <p>Thank You,</p> <p></p>	<p>determinations that have been made with respect to overpass and underpass locations as detailed in the Public Information Centre (PIC) #1 material on the project website (https://www.bradfordbypass.ca/2021/04/09/8-general-design-refinements/). Overpasses are proposed at 9th Line at Highway 400, 10th Sideroad, Artesian Industrial Parkway, Metrolinx Rail Line, Holland River, proposed Bathurst Street Interchange, Holland River East Branch, Yonge Street, 2nd Concession Road, and the proposed Leslie Street Interchange. Underpasses are proposed at Professors Day Drive and proposed County Road 4 interchange.</p> <p>The Project Team are aware of design constraints and considerations surrounding the wetlands in East Gwillimbury and the eastern end of Bradford West Gwillimbury and are investigating innovative opportunities to develop the design within these areas. The bridge design will consider the initial capital construction costs, future maintenance regiments, number of bridge spans as well as height requirements to accommodate navigation in the Holland River and Holland River East Branch. Environmental constraints, including those related to fisheries and terrestrial ecosystems will be factored into the design as it progresses.</p> <p>As part of our ongoing commitment to minimize environmental impacts, MTO is undertaking additional environmental studies for fisheries, landscaping, land use and property impacts, terrestrial ecosystems, species at risk, and surface water & stormwater management. Furthermore, previous commitments made in the 2002 Approved EA will be carried forward to ensure all approvals and legislative requirements at both the federal and provincial levels are met.</p> <p>The design will be a collaborative process considering inputs from environmental factor-specific specialties to understand existing conditions, develop appropriate recommendations for the conceptual landscape plan that is integrated with the various engineering design studies.</p> <p>As we continue to refine and evaluate alternatives throughout the preliminary design and environmental assessment process, MTO will continue to consult and engage with the public, key stakeholders, regulatory agencies and Indigenous communities to discuss the project and solicit feedback on the design. The results of these consultations and evaluation for the selection of the technically preferred</p>

CT314	[REDACTED]	To: Project Team From: [REDACTED]	Email: [REDACTED]	Employment	August 8, 2021	<p>Hi there, I'm inquiring about who the earth movers are doing the 400-404 bypass construction? I'm in [REDACTED] but would maybe relocate. Myself, My daughter and son are heavy equipment operators as well. If someone could please get back to me with what company to contact for work. Thank you very much for your time.</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Ontario Ministry of Transportation (MTO) has retained AECOM Canada Ltd. (AECOM) to undertake this Preliminary Design for the proposed Bradford Bypass. Preliminary Design for the overall Bradford Bypass project is anticipated to be completed in early 2023. Detail Design and Construction for the project will follow once the Preliminary Design is complete. Completion of the next phase of design and construction are subject to funding and approvals, with MTO issuing Requests for Proposals (RFPs) at both the Detail Design and Construction Phases. At this time, no engineering or construction companies have been selected for these stages.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT319	[REDACTED]	To: Project Team From: [REDACTED]	Email: [REDACTED]	Property Inquiry	August 19, 2021	<p>Hello, My family wasn't to buy house on [REDACTED] [REDACTED] On this lot a lots of trees I would like to know if the new project will affect the lot that my family want to buy? As it looks very close to hightway bypass. Thank you Sincerely [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The proposed Bradford Bypass will have no direct impacts on [REDACTED] This property is located approximately [REDACTED] of the</p>

							<p>2002 Approved EA right-of-way. Please refer to the map below to see the approximate location of the property relative to the proposed alignment (marked with a yellow 'X').</p> 
CT320		<p>To: Project Team</p> <p>From:</p>	<p>Three Emails:</p>	<p>Mapping of bypass Road Noise Traffic Issues</p>	<p>August 25, 2021 and August 26, 2021</p>	<p>August 25 message: "I need a DETAILED Bradford Bypass plan/map indicating EXACTLY where the proposed overpass runs over OLD Yonge St. All property owners including myself are affected by the bypass in a major way esp pertaining to road noise from the bypass traffic. Also the Historic Site of the Lower Landing would be compromised by the run of the Bypass. The location of it was initially planned further north and only was changed without my knowledge this April/May to be located approx. further south,</p>	<p>We have added you the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p> <p>Hello</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Preliminary Design and project-specific assessment of environmental impacts will evaluate the</p>

					<p>thus would affect all residents of [REDACTED] and the residents of Old Yonge St north and south too, very negatively. The previous location was just S. of the "Hatcher Blvd" i.e. S. of the Golf Course, which would be the preferred location. As it stands we are seriously contemplating of moving, even though we have been living at [REDACTED]</p> <p>Regards [REDACTED]</p> <p>August 26 message to Project Email: "Residing for 40 years in earshot of the Bradford Bypass Project, I need to participate on the exact location of this bypass, more accurately where will the overpass of Old Yonge St be located? The plan as I learned this spring had been at the location just South of the former "Hatcher Boulevard" near the south side of the Silverlake Golfcourse. Unfortunately I did not attend the two info sessions in April and May of this year. Simply put I did not know about it. Now I learned that the Bypass route has been changed to go a bit further south near the residential home of [REDACTED]. This would encroach on the historic significant Lower Landing on the east side of the East Branch of the Holland River.</p> <p>Why was the change made? It now would run close to the residential areas of Morgans Road and homes on Old Yonge St nearby. This is not acceptable as far as I (we) are concerned. So why can the previous suggested route not be used instead?"</p> <p>August 26 email to Town of East Gwillimbury: "We have been living on [REDACTED]. The bypass will affect us and all residents of [REDACTED] plus homes in the area just N and S of Morgans Road on Old Yonge St. The last route proposal was just S of the Silver Lakes Golf Course, S of the "Hatcher Blvd." through the lot adjacent to it, which had been expropriated by the Government for that purpose. Now that would give the [REDACTED] residents a bit of a buffer from the bypass. However, since May 2021 I learned "through the grapevines" that the route has been moved south by some 200m to Pt of Lot# 118, the property of Thomas To. As it stands now the route would go right over the historic site of the Lower Landing, located on the east side of the East Branch of the Holland River. This change will negatively influence the residents of [REDACTED] and area from the anticipated road noise of the now proposed bypass route. First of all I would like to know the reasons for this change. Also I cannot identify the details of this change on a suitable map. As it stands this info has not been disseminated to the residents of our immediate area or the public at large either.</p>	<p>design alternatives and refinements to select the recommended Preliminary Design by comparing them within the context of the evaluation factors for Transportation, Natural Environment, Social Environment, Economic Environment and Cultural Environment. The Project Team is undertaking site investigations and an assessment of potential impacts within the study area to inform the evaluation process and propose mitigation measures, strategies and identify future commitments for the proposed project.</p> <p>As part of this process, the Project Team continues to review the proposed design refinement for the Holland River East Branch crossing and the design for the Old Yonge Street (East Gwillimbury) overpass. More information on these crossings can viewed here: https://www.bradfordbypass.ca/2021/04/09/9-bradford-bypass-mainline-refinement-holland-river-east-branch-crossing/. The proposed realignment of the freeway southerly will not have any anticipated direct impacts on the residences at [REDACTED]</p> <p>The results of the environmental studies being carried out during the current study (e.g. fisheries, fluvial geomorphology, archaeology, etc.) are being factored into the design refinements and evaluation of alternatives for the preferred preliminary design. Design refinements are identified throughout the design process which aim to reduce potential impacts to <u>both</u> the environment <u>and existing land uses</u>. The designs are continuously being updated as more information from the environmental studies is obtained.</p> <p>A Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's <i>Environmental Guide for Noise</i>. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barrier walls, where the proposed improvements to the Project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted as part of the design, it must meet MTO's technical, economic and administrative feasibility criteria as defined in MTO's Noise Guide. Construction-specific noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the</p>

September 2021 - Consultation Record

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
CT324	[REDACTED]	To Project Team From: [REDACTED]	Email: [REDACTED]	Transportation Study Consultation ERO	September 10, 2021	<p>"Hello, and thanks for this. If there is a link to the transportation study you refer to, can you please share it? What is the timeline for 2 way all day GO service on the Barrie line? About the consultation idea:</p> <ol style="list-style-type: none"> 1. I would rather not be consulted in a silo of people I already agree with. We would rather do consultation WITH the other groups you list. That would be worthwhile, and would look like proper and transparent consultation. 2. You are not answering our questions about removing the exemption on the ERO. You've said the ERO exemption is not your department, it's the MOECP. Respectfully, I would submit that you and your team and Min. Mulroney have more sway over the MoECP than we do. I think it's your homework to move outside of your MTO silo. <p>Frankly, until that happens I have no interest in repeating the same questions and getting no commitment to removing the ERO exemption. If you do remove the exemption, probably others in my "category" would agree to participate in your "consultation" too. But while the exemption is out there this is all a distraction and we don't have time to waste banging our heads against the wall getting nowhere with you guys.</p> <p>Nothing you have sent now reassures me that environmental impacts would be mitigated. Just studied. If the MTO is going to do this with no commitment to remediation you should come clean with that. If the MTO is committing to remediation you should say that."</p> <p>Regards, [REDACTED]</p> <p>[REDACTED]</p>	<p>Hi [REDACTED]</p> <p>The information, data and findings from the Traffic Study completed for this project will be summarized in the draft Environmental Conditions Report (ECR) and draft Environmental Impact Assessment Report (EIAR) prepared in accordance with Ontario Regulation 697/21.. These draft reports will undergo a public review period followed by an issues resolution process before being finalized. Between the ECR and EIAR, PIC #2 will also present evaluation of alternative, which includes traffic analysis.</p> <p>MTO cannot comment on the timeline for the 2-way all day GO service on the Barrie Line. Details related to planned GO services should be solicited from Metrolinx. You can register for Metrolinx's project updates at this link:</p> <p>https://www.metrolinx.com/en/greaterregion/regions/simcoe.aspx.</p> <p>The Environment, Community and Agriculture (ECA) Committee that the Project Team invited your organization to attend is intended to bring together representatives from the community, environmental groups, and agricultural groups. This group discussion provides an opportunity for key representatives to voice their concerns, highlight key factors and discuss them directly with the Project Team. Materials and meeting notes from the first session will be shared with all invitees and attendees. The date for the next meeting will be established later this year, with invitations to be extended to a Rescue Lake Simcoe Coalition representative, as we believe this will serve as an opportunity for more meaningful discussions. We look forward to meeting with you.</p> <p>On October 7, 2021, Ontario Regulation 697/21 came into effect exempting the Bradford Bypass Project from the requirements of the <i>Environmental Assessment Act</i>. The regulation sets conditions for the assessment process going forward and for continued environmental protection and consultations for the Bradford Bypass Project and associated Early Works. The MTO is still required to gather existing</p>

						<p>*In response to CT-PIC1-050 on May 3, 2021</p> <p>information about environmental conditions, predict and mitigate impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous Communities, and document decision-making. Other provincial and federal legislative and permitting processes will still apply. Further information regarding the conditions of the exemption can be found at the link here: https://www.ontario.ca/laws/regulation/r21697?search=697.</p> <p>MTO will follow the Early Works Assessment Process outlined in Ontario Regulation 697/21 for the County Road Early Works. The regulation provides for assessment on the grade separated bridge crossing at County Road 4(Yonge Street) and the potential to proceed in advance of the rest of the Bradford Bypass Project. Provided that MTO completes an Early Works Assessment Process, MTO will still be required to complete all regulatory requirements set work in the regulation, including carrying out consultation, and obtaining permits and approvals for the project. The Ministry is also working collaboratively with Simcoe County for early works at County Road 4 and the Bradford Bypass. This builds upon the Municipal Class EA undertaken by Simcoe County for widening of County Road 4 and preliminary design and environmental assessment for the Bradford Bypass project.</p> <p>As per O. Reg. 697/21, a Draft Early Works Report for works completed at County Road 4 will be completed and will be made available to Indigenous communities, government agencies, and interested members of the public for review and comment.</p> <p>We thank you for your continued interest and involvement with the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts , undertaken in accordance with Ontario Regulation 697/21. Please note that the Project Website (www.bradfordbypass.ca) was updated on November 5, 2021, to include new information related to the new regulation.</p> <p>We look forward to your continued participation and welcome your questions and comments as the study progresses.</p>
--	--	--	--	--	--	--

CT325	████	To: Project Team From: █████	Email: █████	Traffic Studies	September 11	<p>"I regularly read the Bypass site. Where are the studies that show this supposed 10-35min savings? I live in WG/EG area and all congestion problems could be solved with municipal solutions. Why is that not in the PIC?"</p> <p>*In response to CT-WEB-007 on May 18, 2021</p>	<p>Hello █████</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>We thank you for visiting our Project Website. Please note that the website (www.bradfordbypass.ca) was updated on November 5, 2021, to include new information related to the new regulation.</p> <p>The information, data and findings from the Traffic Study completed for this project will be summarized in the draft Environmental Conditions Report (ECR) and draft Environmental Impact Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21. In 2022, the draft ECR and EIAR reports will undergo a public review period before being finalized. In addition to the ECR and EIAR, PIC #2 will also present evaluation of alternative, which includes traffic analysis information. You will receive advanced notification of PIC #2 and when the ECR and EIAR are published for public review.</p> <p>We thank you for your participation in the ECA session. We look forward to your continued participation and welcome your questions and comments as the study progresses. Please feel free to reach out to the Project Team at your earliest convenience.</p>
CT326	████	To: Project Team From: █████	Email: █████	Tendering Bidding	September 13	<p>"Good morning,</p> <p>When do you expect this project to go out to tender and will it be through Infrastructure Ontario? Also when do you expect to have a shortlisted team of bidders announced?</p> <p>Thanks"</p>	<p>Hello █████</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study, undertaken in accordance with Ontario Regulation 697/21, which includes an assessment of potential project-specific environmental impacts.</p> <p>The Ontario Ministry of Transportation (MTO) has retained AECOM Canada Ltd. (AECOM) to undertake this Preliminary Design and project-specific assessment of environmental impacts for the proposed Bradford Bypass. Preliminary Design for the overall Bradford Bypass project is anticipated to be completed in early 2023. Detail Design and Construction will completion of the preliminary design</p>

						<p>and is subject to funding and approvals. The timing and construction delivery model type for the project has not been confirmed at this time. The Ministry will follow the standard process for issuing requests for proposals through the Registry, Appraisal and Qualification System (RAQS).</p> <p>We have added you to the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT328		To: Project Team From:	Email:	Cost of construction and maintenance	September 22, 2021	<p>Hello,</p> <p>I was wondering if you can help me find some cost information for the Bradford Bypass. I would like to know if there is an estimated cost of construction, and an estimated annual cost of highway maintenance over the first 5-10 years of the highway's operation. I am working on a research project on Ontario's public highway system, and would greatly appreciate being able to include some information about the ongoing highway projects in the province.</p> <p>My objective in this project is to describe the development of Ontario's 400 series highway system from the early highway planning in 1952 to the present day.</p>
						<p>Hello</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>At this time, a cost estimate for construction and highway maintenance for the Bradford Bypass has not yet been determined. To ensure competitive tender bids, the Ministry does not publish project estimates. To obtain the best value bid for the project, we only release costs once the procurement process is complete.</p> <p>We have added you the Project Contact List and you will be notified through email of future PICs and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the</p>

CT337		To: Project Team From:	Email:	GHG Emissions	Monday, October 25, 2021	<p>"Hello, I am wondering if an analysis has been done looking at greenhouse gas emissions from the proposed Bradford Bypass. Both before, during and after construction?</p> <p>If so I wonder if I could get a copy please. If not, I'm wondering why not.</p>	<p>Hello</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Preliminary Design for Bradford Bypass will include a wide range of environmental studies in accordance with Ministry standards and current legislative requirements. Among these studies is an Air Quality Impact Assessment, which will determine the potential changes in comprehensive local and regional air quality, greenhouse emissions, and recommend mitigation measures and future commitments. The Air Quality Impact Assessment for Preliminary Design will follow the MTO's <i>Environmental Guide for Assessing and Mitigating the Air Quality Impacts and Greenhouse Gas Emissions of Provincial Transportation Projects</i> (May 2020) (Air Guide).</p> <p>To align with the Federal <i>Impact Assessment Act</i> requirements, a subsequent assessment will be undertaken and will build upon the provincial requirements to include analysis of construction related GHG emissions. Results of these assessments will inform GHG mitigation measures for both the construction and operational phases of the project.</p> <p>The results of the Preliminary Design studies will be presented during the next Public Information Centre (PIC) #2, to be held during the fall of 2022, and summarized in the draft Environmental Conditions Report (ECR) and draft Environmental Impact Assessment Report (EIAR) prepared in accordance with Ontario Regulation 697/21.</p> <p>We have added you the Project Contact List and you will be notified through email of future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. CT338	█	To: Project Team From: █	Phone █ Email: █	Timeline	Tuesday, October 26, 2021	<p>"My name is █ I'm calling from █. █ Been there for over thirty years and have had nothing but trouble trying to get through Bradford all these years. It's been very discouraging hearing it started up then shut down and then started up and shut down. Can somebody give me a call back █ and give me an update with the real time of when they think they'll get this thing going because I don't know how many more years I can hold on trying to get through Bradford. It's terrible, I won't even send my trucks before 10 or after 2 in the afternoon, so in the morning before 10 and in the afternoon after 2 I won't send my trucks to pick up or drop parts off that direction. It's really hurting small businesses with thousands of houses built in the area and not improve the infrastructure to get to where you got to go with all these people. They're plugging up the road and we really need this done so I would really just like to get an idea of what the timing is so if somebody can give me a call back. Thank you."</p>	<p>█ spoke to █ on October 27, 2021 at 2:32PM.</p> <p>█ asked if she could speak to █ person confirmed they are</p> <p>█ introduced herself on behalf of AECOM, and indicated that we had a missed call from █ and was returning the call to answer his question about the timeline of the project. Dan confirmed that was his concern.</p> <p>█ told him AECOM was retained by MTO to conduct the Preliminary Design and Environmental Assessment (EA) for BBP. █ informed █ that the Preliminary Design for the overall Bradford Bypass project is anticipated to be completed in early 2023, and could not comment on when detail design and construction will begin, because those are subject to funding and approvals.</p> <p>█ stated he thought that the Environmental Assessment was already completed for the project.</p> <p>█ clarified that there was a 2002 EA, but the Preliminary Design and EA process is including environmental studies that are in accordance with current legislative requirements such as a Noise and Vibration Impact Assessment, and Air Quality Impact Assessment, etc.</p> <p>█ stated he believes we'll see a huge difference with the Air Quality because of all the idling cars. He also stated the following concerns:</p> <ul style="list-style-type: none"> • █ can't send trucks through the highway currently with the congestion • The surrounding municipalities are building more houses and we need new infrastructure to support the growing population • █ is disappointed in the lowered speed limits. Dan states they have done from 80 to 70 and now 60.

							<ul style="list-style-type: none"> • [REDACTED] has been in the area for 30 years, and has lost a lot of business because the congestion does not allow him to go West • If the Ministry of Transportation is going to do this, they need to do it quickly. It's already been 20 years. <p>[REDACTED] informed [REDACTED] that she has made note of all his concerns, and asked if [REDACTED] would like to be added to the Project Contact List so he receives project updates and a notification for the next Public Information Centre (PIC), where a lot of his concerns will be addressed.</p> <p>[REDACTED] said he would greatly appreciate that, and provided his email. He also indicated that he prefers being spoken to directly on the phone, because he is an older gentleman that receives a lot of emails and is concerned he'll miss it.</p> <p>[REDACTED] informed [REDACTED] she'll make that comment beside his name in the Project Contact List that he prefers to speak to someone on the phone over emails. [REDACTED] thanked [REDACTED]</p> <p>[REDACTED] asked [REDACTED] if he had any other concerns or questions. [REDACTED] said no.</p> <p>[REDACTED] closed the comment.</p>
CT339	[REDACTED]	To: Project Email From: [REDACTED]	Email: [REDACTED]	Pollution of Lake Simcoe Urban Sprawl Carbon Toll Road	Friday, October 29, 2021	<p>Forwarded email sent to local representatives first:</p> <p>"Good evening:</p> <p>"I have noticed that there are markers in the fields adjacent to Hwy 4 (Barrie St) between the 8th and the 9th line. Some construction type machinery is also present. The provincial government has made it an election promise that there will be more highways coming.</p> <ol style="list-style-type: none"> 1. Have the impacts of the salt and debris that will be washing into lake Simcoe and onto the fields of the marsh been accounted for? The economic impact of lost productivity and degrading of the land should concern 	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Bradford Bypass has portions of the highway located within the Lake Simcoe Region Conservation Authority (LSRCA) regulation limits, south of Lake Simcoe, and the regulation limits for Nottawasaga Valley Conservation Authority (NVCA). Stormwater management facilities within each regulation area will be considered. To minimize the potential influence on the subwatersheds, the MTO will apply either the LSRCA or NVCA water quantity and quality control guidelines.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>the farmers with lands beside the 16 km hwy.</p> <p>2. Has anybody calculated the effect of urban sprawl which will inevitably occur, the "if you build them, they will come" effect. This is an interesting study that deals with it: An Analysis of the Relationship Between Highway Expansion and Congestion in Metropolitan Areas (daclarke.org) Take a look under the heading "Why The Results Aren't surprising".</p> <p>3. How is the sprawl going to affect the ever shrinking carbon budget for this country?</p> <p>4. As far as I am aware there has been no clear answer as to whether the highway will be a toll one. If that is the case, it will probably suffer the fate of Hwy 407...mostly empty, and leaving us with a big bill that we all will have to pay.</p> <p>5. When I looked for the reports commissioned to AECON in 2019, I could not find any, and the dates on the reports linked by the Ministry were 1997 and 2003. The area has changed considerably since then. Nowhere did I see an indication that any other routes were considered. (OVERVIEW – BRADFORD BYPASS).</p> <p>6. The OSPE raises concerns about the levels of benzene, a known carcinogen, resulting from the vehicle traffic (The Bradford Bypass and the Need for Evidence-Based Decision Making • Ontario Society of Professional Engineers (ospe.on.ca)). In Bradford, the Bypass would be very close to subdivisions off the 8th concession, west of Barrie St and a proposed multistory building east of it. Have the levels of benzene been estimated and their health impacts on residents taken into account?</p> <p>7. Noise levels would also be significantly increased for those residents. Is there an estimate for what</p>	<p>Given the location of the alignment, the project will be located south of Lake Simcoe and MTO will assess potential impacts of the proposed project with respect to the <i>Lake Simcoe Protection Act</i> and the Lake Simcoe Protection Plan through consideration of water quality and quantity, stormwater management, groundwater management, landscaping and ecological restoration measures. Additionally, MTO will evaluate the fluvial geomorphological designs for watercourses, erosion and sediment control, and spills prevention and protection measures. The studies will be undertaken to satisfy the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual and other provincial and regulatory requirements.</p> <p>Preliminary design and detail design studies will build upon the environmental commitments from the 2002 Approved Environmental Assessment (EA), and in accordance with Ontario Regulation 697/21 as it relates to water quality, drainage and stormwater management. The drainage and hydrology engineering studies undertaken for the project will develop an efficient and effective drainage system for the highway, while addressing potential impacts related to runoff and the change in impervious cover. It is expected that several stormwater management features and infrastructure will be required as part of the design to meet the MTO Highway Design Standards and the LSRC requirements for water quantity and quality control of discharges to Lake Simcoe. In addition, the design of the highway and stormwater management for the highway will meet the provincial legislative requirements for water quality and quantity under the <i>Ontario Water Resources Act</i> and <i>Environmental Protection Act</i>.</p> <p>The Project Team acknowledges your concerns regarding the construction of the highway and the potential impacts on nearby properties and residents. As part of this study, environmental and design studies are being undertaken to identify and evaluate potential impacts of the project and recommend mitigation measures to reduce these impacts. As part of the project-specific assessment of environmental impacts, the Ministry is undertaking a Noise Impact Assessment, Air Quality Impact Assessment, Land Use and Property Impact Assessment, which will all evaluate potential impacts of the highway on adjacent landowners. Please see the Project Website for a full list of studies being undertaken during this Preliminary Design and project-specific assessment of environmental impacts (https://www.bradfordbypass.ca/overview/). The results of these studies will be presented during the next Public Information</p>

						<p>they would be for the homes abutting the Bypass? The World Health Organization has issued clear guidelines (WHO/Europe Noise - Data and statistics), citing health concerns for those exposed to sustained levels. How noisy would the Bypass be for those who live right beside it?</p> <p>A connection between Hwys 404 and 400 is quite possibly needed. It seems to me that we are trying to solve the problem using old and incomplete data. The outcome in the long run might not be what was expected.</p> <p>Before this project gets approval from council, we need answers that only a comprehensive updated environmental assessment can provide, as well as a clear indication from the ministry on the cost of the project and if the road is going to be a toll one.</p> <p>Would you please let me know of any answers/explanations to the above 1-7?"</p> <p>Email sent to Project Email: "Good morning:</p> <p>I am copying an email that I sent to our local representatives regarding the Hwys 400-404 connection known as the Bradford Bypass. There seem to be no answers to the questions I have raised. Perhaps you can be of assistance.</p> <p>In the proposal, there is no mention of consideration of an alternative site for this highway. The highway will stretch 16 km mostly over marsh. In some places compact soil, not bedrock, is found 40 to 50 m below surface. This would make building a concrete structure challenging. It reminds me of the Monty Python skit from the Holy Grail (if you are not familiar, here a link Swamp Castle - YouTube). Of course, the construction of the Bypass is no laughing</p>	<p>Centre (PIC #2), to be held during the fall of 2022, and summarized in the draft Environmental Conditions Report (ECR) and draft Environmental Impact Assessment Report (EIAR) prepared in accordance with Ontario Regulation 697/21.</p> <p>The provincial government has identified that the Bradford Bypass will not be a toll highway.</p> <p>Alternatives to the 2002 Approved EA alignment are not being considered. This alignment is technically preferred for a freeway in terms of highway network expansion, ease of construction, relationship to provincial and municipal land use planning and the preferred route is already included in municipal Official Plans and Transportation Master Plans, as well as the <i>Places to Grow Act</i>. Refinement of the 2002 EA Approved alignment and consideration of the highway's proximity to existing and approved developments is underway. PIC #1 presented the proposed refinements being considered and evaluated during Preliminary Design. Localized and minor alignment shifts have been identified as part of this study and will be further considered as environmental studies are completed, Preliminary Design is advanced, and input is received through consultation.</p> <p>We have added you to the Project Contact List and you will be notified through email of future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>

CT341		To: Project Team From: [REDACTED]	Email: [REDACTED]	Environmental assessment	Monday, November 1, 2021	<p>Hello,</p> <p>Please actually do another environmental assessment before starting work. We only have one planet and it is becoming tiresome how people, especially developers and politicians, think they have the right to build whatever they want wherever they want. The lack of proper due diligence in this matter is disturbing and disgusting, do better please.</p> <p>Sincerely, [REDACTED] (A concerned Bradford member)</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>This streamlined assessment process under Ontario Regulation 697/21 allows MTO to move the Project forward in an environmentally responsible way. The Project Team will carry forward previous environmental commitments made during the 2002 Route Planning and Environmental Assessment Study as set out in the regulation, and the Simcoe County Road 4 Widening Environmental Assessment study as applicable. Alternatives within the Project Study Area have been generated and will be evaluated based on technical and environmental factors, and in consultation with Indigenous communities, public stakeholders, municipalities, and government agencies.</p> <p>The Ontario Regulation 697/21 can be viewed here: https://www.ontario.ca/laws/regulation/r21697?search=697</p> <p>The Project includes the completion of several comprehensive studies related to the natural, socio-economic, and cultural environment, as well as engineering design. A list of the studies being carried out are listed on the Project Website on the Overview Page. These studies will update and document existing conditions, identify and evaluate potential impacts of the Project and recommend mitigation measures to reduce these impacts to meet current environmental legislative requirements.</p> <p>The results of these studies will be presented during the next Public Information Centre (PIC) #2 anticipated to be held during the fall of 2022 and documented in a draft Environmental Conditions Report (ECR) and draft Environmental Impact Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of future milestone events including filing of the ECR, PIC #2, filing of the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
CT342		To: Project Team From: [REDACTED]	Email: [REDACTED]	Alignment of overpass	Monday, November 1, 2021	<p>Good morning,</p> <p>I am a resident of the [REDACTED] located just below the Bradford Bypass, across the [REDACTED]</p> <p>I would like to suggest the Bypass curve above the golf course rather than under. The Community Park is located at the end of Oak Ave, and as a Registered Nurse and member of the RNAO, I know this park is too close to the highway, as our children would be exposed to heavy metal poisoning from car exhaust.</p> <p>If you could kindly take this suggestion forward to key decision makers, and keep me advised of the deliberation of this issue.</p> <p>Kind Regards, [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Preliminary Design phase will include refinements to the Technically Preferred Route within the Project Study Area based on various factors, including engineering designs, traffic studies and the results of the environmental impact assessments. Included in these environmental studies, the Ministry will complete an air quality impact assessment and will undertake a human health screening to consider the interaction between the Project and the land uses within the Project Study Area. Your feedback regarding the community park will be included in those assessments.</p> <p>The results of these studies will be presented during the next Public Information Centre (PIC) #2 to be held during the fall of 2022 and documented in a draft Environmental Conditions Report (ECR) and draft Environmental Impact Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21.</p> <p>We have added you to the Project Contact List and you will be notified through email of future milestone events including filing of the ECR, PIC #2, filing of the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT343		To: Project Team From: [REDACTED]	Email: [REDACTED]	Construction commencement	Tuesday, November 2, 2021	"Has the MTO begun expropriation of land?"	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation (O. Reg) 697/21.</p> <p>There are an estimated 80 private properties that will be partially or fully impacted by the Bradford Bypass Project. As part of the Preliminary Design, MTO has been meeting with individual landowners through 2021 and will continue in 2022 to discuss potential or expected impacts to individual properties, working with them to understand their individual concerns and identify opportunities to mitigate impacts.</p>

							<p>Where appropriate and where there is an identified need, MTO has begun the process of acquiring lands from willing sellers. With respect to the purchase of properties, the Ministry works with property owners to negotiate in good faith with owners as early as possible to reach amicable agreements for the acquisition of any properties needed to support important infrastructure undertakings like the Bradford Bypass. Expropriation is only used when agreements cannot be reached within suitable project timeframes.</p> <p>We have added you the Project Contact List and you will be notified through email of future milestone events including filing of the Exiting Conditions Report (ECR), Public Information Centre (PIC) #2, filing of the Environmental Impact Assessment Report (EIAR) and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>

That's why we're making historic investments in transit and transportation infrastructure to dramatically expand and enhance the province's transportation network. The Bradford Bypass is one component of this investment in transit and transportation infrastructure.</p> <p>The Ontario government is also addressing current and future transportation needs in Simcoe County and York Region and continues to advance planning for the Bradford Bypass Project, a proposed transportation corridor connecting Highway 400 and Highway 404. Both the County of Simcoe and Regional Municipality of York are expected to experience rapid growth over the next 10-20 years and investing in this new 16-kilometre transportation corridor is needed to relieve congestion on existing east-west local roads and provide an improved connection between Highway 400 and Highway 404. The government is keeping its promise to build better public transit. Ontario is moving forward with two-way, all-day service every 15 minutes on key segments of the GO Transit rail network, improving access to transit and convenience for the people of Ontario. Through continued collaboration with Metrolinx and Infrastructure Ontario, the province continues to move forward with critical procurements, including additional infrastructure along all GO rail corridors.</p>

CT349		To: Project Team From:	Email: [REDACTED]	Construction date	Monday, November 8, 2021	<p>Good morning ,</p> <p>Just a quick question , when will construction began? And what is the estimated completion date.</p> <p>Regards, [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>Preliminary Design for the overall Bradford Bypass Project is anticipated to be completed in early 2023. Detail Design and Construction will follow.</p> <p>On October 7, 2021, Ontario Regulation 697/21 came into effect with respect to the exemption for the Bradford Bypass Project and under the Class <i>Environmental Assessment</i> process. The regulation sets conditions for the assessment process going forward and for continued environmental protection and consultations for the Bradford Bypass Project and associated Early Works. MTO remains responsible for gathering existing information about environmental conditions, predict and mitigate impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous peoples, and document decision-making. Other provincial and federal legislative and permitting processes still apply. Further information regarding the conditions of the exemption can be found at the link here: https://www.ontario.ca/laws/regulation/r21697?search=697.</p> <p>In accordance with the provisions of the Ontario Regulation 697/21, the Ministry has followed the Early Works Assessment process and is moving ahead with the Early Works. The Early Works, as set out in the regulation are focused on a grade separated bridge crossing for the future Bradford Bypass at County Road 4 (Yonge Street). The Draft Early Works Report was available for review on the project website (www.BradfordBypass.ca/early-works/) from January 13, 2022 until February 12, 2022. The Final Early Works Report is now available, and the Early Works Statement of Completion has now been issued in accordance with Ontario Regulation 697/21, Section 13. It is anticipated that Early Works construction will start in late 2022.</p> <p>We have added you the Project Contact List and you will be notified through email of future milestone events including filing of the Exiting Conditions Report (ECR), Public Information Centre (PIC) #2, filing of the Environmental Impact Assessment Report (EIAR) and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to</p>

CT350	█	To: Project Team From: █	Email: █	400-series Assignment for Highway Name	Monday, November 8, 2021	<p>In response to email response on January 13, 2021*</p> <p>Hi. I see all sorts of great announcements about this highway project which I totally support the most recent from the province today. However, there is still no mention that it will be a 400-series-standards built highway. Can you explain why a 400-series number has not yet been assigned to the bypass project? What's the hold up? This is concerning because it should be clear that there will be NO AT GRADE interchanges.</p> <p>I look forward to hearing from you.</p>	<p>Hello █</p> <p>Thank you for your interest in, and positive support of the Bradford Bypass. The Preliminary Design and project-specific assessment of environmental impacts is being undertaken in accordance with Ontario Regulation 697/21.</p> <p>At this time, the 400-series numbering of the Bradford Bypass has not been determined. The new designation will be shared with the public when it becomes available. The Bradford Bypass will be a controlled access highway, which is a roadway that has been designated for high-speed vehicular traffic where traffic flow is controlled, with entry and exit from the highway at designed grade-separated interchanges.</p>

Where an impact is identified, strategies to avoid, minimize, mitigate or compensate for those impacts are developed in accordance with the provincial <i>Endangered Species Act</i> (ESA) and where applicable, the <i>Federal Species at Risk Act</i> (SARA). The Project Team will consult with the regulatory agencies with respect to the impact assessments and obtain the necessary approvals under the appropriate legislation.</p> <p>The 2002 Route Planning study looked at various alternatives and route options and selected this corridor as the Technically Preferred Route. To allow a satisfactory and comprehensive comparison to be made, information was gathered and grouped under five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment. Based on the outcome of that study, the Preliminary Design for the Project focuses on developing the design and completing the project-specific impact assessment for a freeway-to-freeway connection between Highway 400 and Highway 404, with proposed interchanges at 10th Sideroad, County Road 4, Bathurst Street, 2nd Concession Road, and Leslie Street.</p> <p>The results of these studies will be presented during the next Public Information Centre (PIC) #2 anticipated to be held during the fall of 2022 and documented in a draft Environmental Conditions Report (ECR) and draft Environmental Impact Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21.</p> <p>Canadian Navigable Waters Act The Project Team appreciates and thanks you for the information you have provided regarding navigational uses. This information will be factored into the design considerations in order to meet the requirements under the <i>Canadian Navigable Water Act</i> and in consultation with Transport Canada.</p> <p>Consultation and Engagement The Bradford Bypass Project Team has actively been consulting and engaging with municipalities, environmental agencies, Indigenous communities and concerned stakeholders throughout Preliminary Design of the Bradford Bypass. It is an on-going process throughout the Project with key milestone events such as PICs, Indigenous community meetings, committee group meetings, and focused meetings with municipalities, regulatory agencies, key stakeholders and property owners. The Project Team welcomes feedback, comments and questions at any time during the Project.</p> <p>MTO provides advance notification of each key milestone event using various means of communication: newspapers, direct mailing, Canada Post admail delivery and the Project Website. The notices are published in local newspapers including Bradford West Gwillimbury Topic and East</p>

						<p>can alleviate some concern I have in regards to the proposed Bradford Bypass. I have registered to follow this project, not knowing that public consultations had already occurred.</p> <p>In watching the webinar PIC 2, I am greatly concerned that both the Ministry of Transportation and AECOM, have stated they are only going to address Species At Risk, habitat and green belt issues in regards to the Bradford Bypass, where 'it is possible and practical' to do so within the design plans and other legislative constraints. That sounds to me like 'if we can save them without going out of our way, we will, but we have legislation to back us up if we don't'. This Bypass impacts more than the citizens of Bradford and the farmers of the Holland Marsh; greater farther reaching communication about consultation should have happened. I am wondering with less than 50 surveys for all of Simcoe and York Region, that there was not sufficient publicizing of this public consultation and its timelines. I would like to inquire how it was publicized please, for future reference.</p> <p>10 minutes saved commuter time, possibly up to 30 end to end in rush hour. Again I wonder whether the other routes considered, though less 'user friendly' are more viable alternatives? Wouldn't the existing east-west roads have less impact all round? Ninth line, 4th line and 77 as well as Queensville Sideroad, Boag Road in addition to highway 9 could all be viable alternatives and be more cost effective without disrupting the existing wildlife and wetlands as significantly as the Bypass?</p> <p>How will this bypass significantly save time for Holland Marsh farmers whose product goes either straight up the 400 to Barrie or down to Toronto and even the airport? Are we talking about cottage commuters and companies who don't want to pay the 407 toll east-west? The Conservative government sold 407 and the subsequent tolls for the 99 year lease where profit goes partially to Spanish investors, is what needs to be remedied rather than creating another highway, or will this Conservative government sell this one off too and allow it to also become an</p>	<p>Gwillimbury Express, letters are distributed to the Project Contact List, which contains an ever-growing list of contacts, with over 800 contacts as of March 30, 2022. Flyers are distributed to approximately 12,500 recipients within geographic proximity to the Project through Canada Post airmail, and the notifications are also posted on the Project Website which is available to the public at any time.</p> <p>Indigenous Engagement The Project Team is consulting and engaging with Indigenous communities whose Aboriginal and treaty rights may be adversely impacted by the project, as well as communities that are interested in the project-specific assessment of environmental impacts.</p> <p>Traffic The proposed Bradford Bypass is anticipated to have more than 60 per cent savings in travel time when using the new freeway compared to existing routes along local roads. For Holland Marsh farmers and other motorists, this new transportation corridor will relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and will allow goods to move to and from the communities of Bradford West Gwillimbury, East Gwillimbury and King Township and the broader communities serviced by the provincial highway network.</p> <p>We have added you to the Project Contact List and you will be notified through email of future milestone events including filing of the ECR, PIC #2, filing of the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Airmail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>

						<p>elitist highway for the privileged after making its impact on the environment and climate change?</p> <p>10 minutes in exchange for endangered wildlife, wetlands and ignorance of climate change? I would also like to know the projected cost, which frankly could be going into jobs in the green energy sector contracts that were cancelled when this government came into office.</p> <p>Lastly, in preliminary consultations with the Chippewas of Georgina Island and Rama, and the Mississaugas in May, what was their input? This has not been mentioned in this webinar. I noticed they are not included in the groups being consulted on environmental and possible harvesting impacts or neighbouring properties. Was it more of an information sharing than a consultation nation to nations, on land that technically they have a right to purchase from the Crown as per the 2018 Agreement pertaining to the Williams Treaty? Was this even considered or offered?</p> <p>As you can see, I am quite apprehensive about the pathway this government is taking with so much at stake.</p> <p>Please advise. I thank you for your time. Sincerely,</p> <p>[REDACTED]</p>

CT358	█	To: Project Email From: █	Email: █	Interchange at Leslie Street	Wednesday, November 10, 2021	<p>Hello</p> <p>I was looking st the plan for the bradford bypass and noticed there is only a partial interchange planned at leslie street. Is there a reason this is the only partial interchange? Would it not make sense to have a full one there as well instead of forcing more trafic onto woodbine?</p> <p>Which direction would this interchange be? Basically wanting to know what the options will be for anyone needing to enter or exit the highway at leslie st.</p> <p>Thanks, █</p>	<p>Hello █</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Preliminary Design of the Bradford Bypass includes the proposed partial interchange at Leslie Street, which can be viewed as part of the Public Information Centre (PIC) #1 materials (https://www.bradfordbypass.ca/2021/04/12/17-leslie-street-interchange/). The interchange provides access to and from the Bradford Bypass onto Leslie Street. Vehicles on the Bradford Bypass travelling eastbound can exit at Leslie Street. Vehicles can also access the Bradford Bypass in the westbound direction from Leslie Street. There is no access to or from the east at Leslie. Existing access to and from Highway 404 remains unchanged from current condition.</p> <p>Due to the close proximity of the proposed Highway 404/ Bradford Bypass freeway to freeway interchange, there are geometric and operational constraints that require Leslie Street to be a partial interchange. The partial interchange was identified in the 2002 Approved Environmental Assessment and was developed, evaluated, and selected through the evaluation process. The current traffic demand assessment carried out as part of this Preliminary Design study confirmed that the partial interchange would service the provincial needs. This interchange design also takes into consideration the proximity of this location to the freeway-to-freeway interchange at Highway 404.</p> <p>Refinements and evaluations of interchange configurations within the Study Area are being considered during the current study based on five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>We have added you the Project Contact List and you will be notified through email of the future PIC #2 and updates for this Project including the public review periods for the Environmental Conditions Report (ECR) and Environmental Impact Assessment Report (EIAR). An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Project Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p>

CT359		To: Project Email From: [REDACTED]	[REDACTED]	Proposed route	Thursday, November 11, 2021	<p>"Hello, it's [REDACTED] calling. My number is [REDACTED] and I'm calling to make a request. The Bradford Bypass I think is a very important and good idea. However, I think there may be some unintended consequences, very damaging unintended consequences to the traffic levels on the North and Southbound 404, North of the Aurora Side Road where it drops the two lanes. All of this additional traffic that this is going to redistribute off of Highway 400 to the 404 which of course is its intention is going to further congest 404 in that pocket up North. What I want to talk to somebody about is has anyone given serious thought to extending the three lanes of the 404 further up to the bypass, doesn't need to go further just to that bypass point, so that if three lanes continuous from basically 16th avenue all the way to this bypass. I think anything less than that we're going to solve one problem and instantly create another to the point where the Bypass may not be used that often because of the congestion it now creates on the 404. So if somebody could give me a shout back that would be terrific. Thank you very much.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>MTO is continually considering improvements to highway infrastructure, including the addition of HOV lanes and additional lanes along Highway 404, North of Aurora Road. The extent and timing of these improvements are not available at this time. Your comments and recommendations have been shared with MTO as input toward future improvements of Highway 404. Improvements on Highway 404 within the study area, that are anticipated to occur prior to 2041, are included in the traffic modelling and analysis for the Bradford Bypass project.</p> <p>We have added you the Project Contact List and you will be notified through email of the future Public Information Centre (PIC) #2 and updates for this Project including the public review periods for the Environmental Conditions Report (ECR) and Environmental Impact Assessment Report (EIAR). An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Project Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>

CT365		To: Project Team From:	Email	Stakeholder comment form	Sunday, November 21, 2021	<p>"1) Does your organization wish to participate in the study and continue to receive notices of project activities or information as this study progresses? If you do not wish to participate, you will be removed from the mailing list. ---</p> <p>Yes</p> <p>--- Name ---</p> <p>---</p> <p>--- Title ---</p> <p>---</p> <p>--- Email ---</p> <p>---</p> <p>--- Phone Number ---</p> <p>---</p> <p>--- Mailing Address ---</p> <p>---</p> <p>--- 2) Please indicate if the above noted project will affect the delivery of your organization's programs or services, and/or provide project related comments to the Project Team. ---</p> <p>As I study the topographic map of the area, I am alarmed by 2 aspects of this project.</p> <p>1. Wetlands and watercourses: much of the route crosses sensitive wetlands and numerous streams as well as the Holland River. It is impossible to conduct major construction without impacting these during the construction process, no matter how you attempt to "mitigate".</p> <p>2. Food security: this convenient bypass will make it easier for commuting east and north of the 404 and west and north of Bradford. Ontario has finite agricultural land, particularly land for vegetable crops grown in the Holland Marsh. Our farmlands need to be protected at all costs. Opening them up for development is a very short-sighted gain.</p>	<p>Hello</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Project Team will carry forward previous environmental commitments made during the 2002 Route Planning and Environmental Assessment (EA) Study as set out in the regulation, and the Simcoe County Road 4 Widening EA study as applicable. As part of the project-specific assessment of environmental impacts, various environmental and engineering studies are currently being completed. These include an Agricultural Impact Assessment (AIA), and an impact assessment for both Terrestrial Ecosystem and Fisheries. Refer to the Overview page on the Project Website to see a full list of the environmental studies being undertaken for this Project.</p> <p>Under the 2002 Approved EA and as a requirement under the Greenbelt Plan (2017), the AIA will be undertaken to the existing standards and with reference to the Ontario Ministry of Agriculture, Food and Rural Affairs (OMAFRA) Draft AIA Guidance Document (March 2018). This study will identify potential impacts to agricultural lands and recommend mitigation measures and strategies to be incorporated into the project design. Further mitigation, compensation and/or enhancement measures related to agriculture are being considered during the Preliminary Design stage of the study in consultation with the agricultural community.</p> <p>The Fisheries and Terrestrial Ecosystem studies will assess the project-specific impacts of the Project including existing conditions and identification of mitigation measures to avoid or minimize these impacts. The Project is subject to environmental legislative and permitting requirements. In compliance with these Federal and Provincial requirements, the Ministry consults with regulatory agencies such as Fisheries and Oceans Canada (DFO), Ministry of the Environment, Conservation and Parks (MECP), Ministry of Northern Development, Mines and Natural Resources and Forestry (NDMNRF), and consults with Conservation Authorities as key stakeholders for the environment.</p> <p>The results of these studies will be documented in the Environmental Conditions Report (ECR) and Environmental Impact Assessment Report (EIAR) in accordance with Ontario Regulation 697/21.</p> <p>We have added you to the Project Contact List and you will be notified through email of the future Public Information Centre (PIC) #2 and updates for this Project including the public review periods for the ECR and EIAR. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Project Study Area.</p>

						<p>--- 3) Navigability of the Holland River and Holland River East Branch: The design and future construction of the bridges may affect current navigability within the rivers. For the purpose of protecting the existing navigable function of these waterways, please complete the following: Does your organization use the Holland River or Holland River East Branch within the project limits for navigation (i.e., recreation or commercial uses), or are you aware of others doing so? ---</p> <p>No"</p>	<p>Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT366		To: Project Team From: [REDACTED]	Email: [REDACTED]	Water protection	Wednesday, November 24, 2021	<p>"Hello Project Team,</p> <p>Thank you for your email. I wish you Great success in your efforts on the Bradford Bypass. I note your comments as follows "several storm water management features will be required to meet the standards required by the MTO, LSRCA and the Ontario Water Resources Protection Act.</p> <p>Road salt is toxic to wildlife. Algae and duckweed is caused by excessive phosphorus / nitrogen and removes oxygen from the water. Duckweed encourages the growth of bacteria which creates toxic water and kills plants and wildlife.</p> <p>I will send a few pictures separately of duckweed adjacent to the proposed bypass. I hope that you can add the removal of phosphorus and road salt to your Bypass project and improve the overall situation in the Holland Marsh and Lake Simcoe.</p> <p>Yours very truly,</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Project Team recognizes your concerns and comments regarding maintaining water quality, and thanks you for sharing this information and photographs.</p> <p>The studies will be undertaken to satisfy the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual and other provincial and regulatory requirements.</p> <p>Additionally, the Project will meet current standards that build upon the environmental commitments from the 2002 Approved Environmental Assessment (EA) as it relates to water quality, drainage and stormwater management. The drainage and hydrology engineering studies undertaken for the Project will develop an efficient and effective drainage system for the highway, while addressing potential impacts related to runoff and the change in impervious cover.</p> <p>The Bradford Bypass is primarily located within the Lake Simcoe Region Conservation Authority (LSRCA) regulation limits, south of Lake Simcoe. MTO will assess the project-specific impacts with respect to the <i>Lake Simcoe Protection Act</i> and the Lake Simcoe Protection Plan through consideration of water quality and quantity, stormwater management, groundwater management, landscaping and ecological impacts and mitigation measures.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>For those stormwater management facilities that may occur within the jurisdiction of the Nottawasaga Valley Conservation Authority (NVCA) and potentially influence the subwatershed, MTO will apply NVCA water quantity and quality control guidelines. In addition, the design of the highway and stormwater management for the highway will meet the provincial legislative requirements for water quality and quantity under the <i>Ontario Water Resources Act</i> and <i>Environmental Protection Act</i>.</p> <p>We have added you the Project Contact List and you will be notified through email of the future Public Information Centre (PIC) #2 and updates for this Project including the public review periods for the Environmental Conditions Report (ECR) and Environmental Impact Assessment Report (EIAR). An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Project Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT367		To: Project Team From: [REDACTED]	Email [REDACTED]	Location of BBP	Wednesday, November 24, 2021	<p>"Hello,</p> <p>Where exactly is the Bradford bypass going? How far would it be from line 9? And is it possible that it can be moved? Or is it all in place and official now?</p> <p>Thank ou"</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The proposed highway will extend from Highway 400 between 8th Line and 9th Line in Bradford West Gwillimbury, will cross a small portion of King Township and will connect to Highway 404 between Queensville Sideroad and Holborn Road in East Gwillimbury. MTO is currently undertaking a project specific assessment of environmental impacts and completing additional design and engineering work. MTO previously completed a route planning study for the Bradford Bypass and the EA and Recommended Plan was approved in 2002.</p> <p>Alternatives to the 2002 Approved EA alignment are not being considered. This alignment is technically preferred for a freeway in terms of highway network expansion, ease of construction, relationship to provincial and municipal land use planning and the preferred route is already included in municipal Official Plans and Transportation Master Plans, as well as the <i>Places to Grow Act</i>. Refinement of the 2002 EA Approved alignment and consideration of the highway's proximity to existing and approved developments is underway. Public Information Centre (PIC) #1 presents the proposed refinements being considered and</p>

							<p>evaluated during Preliminary Design. Localized and minor alignment shifts have been identified as part of this study and will be further considered as environmental studies are completed, Preliminary Design is advanced, and input is received through consultation.</p> <p>We have added you the Project Contact List and you will be notified through email of the future PIC #2 and updates for this Project including the public review periods for the Environmental Conditions Report (ECR) and Environmental Impact Assessment Report (EIAR). An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Project Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT368		To: Project Team From:	Email:	Taxes Traffic Study	Friday, November 26, 2021	<p>"1) Does your organization wish to participate in the study and continue to receive notices of project activities or information as this study progresses? If you do not wish to participate, you will be removed from the mailing list. ---</p> <p>No</p> <p>--- Name ---</p> <p></p> <p>--- Email ---</p> <p></p> <p>--- 2) Please indicate if the above noted project will affect the delivery of your organization's programs or services, and/or provide project related comments to the Project Team. ---</p> <p>What is the opportunity cost of these tax dollars? What is the flow of traffic expected for this route versus how that flow could be managed through use of the 407 if the cost of the 407 on a per use basis is reduced? Can these tax dollars be more optimally spent on buying back the 407 project as a public good and then reduce per use costs to</p>	<p>Hello </p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The purpose of the proposed Bradford Bypass is to improve connectivity to the region as well as to provide capacity to accommodate future demand in the region. The new freeway will relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and support urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404. As announced on November 4, 2021 by Premier Ford, the Bradford Bypass will not be operated as a toll highway.</p> <p>Congestion costs Ontario billions in lost productivity, adds to the costs of goods and creates harmful carbon emissions. Ontario needs new infrastructure to help move people and goods or the region will quickly become overwhelmed. Even if traffic use changes in a post-pandemic era, Simcoe County is expected to experience rapid population growth over the next 10 years, with the Regional Municipality of York growing to 1.79 million by 2041. Building the proposed Bradford Bypass is necessary to relieve existing congestion on local east-west roads and to address the expected long-term travel demand in the area.</p> <p>The travel time savings are calculated by comparing two scenarios: one scenario with the Bradford Bypass and the other without. The 407 Express Toll Route is included in the transportation model under both</p>

						<p>increase 'ridership' of the 407 for all. The 407 was a fail as current use is prohibitively expensive. Can that problem be fixed first before resorting to another mega-project?</p> <p>Will traffic use in this post-pandemic era not change and be dramatically reduced? Were per-pandemic traffic estimates used in the cost-benefit analysis?"</p>	<p>scenarios. Motorists and trucks are anticipated to see more than a 60 per cent savings in travel time when using the new freeway compared to existing routes along local roads.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT369		<p>To: Project Team</p> <p>From:</p> <p></p>	Email:	Toll Road	Friday, November 26, 2021	<p>Good day,</p> <p>I would like to provide one specific concern, that this bypass will not be tolled.</p> <p>Ontario taxpayers were advised a long time ago that new roads would be tolled. Hence the 407, 412 and 418, the only new highways within Durham Region, are completely toll highways (most local residents don't use the tolled highways from what I understand by the way due to the exorbitant cost).</p> <p>By calling a new highway a "bypass" and avoiding the option to toll the highway, it is unfair and uncouth in my opinion to residents within other areas of the province.</p> <p>I don't live in this area to use this bypass, but, my taxes support it. Yet, where I do live within Oshawa, I can't afford to use the new highways to commute.</p> <p>Please reconsider the option to toll this highway. Even a one time on/off charge of \$4 for example vs a per km charge would help to offset the public cost and would be consistent with what the public was advised.</p> <p>Thank you,</p> <p></p>	<p>Hello </p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>As announced on November 4, 2021 by Premier Ford, the Bradford Bypass will not be operated as a toll highway. Premier Ford also announced on February 18, 2022 that tolls have been permanently removed from Highways 412 and 418, which came into effect on April 5, 2022.</p> <p>We have added you the Project Contact List and you will be notified through email of the future Public Information Centre (PIC) #2 and updates for this Project including the public review periods for the Environmental Conditions Report (ECR) and Environmental Impact Assessment Report (EIAR). An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Airmail to residences and businesses adjacent to the Project Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>

CT370	█	To: Project Team From: █	Email: █	MPP Mail Out	Sunday, November 28, 2021	<p>Dear MPP Mulroney, Minister Piccini, Minister Clark and MTO Project Team,</p> <p>The Bradford Bypass runs through one of the most sensitive parts of the Greenbelt and will bisect Lake Simcoe's most important wetland. This route will destroy the habitat of at least 8 species of concern. That means we need to be very considerate of the impacts of this highway on the Holland Marsh and its eco-system. Not only that - think of all the farmland that would be cut up or paved over! I thought you were supposed to be supportive of local businesses?</p> <p>For those reasons, I want the exemption for the Bradford Bypass (https://ero.ontario.ca/notice/019-1883) to be rejected. If you're interested in doing something creative - study how many people would use the 407 if it were free and not a toll road. This would better use existing infrastructure!</p> <p>Further, I want MTO to complete a new full provincial individual EA, a complete update to the 1997 EA, including an examination of alternatives to a highway, and examination of need. I care about this issue greatly and how you proceed with it will impact my vote in the next provincial election. Do right by our wetlands, Lake Simcoe, local businesses and our public health.</p> <p>Regards, █ █ █</p>	No Response Required.

CT372	[REDACTED]	To: Project Team From: [REDACTED]	Email [REDACTED]	Opposition of BBP Traffic and environmental concerns	Saturday, December 4, 2021	<p>I am opposed to this bypass.</p> <p>I have looked at the plans for the route of the 413 highway. I am not sure how this will really elevate the traffic going sound on the 404 or DVP. It seem to me that people going west would already be heading over to highway 400 prior to this highway. It also comes very close to the 407 which was a very bad government sale to balance the budget. It makes me wonder if this is really a money making deal for some already rich construction company.</p> <p>At a time when the planet is trying to reduce global warming from its current projected path of 2.7 beyond safe thresholds, I cannot comprehend this government's notion that both the construction</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>Even with all currently planned transportation and transit investments, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). For Ontarians in 2051, average travel speeds are expected to be 16 per cent slower when compared to 2016.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>and utilization of another highway which will cut through wetland and greenspace to save the commuter minutes, is in any way, shape or form, good for Ontarians, nature, wildlife or the Earth. To combat climate change and reach the targets set at the summit meetings I am wondering how this will help.</p> <p>Navigability of the Holland River and Holland River East Branch: The design and future construction of the bridges may affect current navigability within the rivers.</p> <p>What affect is this going to have on the bird and wild life in the Holland March area. Are they going to be affected?</p> <p>I would like to hope this is not just another blunder like the millions given away to businesses during covid that should not have have received it and then almost laughing it off that tax payers lost millions like we are doing daily on the 407.</p> 	<p>Simcoe County is expected to experience rapid population growth over the next 10 years, with the Regional Municipality of York growing to 1.79 million by 2041.</p> <p>Congestion already costs Ontario billions in lost productivity, adds to the costs of goods and creates harmful carbon emissions. Ontario needs new infrastructure to help move people and goods or the region will quickly become overwhelmed.</p> <p>This new transportation corridor will relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and support projected urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404. Motorists and trucks are anticipated to see more than a 60 per cent savings in travel time when using the new freeway compared to existing routes along local roads.</p> <p>The Holland Marsh Wetland Complex extends beyond the Bradford Bypass corridor and consists of over 3,000 hectares (ha) of designated wetland area. Currently, the Bradford Bypass corridor will cross approximately 10.75 ha, which accounts for only 0.35 per cent of the entire Provincially Significant Wetland (PSW) area. The crossing locations were chosen because they are consistent with the Ministry's effort to minimize impacts to this sensitive wetland area and are among the narrowest portions of Holland Marsh. A portion of the crossing will be accommodated on an elevated structure in order to provide marine navigational clearance over the Holland River and Holland River East Branch below.</p> <p>The Project Team will carefully consider all impacts to wetland areas and will continue to work with Indigenous communities, environmental agencies, municipalities, and other concerned stakeholders to identify principles and recommendations for mitigating the impacts of placing new or expanded provincial highways within wetland areas. The Bradford Bypass Project will continue to look at opportunities to minimize impacts to these wetland areas through engineering refinements.</p> <p>We have added you to the Project Contact List and you will be notified through email of future milestone events including filing of the Exiting Conditions Report (ECR), Public Information Centre (PIC) #2, filing of the Environmental Impact Assessment Report (EIAR) and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p>

CT378	[REDACTED]	To: Project Team	Email: [REDACTED]	Consortium	Friday, December 24, 2021	Good afternoon,	Hello [REDACTED]

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
		From: [REDACTED]				<p>My name is [REDACTED] and I live in [REDACTED] I was wondering if a consortium has been chosen to manage the construction of the Early Works bridge portion of the route or for the entire project.</p> <p>If so, could you provide information on the consortium? I would like to find out which companies are involved.</p> <p>Thank you,</p> <p>[REDACTED]</p>	<p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Ontario Ministry of Transportation (MTO) has retained AECOM Canada Ltd. (AECOM) to undertake this Preliminary Design project specific assessment of environmental impacts for the Bradford Bypass. In accordance with the provisions of the Ontario Regulation 697/21, the MTO intends to move ahead with the Early Works, a focused grade separated bridge crossing for the future Bradford Bypass at County Road 4 (Yonge Street). The Ministry is following the standard process for issuing requests for proposals through the Registry, Appraisal and Qualification System (RAQS). The Request for Proposals (RFP) for the County Road 4 Early Works was issued for tendering on November 25, 2021. The RFP Closing date is currently scheduled for February 2, 2022 after which MTO will evaluate the lowest bid submission to ensure it is compliant with the requirements of the RFP. MTO is targeting contract award in March 2022. Upon award, MTO will be able to release the legal name of the entity that was awarded the contract, however, that entity (firm, partnership, etc.) will have to be contacted directly to obtain additional information regarding sub-contractors, service providers, etc.</p> <p>For the Bradford Bypass, Preliminary Design is anticipated to be complete in Early 2023.</p> <p>We have added you to the Project Contact List and you will be notified through email of future Public Information Centres (PICs) and updates for this study. An Ontario Government Notice (OGN) announcing the date of future PICs will be published in local newspapers, posted on the Project website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>

CT380	█	To: Project Team From: █	Email: █	Protest against BBP	Friday, January 7, 2022	<p>"Hello Bradford Bypass Project Team,</p> <p>Yes, I have concerns.</p> <p>Cease and desist building the Bradford Bypass over and through the Holland Marsh and the Holland River. We have taken away enough natural habitat. Use the alternative solutions presented by the STOP the Bradford Bypass Group.</p> <p>Nature needs a place to grow, and it is here in the Holland Marsh Wetlands.</p> <p>█</p>	<p>Hello █</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The purpose of this new 16.2-kilometre controlled access freeway is to improve connectivity as well as to provide capacity to accommodate future demand. Even with all currently planned transportation and transit investments, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). The Bradford Bypass will relieve congestion on existing east-west local roads and provide an improved northern freeway connection between Highway 400 in the County of Simcoe and Highway 404 in York Region.</p> <p>The ministry previously completed a Route Planning study for the Bradford Bypass and the Environmental Assessment (EA), and the Recommended Plan was approved in 2002. The planning process that resulted in the 2002 Approved EA for the Bradford Bypass evaluated alternatives from a broad range of potential solutions to the undertaking. The alternatives considered included a base case of "do nothing", managing transportation demand,</p>

							<p>improving existing roadways and/or roadway-based modes, as well as introducing new non- roadway-based facilities and/or non-roadway-based modes. The need for this freeway was confirmed during the Route Planning and EA Study as the only reasonable solution that would make a significant contribution towards addressing the problem. For more information on the previously completed EA Study and to view the previously completed EA, please visit the project website: https://www.bradfordbypass.ca/overview/.</p> <p>The Preliminary Design phase of the Project includes refinements to the Technically Preferred Route within the Study Area based on various factors, including an updated traffic demand assessment and current environmental impact assessments. As part of Public Information Centre (PIC) # 1, refinements and alternatives were developed and shown for the Bradford Bypass mainline, freeway-to-freeway interchanges, as well as arterial/crossing road interchanges.</p> <p>As part of the refinement process, the Project Team is actively engaged with local municipalities and regions for consultation on the design. The results of these consultations will be incorporated into the Ministry's Preliminary Design study and presented to the public at key design stages.</p> <p>The ministry is currently undertaking the Preliminary Design and project-specific assessment of environmental impacts as outlined in Ontario Regulation (O. Reg.) 697/21: Bradford Bypass Project. The Project Team will carry forward previous environmental commitments made during the 2002 approved Route Planning and EA Study. In addition, the Preliminary Design stage for the Bradford Bypass will include a wide range of environmental studies, as well as those identified in accordance with O. Reg. 697/21 and current legislative requirements. The ministry will conduct the following studies during Preliminary Design:</p> <ul style="list-style-type: none"> • Agricultural Impact Assessment • Air Quality Impact Assessment • Archaeological Assessment (Stages 2, 3, and 4 as required) • Cultural Heritage Assessment • Drainage and Hydrology • Erosion and Sediment Control Risk Assessment • Fish and Fish Habitat Existing Conditions and Impact Assessment Report • Fluvial Geomorphology • Groundwater Impact Assessment • Land Use and Property Impact Assessment • Noise and Vibration Impact Assessment • Preliminary Landscape Composition Plan • Snowdrift Assessment • Terrestrial Ecosystems Existing Conditions and Impact Assessment Report (including an assessment of vegetation and vegetation

							<p>the refined Preliminary Design of the Preferred Route in accordance with MTO's Environmental Guide for Noise. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barriers walls, where the proposed improvements to the Project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted, it must meet MTO's technical, economic, and administrative feasibility criteria as defined in MTO's Noise Guide.</p> <p>In addition, MTO endeavors to find innovative opportunities to address noise mitigation efforts through engineering of various types, enhancements of engineering materials, construction technologies/ enhancements, and pavement structures (such as quiet pavements), which will be investigated for consideration in the appropriate design phase.</p> <p>We have added you to the Project Contact List and you will be notified through email of future milestone events including filing of the Existing Conditions Report (ECR), PIC #2, filing of the Environmental Impact Assessment Report (EIAR) and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email. We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT383		To: Project Team From: [REDACTED]	Email: [REDACTED]	Public Transit	Tuesday, January 11, 2022	<p>Another highway in this province, which is already overrun with highways, is not the solution. Strong public transit is. Instead of building a highway through the green belt, an important natural resource, why not build a railroad? Trains are far more environmentally sustainable than cars, and far less deaths occur in train accidents, as opposed to the astronomical casualty list cars rank up daily.</p> <p>With climate change worsening daily, creating a highway will only exacerbate this problem. A highway is a short-sighted solution to the issue of traffic, short-sightedness is not what we need right now, not when the future of this species, my children and your children is in jeopardy.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your comments on the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>MTO previously completed a Route Planning study for the Bradford Bypass and the Environmental Assessment (EA), and the Recommended Plan was approved in 2002. The planning process that resulted in the 2002 Approved EA for the Bradford Bypass evaluated alternatives from a broad range of potential solutions to the undertaking. The need for this freeway was confirmed during the Route Planning and EA Study as the only reasonable solution that would make a significant contribution towards addressing the problem. Both the County of Simcoe and York Region are expected to experience rapid growth over the next 10-20 years and investing in this new 16-kilometre transportation corridor is needed to relieve congestion on</p>

						<p>Car culture is detrimental to the human race. Look at what they have brought to this world, the infrastructure and urban design we have created to accommodate cars is simply ugly and incompatible with healthy human life. Look at our car-centric towns, including Bradford. Walking is unpleasant due to the little space given to pedestrians, and at that, it is far too loud to enjoy, the sound of endless cars speeding through town enough to drive one insane.</p> <p>For the well being of Bradford residents, please do not continue with this project.</p>	<p>existing east-west local roads and provide an improved connection between Highway 400 and Highway 404.</p> <p>Even with the currently planned transportation and transit projects, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). The Bradford Bypass is one of the components as part of the transportation plan to expand and enhance the province's transportation network.</p> <p>The Project Team acknowledges your concerns regarding the proposed freeway and the potential impact on the natural environment. As part of this current Preliminary Design and project-specific assessment of environmental impacts, MTO is undertaking 15 environmental studies to update and document existing conditions, identify, and evaluate potential impacts of the Project and recommend mitigation measures to reduce these impacts to meet current environmental legislative requirements. To view the full list of studies being conducted, please visit the Project website (https://www.bradfordbypass.ca/overview/).</p> <p>The results of these studies will be presented during the next Public Information Centre (PIC) #2 anticipated to be held during the fall of 2022 and documented in a draft Environmental Conditions Report (ECR) and draft Environmental Impact Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21.</p> <p>We have added you to the Project Contact List and you will be notified through email of future milestone events including filing of the ECR, PIC #2, filing of the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT384		To: Project Team From: [REDACTED]	Phone: [REDACTED]	Protest against BBP	Tuesday, January 11, 2022	<p>"Yes my name is [REDACTED] I live in Bradford. We do not need this new Bradford Bypass. We don't need anymore roads and anymore pollution. We don't need Doug Ford and we don't need the PC party continuously being voted in Bradford all the time. Okay it's just for Doug</p>	<p>[REDACTED] called [REDACTED] on three different occasions, and he answered her call on April 7, 2022. [REDACTED] confirmed he was on the line.</p> <p>* [REDACTED] asked what the status of the project was.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>Ford's gains and for him to win another election and he is not helping anybody in Bradford. No low income people no nothing and he's the worst Premier ever and we don't need to help this guy win again. So my names [REDACTED] phone number is [REDACTED] and I'm against the Bradford Bypass and all the other roads Doug Ford want to be building so he can save his ass so thank you very much bye."</p>	<p>[REDACTED] stated the Project is currently in the Preliminary Design phase, which is expected to be completed early 2023. MTO is advancing the Early Works, as set out in the regulation, which is focused on a grade separated bridge crossing for the future Bradford Bypass at County Road 4 (Yonge Street), and construction is anticipated to begin late 2022.</p> <p>* [REDACTED] stated he does not support this highway, and believes the only reason it is being built is because Doug Ford would like to be reelected, and requires funding from developers for his election campaign.</p> <p>[REDACTED] informed [REDACTED] that the reason the highway is moving forward is because Simcoe County is expected to continue to experience rapid population growth, and the Bradford Bypass is necessary to relieve congestion on local roads.</p> <p>* [REDACTED] stated it's concerning that the highway is going over the Holland Marsh and farmland.</p> <p>[REDACTED] informed [REDACTED] various environmental and engineering studies are currently being completed, including an Agriculture Impact Assessment and Fish and Fish Habitat Existing Conditions and Impact Assessment Report.</p> <p>* [REDACTED] stated the funding used to build the highway would be better off supporting housing. He stated there's increased homelessness in Bradford and constructing apartment buildings should be the priority because Canadians can no longer afford homes.</p> <p>[REDACTED] stated anything related to housing and housing affordability should be directed to the Ministry of Municipal Affairs and Housing (MMAH), as they are responsible for delivery housing and homelessness programs.</p> <p>* [REDACTED] asked if local roads are being rehabilitated as part of this project, and who deals with the garbage on the roads.</p> <p>[REDACTED] informed [REDACTED] that anything related to local roads would need to be addressed to the municipalities Capital Works department, and garbage issues are also the municipalities responsibility.</p> <p>[REDACTED] asked [REDACTED] if he would like to provide his email address to be added to the Project contact list and receive updates on the project.</p> <p>* [REDACTED] stated no.</p> <p>* [REDACTED] thanked [REDACTED] for calling him, and stated if he had any further questions or concerns he will contact the project team.</p>

CT387	██████	To: Project Team From: ██████████	Email: ██████████	Protest against BBP	Tuesday, January 18, 2022	<p>"Hello I am writing to voice my concern over this project. I cannot understand how an environmental assessment done over 10 years ago can still be considered valid for a project that has not even begun yet. So much of our environment has changed in the last 10 years in Bradford, and with that, the assessment should be re-done to ensure no damage to already sensitive ecosystems will occur. Additionally, I generally feel that this project is more damaging than good for anyone. The amount of landscape it will change, to only cut commute times by a few minutes seems absolutely ludicrous and if you were to ask any of the current population of the area, I do believe we would all agree that this project should NO LONGER go forward and should be thrown out.</p>	<p>Hello ██████████</p> <p>Thank you for your comments on the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. The Project Team acknowledges your concerns regarding the Bradford Bypass Project.</p> <p>MTO previously completed a route planning study for the Bradford Bypass and the Environmental Assessment (EA) and Recommended Plan was approved on August 28, 2002. In August 2019, MTO approved the re-initiation of design activities for the Bradford Bypass. In advance of the current Preliminary Design assignment, AECOM completed preparatory work relating to the engineering design updates for the project, and environmental existing conditions updates. Upon completion of the preparatory work, MTO initiated a Preliminary Design and Class Environmental Assessment Study for the Bradford Bypass in September 2020. The approved planning process initially followed was for a Group 'A' project under the MTO <i>Class Environmental Assessment for Provincial Transportation Facilities</i> (2000) (Class EA).</p> <p>On October 7, 2021 Ontario Regulation 697/21 came into effect with respect to the exemption for the Bradford Bypass Project under the Class <i>Environmental Assessment</i> process. The regulation sets conditions for the</p>

						<p>Please consider all the lives, both human, animal and plant, that you are about to destroy and with the pressures of climate change being so great already (we have seen the damages done by the fires, the more intense storms, the lack of ground for water to go to and extreme flooding), I urge you to stop this project and no longer pursue it in the future.</p> <p>Thank you [REDACTED]</p>	<p>assessment process going forward and for continued environmental protection and consultations for the Bradford Bypass Project and associated Early Works.</p> <p>MTO continues to undertake 15 environmental studies to update and document existing conditions, identify, and evaluate potential impacts of the Project and recommend mitigation measures to reduce these impacts to meet current environmental legislative requirements. To view the full list of studies being conducted, please visit the Project website (https://www.bradfordbypass.ca/overview/).</p> <p>The results of these studies will be presented during the next Public Information Centre (PIC) #2 to be held during the fall of 2022 and documented in a draft Environmental Conditions Report (ECR) and draft Environmental Impact Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21. We have added you the Project Contact List and you will be notified through email of future milestone events including filing of the ECR, PIC #2, and filing of the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT388	[REDACTED]	To: Project Team From: [REDACTED]	Email: [REDACTED]	Timing for the project	Tuesday, January 18, 2022	<p>"Hi Team, Hope this email finds you well. I was wondering if you will be able to help me to get more information in regards to the Bradford Bypass project? I would like to know more about the timing for this project and how the plan works as I am planning to buy a few lands around the area.</p> <p>I will appreciate your reply [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>On October 7, 2021, Ontario Regulation 697/21 came into effect with respect to the exemption for the Bradford Bypass Project and under the Class <i>Environmental Assessment</i> process. The regulation sets conditions for the assessment process going forward and for continued environmental protection and consultations for the Bradford Bypass Project and associated Early Works. The Ministry of Transportation (MTO) remains responsible for gathering existing information about environmental conditions, predict and mitigate impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous peoples, and document decision-</p>

						<p>highway when other more <u>cost-effective alternatives</u> are possible?</p> <p>2. Why is it permitted to destroy Canadian Heritage sites, sensitive eco-systems, cause the willful extinction of endangered birds and animals, and irreversibly damage large swaths of land supposedly protected under laws like the Greenbelt Act and the Lake Simcoe Protection Act?</p> <p>3. How can any <u>Early Works</u> construction take place BEFORE it is lawful to do so?</p> <p>I find it very troubling that the current government of Ontario is forcing it's way into building a highway that has been foretold to cause much damage to the local environment. It is intended to cut through the Greenbelt and sensitive wetlands that are part of the Lake Simcoe watershed. My home is served by a water well on my property and I am protective of that resource and would not want the ground water or water table to be polluted. People closer to the proposed highway would certainly be gravely upset if their wells became contaminated with run-off from a highway! Anyone who has driven along on a highway and paid attention can see that the trees along the side of highway die off due to the road salt. Moose are known to come out of the bush to lick the salt residue along the sides of ditches!</p> <p>There are documented studies that show that there is much that will be irreversibly damaged if this highway is built. There is an Indigenous site, known as the Lower Landing, that has gone through a preliminary archeological assessment that would be destroyed if this highway is built. How's that for "reconciliation" by Canadian government(s) for the Indigenous peoples of this country and the local area?</p> <p>A recent compelling article on the subject: https://thepointer.com/article/2022-01-23/bradford-bypass-threatens-ancient-</p>	<p>investments, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). The Bradford Bypass will relieve congestion on existing east-west local roads and provide an improved northern freeway connection between Highway 400 in the County of Simcoe and Highway 404 in York Region.</p> <p>The ministry previously completed a Route Planning study for the Bradford Bypass and the Environmental Assessment (EA), and the Recommended Plan was approved in 2002. The planning process that resulted in the 2002 Approved EA for the Bradford Bypass evaluated alternatives from a broad range of potential solutions to the undertaking. The alternatives considered included a base case of "do nothing", managing transportation demand, improving existing roadways and/or roadway-based modes, as well as introducing new non- roadway-based facilities and/or non-roadway-based modes. The need for this freeway was confirmed during the Route Planning and EA Study as the only reasonable solution that would make a significant contribution towards addressing the problem. For more information on the previously completed EA Study and to view the previously completed EA, please visit the project website: https://www.bradfordbypass.ca/overview/.</p> <p>The ministry is currently undertaking the Preliminary Design and project-specific assessment of environmental impacts as outlined in Ontario Regulation (O. Reg.) 697/21: <i>Bradford Bypass Project</i>. The Project Team will carry forward previous environmental commitments made during the 2002 approved Route Planning and EA Study. In addition, the Preliminary Design stage for the Bradford Bypass will include a wide range of environmental studies, as well as those identified in accordance with O. Reg. 697/21 and current legislative requirements. The ministry will conduct the following studies during Preliminary Design:</p> <ul style="list-style-type: none"> • Agricultural Impact Assessment • Air Quality Impact Assessment • Archaeological Assessment (Stages 2, 3, & 4, as required) • Cultural Heritage Assessment • Drainage and Hydrology • Erosion and Sediment Control Risk Assessment • Fish and Fish habitat Existing Conditions and Impact Assessment Report • Fluvial Geomorphology • Groundwater Impact Assessment • Land Use and Property Impact Assessment • Noise and Vibration Impact Assessment • Preliminary Landscape Composition Plan

						<p>indigenous-site-more-significant-than-95-percent-of-all-historic-archaeological-sites-in-canada?fbclid=IwAR2De8kMRJhEXMMMtis60B7BZdDeJgi0IS2KHrm238-Mp6YVOzHYgYR_F4</p> <p>In the past there have been well documented studies that investigated how to improve the roadways in our area. I'm an automotive engineer by trade and, to me, would think that it would be obvious that informed individuals that do this sort of work professionally should study all the available historical information so that there is a thorough understanding of the problem(s) to be solved. It seems that these studies and associated information is willfully being ignored by the current government and Ministry of Transportation. How can this be?</p> <p>As a concerned Canadian citizen, I am asking that the Federal Government of Canada take a closer look at this proposed project and seriously consider undertaking an up-to-date Environmental Assessment so as to examine all the options available and to make an informed, modern day 21st century, recommendation that respects the various laws that are in place regarding the Environment, Lake Simcoe, the Lake Simcoe watershed, and the Greenbelt. I understand that an assessment is to begin for the Highway 413 project – why not for the Bradford Bypass? There is an incredible and compelling amount of information to back-up everything I've written about and I would be happy to show you or your designate(s).</p> <p>A recent compelling article: https://thepointer.com/article/2022-01-21/gord-miller-ontario-s-former-environmental-commissioner-trudeau-must-do-what-ford-won-t-kill-the-bradford-bypass?fbclid=IwAR1JgwwTW46cx0fbwZXvku4mi3YwQe6BYTZ71ahgax2vey1p3yk180Yd86I</p> <p>I thank you in advance for your consideration.</p>	<ul style="list-style-type: none"> Snowdrift Assessment Terrestrial Ecosystems Existing Conditions and Impact Assessment Report (including an assessment of vegetation and vegetation communities, wildlife and wildlife habitat, species at risk and designated natural areas) Waste and Excess Materials Management Plan <p>More specifically, the Terrestrial Ecosystems Existing Conditions and Impact Assessment Report will be completed and will document potential impacts to the Holland Marsh, prescribe mitigation measures to alleviate potential impacts, and document future commitments. Where potential impacts to endangered or threatened species are identified, the ministry will work with regulatory agencies to meet the legislative requirements of the Ontario <i>Endangered Species Act</i> and the federal <i>Species at Risk Act</i>. These studies will allow the Project Team to identify principles and recommendations to mitigate impacts. An Environmental Conditions Report (ECR) and an Environmental Impact Assessment Report (EIAR) will document the final description of the freeway alignment and design, environmental impact evaluation results, mitigation measures, monitoring activities, and potentially required permits and approvals and will be made available to Indigenous communities, government agencies, and interested members of the public for review and comment.</p> <p>The ministry recognizes the importance of farmland and the Greenbelt's agricultural system for economic wellbeing, human health, and the quality of life of Ontarians. At the same time, we need to ensure that our transportation infrastructure keeps up with a growing population and helps build our economy. The Greenbelt Plan permits infrastructure, including highways, where it supports the significant growth and economic development expected in southern Ontario beyond the Greenbelt by providing connections among urban centres.</p> <p>The ministry will assess impacts with respect to the <i>Lake Simcoe Protection Act</i> and the Lake Simcoe Protection Plan. This assessment will also include recommendations on ways to avoid or mitigate adverse impacts. The Project Team will undertake drainage and hydrology engineering studies to satisfy relevant provincial and regulatory/legislative requirements. The ministry will continue to consult with Lake Simcoe Region Conservation Authority (LSRCA) as the study progresses. Additionally, as part of the Preliminary Design, the ministry is undertaking a hydrogeological assessment which includes completing a Water Well Survey to identify current water well users within a 500-metre radius around the project site.</p> <p>O. Reg. 697/21 that was introduced on October 7, 2021 by Ministry of Environment, Conservation and Parks allows the ministry to complete a</p>

						<p>Kindest regards,</p> <p>[REDACTED]</p>	<p>streamlined planning and assessment process to move the Bradford Bypass project forward in an environmentally conscious way. The regulation allows for a bridge and associated roadworks at County Road 4 to proceed in advance of the rest of the project provided that MTO completes an early works assessment process. The ministry is still required to complete all environmental requirements such as carrying out consultations as set out in the regulation and obtaining permits and approvals for the project prior to the start of construction. The Draft Early Works Report for works completed at County Road 4 is currently available for public review until February 12 at the following link: URL https://www.bradfordbypass.ca/early-works/.</p> <p>Current work is underway to complete field investigations related to the Archaeological Assessment (Stages 2, 3, & 4, as required) under O. Reg 697/21 and legislative requirements under the <i>Ontario Heritage Act</i>. The ministry as a Crown Agency will continue to be subject to its constitutional obligations to consult with Indigenous communities that have established or credibly asserted Aboriginal or treaty rights that could be adversely impacted by the Project.</p> <p>The Impact Assessment Agency of Canada (IAAC) completed the review of project details to determine whether to designate the Bradford Bypass Project for a federal EA. On May 3, 2021, the Minister of Environment and Climate Change determined that the Bradford Bypass Project did not warrant designation under the federal <i>Impact Assessment Act</i>. The ministry is still required to follow all relevant provincial and federal legislative requirements, standards, and practices as they apply to the design, construction, and operation of the project to ensure continued environmental protection.</p> <p>Thank you for taking the time to bring your concerns about the Bradford Bypass to our attention.</p> <p>Yours truly,</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>c: Honourable Doug Ford, Premier of Ontario</p>
CT191 Cont.	[REDACTED]	To: Project Team From: [REDACTED]	Email: [REDACTED]	Property requirements	Thursday, January 27, 2022	Good morning,	Hello [REDACTED]

						<p>As we continue to work away on the future development concept for 3610 & 3664 8th Line, we would appreciate it if you could provide an estimate of potential property requirements as part of the planned interchange at the Bradford Bypass.</p> <p>For reference, I have attached our comments from April 27, 2021. We are aware that you may still be considering the 4 options and may not yet have confirmation of the preferred alignment but we're hoping that that some preliminary property information could be provided at this time.</p> <p>We would appreciate hearing back from you.</p> <p>Thank you so much.</p> <p>[REDACTED]</p>	<p>Thank you for following up with the Project Team on the status of design for the Bradford Bypass Project, which involves completion of the Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>At this time a preferred alternative for the Highway 400 interchange has not been selected as the Project Team is currently in the process of evaluating alternatives. The Project Team is taking into consideration stakeholder comments and concerns when evaluating the preferred alternatives for the Bradford Bypass Project. Once selected, the preferred alternatives will be presented at Public Information Centre (PIC) #2 to be held the fall of 2022. Further details on the study and design will be documented in the draft Environmental Impact Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21. In early Fall 2022, and in advance of PIC #2, the Project Team will connect with property owners along the corridor to offer an opportunity to discuss their property specific concerns.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of future milestone events including filing of the Exiting Conditions Report (ECR), PIC #2, filing of the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience</p>
CT393	[REDACTED]	To: Project Team From: [REDACTED]	Email: [REDACTED]	Add to contact list	Friday, January 28, 2022	<p>I would be interested in receiving progress information updates regarding this project.</p> <p>Thank you,</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>As you have requested to be added to the mailing list, we will include you on the Project Contact List and you will be notified through email of the future PIC #2 and updates for this study. CT394	█	To: Project Team From: █	Email and phone call: █	Date of approval	Monday, January 31, 2022	<p>Phone call: "Hello, please call █ it's █. Thank you so much. I had a couple questions about the Bradford Bypass. It's January 31, 2:37PM. Thank you."</p> <p>Email: "Good day</p> <p>Hope you are able to give me a few important statistics.</p> <p>I would appreciate if you could tell me the <u>actual date</u> that the Bradford Bypass was approved to be built. Was it during a meeting in May or June 2022? I am aware Premier Ford made an announcement for the Bradford Bypass to be build which was published in the Newspapers on October 14, 2022 and also November 21, 2022 but my question is:</p> <p><u>What actual DATE did council or whoever made this decision with the Premier approve the go forward with the Bradford By Pass to be built?</u> I know it had to be before the announcement to the Public. Was it May 2022, June 2022 for example in a Council Meeting?</p> <p>Thank you so much and I appreciate this very much as I am composing a document for a factual storytime and I want to add this to it.</p> <p>Regards</p>	<p>Hello █</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Ministry of Transportation (MTO) previously completed a route planning study for the Bradford Bypass and the Environmental Assessment (EA) and Recommended Plan was approved in 2002.</p> <p>In August 2019, MTO approved the re-initiation of design activities for the Bradford Bypass. In advance of the current Preliminary Design assignment, AECOM completed preparatory work relating to the engineering design updates for the project, and environmental existing conditions updates. Upon completion of the preparatory work, MTO initiated a Preliminary Design and Class Environmental Assessment Study for the Bradford Bypass in September 2020. The approved planning process initially followed was for a Group 'A' project under the MTO <i>Class Environmental Assessment for Provincial Transportation Facilities</i> (2000) (Class EA).</p> <p>On October 7, 2021, Ontario Regulation 697/21 came into effect with respect to the exemption for the Bradford Bypass Project under the Class <i>Environmental Assessment</i> process. The regulation sets conditions for the assessment process going forward and for continued environmental protection and consultations for the Bradford Bypass Project and associated Early Works.</p> <p>In accordance with the provisions of the Ontario Regulation 697/21, MTO has followed the Early Works Assessment process and intends to move ahead with the Early Works. The Early Works, as set out in the regulation are focused on a grade separated bridge crossing for the future Bradford Bypass at County Road 4 (Yonge Street). The Draft County Road 4 Early Works Report was available for review on the project website</p>

							<p>In accordance with MTO's Air Guide, provincial transportation projects are required to estimate greenhouse gas (GHG) emissions for build and no-build scenarios of the preferred alternative for reference years and assess their implications for achieving any applicable GHG emission-reduction targets. For additional information, please refer to Section 3 of the Air Guide.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of future milestone events including filing of the Exiting Conditions Report (ECR), Public Information Centre (PIC) #2, filing of the Environmental Impact Assessment Report (EIAR) and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p>
CT395		To: Project Team From: [REDACTED]	Email: [REDACTED]	Impacts to agricultural land, endangered species, lake Simcoe, etc.	Thursday, February 10, 2022	<p>Hello,</p> <p>With the threats to prime agricultural land, endangered species and habitat, threats to future food security, the risks associated with how the Bypass construction, use, and future sprawl will affect Lake Simcoe, wetlands - specifically the Holland Marsh, the concerns of the indigenous peoples, and the lack of forethought regarding just transition from fossil fuels and towards a more sustainable and healthy future for all... why are you building this highway again?</p> <p>To make developers prosper? To relieve traffic?</p> <p>"Mr. Mayor, I can't think of any city on earth that has solved congestion by building more highways," said [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your comments on the Bradford Bypass Preliminary Design and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Project Team acknowledges your concerns regarding potential impacts to agricultural land, the natural environment, Lake Simcoe, and wetlands. MTO is undertaking 15 environmental studies to update and document existing conditions, identify and evaluate potential impacts of the Project and recommend mitigation measures to reduce these impacts to meet current environmental legislative requirements. To view the full list of studies being conducted, please visit the Project website (https://www.bradfordbypass.ca/overview/)</p> <p>The results of these studies will be presented during the next Public Information Centre (PIC) #2 anticipated to be held</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>during the fall of 2022 and documented in a draft Environmental Conditions Report (ECR), and a draft Environmental Impact Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21.</p> <p>MTO is engaging and consulting directly with Indigenous communities pursuant to s.35 of the Constitution Act 1982. Indigenous community representatives and community members are continually engaged and consulted through a variety of activities such as written communications, providing feedback on draft environmental and archaeological reports, individual meetings, and active participation in, and monitoring of archaeological investigations being undertaken. Indigenous community interests, feedback, concerns, and questions are being included as part of the Preliminary Design and will continue to be included as part of the future Detail Design study.</p> <p>MTO previously completed a Route Planning study for the Bradford Bypass and the Environmental Assessment (EA), and the Recommended Plan was approved in 2002. The planning process that resulted in the 2002 Approved EA for the Bradford Bypass evaluated alternatives from a broad range of potential solutions to the undertaking. The need for this freeway was confirmed during the Route Planning and EA Study as the only reasonable solution that would make a significant contribution towards addressing the problem, because Simcoe County is expected to experience rapid population growth over the next 10 years, with the Regional Municipality of York growing to 1.79 million by 2041. Municipalities within the Study Area of the Bradford Bypass have also generated Official and Transportation Master Plans based on the approved 2002 Environmental Assessment, in order to address traffic demand as a result of population and employment growth projections.</p> <p>We have added you to the Project Contact List and you will be notified through email of future milestone events including filing of the ECR, PIC #2, filing of the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the</p>

							<p>Project Contact List will receive direct notification through mail or email</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p>
CT396		To: Project Team From: [REDACTED]	Email: [REDACTED]	Minister CC	Thursday, February 10, 2022	<p>Dear [REDACTED]</p> <p>I am very disappointed in your decision to not call for an environmental review of the Bradford Pass. How can you square such a decision with your <u>mandate letter</u> that includes a direction to "provide funding to protect and restore" Lake Simcoe. In your letter to me you say this:</p> <p><i>Ontario Regulation 697/21 sets the exemption and the conditions for the assessment process going forward. The Agency understands that the Proponent will be required to undergo a streamlined provincial assessment process for the Project, informed by consultation with Indigenous communities and interested members of the public, that includes an early works assessment process and preparation of an environmental conditions report and an environmental impact assessment report. The Agency also understands that the Proponent will be required to follow all other relevant legislative requirements, standards, and practices for the Project.</i></p> <p>However, it is my understanding that "the Proponent" (presumably this is the Ontario government – it would be helpful if such terms could be defined for regular members of the public like myself) is making plans to get started on the work before the proper assessment processes have been done. This strikes me as 1). a big waste of money and 2). evidence that the Ford government is not taking this process seriously.</p>	<p>No response required.</p> <p>[REDACTED] response – February 11, 2022</p> <p>Hello,</p> <p>Thank you for your correspondence addressed to the Honourable Steven Guilbeault, Minister of Environment and Climate Change and/or the Impact Assessment Agency of Canada (the Agency) regarding the Bradford Bypass Project (the Project) proposed by the Ontario Ministry of Transportation (the Proponent).</p> <p>The Impact Assessment Act (IAA) and its regulations establish the legal framework for federal impact assessments. Federal impact assessment is a key element of a larger regulatory system for addressing project effects. It works in a complementary fashion alongside other regulatory processes at the federal, provincial, territorial, and municipal levels.</p> <p>In May 2021, the former Minister of Environment and Climate Change responded with reasons to a request to designate the Project and determined that it was unwarranted. His response was based on information provided by the province and Indigenous groups; the scientific advice of federal expert departments; and the federal, provincial, and municipal regulatory mechanisms in place to manage potential adverse environmental effects in areas of federal jurisdiction as defined in the IAA.</p> <p>Ontario Regulation 697/21 sets the exemption and the conditions for the assessment process going forward. The Agency understands that the Proponent will be required to undergo a streamlined provincial assessment process for the Project, informed by consultation with Indigenous communities and interested members of the public, that</p>

						<p>The Federal government has a duty to act on behalf of the well being of all Canadians in times of existential crises such as the climate crisis. This was the reasoning that the supreme court gave for thankfully quashing the Ford government's objections to Federal intervention on carbon pricing. I think that the Ford government's highway plans fly in the face of the direction that Canada as a whole must go: we must reduce our dependency on car culture, seriously develop greater public forms of transportation and prevent further sprawl over much needed farm and wet lands. All the provinces must do this, or we will not achieve our emissions targets by 2030. Ensuring we meet this goal is a Federal responsibility.</p> <p>We are counting on you, Sincerely, [REDACTED]</p>	<p>includes an early works assessment process and preparation of an environmental conditions report and an environmental impact assessment report. The Agency also understands that the proponent will be required to follow all other relevant legislative requirements, standards, and practices for the Project.</p> <p>Since there have been no material changes to the Project, there is no basis for the Minister to revisit the former Minister's determination.</p> <p>The Agency encourages you to direct future correspondence to the team managing the provincial assessment process at projectteam@bradfordbypass.ca or info@bradfordbypass.ca. Should you wish to contact the Agency, you may do so via email at [REDACTED]</p> <p>Thank you, [REDACTED] [REDACTED] [REDACTED]</p>
CT397	[REDACTED]	To: Project Team From: [REDACTED]	Email: [REDACTED]	Environmental Concerns Moving highway North	Sunday, February 13, 2022	<p>Good evening,</p> <p>My apologies this is a little late, I had to prepare the .pdf file. I am a local resident living in front of the school currently being built at [REDACTED]. I believe the highway should be built further north to avoid destruction of the local forests and to avoid being the backyard of the current school being built. There are empty fields north of the currently proposed route for the highway. Please have a look at the claim for moving the highway slightly north to the empty fields and the picture evidence to showcase the empty fields.</p> <p>To avoid air pollution, light pollution and noise pollution, the highway should be deviated north around the forests so they can act as a natural buffer for the local residents. This way the highway can still be built but far enough away that the local residents aren't affected by the air, light and noise pollution.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your comments on the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. The Project Team acknowledges your concerns related to the Bradford Bypass.</p> <p>The planning process for the 2002 Approved Environmental Assessment (EA) narrowed down alternatives from a broad range of potential solutions to the concept, ultimately selected as the Technically Preferred Route to a Planning level of detail. As part of the current Preliminary Design study, alternate corridor locations for the highway are not being considered as the Technically Preferred Route for the Bradford Bypass was approved through 2002 EA. This alignment is technically preferred for a freeway in terms of highway network expansion, ease of construction, relationship to provincial and municipal land use planning (Official and Transportation Master Plans, Places to Grow Act), as well as having fewer negative impacts on residential and natural areas when compared to other route options considered.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>Thank you for your time. Best regards,</p> <p>██████████</p>	<p>The Preliminary Design phase will include refinements to the Technically Preferred Route within the Study Area based on various factors, including updated environmental and design studies to identify and evaluate potential impacts of the Project and recommend mitigation measures to reduce these impacts.</p> <p>MTO is undertaking 15 environmental studies to update and document existing conditions, identify, and evaluate potential impacts of the Project and recommended mitigation measures to reduce these impacts to meet current environmental legislative requirements. This includes but is not limited to, a Noise Impact Assessment, a Terrestrial Ecosystems Existing Conditions and Impact Assessment Report, and an Air Quality Impact Assessment.</p> <p>The Noise Impact Assessment will be undertaken in accordance with MTO's <i>Environmental Guide for Noise</i>. MTO will investigate noise mitigation efforts, including consideration for existing and future noise barrier walls, where the proposed improvements to the Project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. Construction-specific noise mitigation will address the type of noise-generating equipment used, hours of operation and proximity to identified Noise Sensitive Areas. Timing constraints, setback distances and quieter alternatives will be evaluated in the selection of the construction noise mitigation plan.</p> <p>The Terrestrial Ecosystems Existing Conditions and Impact Assessment will look at existing conditions for plants, wildlife, and vegetation within the study area for the project. This will include investigations and project-specific impact assessments related to species at risk, and their associated habitat that may be impacted by the project. Where an impact is identified, strategies to avoid, minimize, mitigate or compensate for those impacts are developed in accordance with the provincial <i>Endangered Species Act</i> (ESA) and where applicable, the Federal <i>Species at Risk Act</i> (SARA). The Project Team will consult with the regulatory agencies with respect to the impact assessments and obtain the necessary approvals under the appropriate legislation.</p> <p>An Air Quality Impact assessment will be undertaken in accordance with the MTO's <i>Environmental Guide for Assessing</i></p>

							<p>and Mitigating the Air Quality Impacts, and Greenhouse Gas Emissions of Provincial Transportation Projects (May 2020) (Air Guide). MTO will estimate greenhouse gas (GHG) emissions for build and no-build scenarios of the preferred alternative for reference years and assess their implications for achieving any applicable GHG emission-reduction targets. For additional information, please refer to Section 3 of the Air Guide.</p> <p>The results of these studies will be presented during the next Public Information Centre (PIC) #2 anticipated to be held during the fall of 2022 and documented in a draft Environmental Conditions Report (ECR), and a draft Environmental Impact Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21, which will be available for public review periods.</p> <p>The Bradford Bypass highway lighting will be designed to meet current MTO criteria utilizing MTO approved LED luminaires. The MTO design criteria includes stringent standards regarding allowable light trespass or spill light levels beyond the MTO right-of-way. The levels allowed are based on commercial and residential land use categories with the least spill allowed for adjacent natural areas, parks, rural, agricultural, open spaces, and residential areas. The MTO approved modern LED luminaires that will be utilized, are designed with limited lighting and with shielding to direct the light toward the highway and away from adjacent properties outside the MTO right-of-way.</p> <p>We have added you to the Project Contact List and you will be notified through email of future milestone events including filing of the ECR, PIC #2, filing of the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p>

						<p>circular road right through the south part of our property, taking out our 1600 square foot workshop and barring access to our house, as the new R.O.W. and red line cover our driveway and leave us about 10 feet to our front door.</p> <p>Can you please get someone out to see the actual property and come up with a better solution for all concerned.</p> <p>Thank you for your time.</p> <p>[REDACTED]</p>	
CT399	[REDACTED]	<p>To: Project Team</p> <p>From: [REDACTED]</p>	Email: [REDACTED]		Friday, February 18, 2022	<p>Mr [REDACTED]</p> <p>I appreciate you responding but I was a bit confounded by the lack of information. I am none the wiser as to why this project should be exempted from an updated Environmental assessment. I have asked several members of council for current traffic studies showing the actual time savings to no avail. Instead I'm told about future studies. I believe that is putting the cart before the horse.</p> <p>We can that it is fine to have differences of opinion but I would think it is incumbent on representatives to explain their decision making process and whether it is based on science or just an opinion.</p> <p>I had previously read through much of the website you sent me and again the actual studies cited are 20 plus years old, and refer to Bradford having a population of 18,000. It states one of the selling points of the bypass location is the lack of houses nearby....20 some years later that is not the case as the bypass will be directly behind the subdivision on the 8th line.</p> <p>Perhaps I wasn't clear in my email. I want to know how council members came to the conclusion to support the bypass. What studies made you believe this is the best solution? Consequently, I have set out my questions below that I would answered.</p>	<p>Good afternoon [REDACTED]</p> <p>Please see attached the responses to the remaining questions. Please let us know if you have any questions or concerns.</p> <p>Regards,</p> <p>1.A Traffic Study is currently being revised for the Technically Preferred Route, as identified in the 2002 Approved Environmental Assessment (EA), and Preliminary Design alternatives.</p> <p>2.The Ministry is undertaking the streamlined assessment process, which is set out in Ontario Regulation 697/21 and came into force on October 7, 2021. Ontario Regulation 697/21 prescribes a project-specific assessment of environmental impacts, including consultation requirements that are being carried out as part of this study. The regulation sets out a streamlined process with a goal of maintaining strong environmental oversight for the planning, assessment, documentation, and consultation objectives necessary to advance the project to implementation and continue environmental protection. This will reduce timeline delays for building important infrastructure for Ontario communities, while maintaining environmental considerations and opportunities for public and Indigenous engagement, delivering critical roadway infrastructure that matters most to Ontario communities and facilitating the movement of people</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>1. When was the most recent traffic study done and what were the results of the study in terms of time saving etc. both on the bypass and the roads it will spill it's traffic onto.</p> <p>2. Why was the bypass exempted from an updated Environmental assessment?</p> <p>3. Will the future studies end up being the equivalent of having done an up to date environmental assessment. (Several environmental and communities are calling for an updated EA, and it seems contradictory to exempt it from an EA and then perform those studies anyway, particularly if it would prove the route to be the best one...not to mention a public relations disaster).</p> <p>4. What are the ramifications for those north of Bradford? Are there traffic studies showing the traffic flow on Highway 11 north of the proposed exit? (I live off of the ninth line, and currently highway 11 is largely inaccessible from the 9th line during rush hour, so selfishly, I am interested studies that show how this will impact that intersection and those further north)</p> <p>5. How many endangered species were considered in the previous environmental assessment? How many endangered species are there today in the same area? Does the old environmental assessment have a procedure to accommodate with any new endangered species?</p> <p>6. How does the bypass fit into the Bradford West Gwillimbury environmental action plan to comply with emissions.</p> <p>7. Do you know of farmland that has been taken out of farming due to a lack of transportation accessibility, or is that something that concerns you about the future?</p> <p>8. How does the environmental assessment that</p>	<p>across the province. Please refer to information on the Project Website, which describes the process. As well, please see the decision notice on the Environmental Registry of Ontario (https://ero.ontario.ca/notice/019-1883) for more information.</p> <p>3. There are similarities between the MTO Class EA process and those being carried out under Ontario Regulation 697/21. Under the Regulation, the Ministry will carry forward the environmental commitments from the 2002 Approved EA for the Technically Preferred Route. The regulation, in general, incorporates all but Condition 4 of the 2002 EA Notice of Approval, which had directed MTO to follow the Class Environmental Assessment for Provincial Transportation Facilities (MTO Class EA) for the design and construction of the project. As part of the study documentation under the Regulation and requirements to satisfy environmental legislation and secure necessary permits, licenses, approvals and authorizations for the project, environmental impacts studies are being undertaken and mitigations measures are being developed. These studies are listed on the bottom of the Overview page of the Project Website. Under the MTO Class EA, these studies would have been presented in the Transportation Environmental Study Report (TESR). Under the Regulation, results and information will be presented in the Environmental Conditions Report (ECR) and the Environmental Impact Assessment Report (EIAR).</p> <p>4. The Highway 11 and 9th Line intersection and traffic patterns will be influenced by the County of Simcoe Widening on County Road 4. In general, the future traffic patterns and flow are being assessed to compare the future condition with and without the highway.</p> <p>Information in the graphic presented as part of PIC 1 (https://www.bradfordbypass.ca/2021/04/09/5-considerations-for-the-bradford-bypass-project/) shows initial changes to traffic patterns in 2041. There is anticipated to be an increase in local traffic on County Road 4 where there is a proposed interchange with the Bradford Bypass. As the Project Team evaluates interchange alternatives, the results of traffic modelling will be updated and presented.</p>

						<p>is being done for the downtown revitalization project compare to one that would be done for the bypass in terms of complexity and possible impacts?</p> <p>9. Will there be in person opportunities for public discussion on the bypass. I understand covid has hampered that ability but some might also perceive it as a way for the powers that be to squeeze this in without proper oversight by the public. That is a pretty basic fundamental rite that I'm confident we can agree on.</p> <p>10. If the Conservative party is not elected will the taxpayer be on the hook for the cost of breaking/delaying contracts signed pertaining to the bypass?</p> <p>I trust council has already looked into the above issues and hope it is not too onerous a task for you to get me the responses.</p> <p>Thanks for your time and have a good week. I look forward to reading through the results so I can make an informed decision.</p> <p>[REDACTED]</p> <p>Sent from my iPad</p> <p>On Feb 2, 2022, at 8:49 AM, [REDACTED] wrote:</p> <p>[REDACTED]</p> <p>Thank you for your email, like I mentioned I appreciate everyone's opinion on the Bradford Bypass. I do believe that you can find some of your concerns on the Bradfordbypass.ca Government website. From what I have been told the Province is doing 15 studies which includes updating the EA. The quick answer is we are not all going to support the Bypass. That is why we appreciate your input as it helps us make sure that everyone is held to a higher standard. That the government will follow through with the needed studies to insure this Bypass is built in an</p>	<p>5.As documented in the 2002 Approved EA, no species at risk listed by the Committee on the Status of Endangered Wildlife of Canada (COSEWIC) were identified within the Technically Preferred Route.</p> <p>The Ministry recognizes that the sensitivity of species and/or their habitat is continually assessed and updated overtime. As part of the preparatory work prior to the Preliminary Design study, an update of sixteen (16) species at risk (SAR) are being considered as part of the Preliminary Design study. The Terrestrial Ecosystems Existing Conditions Report can be viewed on the Project Website (https://www.bradfordbypass.ca/overview/).</p> <p>Where SAR are identified through field investigations to be present or considered to occur within the limits of work based on the presence of suitable habitat, they will be assessed as part of the study. This is continually re-evaluated and updated should the status or listing of a species change. Commitments related to species at risk from the 2002 Approved EA will be carried forward and factored into impact assessment and compliance with the current environmental legislation and requirements for the individual species and their regulated habitat for the project. The Ministry will continue to consult with the MECP for provincially regulated species at risk, Fisheries and Oceans Canada (DFO) for federally listed fish species, and Environment Canada for federally listed terrestrial species. Requirements under the Migratory Bird Convention Act (MBCA) are applied to SAR and non-SAR bird species that may be potentially impacted by the project. Under the provincial <i>Endangered Species Act</i> (ESA), an information gathering form (IGF), will be prepared and filed with MECP for species protected under the ESA. The ministry will continue to work with MECP to obtain permits under the <i>Ontario Endangered Species Act</i>, which may include mitigation and / or monitoring conditions, and consultation requirements, where necessary. A request for review (RFR) will be filed with DFO in accordance with the process for regulatory compliance under the Fisheries Act, which also covers species protected under the Species at Risk Act (SARA).</p> <p>6.Municipality response – [REDACTED] addressing this one Per February 18, 2022 email:</p>

						<p>Environmentally sensitive way, taking into account everyone's concerns.</p> <p>Again thank you for your concerns about this Bypass and keep informed from the Provincial website and follow all the opportunities to join the public meetings to voice your concerns. As it is right now I do support the building of this Bypass and I will continue to keep myself up to date as possible.</p> <p>Thank you for your concerns. Enjoy your day and stay safe.</p> <p>[REDACTED]</p>	<p>7. Under the 2002 Approved EA and as a requirement under the Greenbelt Plan (2017), an Agricultural Impact Assessment (AIA) is being undertaken in consultation with the Ontario Ministry of Agriculture, Food and Rural Affairs (OMAFRA), and with reference to their Draft Agricultural Impact Assessment (AIA) Guidance Document (March 2018). As part of the completion of the agricultural assessment, the AIA will be shared with OMAFRA to review and provide feedback. An updated review of official land use policies and master planning by local municipalities as they relate to the Bradford Bypass project is also being completed. The traffic study as outlined in other responses will assess the future conditions for traffic as they relate to the project. These studies do not specifically look at traffic and transportation by a subset of users, beyond what may be presented in municipal or regional transportation master planning studies. As part of the work being completed by the Ministry, consultation and feedback by individual property owners for access to/from properties is factored into the design, which includes farm properties. Accessibility and vehicle usage by farming operations is received by local farmers and community representatives. This included feedback from agricultural representatives during the Environment, Community and Agriculture committee meeting (December 8, 2021), which continues to be considered through refinement of the Preliminary Design and assessment of impacts to agricultural lands within the study area.</p> <p>8. Municipality response – [REDACTED] BWG addressing this one Per February 18, 2022 email.</p> <p>9. As a result of the public health measures linked to COVID-19 that restricted large in-person gatherings, the Project Team held consultation events (e.g., meetings with technical stakeholders, PIC # 1) virtually by leveraging various platforms (i.e., Microsoft Teams/Skype/the Project Website). Virtual consultation events have proven to be as engaging and effective as in-person consultation events. These events often include extended opportunities to view materials online, comment periods to provide feedback to the Project Team and opportunities to request one-on-one meetings with the Project Team. They provide flexibility for those wishing to attend who may have conflicts or restrictions that limit their ability to attend an event in person (e.g., childcare needs,</p>

CT401	█	To: Project Team From: █	Email: █	Second ECA committee meeting	Wednesday, March 2, 2022	Good afternoon, Thank you for this information. Do you know when the second meeting will take place? I want to ensure that there is proper input from our Chamber. Warm Regards, █	Hello █ Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. The first Environment, Community, and Agriculture (ECA) Committee meeting was hosted on December 8, 2021. The second ECA meeting is scheduled to take place in Fall 2022. Leading up to the second meeting, we will connect with attendees to identify a "save the date". We have added you to the Project Contact List as a primary contact for King Chamber of Commerce and you will be invited to the next ECA meeting by email. As you are on the Project Contact List you will also be notified through email of future milestone events including filing of the Environmental Conditions Report (ECR), Public Information Centre (PIC) #2, filing of the Environmental Impact Assessment Report (EIAR) and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website, and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email. We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available. If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. Sincerely, █ called █ on March 15, 2022. █ is concerned about access and need. <ul style="list-style-type: none"> Constraints include dog on the property and an invisible fence wire underground that they don't want impacted.
CT402	█	To: Project Team From: █	Phone: 705-770-1291	PTE	Monday, March 14, 2022	Oh hi there I received a letter today at our home in Bradford regarding the Bradford Bypass and I just had a few questions about the permission to enter requirements. My name is █ If you could call me back at █ Thank you.

		From: [REDACTED]				Please find attached-note we do not consent to the physical fieldwork. Also you sent another envelope but we don't know who those people are. Would you like us to dispose of it or do you want to pay for return postage?	<p>Thank you for providing a signed copy of your Permission to Enter (PTE) form. We have made note that you only consent to non-intrusive fieldwork, which consists of field staff documenting observations, taking photos, and mapping Environmental Conditions.</p> <p>You can dispose of the additional package you received.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p> <p>Sincerely,</p> <p>Hello [REDACTED]</p>
CT407	[REDACTED]	To: Project Team From: [REDACTED]	Email: [REDACTED]	Mortgage transaction for [REDACTED]	Monday, March 21, 2022	<p>Good Afternoon,</p> <p>We are the lawyers for a Lender in connection with a proposed mortgage transaction which is being secured against lands municipally known as [REDACTED]. Our search of title to the property has revealed that title to the property is subject to an Order-In-Council registered as instrument number [REDACTED] to designate a portion of the proposed highway as controlled -access highway referred to as the "Bradford bypass". I have attached a copy of the registered document for your ease of reference. You will note that from the Plan attached to the Order we are unable to determine where the subject lands are and how they are affected by the Order. The whole of the subject PIN is included in the Land Title Schedule attached to the registered Order.</p> <p>Can you please clarify what portion of the subject lands is subject to the proposed bypass? How does the Order affect the subject lands? Is there a highway planned? Do you have any information relating to the subject property and the planned highway? Can you please confirm whether any proposed highway may affect the subject lands?</p> <p>We are looking for clarification on how the registered Order in Council may affect the subject lands and accordingly your assistance with this matter would be greatly appreciated. If this email should be redirected to someone else who may be</p>	<p>Thank you for reaching out to the project team for the Bradford Bypass Preliminary Design study. We have reviewed your request for information and provide the following information in response to your questions.</p> <ol style="list-style-type: none"> How does the Order affect the subject lands? (re: Order in Council by Minister of Transportation - [REDACTED] included with the original request for reference) <ol style="list-style-type: none"> The Order-In-Council registered as instrument number [REDACTED] will require any development applications proposed for the subject lands to be reviewed by the MTO. Is there a highway planned? (re: current status of the project) <ol style="list-style-type: none"> The Highway 400 – Highway 404 Link (Bradford Bypass) is currently in the Preliminary Design phase of the project which was initiated in 2020 and is being completed in accordance with Ontario Regulation 697/21. Preliminary Design is expected to be completed in early 2023. Detail Design and Construction Phases will follow. The Early Works for the project, which includes a grade separated structure on County Road 4 in Bradford West Gwillimbury, has been advanced and construction of those elements are anticipated to start in 2022. The subject

CT409	[REDACTED]	To: Project Team From: [REDACTED]	Email: [REDACTED]	Support of BBP	Monday, March 21, 2022	I live in the area and think this Bypass is a GREAT idea. [REDACTED]	Hello [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. The Project Team acknowledges and appreciates your support for the Bradford Bypass. As you are already on the mailing list, you will continue to be notified through email of the future PIC #2 and updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email. We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available. If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. Sincerely,
CT410	[REDACTED]	To: Project Team From: [REDACTED]	Email: [REDACTED]	Change of contact	Monday, March 21, 2022	Thank you. I have already redirected this Notice, but all future ones from you or your clients, can go to: [REDACTED] This ensures they are addressed by the right subject matter experts at IO. [REDACTED]	Hello [REDACTED] We have added [REDACTED] to the project mailing list and will send all notices to this email moving forward. If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. Sincerely,
CT411	[REDACTED]	To: Project Team	Email: [REDACTED]	Remove from contact list	Monday, March 21, 2022	Can you please remove [REDACTED] from your mailing list. She no longer works for us.	Hello [REDACTED] We have removed [REDACTED] from our mailing list.

CT306 Cont.		To: Project Team From: [REDACTED]	Email: [REDACTED]	Environmental impact	Monday, March 21, 2022	<p>Hi,</p> <p>I've sent in my input several time but I do not know if it was at all taken into consideration? Documents on the website are difficult for a non consultant to understand. My comments / recommendations should be on record but in general some of the big points were:</p> <ol style="list-style-type: none"> 1. There appears to be only one subdivision that run the edge of a portion of the bypass of County Road 4, north of 8th Line. The homes at this section will also be contending with the new cloverleaf and increase N-S traffic on Yonge. Will there be any vegetarian screening, green wall, etc. in addition to industry standards in this regard to buffer the subdivision along the length of bypass and the section from 8th / county road 4, and the cloverleaf? 2. Are there any noise/pollution mitigation being proposed beyond industry standards? 3. Is there any information the province has on the impact on real estate values on properties or subdivisions that straddles provincial highways? 4. Will there be wildlife corridors? 5. Will there be any progressive technology/techniques used on this highway which will improve / lessen the impact of living next to a highway? <p>Could someone please respond to these questions specifically to help me plainly understand?</p> <p>Thank you for your help.</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>Thank you for taking the time to speak with the Project Team on May 18, 2022. It was a pleasure to learn more about what is important to you, understand your history of involvement since the 2002 Approved Environmental Assessment (EA) study, and provide some initial information to you. We trust that this communication, in addition to the conversation will provide helpful information.</p> <p>We acknowledge that your question is in relation to the residential developments west of County Road 4 in the Town of Bradford West Gwillimbury, and in particular, your home on the cul-de-sac of Meadowview Drive. The Bradford Bypass will be located to the north of the cul-de-sac and extend westerly along behind the properties on the north side of Chelsea Crescent and Wyman Crescent. A preliminary landscape plan will be prepared based on the refined Preliminary Design of the Technically Preferred Route, which will further be refined during the Detail Design. The landscape plan will consider plantings within the project limits, including snowdrift mitigation, ecological site restoration and aesthetics associated with the freeway.</p> <p>A Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's <i>Environmental Guide for Noise</i>. MTO will investigate noise mitigation measures, including consideration for existing and future noise barrier walls, where the proposed improvements to the Project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. For noise mitigation to be warranted as part of the design, it must meet MTO's technical, economic, and administrative feasibility criteria as defined in MTO's Noise Guide.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>As discussed during the conversation, MTO does not have information on the impact of the Bradford Bypass on real estate values for properties within close proximity of the highway. Property values within a community vary based on a variety of interrelated factors beyond those of this project (i.e., future land uses and developments, market demand, etc.). As such, MTO is focused on property impacts for those properties directly impacted by the project.</p> <p>As part of the project-specific assessment of environmental impacts, the Project Team will identify and consider wildlife corridor and linkage needs within the Study Area. This information will be factored into design requirements for bridges and culverts along the corridor, associated landscape designs, as well as exclusion measures (i.e., fencing) to promote safety for vehicles and wildlife within the highway right-of-way. Wildlife passages will be developed and refined through detail design in consultation with regulatory agencies.</p> <p>In addition to current guides and best management practices, MTO considers innovative opportunities to address noise mitigation through engineering of various types, enhancements of engineering materials, construction technologies/enhancements, and pavement structures, which will be investigated for consideration in the appropriate design phase.</p> <p>Further to your conversation with the Project Team, you would like to remain informed regarding design changes and considerations for the design and construction of the interchange and freeway at County Road 4, with a focus on understanding the design and mitigations for noise, and landscape aesthetics adjacent to your location. It is also understood that you would like opportunities to see the design as it is refined, developed and implemented through the next phases of the project will be possible through Public Information Centres (PICs), public meetings, project websites and study documentation made available for public review.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of future milestone events for the Project where you can review</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>project information, seek clarification, and provide feedback on items of importance to you and your community. The next opportunity to learn more about project will be the Environmental Conditions Report, which will be made available for public consultation in accordance with Ontario Regulation 697/21.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. Thank you for your on-going interest in the project.</p> <p>Hello [REDACTED]</p>
CT414	[REDACTED]	To: Project Team From: [REDACTED]	Email: [REDACTED]	Noise concerns	Monday, March 21, 2022	<p>Good evening,</p> <p>Thank you for the consistent updates. I was reviewing one of the reports with anticipated noise levels. I did not see any estimates for the eastern most region, specifically for the residences near [REDACTED]</p> <p>Can you please point me in the right direction to find this information?</p> <p>Thanks in advance, [REDACTED]</p>	<p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The noise report currently available on the Project Website is specific to the County Road 4 Early Works Report and focuses on potential impacts associated with the County Road 4 Early Works in the Town of Bradford West Gwillimbury. The area of Leslie Street and Holborn Road is outside the Study Area captured in that report.</p> <p>A Noise Impact Assessment will be undertaken for the refined Preliminary Design of the Preferred Route for the overall Bradford Bypass in accordance with MTO's <i>Environmental Guide for Noise</i> (2022) and the requirement for a Noise Report under Ontario Regulation 697/21 Section 24. MTO will investigate noise mitigation measures, including consideration for existing and future noise barrier walls, where the proposed improvements are expected to increase ambient noise levels beyond acceptable levels outlined in MTO's Noise Guide (2022).</p> <p>The results of this study will be presented during the next Public Information Centre (PIC) #2 and documented in the Environmental Impact Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21.</p>

						<p>3. Provide the boreholes and water elevations where the bypass crosses the Marsh.</p> <p>4. Provide a mock-up of what is planned.</p> <p>From the air photo it is easy to locate 7 unfiltered storm water drains out letting from the urban part of Bradford into the West Holland River. The most northerly of these is right beside the proposed route of the Bypass.</p> <p>As you are aware, the concentration of phosphorus is increasing in the Holland Rivers. You have indicated that you intend to install storm water ponds. Please show the storm water ponds on the drawings for the Bypass along with filter ponds for the existing Bradford Drains.</p> <p>Yours very truly,</p> <p></p> <p>Sent from my iPad</p>	<p>identify, and evaluate potential impacts of the Project and recommend mitigation measures to reduce these impacts. The studies will follow current standards and guidelines including, but not limited to: the MTO Environmental Reference for Highway Design, Highway Drainage Design Standards, Drainage Management Manual and the Ministry of Environment, Conservation, and Parks (MECP) Stormwater Management Planning and Design Manual. Lake Simcoe Region Conservation Authority (LSCRA), Nottawasaga Valley Conservation Authority (NVCA), MECP, and public health agencies will continue to be consulted throughout the study to align the proposed designs with currently policies and practices for the watersheds within the Study Area.</p> <p>A preliminary landscape design will be developed as part of the Preliminary Design, which will recommend plantings for stormwater management facilities and site restoration measures. This may include constructed wetland features to support the overall stormwater management for quantity and quality control for stormwater runoff from the Bradford Bypass.</p> <p>As part of the Preliminary Design, the Project Team is completing a snowdrift assessment of the preferred Preliminary Design. The study will identify areas and degree of snow drift potential. Based on the location and the extent of snow drifting within the corridor mitigation measures will be developed that reduce the extent and severity of snow drift along the highway. Based on the type of measures recommended, they will be incorporated into the highway and landscape designs where appropriate.</p> <p>Once the highway is operational, MTO will carry out winter maintenance using the appropriate equipment and materials to ensure roads and highways are safe in the winter. These measures depend on the weather, highway conditions, and traffic levels. We encourage you to review information on how MTO clears Ontario roads (https://www.ontario.ca/page/how-we-clear-ontarios-highways-winter).</p> <p>2. The drainage and hydrology engineering studies undertaken for the Project address potential impacts related to runoff and the change in the area's</p>

							<p>impervious cover from the Project. Groundwater and Soil Contamination studies will consider existing evidence of designated substances that may be encountered during construction and provide mitigation measures and strategies to manage these substances in accordance with provincial legislation as part of water taking permits through MECP and excess material management for soil management during construction.</p> <p>3. Borehole information for the project is factored in as part of the geotechnical investigations for the structural and pavement designs, and for sampling soils and groundwater information as part of the design. The study results, designs, and relevant mapping will be presented during the next Public Information Centre (PIC) #2 and documented in the Environmental Conditions Report (ECR) and Environmental Impact Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21.</p> <p>4. Existing drainage features, including natural watercourses, and municipal and agricultural drainage systems are considered and integrated as part of the drainage and stormwater system for the Bradford Bypass. Municipal drains, which are designed in accordance with the <i>Drainage Act</i>, will be designed in consultation with municipalities. The design and relevant mapping will be presented during PIC #2.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of future milestone events including filing of the ECR, PIC #2, filing of the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website, and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p>

CT426		To: Project Team From: [REDACTED] [REDACTED]	Email: [REDACTED]	Construction company hired	Tuesday, March 29, 2022	Ggood morning I am just wondering which companies will be building this highway. Construction companies is it dufferin...acon? Look forward to hearing back [REDACTED] Get Outlook for Android	Hello [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. The Ontario Ministry of Transportation (MTO) has retained AECOM Canada Ltd. (AECOM) to undertake the Preliminary Design and project-specific assessment of environmental impacts for the proposed Bradford Bypass. The Preliminary Design for the overall Bradford Bypass project is anticipated to be completed in early 2023. Detail Design and Construction will follow, and the contractor will be selected during these stages of delivery of the Bradford Bypass. .. MTO is advancing the Early Works, as set out in the regulation, which is focused on a grade separated bridge crossing for the future Bradford Bypass at County Road 4 (Yonge Street). The County Road 4 Final Early Works Report is now available on the Project website, and the Early Works Statement of Completion was issued on March 21, 2022. It is anticipated that Early Works construction will start in 2022. The Early Works has been awarded to Brennan Paving & Construction Ltd as the successful bidder for the design and construction of the new bridge that will allow County Road 4 between 8 th Line and 9 th Line to cross over the future Bradford Bypass. The project will also include widening County Road 4 from two to four lanes. Further information is

							<p>We have added [REDACTED] as the main points of contact, and specified the preferred method of contact is by telephone.</p> <p>We would like to update our project contact list. Please confirm that this email address can be added to the contact information we have on file as a means of providing project information to the Bradford Baptist Church. If preferred, we can continue to send communications by mail instead of email.</p> <p>If you have any questions or concerns, please feel free to reach out to the Project Team at your earliest convenience.</p> <p>Sincerely,</p>
CT435 Cont.		<p>To: Project Team</p> <p>From: [REDACTED] on behalf of the [REDACTED]</p>	Email: [REDACTED]	PTE	Tuesday, April 5, 2022	<p>Hello, thank you for confirming. Also this email is our main email.</p> <p>Thanks,</p> <p>[REDACTED]</p>	No further action required.
CT436		<p>To: Project Team</p> <p>From: [REDACTED]</p>	Email: [REDACTED]	Support for the BBP Environmental concerns	Tuesday, April 5, 2022	<p>Hello project team,</p> <p>I first want to say thank you for moving a much needed project, the Bradford Bypass, further along. I feel it can't come soon enough, and the province will reap the benefits once it has been completed. As one of the many beneficiaries, the Town of Bradford will be transformed overnight to a more liveable city, with a downtown that can actually be enjoyed, attract new families and investment, rather than the traffic clogged nightmare it is now. The region will operate more efficiently without all the congestion, and vehicles will spend much less time idling at lights (a known source of pollution), with stop and go traffic. The Bradford Bypass will also "bridge" the divide between east and west in the area, literally and figuratively. Due to the current difficulties in traveling between the east and west sides of the Newmarket/Aurora area, there is a lot less</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. The Project Team acknowledges and appreciates your expressed support for the Project.</p> <p>Environmental and design studies are currently being undertaken to identify and evaluate potential impacts of the Project and recommended mitigation measures to reduce these impacts in an environmentally responsible manner. A list of studies being undertaken can be found on the Project Website at https://www.bradfordbypass.ca/overview/.</p> <p>The results of these studies, including the preferred design alternative, will be presented during Public Information Centre (PIC) #2, and documented in the Environmental Impact Assessment Report (EIAR).</p>

						<p>connectivity than there should and could be, both economic and social.</p> <p>Having said that, I do hope that the project can be built in an environmentally responsible way, and once completed, could include features such as an HOV/Green Vehicle lane. A suggestion for compensation for any lost wetlands/natural areas, would be to acquire some nearby land and naturalize it to a wetland state, such as adding to the lands of Scanlon Creek Conservation area (just across Line 9 from the proposed route).</p> <p>Thanks,</p> 	<p>Where impacts are anticipated, MTO will investigate the development and implementation of compensation measures in accordance with environmental permits and approvals, including overall benefit plans as required by provincial and federal agencies. MTO continues to consider additional design features that will enhance the environmental approach to design and construction and improve Ontario's transportation system in a way that enables people and businesses to thrive, now and for future generations.</p> <p>We have added you the Project Contact List and you will be notified through email of future milestone events including publication of the Environmental Conditions Report, PIC #2, the EIA and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC (PIC #2) will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Amail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the Project as it becomes available.</p> <p>If you have any additional questions, please reach out to the Project Team at your earliest convenience.</p> <p>Sincerely,</p>
CT437		<p>To: Project Team</p> <p>From: </p>	Email: 	Property impacts	Wednesday, April 6, 2022	<p>Hi </p> <p>Can you let me know the design status for the overpass at PDD? We own the land south of the highway (PDD ROW and the lands to the east of PDD).</p> <p>Let me know if a call is easiest.</p> <p>—</p> 	<p>Hello </p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Bradford Bypass is expected to accommodate the future extension of Professor Day Drive crossing to the north, but is not anticipated to directly impact  property at  at this time. Please refer to the Draft Preliminary Design map below to see the location of  relative to the Bradford</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>For clarification purposes: The Sarjeant Company is the owner of these lands. We are looking for clarification on the following questions.</p> <p>Can you tell us what the probability of an exchange being created there?</p> <p>Can you tell us the amount of land would require to be Expropriated?</p> <p>Can you tell us the configuration of the lands for Expropriation.</p> <p>Change in access to Side road 10 if expropriated?</p> <p>How are you valuing the land being expropriated?</p> <p>Considerations and Compensation for relocating of Plant and Equipment on site?</p> <p>Thanks for your assistance in this matter.</p> <p></p> <p>Property in question: </p>	<p>assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The project is currently in the Preliminary Design phase, which involves refinement to the Technically Preferred Route at select locations, including Sideroad 10. The design from the 2002 Approved Environmental Assessment (EA) represents the base case for this location, and was presented as part of Public Information Centre (PIC) #1. This information can be viewed on the project website (https://www.bradfordbypass.ca/2021/04/02/1-project-overview/).</p> <p>The Preliminary Design is considering an additional interchange at Sideroad 10, and the interchange configuration alternatives were presented on the project website for a public review period in April, 2022 (https://www.bradfordbypass.ca/wp-content/uploads/2022/04/2022-21-04_MTG-PublicConsultationInterchanges.pdf).</p> <p>The property at 311 Sideroad 10, does fall within the Technically Preferred Route of the Bradford Bypass and will be directly impacted by the interchange alternatives in consideration at Sideroad 10. MTO will work directly with individual property owners regarding direct impacts to their property as a result of the proposed Project once the impacts have been confirmed.</p> <p>The results of the Preliminary Design evaluations, including the preferred design alternative for this interchange location, will be presented during PIC #2 and documented in the Environmental Impact Assessment Report (EIAR), which will be filed for a public review period.</p> <p>As your contact information is already on the Project Contact List, you will be notified through email of future milestone events including publication of the Environmental Conditions Report (ECR), PIC #2, the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post</p>

CT421 Cont.	████	To: Project Team From: ██████████	Email: ██████████	Clarification to notice	Thursday, April 14, 2022	<p>Good afternoon,</p> <p>We have received that e-mail below.</p> <p>We are wondering if that e-mail was intended for the Department of Fisheries and Oceans Canada. If so, is this information in response of the consultation package that we sent yesterday?</p> <p>Thanks, ██████</p>	<p>Hello ████████</p> <p>Thank you for reaching out to the Project Team. We apologize if this email notification created confusion and thank you for following up to seek clarification. My team followed our procedure to add contacts from the Project Team email to our contact list. As such, you were included in the recent mailout to receive consultation event information regarding the preliminary design alternatives for the interchanges being considered as part of the project. We do have primary contacts for DFO and recognize that you may not need to receive these notifications and will remove your information from the contact list going forward.</p> <p>We are completing the review of the consultation package provided and anticipate having that back to you before the May 2nd deadline.</p> <p>If you have any further questions, please contact me at your earliest convenience.</p> <p>Cheers, ██████</p>
CT445	████	To: Project Team From: ██████████	Email: ██████████	Environmental impacts Opposition to BBP	Thursday, April 14, 2022	<p>██████</p> <p>Please consider the facts relayed in a few pages of an article in The Pointer, published October 16, 2021. The complete article can be found here https://thepointer.com/article/2021-10-16/a-bird-that-can-t-speak-back-the-ford-government-s-mass-killing-of-the-double-crested-cormorant-reveals-its-true-stripes </p> <p>The preservation of the natural world is imperative for the survival of the human race.</p> <p>Perhaps encourage ride sharing? 😊 rather than yet another paved massacre of nature.</p> <p>Thank you.</p> <p>In peace,</p>	<p>Hello ████████</p> <p>Thank you for your comments on the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>Thank you for sharing the article outlining concerns over management and preservation of our natural ecosystems. MTO recognizes the importance of farmland and the Greenbelt's agricultural system for economic wellbeing, human health, and the quality of life of Ontarians. As part of the Preliminary Design, and in line with MTO's approach to sustainable decision making, MTO considers the previous environmental commitments made during the 2002 Route Planning and Environmental Assessment Study as set out in the regulation. To update the study and environmental considerations, the MTO is undertaking 15 environmental studies to update and document existing</p>

							<p>Assessment Report (EIAR), to be prepared in accordance with Ontario Regulation 697/21. Both documents will be available for a public review period.</p> <p>Even with all currently planned transportation and transit investments, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). It is important to note that the Bradford Bypass is only one element of many transportation options being developed by MTO to keep people and goods moving through the region. The recently released <i>Connecting the GGH: a Transportation Plan for the Greater Golden Horseshoe</i> details the Province's historic investments in the transit system that are underway and are planned to support a more sustainable region. Significant population growth is anticipated in the coming decades with Simcoe County expected to grow to 416,000 residents over the next 10 years and with the Regional Municipality of York growing to 1.79 million by 2041. Building the proposed Bradford Bypass is necessary to relieve existing congestion on local east-west roads and to address the expected long-term travel demand in the area.</p> <p>As your contact information is already on the Project Contact List, you will be notified through email of future milestone events including filing of the ECR, PIC #2, filing of the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p> <p>Sincerely,</p>

CT386 Cont	█	To: Project Team From: █ █	Email: █	Environmental impacts at Bathurst Street	Thursday, April 14, 2022	<p>As I said before I am 100% in favor of the bypass, my only concern is the huge environmental impact of the Bathurst st interchange. There is literally no where to go once you would exit onto Bathurst. to the north two rivers and a couple farms , to the east swamp, to the west a couple of farms and the south is already serviced by green lane and Queensville side rd. interchanges</p> <p>thankyou.</p>	<p>Hello █</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. The Project Team acknowledges your support for the Project and your concerns over the Bathurst Street interchange.</p> <p>The Bathurst Street interchange was recommended in the 2002 Approved Environmental Assessment (EA) and is being evaluated with other design refinements for the project during the Preliminary Design study to support the future travel demands within the Study Area. Interchange configuration refinements at the major road crossings within the Study Area are being evaluated through this study based on five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment.</p> <p>MTO is also undertaking 15 environmental studies to update and document existing conditions, identify, and evaluate potential impacts of the Project, including impacts from the Bathurst Street interchange, and recommended mitigation measures to reduce these impacts to meet current environmental legislative requirements.</p> <p>It is noted that municipalities within the Study Area of the Bradford Bypass have generated Official and Transportation Master Plans based on the proposed interchanges as per the 2002 approved EA to address traffic demand as a result of population and employment growth projections. As a result, the Project Team will continue to engage municipalities and will support future municipal interchange initiatives as well as engage with other key stakeholders, including the agricultural community.</p> <p>As your contact information is already on the Project Contact List, you will be notified through email of future milestone events including filing of the Existing Conditions Report (ECR), Public Information Centre (PIC) #2, filing of the Environmental Impact Assessment</p>

						<p>Will the government pay to move the house if you go this route?</p> <p>██████████</p> <p>mail: ██████████</p>	<p>Cultural Heritage Resource Assessment Report (CHRAR) originally completed in 2020 , which identified Built Heritage Resources and Cultural Heritage Landscapes within 500 m of the 2002 approved right-of-way for the Bradford Bypass. The next phase of the cultural heritage study is to undertake cultural heritage evaluation and heritage impact assessment where required.</p> <p>The heritage status of your property has been identified as "Designated Part IV" (Municipal Heritage Recognition). This designation and heritage significance is confirmed through our discussions with you on May 13th, during which you provided extensive history on the property and surrounding lands.</p> <p>In the 2020 CHRAR, a Cultural Heritage Evaluation Report (CHER) was recommended for this property based on the early Preliminary Design for the project at the time. Following the 2022 update to the CHRAR and evaluation of the Preliminary Design alternatives at Leslie Street, a CHER may no longer be warranted if the proposed design avoids potential impacts to the property and that indirect impacts from construction and operation (i.e., vibration) may be avoided where work is greater than 50 m from the home. Prior to undertaking the cultural heritage evaluation, the project heritage specialist(s) will contact you regarding permission to enter and discuss opportunities to review the extensive documentation you have for this home and property so that it can be included in the evaluation report. Regardless of the recommendation for a CHER, the property will continue to be identified as a cultural heritage resource and noted as a potential risk for vibration impacts. This information and the need for future consultation will be factored into design and construction considerations as the project progresses.</p> <p>As the Ministry advances the Preliminary Design and selects the preferred interchange and alignment design, the Project Team will provide opportunities through an individual meeting with you to discuss your property - specific concerns and questions.</p> <p>As a property owner and a key contact on the Project Contact List, you will be notified through email of future</p>

						<p>Have you read reports regarding urban sprawl and the carbon emissions from an explosion of traffic from this urban sprawl?</p> <p>Have you seen the latest reports about droughts and food shortages?</p> <p>The assessments seem to have been done over 20 years ago. There have been many new ways to assess air quality, possible water contamination, urban sprawl, agriculture, etc.</p> <p>Reports from scientists studying this project reject former assessments and warn us that millions of tons of carbon will be released by this project.</p> <p>Traffic assessors have said the link will save only a few moments of time travel.</p> <p>I do not see which Indigenous communities have been consulted about the environmental repercussions of this project. I believe the Truth and Reconciliation process requires this, not to mention their wisdom regarding our environment is deeper and truer than ours.</p> <p>Why can't this mega - money project be discontinued and use the money for all people of Ontario. We need wind turbines and solar panels to bring down electricity costs. Europe, and in particular, Germany has made great</p>	<p>current environmental legislative requirements. This includes, but is not limited to, an Agricultural Impact Assessment and an Air Quality Impact Assessment.</p> <p>To view the full list of studies being conducted, please visit the Project website (https://www.bradfordbypass.ca/overview/).</p> <p>The results of these studies will be presented during the Public Information Centre (PIC #2) and documented in a Environmental Conditions Report (ECR) and Environmental Impact Assessment Report (EIAR), which will be filed for a public review period.</p> <p>The proposed Bradford Bypass is anticipated to have more than 60 per cent savings in travel time when using the new freeway compared to existing routes along local roads. For Holland Marsh farmers and other motorists, this new transportation corridor will relieve congestion on existing east-west local roads between Highway 400 and Highway 404 and will allow goods to move to and from the communities of Bradford West Gwillimbury, East Gwillimbury and King Township and the broader communities serviced by the provincial highway network.</p> <p>The Project Team is consulting and engaging with Indigenous communities whose Aboriginal and treaty rights may be adversely impacted by the project.</p> <p>We have added you the Project Contact List and you will be notified through email of future milestone events including filing of the ECR, PIC #2, filing of the EIAR and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p>

							<p>██████████ stated that the Project is currently in the Preliminary Design phase, which is expected to be completed in Early 2023. Detail Design and construction will follow, but ██████████ can not comment on the timeline</p> <p>*██████████ stated she's interested in buying a small motorboat, and wants to know if they'll be able to use the Holland River for recreational uses.</p> <p>*██████████ stated that the design and future construction of the bridges will take into consideration navigability and maintaining proper access to the Holland River and Holland River East Branch. ██████████ requested ██████████ provide the height of the motorboat when she knows the size, because that information will be factored into the design considerations in order to meet the requirements under the <i>Canadian Navigable Water Act</i> and consultation with Transport Canada.</p> <p>*██████████ thanked ██████████ for the information, and asked if she could continue to contact the project team through the 1-800 number posted on the website.</p> <p>*██████████ stated she can continue to call the 1-800 number or send a message to the Project email, whatever she is most comfortable with.</p> <p>██████████ closed comment.</p>
CT453	██████	To: Project Team From: ████████	Email: ██████████	Support for BBP Wildlife concerns	Friday, April 22, 2022	<p>Hello,</p> <p>I am a resident of ██████████ and support the plans for the new highway. However, I am also an advocate for wildlife, and my question is whether there will be corridors (tunnels) under the roads in various places to allow wildlife safe passage. Considering the highway will pass through wetlands, we must ensure that turtles, frogs, and even large mammals such as deer, fox and coyotes are able to travel safely (and avoid potential accidents with vehicles which can be dangerous to drivers too).</p>	<p>Hello ████████</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. The Project Team acknowledges and appreciates your support for the Bradford Bypass.</p> <p>Environmental and design studies are currently being undertaken to identify and evaluate potential impacts of the Project and recommended mitigation measures to reduce these impacts. One of the studies involves a Terrestrial Ecosystem Existing Conditions and Impact Assessment, which will look at wildlife and wildlife habitat through the Study Area. As part of this study,</p>

						<p>Please respond! Thank you!</p> <p>██████████</p>	<p>The Project Team conducted preparatory work in 2020 for the Bradford Bypass which is available on the Project Website (https://www.bradfordbypass.ca/overview/):</p> <p>The reports included the following:</p> <ul style="list-style-type: none"> • Contamination Overview Study; • Cultural Heritage Resource Assessment Report; • Fish and Fish Habitat Existing Conditions Report; • Land Use Factors Existing Conditions Report; • Terrestrial Ecosystems Existing Conditions Report; and • Draft Archaeological Assessment Report. <p>The project-specific assessment of environmental impacts is being currently undertaken in accordance with Ontario Regulation 697/21. The study is a streamlined assessment process which will carry forward previous environmental commitments made during the 2002 Route Planning and Environmental Assessment Study. Under the regulation, MTO is committed to gathering current information about environmental conditions, predict and mitigate potential impacts to the extent practicable, consult with the public and stakeholders, consult with Indigenous communities, and document decision-making. Other provincial and federal legislative and permitting processes would still apply.</p> <p>As part of the current study, MTO is undertaking 15 environmental studies to update and document existing conditions, identify, and evaluate potential impacts of the Project and recommend mitigation measures to reduce these impacts to meet current environmental legislative requirements. To view the full list of studies being conducted, please visit the Project website (https://www.bradfordbypass.ca/overview/).</p> <p>The results of these studies will be presented during the next Public Information Centre (PIC#2) and documented in a draft Environmental Conditions Report (ECR) and draft Environmental Impact Assessment Report (EIAR), which will be filed for a public review period.</p> <p>We have added you to the Project Contact List and you will be notified through email of future milestone events</p>

CT-PIS-01		To: Project Team From:	Email: 	Mark-ups	Wednesday, April 20, 2022	*Forwarded Project Team notification email to Simcoe circulations and Rogers for mark-up requests. CC'd Project Team "Please find mark-up requests"	No response required.
CT-PIS-02		To: Project Team From:	Email: 	LSRCA Comments	Wednesday, April 20, 2022	<p>Good afternoon:</p> <p>Thank-you for consulting the on the Preliminary Design: Interchange Consideration as part of the Bradford Bypass EA.</p> <p>The general location for the proposed interchange at Sideroad 10, in between Line 8 and Line 9 in the Town of Bradford-West Gwillimbury includes the following natural hazards and environmental features:</p> <ul style="list-style-type: none"> Floodplain and erosion hazards associated with Frazer Creek watercourses, and unevaluated wetland. Woodland and Simcoe Greenland Ecologically Significant Groundwater Recharge areas identified under the Lake Simcoe Protection Plan (LSPP). <p>The general location for the proposed interchange at 2nd Concession, south of Holborn Rd in the Town of East-Gwillimbury includes the following natural hazards and environmental features:</p> <ul style="list-style-type: none"> Floodplain and erosion hazards associated with Holborn Drain watercourse and Ravenshoe/Boag Drain watercourse, and unevaluated wetland. The LSRCA does not have floodplain mapping or modelling for the Ravenshoe/Boag drain so MTO will need to complete a HEC-RAS analysis to delineate the floodplain and determine flood elevations. Holland River Marsh ANSI, located north of Holborn Rd and West of 2nd Concession. York Region Significant Woodland. 	<p>Hello</p> <p>Thank you for your comments on the Preliminary Design Interchange Considerations for the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, which is undertaken in accordance with Ontario Regulation 697/21, and for providing comments on behalf of LSRCA.</p> <p>The Preliminary Design for the Bradford Bypass project is still being undertaken and will complete several comprehensive studies related to the natural, socio-economic, cultural environment, and engineering design. These studies will update and document existing conditions, identify and evaluate potential impacts of the project and recommend mitigation measures to reduce these impacts to meet current environmental legislative requirements. For stormwater management controls, the project will follow the Ministry of the Environment, Conservation and Parks Stormwater Management guidelines, and will consider LSRCA's guidelines where appropriate.</p> <p>Thank you for providing the information on natural hazards, environmental features and mapping at the proposed interchanges, as well as the list of suggested avoidance and mitigation measures. We have circulated this information to the appropriate technical disciplines for consideration of project-specific environmental impacts. Additionally, the location of the natural hazards and environmental features identified at 10th Sideroad and 2nd Concession Road will also be documented and taken into consideration as part of these studies. Thank for further clarification on the HEC-RAS modelling information. This analysis is being carried out as discussed at the February 17, 2022 meeting with LSRCA.</p> <p>The results of these studies will be presented during the next Public Information Centre (PIC) #2 anticipated to be</p>

CT-PI5-04		<p>To: Project Team</p> <p>From: [REDACTED]</p>	Email: [REDACTED]	Interchange considerations	<p>Monday, April 25, 2022</p>	<p>i could not find a comment form specific to your request for input on the Bradford bypass interchange considerations. Hence this email.</p> <p>Working from east to west:</p> <p>There is no business case at present, nor cost benefit analysis I can see for the interchanges at Leslie, (too close to the 404 exchange), the 2nd concession (even future development will not make this viable; and less iffy , at the Bathurst street interchange (nothing north and limited access south). The exchange at the 10th has some merit, but given how close it is to the 400, seems a bit redundant. I am sure MTO is aware of all of this, but given the local politics is doing its due diligence. As a local taxpayer, I feel the extra costs and disruption are not justified. If compromise is required, then the 2nd would be fit.</p> <p>It would be useful if your requests or comments were structured in a format on line.</p>	<p>Hello [REDACTED]</p> <p>Thank you for your comments on the Preliminary Design Interchange Considerations for the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, which is undertaken in accordance with Ontario Regulation 697/21..</p> <p>Comments may be submitted to the Project Team through the Project email (projectteam@bradfordbypass.ca) at any time.</p> <p>The Bathurst Street and Leslie Street interchanges were identified in the 2002 Approved Environmental Assessment which was developed, evaluated, and selected through that evaluation process.</p> <p>MTO is developing and considering the feasibility of interchanges at 10th Sideroad and 2nd Concession Road as part of the Preliminary Design based on feedback received from municipal staff and councils in 2020. It was requested that interchanges be considered at these locations based on municipal and regional development and transportation planning within Simcoe County and York Region. For each interchange, configuration options are also being considered as shown in the materials for the Preliminary Design interchange considerations for 10th Sideroad and 2nd Concession Road on the Project Website (https://www.bradfordbypass.ca/wp-content/uploads/2022/04/2022-21-04_MTG-PublicConsultationInterchanges.pdf).</p> <p>The interchanges will be evaluated through a reasoned-argument method to consider the five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment. CT-PIS-06		To: Project Team From:	Email:	2 nd Concession Road Interchange	Tuesday, April 26, 2022	<p>As a homeowner living just off the of the proposed Bradford Bypass I am very interested in this process and would appreciate being included in all correspondence being made available to residents.</p> <p>I am having difficulty understanding the logic behind a proposed interchange at the 2nd Concession as it would only be about 3 km from the end of the Bypass at Hwy 404. I am not sure why anyone travelling on the Bypass would want to exit at the 2nd Concession because it is simply a rural residential road. Anyone from this area wanting to access the Bypass could just as easily do so from the 404 via either Green Lane or Queensville Road and another interchange to come at Doane Road. Further, as the 2nd Concession is a narrow 2 lane road both north and south of the proposed interchange I anticipate considerable investment would be required to upgrade the feeder roads. This would also likely require significant engineering to reduce the grade of the hill on 2nd Concession between Doane Road and Algonquin Forest Drive.</p>	<p>Hello</p> <p>Thank you for your comments on the Preliminary Design Interchange Considerations for the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, which is undertaken in accordance with Ontario Regulation 697/21.</p> <p>MTO is developing and considering the feasibility of interchanges at 10th Sideroad and 2nd Concession Road as part of the Preliminary Design based on feedback received from municipal staff and councils in .</p> <p>Through consultation with York Region and the local municipalities, it has been requested that MTO specifically consider including an interchange at 2nd Concession Road based on municipal and regional development and transportation planning. Since the 2002 Approved Environmental Assessment, the Region has continued to update their Transportation Master Plan and consider future planning improvements to 2nd Concession Road.</p>

CT-PIS-10		To: Project Team From: [REDACTED]	Email: [REDACTED]	[REDACTED]'s comments	Tuesday, May 3, 2022	<p>Good afternoon,</p> <p>Please find attached a letter with comments from [REDACTED] on the interchange considerations for the Bradford Bypass project.</p> <p>I also wanted to let you know that a few people within our ministry are finding that most Bradford Bypass correspondence ends up in our Junk email folder. I am not sure if you have received this feedback from others and if there is anything that can be done to fix this in the future.</p> <p>Thank you, [REDACTED]</p> <p>Comment Dear Mr. [REDACTED]</p> <p>Thank you for providing the [REDACTED] with the Notice of Consultation for Preliminary Design Interchange for the Bradford Bypass. MHSTCI's interest in this project relates to its mandate of conserving Ontario's cultural heritage, which includes: archaeological resources, built heritage resources, and cultural heritage landscapes.</p> <p>Under the Environmental Assessment (EA) process, the proponent is required to determine a project's potential impact on known and potential cultural heritage resources.</p> <p><u>The Standards and Guidelines for Conservation of Provincial Heritage Properties (S&Gs), prepared</u></p>	<p>Hello [REDACTED]</p> <p>Thank you for your comments on the Preliminary Design Interchange Considerations for the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, which is undertaken in accordance with Ontario Regulation 697/21.</p> <p>Thank you for informing us the correspondences from the project email are going to junk inboxes. The Project Team will investigate this issue to see if there are any changes we can make to avoid this from occurring in the future.</p> <p>The Project Team is updating the Stage 1 Archaeological Assessment report to address [REDACTED] comments. Through the Preliminary Design, MTO continues to complete Stage 2 Archaeological Assessments. The results of these assessments will include any archaeological findings for the interchanges at 10th Sideroad and 2nd Concession Road, and will be documented in Stage 2 Archaeological Assessment Report(s) for the project. Based on the findings of the Stage 2 investigations, MTO will advance Stage 3 and Stage 4, with involvement from Indigenous Nations. The archaeological assessment documentation will be provided to Indigenous Nations for review and consideration, then submitted to the [REDACTED] for review and acceptance.</p> <p>The Project Team has consulted with [REDACTED] regarding the Cultural Heritage Resource Assessment Report (CHRR) prepared in 2020. The 2020 CHRR for the</p>

						<p>pursuant to Section 25.2 of the Ontario Heritage Act (OHA), came into effect on July 1, 2010. All Ontario ministries and public bodies prescribed under Ontario Regulation 157/10 must comply with the S&Gs. They apply to property that is owned or controlled by the Crown in right of Ontario or by a prescribed public body</p> <p>██████████ is aware that this project is subject to O.Reg 697/21, which prescribes project-specific assessment of environmental impacts, including consultation requirements.</p> <p>Project Summary The Ministry of Transportation (MTO) has retained AECOM to undertake a Preliminary Design and project-specific assessment of environmental impacts in accordance with O.Reg 697/21. In response to municipal requests, the project team is now evaluating the feasibility of two additional interchanges at 10th Sideroad and 2nd Concession Road as part of the Preliminary Design.</p> <p>Comments These comments focus on the two interchanges and the slide deck that was posted on the project website on April 21, 2022. Technical studies were not provided on the project website.</p> <p>The slide deck says that cultural heritage is one of the criteria that will be used to evaluate the refinements and alternatives related to these interchanges.</p> <p>We note that the Stage 2 archaeological assessment (AA) (██████████) that is being prepared for this project has not been submitted to MHSTCI for review. Without this information MHSTCI is not able to comment on the two interchanges under consideration. The Stage 2 AA will identify which areas will require further archaeological assessment across the entire project location, which would be of assistance when comparing the impacts of different interchange configurations and locations. We strongly recommend that a finalized</p>	<p>Bradford Bypass is being revised to reflect comments and discussions with MHSTCI. The revised CHRAR will include a field review and update the requirements identified in the MTO Environmental Reference for Highway Design (2013), the Environmental Guide for Built Heritage and Cultural Heritage Landscapes (MTO, 2007) and MHSTCI comments received on February 11, 2022. The updated report covers the Preliminary Design, including the proposed interchanges at 10th Sideroad and 2nd Concession Road. Once complete, the revised CHRAR will be resubmitted to the MHSTCI.</p> <p>Both archaeology assessments, and cultural heritage evaluations are on-going for the project. The results of these studies will be documented in corresponding reports. For Archaeology, an updated Stage 1, and new Stage 2, 3 and 4 archaeology reports will be prepared, where required, and submitted to the MHSTCI. For Cultural Heritage, the CHRAR will be updated and resource specific Cultural Heritage Evaluation Reports and Heritage Impact Assessment Reports will be prepared, where required. Findings will be factored into the evaluation of the Preliminary Design alternatives and a summary of the studies will be presented in the fall of 2022 at the next Public Information Centre (PIC) #2, and documented in both the Environmental Conditions Report (ECR) and the Environmental Impact Assessment Report (EIAR), in accordance with Ontario Regulation 697/21.</p> <p>In recognition of the culturally significant features that are known, or may be discovered within the Study Area, MTO will continue to consult with MHSTCI throughout the Preliminary Design and as the project advances through detail design and construction. If you wish to meet with the Project Team to discuss specific archaeological or cultural heritage aspects of the project, we can look for opportunities to meet with you.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of future milestone events including publication of the ECR, PIC #2, the EIAR, and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via</p>

						<p>stage 2 AA is used to inform decisions about these interchanges.</p> <p>Similarly, MHSTCI recommends that a Cultural Heritage Resource Assessment Report (CHRAR) is used to inform decisions about the interchanges. Based on correspondence from the Bradford Bypass Project Team on March 17, 2022, it is our understanding that a CHRAR is being prepared. We recommend that this report is prepared in time to inform decisions about the interchanges.</p> <p>Thank you for consulting MHSTCI on this project and please continue to do so throughout the process. It may be beneficial for MTO and MHSTCI to meet to discuss reporting plans and expectations for both the Early Works and Bradford Bypass Project. Please do not hesitate to contact me to set up a meeting.</p> <p>Sincerely,</p> <p>██████████ ██</p>	<p>Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p> <p>We encourage you to visit the Project Website (https://www.bradfordbypass.ca/) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p> <p>Sincerely,</p> <p>The Bradford Bypass Project Team</p>
CT-PIS-11	██████████	<p>To: Project Team</p> <p>From: ██████████ ██████████</p>	Email: ██████████	Against the interchanges and BBP	Wednesday, May 4, 2022	<p>1) Does your organization wish to participate in the study and continue to receive notices of project activities or information as this study progresses? 						<p>--- Email ---</p> <p>[REDACTED]</p> <p>--- Phone Number ---</p> <p>[REDACTED]</p> <p>--- Mailing Address ---</p> <p>[REDACTED]</p> <p>--- 2) Please provide your feedback on the interchange alternatives that will be designed for 10th Sideroad and 2nd Concession Road. ---</p> <p>5 interchanges in addition to the ones at highway 400 and 404 seems excessive for a 15K long Rd. One at Yonge St and 2nd Conc would be sufficient even when population increases. I don't understand why one is being considered for Leslie St when it is so close to the 404. The least land intensive interchanges would be best but I don't like partial interchanges they are frustrating you are always wanting the part that does not exist. In the US they have much more minimalist interchanges when they are not highway to highway. Smaller versions of your diamond interchanges. I realize they wouldn't meet Ontario highway standards, but your standards are excessive in the extreme in the land they use. Of course my overall preference would be that the highway NOT be built.</p>	<p>In developing the interchange designs, MTO follows the Ontario highway design standards and guidelines; the Transportation Association of Canada's Geometric Design Guide for Canadian Roads; the corresponding MTO supplement for that document; and, other relevant supporting manuals, guidelines, documentation. These standards take into account a variety of criteria such as human factors, roadside safety, traffic operations, and collision analysis.</p> <p>The interchanges will be evaluated through a reasoned-argument method to consider the five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment. Your feedback, along with others received through consultation, will be incorporated into the evaluation as part of these factors. The interchange evaluation will also consider highway geometrics, traffic modelling, and structural and environmental factors.</p> <p>As you are already on the Project Contact List, you will continue to be notified through email of future milestone events including publication of the Environmental Conditions Report (ECR), Public Information Centre (PIC) #2, the Environmental Impact Assessment Report (EIAR), and other updates for this study. 							The Bradford Bypass Project Team
CT-PIS-15		To: Project Team From: [REDACTED]	Email: [REDACTED]	East Gwillimbury comments	Friday, May 6, 2022	<p>To whom it may concern,</p> <p>The Town acknowledges that all 3 Alternatives have an impact to adjacent properties and note that the block highlighted in red in the sketch below, is the future York Region Water Reclamation Centre site. The Town prefers the alternative that minimizes impact on adjacent properties and the developable and natural areas.</p>  <p>Further clarity on residual land use capability and location of appropriate driveway entrances, specifically for [REDACTED] Rd would be appreciated.</p> <p>Regards,</p>	<p>Hello [REDACTED]</p> <p>Thank you for your comments on the Preliminary Design Interchange Considerations for the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, which is undertaken in accordance with Ontario Regulation 697/21.</p> <p>Your feedback will be taken into consideration on the interchange design refinements and alternatives presented. Through previous consultation with East Gwillimbury and York Region, the Project Team is aware of the future studies for the Upper York Sewer Solution (UYSS) and appreciates further confirmation of the proposed water reclamation centre on 2nd Concession Road.</p> <p>Property access and modifications to existing entrances will continue to be reviewed as part of the evaluation of alternatives and future construction staging for the project. MTO will work with property owners to consider these potential impacts to access, and identify where accommodations and access impact mitigations can be implemented. The preferred alternative for the Bradford Bypass will be presented at Public Information Centre (PIC) #2 scheduled for the fall of 2022. Land use and acquisition (if required) will be determined based on MTO directives.</p> <p>We thank you for East Gwillimbury's continued participation in the study. As a primary contact, you will continue to be notified through email of future milestone events including publication of the Environmental Conditions Report (ECR), PIC #2, the Environmental Impact Assessment Report (EIAR), and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.</p>

							<p>We encourage you to contact the project team and visit the Project Website (https://www.bradfordbypass.ca/) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience.</p> <p>Sincerely,</p>
CT-PIS-16		<p>To: Project Team</p> <p>From: [REDACTED]</p>	Email: [REDACTED]	Comments on PIS event	<p>Saturday, May 7, 2022</p>	<p>Attention: Regional and Municipal Clerks. Please include this in the correspondence for the next council meeting dealing with any of the following topics. Transportation Master Plan, Official Plan or Bradford Bypass. Thank you.</p> <p>Good afternoon. Project Team:</p> <p>We respectfully submit our comments concerning the items for consultation posted on your project website for the two week period April 21, 2022 to May 5, 2022.</p> <ol style="list-style-type: none"> 1 We question why the Interchange Considerations were only available for consideration for such a short period. Would a 30 day review period have been that problematic for your team? 2 The public has little or no knowledge about the design and implementation of various interchange configurations. This is the only issue you were apparently consulting on. This type of consultation may permit you to "tick" a box on a consultation checklist but it otherwise serves little real purpose. 3 The real question you should be consulting on is: Should we add interchanges at 10th Sideroad and 2nd Concession? And if we do add interchanges there, are there other 	<p>Dear [REDACTED]</p> <p>Thank you for your comments on the Preliminary Design Interchange Considerations for the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, which is undertaken in accordance with Ontario Regulation 697/21. We have provided the following information in response to your detailed and thoughtful comments and feedback, which has been received on May 7, 2022 as part of the consultation event for the recent interchange considerations at 10th Sideroad and 2nd Concession Road. In recognition that some of questions are similar in nature to previous comments or questions, submitted to the Project Team, we hope that the information here provides additional clarity and addresses the specific feedback on the interchange consultation event.</p> <p>Consultation Process – Interchange Consultation Event The Preliminary Design Interchange Considerations Event materials were available for a two-week review period, in place of a one day in-person event. This was intended to allow people the flexibility to review the information at any time between April 21 and May 5, 2022. While this was the focused duration of the event to be considered as part of the evaluation, the materials remain on the project website and comments can be submitted at anytime during the study. Feedback received throughout the study is considered as part of the overall project and are factored into the environmental and engineering evaluation of the proposed design and configurations options. The interchange considerations will be presented in the Draft Environmental Conditions Report (ECR), with a</p>

						<p>interchanges, such as Leslie St, where a proposed interchange can or should be removed?</p> <p>Discussion</p> <p>We leave it to the consultants to address items 1 and 2 above. With respect to item 3, this is really a major policy question. Originally this freeway was proposed to address MTO's mandate to provide high speed roadways to serve long distant travel. MTO made it very clear in its December 1997 EA Study Report that it was MTO's policy to not mix local (including short distance inter-regional) traffic with long distance traffic. That policy was the reason for approving this highway. At that time, there was no direct highway connection between Highways 400 and 404 (or its planned extension to north of Newmarket as Highway 9 terminated at Davis Drive. The EA Study Report also made it abundantly clear that it did not address local travel requirements and that these were the responsibility of local governments.</p> <p>Today, as a consequence of the province's recent changes to the Greater Golden Horseshoe Growth Plan, the planned population in the area traversed by the Bradford Bypass will now be 4 times that which was originally anticipated in the 1997 EA Study Report. The new Municipal and Regional Official Plans, which are in the process of final approval, call for extensive expansion into what are known as white belt areas thus producing unsustainable levels of sprawl.</p> <p>Because these official plans do not focus on transportation centric "missing middle" development, the bulk of this new population will be automobile dependant. If the Bradford Bypass were not built, or it was located in a corridor south of Newmarket, there would be a compelling need for at least one, if not two new inter-region arterial roads. Our fact sheet, REASONS WHY WE NEED A TOTALLY NEW HOLISTIC STUDY NOT</p>	<p>preferred alternative presented at Public Information Centre (PIC) #2 and the evaluation presented in the Draft Environmental Impact Assessment Report (EIAR).</p> <p>The interchange design option information was presented in recognition of the request by local municipalities for interchanges at 10th Sideroad and 2nd Concession Road. Similar to other interchange alternatives on this project, design options with different footprints (size), and configuration of ramps (access) were developed and presented to solicit feedback from interested stakeholders and individuals.</p> <p>Public consultation is an on-going and adaptive part of the Preliminary Design and project specific assessment of environmental impacts. Future milestone consultation events where the public can learn more about the project and provide feedback include the filing of the draft ECR, PIC #2, and filing of the draft EIAR. The Project Team welcomes the extensive feedback that has been received thus far and continues to encourage all interested persons to submit their comments and feedback for consideration as part of the study.</p> <p>Interchange Design and Location Evaluations</p> <p>Thank you for this excellent question and personal insight into the evaluation process. This is consistent with the evaluation process that the Project Team is currently undertaking. As part of the Route Planning Study, interchanges were considered at each major road crossing. Based on information at the time, the number and location of interchanges was refined to advance those that were warranted based on information and need at the time (see Table 4-1 of the 2002 Approved Environmental Assessment).</p> <p>In consultation with local municipalities and regional government representatives during the current Preliminary Design study, it has been requested that MTO reconsider options to provide these two interchanges based on current transportation master planning and municipal planning efforts.</p> <p>MTO will evaluate the feasibility of interchanges at 10th Sideroad and 2nd Concession Road as part of the</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>RESTRICTED TO MTO'S MANDATE – addresses the need and justification for these types of roads in more detail. https://frogs.ca/wp-content/uploads/shared-files/Reasons-why-a-totally-new-holistic-study-which-is-not-restricted-to-MTO-is-needed-.pdf</p> <p>In light of this significant level of planned local / inter-regional travel demand, and in the absence of these proposed inter-regional arterial roads, the Bradford Bypass will be required to serve long distance high speed as well as local commuter-centered travel demands and local / interregional travel demands. We say this because, due to the major impact on Lake Simcoe caused by salt runoff and other contaminants, there will likely be no ability to expand any inter-regional roads across the Holland River from north of Queensville Sideroad to Lake Simcoe.</p> <p>Hence the addition of interchanges at both 10th Sideroad and 2nd Concession will be needed to handle all of this new planned travel demand. (Sprawl development is planned in both areas). The very fact that the highway will be built along this currently planned corridor will cause sprawl and thus increased travel demand. In the absence of these additional interchanges, the impact on existing roads adjacent to the Bypass will be overwhelming.</p> <p>The Bradford Bypass will have significant negative impacts to our natural environment while costing more per km than most highways due to the added costs of building this highway on structurally unsound substrate. At the end of the day, this highway will also not satisfy MTO's original planned objective of separating local from long distance travel. While our current politicians keep bragging about the travel time savings this highway will provide, this will not be the case during rush hours which is exactly the provinces proposed rationale for building this highway. Based on a study undertaken by Simcoe County, it is quite possible that, unless the Bradford Bypass</p>	<p>Preliminary Design. MTO will continue to engage with local municipalities and regional government representatives throughout the study .</p> <p>Preliminary Design Study and Process The purpose of the Bradford Bypass is to improve connectivity in the region by providing a northern freeway connection between Highway 400 and Highway 404, while also providing capacity to accommodate future demand in the region. This includes providing connections at local roads, where warranted, and accommodate long-distance traffic for those travelling along the provincial highway network. Evaluation for interchange connections between the highway and local roads takes into consideration updates to the Transportation Master Plans, Official Plans and traffic demand analysis for the region.</p> <p>MTO recognizes the need for consideration of current and future transportation and transit options to accommodate the expected growth in Simcoe County and Regional Municipality of York over the next 10 to 20 years. The Bradford Bypass has been proposed as one part of the response to this dramatic growth in population and travel demand in the area and to the forecasted increase in congestion on key east-west roadways linking Highway 400 to Highway 404. The Technically Preferred Route was selected based on highway network expansion, ease of construction, relationship to provincial and municipal land use planning (Official and Transportation Master Plans, <i>Places to Grow Act</i>), as well as having fewer negative impacts to residential and natural areas when compared to other route options considered, and represents one element of many transportation options being developed by MTO to keep people and goods moving through the region and to address the expected long-term travel demand in the area. The location for the Bradford Bypass Technically Preferred Route was also identified in A Place to Grow: Growth Plan for the greater Golden Horseshoe (2020).</p> <p>Through the study, traffic modelling is carried out to evaluate potential alternatives with respect to traffic demand and level of service. This information is</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>is expanded to 6 lanes, the travel times will be significantly worse than we have today.</p> <p>We also recommend you eliminate the currently planned interchange on Leslie St. This goes through a rather quaint community which is not expected to be converted into sprawl development. An interchange here will destroy the sense of community in this area drawing more traffic onto Leslie St. from Keswick. This traffic could just as easily travel south on Hwy 404.</p> <p>As we have repeatedly said in the past, we strongly believe this is the wrong solution in the wrong location. Due to the huge, automobile dependant population planned in the vicinity of the Bradford Bypass corridor it is our strong recommendation that the travel demands to be generated in this area be served by arterial roads connecting existing roads on either side of the Holland River. These would be located to connect Bradford's 8th Line with Queensville Sideroad via Hochreiter Rd. and Bathurst St. and immediately south of Cook's Bay connecting Ravenshoe Rd. to Hwy 89 via Line 13 and 20th Sideroad.</p> <p>A controlled access highway to link Highways 400 with 404 would be built south of Newmarket along one of the "Outer Ring Road" routes depicted on MTO's Exhibit E-5 to their 1997 EA Study Report.</p> <p>Respectfully submitted.</p> 	<p>considered along with the evaluation of design, environmental, social, and cultural criteria. Geotechnical investigations are part of the structural design of the bridges and highway design to understand the foundational requirements of the project. MTO has undertaken a value engineering study through an independent consultant to further examine alternatives that may increase the value of the project in consideration of the design criteria and environmental constraints.</p> <p>MTO is advancing the Preliminary Design and completing an assessment of project-specific environmental impacts in accordance with Ontario Regulation 697/21. The local municipalities and regional governments continue to review and update their transportation master plans to reflect local transportation needs and provide recommendations and planning for roadway improvements within their jurisdiction. Alternatives that involve municipal and regional transportation planning for non-provincial roadways are beyond the scope of considerations for this study.</p> <p>We thank you for your strong interest in the project and providing valuable feedback to the Project Team. We look forward to your continued participation in the study.</p> <p>Sincerely,</p> <p>The Project Team</p>
CT-PIS-17		To: Project Team	Email: 	10 th Sideroad interchange	Monday, May 16, 2022	Good Afternoon:	Hello

		From: [REDACTED] [REDACTED] [REDACTED]				<p>We apologize for not replying by May 5, 2022 as requested in the Notice.</p> <p>We have previously advised that Interphase Developments Inc. owns property on both sides of Sideroad 10 as per the attached information.</p> <p>With respect to the interchange at [REDACTED] our first preference is to not provide an intersection. We believe the County Road 4, County Road 88 and 5th Line interchanges with the 400 series highways are adequate when you compare them to Barrie's 5 intersections and</p> <p>If an intersection is warranted we believe Alternative #2 is the better choice as it limits the number of properties required and at face value appears to be less costly than Alternative #1. The west side of SR 10 would be most suited to a pedestrian sidewalk under the Bypass to access Henderson Park which will be a very large Community Park.</p> <p>Your consideration of our comments would be appreciated.</p> <p>[REDACTED]</p>	<p>Thank you for your comments on the Preliminary Design Interchange Considerations for the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, which is undertaken in accordance with Ontario Regulation 697/21. MTO accepts comments throughout the study, and acknowledges Interphase Development Inc's property ownership for the properties marked X in the map below, and notes concerns for the proposed interchange at 10th Sideroad. We appreciate your feedback for the alternatives under consideration.</p> <p>[REDACTED]</p> <p>MTO is developing and considering the feasibility of interchanges at 10th Sideroad and 2nd Concession Road as part of the Preliminary Design based on feedback received from municipal staff and councils in 2020. It was requested that interchanges be considered at these locations based on municipal and regional development and transportation planning within Simcoe County and York Region. For each interchange, configuration options are also being considered and will be evaluated through a reasoned-argument method to consider the five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment. Your feedback, along with others received through consultation, will be incorporated into the evaluation as part of these factors. The interchange evaluation will also consider highway geometrics, traffic modelling, and structural and environmental factors.</p>

CT353 Cont.	[REDACTED]	Email: [REDACTED]	Indigenous concerns	Wednesday, June 29, 2022	<p>Dear Project Team,</p> <p>Thank you for the information provided your time sharing this is appreciated. It is of some comfort to know not all processes have not been disregarded with the Notwithstanding Clause, though still concerning that this government has disregarded the studies that previously concluded that this bypass was not a viable solution to the challenges and opportunities the province needs.</p> <p>Thank you for adding me to the mailing list for future meetings et al. I have many more follow up responses to the reports and information provided; I will address those later.</p> <p>At this time, I request one further clarification: please advise specifically which Indigenous communities have been consulted and to what degree. I don't see this information listed on the project website, except in vague, generic terms.</p> <p>With respect, I am concerned that at this stage of the process there isn't specification as to which Bands have been consulted or may have only been via a mailing. This would be comparable to not listing municipalities involved; as such, it implies a lesser level of importance being afforded to this area of reconciliation, and compensation, especially given the treaty claims still being contested, the 2018 apology and agreement with the Williams Treaty Nations, and the national precedents being set for reclamation of land that was illegally ceded. For a provincial team, this is disappointing to see, and I am hoping it is simply a matter of detail omission in the communication to the public?</p> <p>Please advise and again, thank you for your time.</p> <p>Sincerely, [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your comments on the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Project Team is consulting and engaging with Indigenous Nations whose Aboriginal and treaty rights may be adversely impacted by the project, as well as communities that are interested in the project-specific assessment of environmental impacts. Indigenous consultation to date has been documented in Section 4.4 of the Draft Environmental Conditions Report (ECR), which is available for public review from August 12th – September 16th on the project website (https://www.bradfordbypass.ca/study-process/).</p> <p>For your convenience, a list of Indigenous Nations that the Project Team has engaged or consulted with is provided below:</p> <ul style="list-style-type: none"> ➤ Alderville First Nation; ➤ Beausoleil First Nation; ➤ Chippewas of Georgina Island First Nations; ➤ Curve Lake First Nation; ➤ Chippewas of Rama First Nation; ➤ Hiawatha First Nation; ➤ Kawartha Nishnawbe First Nation; ➤ Mississaugas of Scugog Island First Nation; ➤ Huron-Wendat Nation; ➤ Metis Nation of Ontario- Georgian Bay Métis Council; and ➤ Williams Treaty Nations <p>As documented in Section 4.4.1.1 of the ECR, engagement and consultation is ongoing per the list above.</p> <p>As per section 4.4.1.2 of the ECR, Communities have been invited to participate in field work with our archaeological specialists, and Community Field Liaisons have been actively participating throughout the project.</p>

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
CT475	To: Project Team From: [REDACTED]	Email [REDACTED]	Water well surveys	Friday, July 1, 2022	<p>On June 30, 2022 I received a letter from Morrison Hershfield stating they have been retained by Brennan Paving and Construction Ltd. to conduct a door-to-door water well survey of resident properties in proximity to the proposed Bradford Bypass project area. The purpose of the survey is to obtain base line water quality and quantity data prior to construction. I am being invited to participate in this survey.</p> <p>In August of 2021 I was approached by Aecom to participate in a Pre-Construction Well Assessment Program as part of the Bradford Bypass project. I agreed to take part, submitting an information sheet to Aecom on September 3, 2021. A sample of raw (untreated) groundwater was collected from my well on October 13, 2021 for laboratory analysis. A final written report dated November 22, 2021 was received in the mail.</p> <p>I understand and appreciate the collection of data for this purpose; however, it seems to me that Morrison Hershfield is being asked to duplicate a survey already conducted by Aecom. Surely the results could be shared from one consulting firm to another. Ultimately, tax dollars are being used to fund these activities. I cannot see how this apparent duplication of services can be justified as a prudent and responsible use of government funds.</p> <p>Please find attached letters from Aecom and Morrison Hershfield.</p> <p>Your prompt response to this matter is greatly appreciated.</p> <p>Sincerely, [REDACTED]</p>	<p><i>*Brennan Paving and Construction Ltd and Morrison-Hershfield issued the response below on Wednesday, September 28, 2022.</i></p> <p>Hello [REDACTED]</p> <p>Thank you for reaching out regarding the well survey and our apologies for taking so long to respond to your enquiry.</p> <p>While the baseline information from AECOM has been received and reviewed by the Brennan-MH team it is important to note that best practices with respect to water monitoring is to always take a pre-construction sample as close to the beginning of construction as possible. Given that the AECOM test will be over a year old by the time construction starts, changes may have occurred in that time that would not be reflected in the original sample. These early samples are also taken to ensure that if there were any existing issues that they can be addressed prior to construction.</p> <p>We also understand your concern regarding the duplication of testing, however, given only a few local residents participated in AECOMs sampling programming it is necessary to reach out to your neighbours again to ensure that all who want to be engage in the testing program have the opportunity, as such, additional letters were being sent out and more sampling will be undertaken for those that want to participate now.</p> <p>If you would prefer, we can use your original sampling results from AECOM as your baseline. Or, please let us know if you wish to have new samples taken and we will arrange to have a sample collected.</p> <p>Please note, you will also be contacted by Morrison Hershfield during construction and post-construction to have additional sampling taken which will be compared to pre-construction baselines to ensure there are no impacts to your water resulting from construction. You can withdraw your consent to participate at any time.</p>

CT478	To: Project Team From: [REDACTED]	Email: [REDACTED]	*In response to PIS notice Confirmation of markup locations	Wednesday, July 6, 2022	Hi, Could you please confirm the location for markups. Is it Hwy 400 to Hwy 404 or 10 th Sideroad and 2 nd Concession Road ? If you could mark the location in google maps that would be really great.	Hello [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. As part of the preliminary design, MTO is developing and considering the feasibility of interchanges at 10 th Sideroad and 2 nd Concession Road based on feedback received from municipal staff and councils in 2021. It was requested that interchanges be considered at these locations based on municipal and regional development and transportation planning within Simcoe County and York Region. For each interchange, configuration options are also being considered as presented in the Public Information Session material. In developing the interchange designs, the Project Team asks all utility companies including Telecon to confirm if their infrastructure falls within the proposed interchanges at 10 th Sideroad and 2 nd Concession Road. Detailed maps of the location of the proposed interchanges can be viewed on the Project Website https://www.bradfordbypass.ca/wp-content/uploads/2022/04/2022-21-04-MTG-PublicConsultationInterchanges.pdf . As your contact information is already on the Project Contact List, you will continue to be notified through email of the filing of the Final Environmental Conditions Report (ECR), and future milestone events including Public Information Centre (PIC) #2, the Environmental Impact Assessment Report (EIAR) and other updates for this study. An Ontario Government Notice (OGN) announcing the date of the future PIC will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area. Stakeholders on the Project Contact List will receive direct notification through mail or email.

CT335 Cont.	To: Project Team From: [REDACTED]	Email: [REDACTED] Phone: [REDACTED]	Heritage Home	Tuesday, July 19, 2022	<p>Phone call:</p> <p>" My name is [REDACTED] I'm on [REDACTED] where the Bradford Bypass is going to go. My phone number is [REDACTED] was talking to [REDACTED] and she was going to be having heritage people come out to access our property because last stood you were going to be taking our access to our house so we can not get in. Putting your curved on-off rampon Leslie. So can someone please call me and tell me what's happening [REDACTED] Thank you.</p> <p>Email:</p> <p>Built Heritage Resource house</p> <p>We have been trying to contact [REDACTED] who phoned us about 3 months ago to discuss alternatives for one of your on-off ramps, which would take a third of our property, and deny us access to our house.</p> <p>[REDACTED] was going to arrange to have a team of historical people come out to assess the situation. We have all the paperwork dating back to 1824. We have heard nothing since.</p> <p>There are now several surveyors, I think, working in the southwest quadrant of the proposed interchange.</p> <p>Is the alternative that would deny us access to our house, still on the table, or are there other options being seriously considered?</p> <p>We need to know what will happen to our property please.</p> <p>Sincerely [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Please find below additional information and a summarization of the information discussed with you on May 13th.</p> <p>We recognize your concerns regarding the proposed interchange design alternatives at Leslie Street, and how those may impact your property. Key concerns that you have noted, and discussed during the call include: Property Impacts from the location of a proposed loop ramp from one of the preliminary alternatives, on the east side of Leslie Street. Including, access to/from Leslie Street, ramp proximity to the home, and impact to the septic bed. Identification of your home as a Built Heritage Resource. Concerns regarding vibration during construction and the impact this may have on your home. Specifically, the rubble foundation.</p> <p>In summary of the conversation on May 13th, the Ministry is undertaking the project-specific assessment of environmental impacts for the Preliminary Design of the Bradford Bypass. This includes an update to the Cultural Heritage Resource Assessment Report (CHRAR) originally completed in 2020, which identified Built Heritage Resources and Cultural Heritage Landscapes within 500 m of the 2002 approved right-of-way for the Bradford Bypass. The next phase of the cultural heritage study is to undertake cultural heritage evaluation and heritage impact assessment where required.</p> <p>The heritage status of your property has been identified as "Designated Part IV" (Municipal Heritage Recognition). This designation and heritage significance is confirmed through our discussions with you on May 13th, during which you provided extensive history on the property and surrounding lands.</p> <p>In the 2020 CHRAR, a Cultural Heritage Evaluation Report (CHER) was recommended for this property based on the early Preliminary Design for the project at the time. Following the 2022 update to the CHRAR and evaluation of the Preliminary Design alternatives at</p>

Reference #	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>Leslie Street, a CHER may no longer be warranted if the proposed design avoids potential impacts to the property and that indirect impacts from construction and operation (i.e., vibration) may be avoided where work is greater than 50 m from the home. Prior to undertaking the cultural heritage evaluation, the project heritage specialist(s) will contact you regarding permission to enter and discuss opportunities to review the extensive documentation you have for this home and property so that it can be included in the evaluation report. Regardless of the recommendation for a CHER, the property will continue to be identified as a cultural heritage resource and noted as a potential risk for vibration impacts. This information and the need for future consultation will be factored into design and construction considerations as the project progresses.</p> <p>As the Ministry advances the Preliminary Design and selects the preferred interchange and alignment design, the Project Team will provide opportunities through an individual meeting with you to discuss your property - specific concerns and questions.</p> <p>As a property owner and a key contact on the Project Contact List, you will be notified through email of future milestone events including filing of the Existing Conditions Report (ECR), Public Information Centre (PIC) #2, filing of the Environmental Impact Assessment Report (EIAR) and other updates for this study. In addition to direct email communications, an Ontario Government Notice (OGN) announcing the date of the future consultation milestones will be published in local newspapers, posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions regarding the project or your property, please feel free to reach out to the Project Team at your earliest convenience.</p>

CT335 Cont.	To: Project Team From: [REDACTED]	Email: [REDACTED]	Heritage concerns Property Impact	Monday, September 19, 2022	<p>Further to your reply of July 19, 2022, we have not heard anything more regarding the loop you propose as an on/off ramp on Leslie St. that would take away any access to our house.</p> <p>It was mentioned to me during a phone conversation with you, that putting the interchange on the 2nd Concession had been considered, as well. Now that the 2nd has been widened from Green Lane, it would make a lot more sense to use that to access an interchange on the 2nd, instead of Leslie Street. Locating the interchange on the 2nd would have far less detrimental impact on any properties there, compared to Leslie.</p> <p>We are also still waiting to hear of a visit from your heritage experts, to look at the historical documentation we have on our home.</p> <p>Bruce and I would really appreciate any updates you have and hope you have made some changes to your initial Alternative plan.</p> <p>[REDACTED]</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>An assessment was conducted evaluating nine interchange location scenarios to determine the best interchange configuration through the Bradford Bypass corridor. The evaluation was conducted to satisfy the study objective to improve connectivity between Highway 400 and Highway 404, facilitate the improvement of traffic operations and movement of goods. Consideration included interchange utilization, overall network delay, out of way travel, environmental considerations and constraints, and preliminary costs. It was determined that interchanges at 10th Sideroad, County Road 4, Bathurst Street, 2nd Concession Road, and Leslie Street would be included as part of the Study.</p> <p>MTO has developed and considered the feasibility of an interchange at 2nd Concession Road as part of the Preliminary Design based on feedback received from municipal staff and councils. It was requested that an interchange be considered at this location based on municipal and regional development and transportation planning. The preferred alternative for the 2nd Concession Road interchange was presented during the Public Information Centre (PIC) #2 held on November 24, 2022. The PIC #2 materials illustrating the proposed interchange at 2nd Concession Road can be viewed on the Project Website (https://www.bradfordbypass.ca/pic/)</p> <p>MTO is also proceeding with an interchange at Leslie Street. The preferred alternative for the interchange at Leslie Street was also presented at PIC #2. Your property located at [REDACTED] is not anticipated to be directly impacted by the Recommended Plan for the project. The property is located approximately [REDACTED] of the proposed interchange. Please refer to the Draft Preliminary Design map below with the property marked with a red "X".</p>

CT491	FH	To: Project Team From: [REDACTED]	Email: [REDACTED]	Meeting	Tuesday, October 11, 2022	<p>Good morning,</p> <p>Following up on the request below we did have a preliminary conversation with someone from your team.</p> <p>She was unable to answer a number of our questions and committed to scheduling a broader connect.</p> <p>We haven't heard back on when that call will take place.</p> <p>Awaiting your response,</p> <p>[REDACTED]</p>	<p>[REDACTED] called [REDACTED] on November 17, 2022. [REDACTED] was also in the room. [REDACTED] and [REDACTED] are the owners of the home.</p> <p>*The owners noted their home is on [REDACTED] and understand they are not directly impacted by the Bradford Bypass works.</p> <p>*The owners noted per the previous correspondence they wanted a meeting; [REDACTED] noted he can provide answers to most of the questions they may have.</p> <p>*The owners requested how to get a link for PIC#2.</p> <p>*[REDACTED] clarified registration for PIC #2 is through the Bradford Bypass Project Website, and once registered they'd receive a Zoom link.</p> <p>*The owners wanted clarification on what would be shared at PIC #2.</p> <p>*[REDACTED] stated the PIC will go through the project overview, timeline, alternatives, and draft recommendations.</p> <p>*The owners asked if they could still give comments and feedback.</p> <p>*[REDACTED] stated the public can provide comments and feedback during the PIC and through the Project Team email. [REDACTED] also noted that the project website has the most up to date information.</p> <p>*The owners stated they are concerned with why an interchange is proposed at 10th Sideroad when there was already a 400 interchange and a County Road 4 / Yonge Street interchange in close vicinity. They noted they saw information in May 2022 about the 10th Sideroad interchange, the addition of ramps on 10th Sideroad, and would prefer not to have the interchange.</p> <p>*[REDACTED] noted the 10th Sideroad and 2nd Concession interchanges were a request by staff</p>

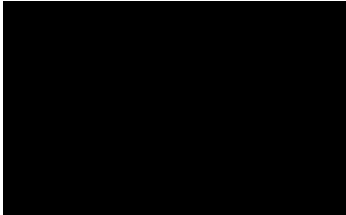

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>and council from municipalities, the Project Team's role is to consider the additional interchanges, based on various factors and assess and evaluate the alternatives and impacts.</p> <p>*The owners stated the alternative plans for 10th Sideroad Interchange are not currently clear if the highway was going over or under 10th Sideroad, and this would be important for their comments.</p> <p>* [REDACTED] clarified details of the Bradford Bypass going over or under are considerations taken into account during the assessment and evaluation process, and design plans are being developed on an ongoing basis.</p> <p>*The owners noted their neighbours are being talked to about taking frontage of property.</p> <p>* [REDACTED] clarified property owner impact meetings were ongoing with directly impacted property owners to obtain feedback on impacts prior to the PIC.</p> <p>*The owners requested clarifications on the meaning of the lines for the 10th Sideroad alternatives.</p> <p>* [REDACTED] clarified the proposed right-of-way includes the grading and landscaping for the Bradford Bypass.</p> <p>*The owners noted they are concerned with drivers being able to see into their yard and lights going into their house from the ramps. The owners were also concerned with drivers coming off of the "N-W Ramp" and onto 10th Sideroad at high speeds and not stopping.</p> <p>* [REDACTED] stated they had valid concerns that are part of the assessment of alternatives, and clarified the alternative plan ramp labelled "Ramp N-W" is an on-ramp onto the highway, and "Ramp E-N/S" is an off-ramp off of the highway to a stop or signalized intersection.</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>*The owners noted concerns with no present signal or stop sign on 10th Sideroad and Arthur Evans Crescent, concerns with the safety of kids crossing to get to the park, and concerns with traffic speeding up as they go over the hill to use the "Ramp N-W" and go onto the highway, even though there is a speed drop from 80 to 60 north of the interchange <i>[Post-meeting note: the 60km/h southbound posted sign is at 9th Line, prior to a hill, roughly [REDACTED]]</i>.</p> <p>*[REDACTED] noted their feedback on safety is important and will be taken into consideration.</p> <p>*The owner stated they had limited time remaining, and would like the following addressed:</p> <ul style="list-style-type: none"> • Concerns with lighting and noise. It was acknowledged that these questions may have been addressed in previous correspondence with the Project Team. • Stated the interchange should be moved south. • Concerned with speed on 10th Sideroad <p>*The owners noted support for the Bradford Bypass, and requested an additional meeting when they have more time available to ask more questions.</p> <p>*[REDACTED] stated to email the Project Team with ranges of available times and dates for another meeting.</p>

CT495		To: Project Team Form:	Email:	In-ground heating	Thursday, October 27, 2022	<p>I would very much like to discuss this further with the project team. I disagree about the statement of cost-efficiency for this project. My 20 years of experience in the snow removal industry and the 15 years I've had operating my own business gives me insights to the long-term costs. I have experience with in-ground heating, which is being used on a greater frequency for small scale areas. I do not propose that the entire 16+ kilometres be heated, but those stretches adjacent to the waterways.</p> <p>I will be available for greater frequency after November 2nd, and would be interested to discuss with the planners. This is an opportunity to look to the future and make good impressions on the naysayers, those that don't believe that highways can make a difference to the environment. As a frequent traveller of the local commuter routes, this highway can be amazing for the environment.</p> <p>Regards,</p>	<p>MTO EMAIL Feb. 2, 2023 – MTO TO PROVIDE A CONTACT TO THE REPLY BELOW.</p> <p>NEW DRAFT RESPONSE PROVIDED Feb. 10, 2023 FOR MTO REVIEW.</p> <p>Hello </p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The ministry supports innovation and is always interested in new technologies. The ministry has protocols in assessing these new technologies which involves discussions with other agencies and owners throughout Canada and the US, especially those with similar climates. Due to the freeway geometry, size of the bridges, cost, and energy use, the ministry has determined that the current winter maintenance strategy would be appropriate for this freeway. These bridges themselves are quite a large size, and the relatively straight and flat freeway geometry means that regular winter maintenance would be appropriate and excessive salting would not be required.</p> <p>We have added your contact information to the Project Contact List so you will be notified through email of future milestone events including filing of the Draft and Final Environmental Impact Assessment Report (EIAR) and other updates for this study.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. CT497		To: Project Team From:	Phone:	Golf course	Thursday, October 27, 2022	<p>"Yes my name is [REDACTED] My phone number is [REDACTED] I just received your latest notice and noticed the Technically Preferred Route remains south and a straight line between the 400 and the 404 and comes about [REDACTED] I'm wondering about your technical considerations beyond your golf course and the political issues there. It would certainly seem to make more sense to run directly across from a straight line on Holborn Road. Also avoiding a fairly large parallel track on river. If someone could give me a call I would appreciate it. Thank you, bye."</p> <p>[REDACTED]</p>	<p>[REDACTED] called [REDACTED] on November 17, 2022. [REDACTED] confirmed he was on the line.</p> <p>[REDACTED] asked if the Technically Preferred Route is being realigned to avoid the golf course.</p> <p>[REDACTED] stated projects of this magnitude have route refinements to balance the technical needs for the highway with potential environmental and property impacts. The Technically Preferred Route identified an alignment at the Holland River East Branch that has the potential to impact fish habitat as a result of pier placement along the meander bends a backwater refuge area, and a known archaeological site. Additionally, socio-economic impacts to the Albert's Marina and Silver Lakes Golf and Country Club were identified.</p> <p>[REDACTED] asked why the Project Team is not looking at alternate corridor options?</p> <p>[REDACTED] stated alternate route options have been ruled out because the planning process for the 2002 Approved Environmental Assessment narrowed down alternatives from a broad range of potential solutions. The study required gathering relevant information with respect to the existing and future conditions in the analysis area so that the impacts (both positive and negative) of each alternative could be compared under different factors. She stated information was gathered and grouped under five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment, and the Technically Preferred Route was selected in terms of highway network expansion, ease of construction, relationship to provincial and municipal land use planning as well as having fewer negative impacts to residential and natural areas when compared to other route options considered.</p> <p>[REDACTED] stated this was going to impact his home.</p> <p>[REDACTED] requested [REDACTED] address, and committed to providing an email providing the</p>

							<p>approximate distance between his home and the Technically Preferred Route.</p> <p>██████████ asked what the Project Team is doing in terms of noise and road salt.</p> <p>██████████ stated a Noise Impact Assessment is being undertaken for the refined Preliminary Design of the Preferred Route in accordance with MTO's Environmental Guide for Noise. MTO will continue to investigate noise mitigation measures, including consideration for existing and future noise barrier walls, where the proposed improvements to the Project are expected to increase ambient noise levels above acceptable levels as outlined in MTO's Noise Guide. She also stated a Drainage and Hydrology Assessment, and Groundwater Impact Assessment is being completed as part of the study to develop an efficient and effective drainage system for the freeway, while addressing potential impacts relative to runoff.</p> <p>██████████ stated that he still believes the Project is politically fixed.</p> <p>██████████ asked ██████████ if he had additional questions. ██████████ stated no.</p> <p>██████████ closed comment.</p>

CT350 Cont.		To: Project Team From:	Email:	Highway name	Thursday, October 27, 2022	<p>Hi. Just following up on my inquiry as to why no 400-series number has been assigned to the Bradford Bypass yet. You would think this would be a "no brainer" as either Highway 488 or Highway 489 or some other 400 number.</p> <p>In January 2021, you stated "it is anticipated that it will be given a 400-series route number". In May 2022 you confirmed that entry and exit from the highway would be at designed "grade-separated interchanges".</p> <p>However, your latest definition that was used in a recent notification from you is shown as follows <u>(emphasis added)</u>:</p> <p><i>"The Bradford Bypass will be a 16.2-kilometre, controlled access freeway to connect Highway 400 and Highway 404 with proposed full and partial interchanges, and <u>grade separated crossings</u>..."</i></p> <p><i>The current study proposes preliminary design refinements to the route alignment and interchanges, design standard updates to the freeway interchanges, and <u>grade separated crossings at local roads</u>..."</i></p> <p>If you are intending that the highway will have "grade separated crossings at local roads", that means it will not meet the criteria to be labelled a 400-series highway, correct? It sounds to me like it will be similar to Highway 11 from Gravenhurst to North Bay that has grade separate crossings at local roads, rather than full interchanges, which is why Highway 11 has not been relabelled as Highway 411.</p>	<p>Hello </p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>At this time, a highway route number has not been assigned to the Bradford Bypass. Should the decision on a highway route number occur during this Preliminary Design Study, this information will be shown on final plans.</p> <p>The preferred Preliminary Design alternatives along with the Recommended Plan for the Bradford Bypass were presented at Public Information Centre (PIC) #2 which was held on November 24, 2022 and includes consideration for full interchanges at 10th Sideroad, County Road 4, Bathurst Street, and 2nd Concession Road, and a partial interchange at Leslie Street. Please refer to the PIC #2 information materials on the Project Website to review the alternatives and Recommended Plan for the project (https://www.bradfordbypass.ca/pic/).</p> <p>As your contact information is already on the Project Contact List, you will continue to be notified through email of future milestone events including filing of the Draft and Final Environmental Impact Assessment Report (EIAR) and other updates for this study.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. You can reach the Project Team via email at projectteam@bradfordbypass.ca, toll free at 1-877-247-6036, or by visiting the Project Website at www.bradfordbypass.ca.</p> <p>Sincerely, The Bradford Bypass Project Team</p>

CT499		To: Project Team From:	Email:	Interchanges	Thursday, October 27, 2022	can you confirm that when the bradford bypass is built that there will for certain be interchanges at bathurst, 2nd concession and leslie? i thought that was the case but read in your material one thing that says 2nd concession is not warranted because it is rural?	<p>Hello</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>This Preliminary Design Study includes consideration for interchanges at 10th Sideroad, County Road 4, Bathurst Street, 2nd Concession Road, and Leslie Street. The interchange locations for County Road 4, Bathurst Street, and Leslie Street were developed, evaluated, and selected in the 2002 Approved Environmental Assessment.</p> <p>MTO developed and considered the feasibility of interchanges at 10th Sideroad and 2nd Concession Road as part of the Preliminary Design based on feedback received from municipal staff and councils in 2020 and 2021. It was requested that interchanges be considered at these locations based on municipal and regional development and transportation planning completed by Simcoe County and York Region. For each interchange, configuration options were developed as shown in the materials for the Preliminary Design Interchange Considerations for 10th Sideroad and 2nd Concession Road on the Project Website, can be found here (https://www.bradfordbypass.ca/wp-content/uploads/2022/04/2022-21-04_MTG-PublicConsultationInterchanges.pdf).</p> <p>The preferred interchange configurations as well as the overall Recommended Plan for the Bradford Bypass project was presented at Public Information Centre (PIC) #2 held on November 24, 2022 from 7:00 p.m. to 9:00 p.m. Eastern Standard Time (EST). To view the PIC #2 information materials, please visit the consultation page of the Project Website (https://www.bradfordbypass.ca/pic/)</p> <p>As your contact information is already on the Project Contact List, you will continue to be notified through email of future milestone events including filing of the Draft and Final Environmental Impact</p>

CT353 Cont.		To: Project Team From: [REDACTED]	Email: [REDACTED]	New housing legislation	Friday, October 28, 2022	<p>Dear Project Team,</p> <p>Thank you very much for the follow up with response details; I appreciate the additional time taken.</p> <p>It is reassuring that more studies are in progress.</p> <p>I would like to continue my questioning about why alternative options have been ruled out. As I drive in the area often, I see the east-west corridor in question and the existing country roads that are in quite close proximity. I would like to better understand why widening or redesignating these thoroughfares have been ruled out?</p> <p>Additionally, a new concern is that the 'Faster Housing' legislation will limit the scope of involvement of conservation authorities in future studies and processes, especially in regards to wetlands redesignation and endangered species mitigation, both at stake in this project. Is this project going to be impacted by the Faster Housing legislation?</p> <p>I thank you again for your time and conscious efforts to go forward in a good way.</p> <p>I look forward to the forthcoming data and information.</p> <p>Sincerely, [REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. The Project Team acknowledges and appreciates your continuous participation throughout the Preliminary Design.</p> <p>Alternate route options have been ruled out as the planning process for the 2002 Approved Environmental Assessment narrowed down alternatives from a broad range of potential solutions. The study required gathering relevant information with respect to the existing and future conditions in the analysis area so that the impacts (both positive and negative) of each alternative could be compared under different factors. To allow a satisfactory and comprehensive comparison to be made, information was gathered and grouped under five broad factors: Transportation, Natural Environment, Social Environment, Economic Environment, and Cultural Environment. The Technically Preferred Route was selected in terms of highway network expansion, ease of construction, relationship to provincial and municipal land use planning (Official and Transportation Master Plans, Places to Grow Act), as well as having fewer negative impacts to residential and natural areas when compared to other route options considered.</p> <p>MTO is working with the Ministry of Municipal Affairs and Housing on the implementation details of Bill 23 to ensure that provincial policies are considered and that the potential risks are minimized and mitigated throughout Bill 23 implementation stages.</p> <p>As part of this project, the ministry will carefully consider all impacts of the BBP and will continue to work with environmental agencies, municipalities and other concerned stakeholders to identify measures to avoid or mitigate the potential impacts</p>

CT225 Cont.	[REDACTED]	To: Project Team From: [REDACTED]	Email: [REDACTED]	Discipline reports	Wednesday, November 9, 2022	<p>Hello, on p.115 of the ECR for the bradford bypass the document states that an impact assessment for fish will "follow under separate cover" please advise whether this has been completed and if so provide a copy to me. If not when is the anticipated timing of completion?</p> <p>Same question for the air quality impact assessment on p.213 of the ECR which states that the air quality impact assessment will include an assessment for construction and operational conditions.</p> <p>Regards,</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Fish and Fish Habitat Impact Assessment is underway to identify and assess impact to fish and fish habitat, and to inform mitigation measures and monitoring activities for the next phase of the project. The Fish and Fish Habitat Impact Assessment Report will review and assess all impacts to watercourse crossings and provide mitigation through culvert and bridge designs, natural channel designs, and vegetation restoration.</p> <p>The Air Quality Impact Assessment is also underway to identify potential impacts and recommend mitigation measures and future commitments. The assessment will follow MTO's Environmental Guide for Assessing and Mitigating the Air Quality Impacts and Greenhouse Gas Emissions of Provincial Transportation Projects (May 2020) (Air Guide) for both the construction and operation phases of the Bradford Bypass. MTO's Air Quality Impact Assessment predicts the cumulative concentration of various contaminants of concern (including GHG) that will be produced using a combination of historical background concentrations of contaminants in the vicinity of the project and air emissions/dispersion modeling which is then compared to the Provincial Ambient Air Quality Criteria (AAQC) and the Canadian Ambient Air Quality Standards (CAAQS).</p> <p>Both studies noted above are underway as the Preliminary Design is progressing and are anticipated to be completed in 2023. A summary of the results of the studies, including commitments to future work, will be included in the Draft Environmental Impact Assessment Report (EIAR) per O. Reg. 697/21. Project commitments and anticipated permits and approvals identified in the studies will be carried forward to subsequent Detail Design and construction phases.</p>

CT552	█	To: Project Team From: █ █ █ █	█	Bridge Height	January 20, 2023	<p>The proposed 8 meter bridge vertical clearance, south of the proposed bradford bypass, is not compatible with dual station cruiser boats. and should be 10 meters .</p> <p>Thank you, the concerned groups .</p>	<p>Hello █</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Project Team appreciates the information you have noted regarding your vessels and/or view of the recommended vertical bridge clearance requirements for accommodating navigation on under the Holland River and Holland River East Branch. The Ministry recognizes that there are upstream limits to navigation at Bridge Street/Yonge Street (Holland River) and Queensville Sideroad West (Holland River East Branch) that may limit further upstream access for these vessel types.</p> <p>The Project Team is currently designing bridges over the Holland River and Holland River East Branch, which are listed as Scheduled Waters, in compliance with the <i>Canadian Navigable Waters Act</i> (CNWA). Per the Act, the Project Team is actively engaging with Transport Canada and is providing an opportunity for the public to provide input into the design of the bridges.</p> <p>The minimum vertical and horizontal bridge clearances of the main span of the bridges under the Holland River and Holland River East Branch will be determined during this Preliminary Design phase. In the following Detailed Design phase, the bridges will be further refined, and permanent navigational aids and signage will be developed. Before the bridges can be constructed, approval from Transport Canada will be required. During Construction, the Contractor will implement measures and plans related to navigation, including installing temporary navigational aids and signage to protect the public on the waterway. The timelines for these project phases after Preliminary Design are not defined at this time.</p> <p>The preliminary 8.0 m (~26') vertical (from High Water Level) and 25.0 m (~82') horizontal bridge clearance over the Holland River and Holland River</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>East Branch was determined as a reasonable improvement to the acceptable 6.86 m (22.5') vertical clearance above water level 219.1 m (718.83') Geological Survey of Canada (GSC) and 19.8 m (65') horizontal clearance provided by the Canadian Coast Guard in the 1997 EA (letter dated April 7, 1995).</p> <p>The preliminary 8.0 m vertical clearance exceeds the required Trent-Severn Canal minimum overhead fixed bridge clearance of 6.1 m (20') per Parks Canada's navigational data. Furthermore, the 8.0 m vertical clearance exceeds the minimum bridge clearances of the Atherley Narrows Bridge (7.0 m, 22.8') and Muskoka Road Bridge (6.7 m, 22.0') on the north side of Lake Simcoe, and the CNR Bridge (6.9 m, 22.7') and Gamebridge Bridge (6.7 m, 22.0') on the east side of Lake Simcoe which provide access to the Trent-Severn Canal on either side of Lake Simcoe. The 8.0 m preliminary vertical clearance also exceeds the minimum bridge clearance under the J.D. MacDonald Bridge (7.8 m, 25.6') and Highway 401 Bridge (7.5 m, 24.5') providing access to the Trent-Severn Canal at Lake Ontario.</p> <p>Similarly, the preliminary 8.0 m vertical clearance exceeds the required Rideau Canal minimum overhead fixed bridge clearance of 6.7 m (22'). Furthermore, the 8.0 m vertical clearance exceeds the minimum bridge clearances of the first fixed bridge in Ottawa (7.9 m, 25.6') providing access to the Rideau Canal at the Ottawa River, and at Highway 401 bridge (6.7 m, 22.0') providing access to Rideau Canal in Kingston.</p> <p>As your contact information is already on the Project Contact List you will continue be notified through email of future milestone events including filing of the Draft and Final Environmental Impact Assessment Reports (EIAR) and other updates for this study. We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest</p>

CT346 Cont.	█	To: Project Team From: █ █ █	█	Bradford Bypass Navigable Waters Review	January 25, 2023	<p>Hi █ thank you for reaching out.</p> <p>In regards to your questions please see my notes below.</p> <p>Types of vessels: <u>-Height clearance required:</u> to account for water level fluctuations a minimum of 20' from the high water mark is required to accommodate most vessels. <u>-Vessel width clearance requirements:</u> 40' (greatly depends on grading/retaining wall design to ensure that sediment does not reduce the water depth and channel width if a column is needed to support the bridge mid span). Adequate width and depth is required to ensure larger vessels can safely pass each other heading opposite directions as the river is quite a busy waterway on the weekends. <u>-Vessel length:</u> 44', some are full keel shaft drive, some are I/O. Draft up to 5'</p> <p>Do you host any special events that would require either Holland River or Holland River East Branch to remain open (not closed for construction) at a specific time each year:</p> <p>Our business has a substantial portion of its income that would be halted if the river were to be closed off for access, our slip customers would not have access to the lake and therefore use of their vessels. We have daily large boat traffic from May-October seasonally. Or repair operations would be impacted as well from the inability to water test vessels during/after repair (the section of river from the new bridge to us is all 10kph speed limit, unless this could be lifted for the course of construction) this runs from ice melt which varies but in the recent years has been as early as mid-march up until freeze up which can be anywhere from late November to late December. Any obstruction of the river</p>	<p>Hello █</p> <p>Thank you for your comments on the Bradford Bypass Navigable Waters Review, undertaken in accordance with Ontario Regulation 697/21.</p> <p>The Project Team appreciates the information you have provided regarding navigation and clearance requirements for your business operation. The Project Team will consider the information you provided as Preliminary Design progresses.</p> <p>The Project Team is currently designing bridges over the Holland River and Holland River East Branch, which are listed as Scheduled Waters, in compliance with the <i>Canadian Navigable Waters Act</i> (CNWA). 						<p>during the boating season would be financially detrimental to our business and livelihoods.</p> <p>Which months do you see the highest vessel traffic on the rivers? June-August</p> <p>What times of day are considered peak hours for vessel traffic? 11am-4pm, Sunset- Significantly more large vessel traffic on weekends</p> <p>What type of vessels are launched and removed from the rivers? Anything from PWC's to 44' cruisers. Typically anything 26' and up are launched seasonally by us early may and left in until mid-late October. We could hold off launch until May 24 and haul out as early as Oct 1st without impacting rates.</p> <p>What type of vessel are moored, docked, or stored at your marina? Please specify heights and required clearances. Vessel dimensions are covered in the above "types of vessels". We do have one sailboat that has a slip at our location. Mast height of that vessel is 35' from waterline- we understand that is likely not going to be feasible to continue servicing sailboat customers, but please understand that bridge height is ultimately going to negatively impact our business and therefore the property value. We provide both wet slips and dry slips (land storage with launching privileges) to over 100 vessels & paying customers.</p> <p>Please include any additional information you feel is necessary. We are a full service marina, primarily powerboats/cruisers. We provide seasonal and year round slips (the year round slip customers are not navigating the river in the winter months), repair services which typically require launching and testing operation of vessels including engine replacement/repair</p>	<p>East Branch was determined as a reasonable improvement to the acceptable 6.86 m (22.5') vertical clearance above water level 219.1 m (718.83') Geological Survey of Canada (GSC) and 19.8 m (65') horizontal clearance provided by the Canadian Coast Guard in the 1997 EA (letter dated April 7, 1995).</p> <p>The preliminary 8.0 m vertical clearance exceeds the required Trent-Severn Canal minimum overhead fixed bridge clearance of 6.1 m (20') per Parks Canada's navigational data. CT-557 Cont.		To: Project Team From: [REDACTED]	Email: [REDACTED] Phone: [REDACTED] Mailing Address: [REDACTED]	Archaeology Studies Support to the Project	February 3, 2023	<p>There was an open letter floating around last year in social media that stated, "Saving Lower Landing Archaeological Site one of many reasons Bradford Bypass should not happen"</p> <p>As a professional licensed archaeologist, I am always skeptical when people who have no interest in history or prehistory suddenly become irate when a project they don't like potentially affects an archaeological site. And this happens all the time: Groups desperate to stop a development disingenuously glom on to archaeology as a way to try to stop it. The fact is, the location of the lower landing archaeological site is unknown, so to complain that it will be affected by the Bradford Bypass is disingenuous. If they don't know where it is exactly, how to they know if will be affected by the new road?</p> <p>The Ministry of Heritage, Sport, Tourism and Culture Industries does an excellent job to ensure that all appropriate areas are surveyed and that if there is an archaeological site in the way of development, it is excavated or avoided. If the Bradford Bypass will affect an archaeological site, appropriate actions will be taken by archaeological professionals and the Ministry. Do not believe the misinformation in this ill-informed letter.</p> <p>[REDACTED]</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest and support for the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. We note your support for archaeology works on the Project.</p> <p>Avoidance and protection of archaeological resources are in accordance with the Ministry of Citizenship and Multiculturalism (MCM) guidelines and received strong consideration as a way to show respect to Indigenous heritage and point of view.</p> <p>As the Preliminary Design progresses, the Project Team continues to engage and consult with Indigenous communities and regulatory agencies to avoid/mitigate impacts to archaeological sites. Also, the documentation for all currently identified archaeological sites and areas of potential is currently underway and findings will be summarized in the Draft Environmental Impact Assessment Report (EIAR) which will be available for public review.</p> <p>We have added your contact information to the Project Contact List so you will continue to be notified through email of future milestone events including filing of the Draft and Final Environmental Impact Assessment Reports and other updates for this study.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. CT-559 Cont.		To: Project Team From: [REDACTED] [REDACTED] [REDACTED]	[REDACTED] [REDACTED]	General Update	February 8, 2023	Hi [REDACTED] I was wondering if there were any updates to this project and if the project team has decided on the delivery model? Are you available to have a quick 10 minute general update call? From the November 2022 update from I.O, it sounds like the RFQ would come out between January to March 2023? Many thanks,	Hello [REDACTED] Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. The Ontario Ministry of Transportation (MTO) has retained AECOM Canada Ltd. (AECOM) to undertake this Preliminary Design study for the proposed Bradford Bypass. Preliminary Design for the overall Bradford Bypass project is anticipated to be completed in early 2023. Subsequent Detail Design and construction for the project will follow. The Ontario government is committed to fully funding the construction of the Bradford Bypass and is following through on its promise to improve and invest in the province's transportation corridors to get people moving within the region, connect people to jobs, make life easier and support a strong economy. We have added your contact information to the Project Contact List so you will continue to be notified through email of future milestone events including filing of the Draft and Final Environmental Impact Assessment Reports and other updates for this study. We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available. If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. You can reach the Project Team via email at projectteam@bradfordbypass.ca , toll free at 1-877-247-6036, or by visiting the Project Website at www.bradfordbypass.ca . Sincerely, The Bradford Bypass Project Team

							<p>potentially influence the sub-watershed, MTO is considering NVCA water quantity and quality control guidelines.</p> <p>Furthermore, appropriate mitigation measures to prevent salt and treated sand from entering watercourses and salt-sensitive areas will be proposed based on various factors including the use of MTO's Salt Management Plan and the Ministry of Environment, Conservation and Parks (MECP) Guidelines on Snow Disposal and De-icing Operations in Ontario. The MTO Salt Management Plan outlines salt management operational practices and strategies and Best Management Practices (BMP) in terms of equipment, best practices, materials, storage, testing, storm response, application rules, snow and ice control trainings, snow removal and disposal, and technology review. This includes implementing a balanced approach to the highway salt application based on the amount of snow precipitation and highway conditions.</p> <p>In areas that are particularly sensitive, salt management measures may be necessary to mitigate environmental effects of road salt in accordance with the study objectives utilizing the Code of Practice for Environmental Management of Road Salts released by Environment Canada. The Code of Practice for Environmental Management of Road Salts can be viewed here: https://www.canada.ca/en/environment-climate-change/services/pollutants/road-salts/code-practice-environmental-management.html.</p> <p>In addition, snow removal and disposal will be utilized in accordance with the MECP Guidelines on Snow Disposal and De-icing Operations in Ontario. Further details on MECP's Guidelines on Snow Disposal and De-icing Operations in Ontario can be found here: https://www.ontario.ca/page/guidelines-snow-disposal-and-de-icing-operations-ontario#:~:text=Ministry%20Approval,-If%20special%20circumstances&text=As%20a%20general%20rule%2C%20the,be%20approved%20for%20direct%20disposal.</p>

CT 519 Cont.		To: Project Team From: [REDACTED]	Email [REDACTED]	Opposition and suggestion of mitigation approach	February 17, 2023	<p>"This includes implementing a balanced approach to the highway salt application based on the amount of snow precipitation and highway conditions."</p> <p>Hello,</p> <p>Thank you for your reply.</p> <p>The "best" answer is no salt should be used on snow. Salt should be only used on ice.</p> <p>When I lived in Colorado, they did not use any road salt (I had a rust free car to prove it). People who drove had snow tires. Sand was used in the metropolitan area and then when there was an accumulation of sand, it was swept up. In the mountains gravel was added to the sand. There were a few cracked windshields.</p> <p>When I lived there, if you wanted to drive, you took the responsibility to make sure it was safe to. Otherwise you stayed home.</p> <p>Maybe it is too difficult to teach people things like "It snows in Simcoe County. Drive accordingly".</p> <p>I had a 2 wheel drive car with full snows and do not recall having any problems and I was an avid winter skier. I was happy to see snow. I did not "stay home".</p> <p>The reason Colorado did not use salt was because it was desert like so the water ecosystems were very sensitive and the choice to use salt was environmental.</p> <p>I do not expect a dramatic change in how Ontario changes how they deal with snow. Snow, for the most part is not a problem until there is plenty of it at which point it needs to be mechanically removed. Drivers thinking they are important and need summer time</p>	<p>Hello [REDACTED]</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>Please find the following response in addition to the Project Team's PIC #2 response provided on previously via email on February 17, 2023:</p> <p>Salt mitigation strategies are applied throughout the entire Bradford Bypass corridor. There are various ways to mitigate salt runoff impacts onto the Bradford Bypass, including the interchanges. The first mitigation method is to prevent the source of the issue, which is snow or ice, entering into the corridor. This can be achieved through preventative measures such as landscaping and snowdrift mitigation techniques and practices (i.e., positioning plantings and features). This method promotes sustainable initiatives and requires consideration and input with respect to the development of landscaping plans used in conjunction with snowdrift technical input to identify and implement measures throughout the corridor for areas that are more prone to hazards such as snow. However, the preventative technique would not eliminate all snow entering the corridor and as a result, treatment would be necessary, as appropriate. The second mitigation method is to sustainably confine and treat stormwater runoff through the implementation of effective stormwater management plans. There are several measures that are proposed to be implemented to contain and treat any stormwater runoff into the highway. Measures such as enhanced grass swales, rock flow check dams, flat bottom swales, stormwater management ponds, impermeable materials/ liners to name a few features that would be implemented for quantity and quality control.</p> <p>As your contact information is already on the Project Contact List, you will continue to be notified through email of future milestone events including filing of the Draft and Final Environmental Impact</p>

CT-395 Cont.	██████	To: Project Team From: ██████	██████████	Project Opposition	February 17, 2023	<p>Hello and thank you so very much for keeping me updated on the Bradford Bypass Project. I need to learn more.</p> <p>In time, I will look at all the links you sent, and I will be happy to learn how the assessments took Lake Simcoe, wetlands, and significant habitats into account. In the meantime, may I ask some questions to the team?</p> <p>1. If we realize, through climate change effects, food insecurity, or biodiversity collapse that we made a mistake by building this highway, how do we get back what we paved over? (Serious question and should be in your assessment).</p> <p>2. Why would humans pave over land that feeds and protects them when densification and other allocated land will more than house the projected influx of more humans?</p> <p>3. As we learn that the Bradford Bypass and the 413 seem to be part of a shady deal made by the provincial government and the land developers who own much of the land, why isn't the Bradford Bypass team stopping everything until the story is out in the open and we assess the outcome?</p> <p>4. And finally, why aren't other options for more efficient transportation tried before paving and developing? Such as buy back the 407. Use the 407. Use more rail for goods... promote 15 min cities vs commute cities...</p> <p>Thank you again, I am so worried about the close relationships between the government and its wealthy donors, the climate crisis relaxed nature of our elected officials, and terrified for our children's future by watching our leaders do the same old during a mass extinction. The future odds aren't looking good. ██████</p>	<p>Hello ██████</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. We note your comments regarding the need for the project as well as climate change.</p> <p>The Technically Preferred Route for the Bradford Bypass was approved through the 2002 Environmental Assessment. This alignment is technically preferred for a freeway in terms of highway network expansion, ease of construction, relationship to provincial and municipal land use planning (Official and Transportation Master Plans, <i>Places to Grow Act</i>), as well as having fewer negative impacts to residential and natural areas when compared to other route options considered.</p> <p>One of the key goals of the Bradford Bypass project is to reduce traffic on the local road network around the corridor, moving the traffic currently traveling through the towns and municipalities within the region onto the new highway corridor. This will provide more roadway capacity for local residents. The new corridor will remove the majority of longer distance trips including trucks from the local road network.</p> <p>The proposed freeway reduces congestion within the local road network. Reductions are observed on corridors including Highway 11 / 1 (Bridge Street), Bathurst Street, Holland Landing Road, Yonge Street, Queensville Sideroad, Doane Road, Mount Albert Road, Green Lane, and Simcoe County Road 88 / Holland Street, among other roads.</p> <p>MTO is also undertaking 15 environmental studies to update and document environmental conditions, identify, and evaluate potential impacts of the project and recommend mitigation measures to reduce potential impacts and meet current environmental legislative requirements. This includes documentation on Climate Change which is currently underway. The assessment will be in</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>accordance with MECP's Climate Change Guide (Considering Climate Change in the Environmental Assessment Process, 2017), and will consider the project's expected production of GHG emissions and impacts on carbon sinks, as well as the resilience or vulnerability of the undertaking to changing climatic conditions. Findings will be summarized in the Draft Environmental Impact Assessment Report (EIAR), and available for public review. To view the full list of studies being conducted, please visit the overview page on the Project Website (https://www.bradfordbypass.ca/overview/).</p> <p>Regarding your comment referencing Highway 407, even with all currently planned transportation and transit investments, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). For Ontarians in 2051, average travel speeds are expected to be 16 per cent slower when compared to 2016.</p> <p>Significant population growth is projected for both Simcoe County and the Regional Municipality of York. The Bradford Bypass has been proposed as a response to this dramatic growth in population and travel demand in the area, including the forecasted increase in congestion on key east-west roadways linking Highway 400 to Highway 404. The proposed location for the Bradford Bypass was also identified in A Place to Grow: Growth Plan for the greater Golden Horseshoe (2020).</p> <p>The purpose of the Bradford Bypass is to improve connectivity to the region as well as to provide capacity to accommodate future demand in the region. The new freeway will relieve congestion on existing local roads between Highway 400 and Highway 404 and support urban development in Simcoe County and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404.</p> <p>The travel time savings are calculated by comparing two scenarios: one scenario with the Bradford Bypass ('Build') and the other without ('No-Build').</p>

							<p>The 407ETR is included in the transportation model under both scenarios. The model shows that the majority of the users of the Bradford Bypass are either destined to or originate from the nearby communities. The impact from the 407 between the Build and No-Build scenarios is insignificant.</p> <p>As your contact information is already on the Project Contact List, you will continue to be notified through email of future milestone events including filing of the Draft and Final Environmental Impact Assessment Reports (EIARs) and other updates for this study.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. You can reach the Project Team via email at projectteam@bradfordbypass.ca, toll free at 1-877-247-6036, or by visiting the Project Website at www.bradfordbypass.ca if you have any additional questions.</p> <p>Sincerely,</p> <p>The Bradford Bypass Project Team Email: projectteam@bradfordbypass.ca Toll-Free: 1 (877) 247-6036</p>

CT-397 Cont.	█	To: Project Team From: █	Email: █	Bradford Bypass Treeline	February 21, 2023	<p>Good morning,</p> <p>I wanted to send this email to ask for the project team to have a look at one treeline and to consider saving it. I am a local resident living in front of █. There is a line of matured trees that separate farm fields that I believe should not be cut down. Please have a look at the .pdf file attached to this email for a better understanding of which line of trees I am referring to.</p> <p>To avoid air pollution, light pollution and noise pollution, the highway should be deviated north around the trees so they can act as a natural buffer for the local residents. This way the highway can still be built but far enough away that the local residents aren't affected by the air, light and noise pollution.</p> <p>Thank you for your time. Best regards,</p> <p>█</p>	<p>Hello, █</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>We note your comments regarding trees in the location of the █. As part of the current Preliminary Design Study, the proposed Technically Preferred Route (Recommended Plan) is expected to impact the trees you have identified. Details will be further confirmed during subsequent Detail Design phases of the project, as needed. To view the PIC #2 materials, click on the Recommended Plan slides in the consultation page of the Project Website (https://www.bradfordbypass.ca/pic/).</p> <p>Additionally, as part of this Preliminary Design Study, the Project Team is preparing a Landscape Composition Report, a Terrestrial Ecosystems Existing Conditions and Impact Assessment Report, Air Quality Impact Assessment Report and Noise Impact Assessment Report among others. As part of the Project, landscaping is recommended throughout the corridor and again, will be further refined in subsequent Detail Design phases.</p> <p>Overall, MTO is undertaking 15 environmental studies to update and document environmental conditions, identify, and evaluate potential impacts of the Project and recommend mitigation measures to reduce potential impacts and meet current environmental legislative requirements. To view the full list of studies being conducted, please visit the overview page on the Project website (https://www.bradfordbypass.ca/overview/).</p> <p>As your contact information is already on the Project Contact List, you will continue to be notified through email of future milestone events including filing of the Draft and Final Environmental Impact</p>

CT-563		To: Project Team From:	Email:	Interchange Locations	February 24, 2023	<p>Can another design be proposed the northeast on ramp for the 10th sideroad? Can this on ramp be moved to the northwest, southwest, or southeast? This northeast ramp is a real intrusion to the properties to the and brings traffic too close to</p> <p>Appreciate the time to give alternative options.</p>	<p>Hello</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>MTO developed and considered the feasibility of an interchange at 10th Sideroad as part of the Preliminary Design based on feedback received from municipal staff and councils. It was requested that an interchange be considered at this location based on municipal and regional development and transportation planning within Bradford West Gwillimbury and County of Simcoe. The preferred interchange configuration as well as the overall Recommended Plan were presented at Public Information Centre (PIC) #2 on November 24, 2022. The materials from PIC #2 can be found on the Project Website (https://www.bradfordbypass.ca/pic/).</p> <p>A consultation event referred to as the <i>Preliminary Design Interchange Considerations Consultation Event</i> was held for the project between April 21, 2022 to May 5, 2022. The purpose of the consultation event was to present updated information on the Preliminary Design Interchange Considerations at 10th Sideroad and 2nd Concession Road, solicit feedback and comments on the additional interchange design alternatives, provide updates on key objectives, and provide an update on project milestones and next steps. An Ontario Government Notice (OGN) announcing the date of the interchange event was posted on the Project Website and distributed via Canada Post Unaddressed Admail to residences and businesses adjacent to the Study Area on April 14, 2022. Stakeholders on the Project Contact List also received direct notification through mail or email.</p> <p>As presented at PIC #2, and the public review period for the Preliminary Design Interchange Considerations for 10th Sideroad and 2nd Concession Road, a total of three design alternatives were developed and assessed. These</p>

							<p>included a Parclo A4 interchange, a Parclo AB interchange, and a Partial Parclo A Diamond Interchange, all of which are available for viewing on the project website. Design alternatives were assessed in accordance with four key criteria; Environment, Traffic Operations, Geometrics, and Structural Requirements. Based on this assessment, Alternative 1, the Parclo A4 interchange was selected and carried forward. This interchange configuration is the most common in Ontario, facilitating all movements while emphasizing safety by providing the lowest conflicting vehicle and pedestrian movements at the ramp terminals.</p> <p>A Traffic Study is also underway to assess traffic requirements for the project. Key highlights of the findings of the study as they pertain to the municipal road network will be summarized in the Draft Environmental Impact Assessment Report (EIAR), which will be posted for public review.</p> <p>As your contact information is already on the Project Contact List, you will continue to be notified through email of future milestone events including filing of the Draft and Final Environmental Impact Assessment Reports (EIARs) and other updates for this study.</p> <p>We encourage you to visit the Project Website (www.bradfordbypass.ca) to review information on the project as it becomes available.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. CT-395 Cont.	█	To: Project Team From: █ █	Email: █	Project Opposition	March 23, 2023	<p>Hello! Thank you for your reply. Yes, I do have more questions and concerns. Please see my response to your response below.</p> <p>Please understand that I am afraid. Fearful, stressed that our government is ignoring a mass extinction, climate crisis, and impending point of no return and pretends a status quo includes building as if there is not clear and present danger. Wetlands, trees, healthy ecosystems, healthy farmlands are our best defence and we seem to be paving over them in Ontario. Thank you for your understanding.</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21. We note your comments regarding the need for the project as well as climate change.</p> <p>The Technically Preferred Route for the Bradford Bypass was approved through the 2002 Environmental Assessment. This alignment is technically preferred for a freeway in terms of highway network expansion, ease of construction, relationship to provincial and municipal land use planning (Official and Transportation Master Plans, <i>Places to Grow Act</i>), as well as having fewer negative impacts to residential and natural areas when compared to other route options considered.</p> <p>Yes, I do know that, and I am also aware that the environmental impacts considered are from that time and with the advancement of science and data collection (including real time anecdotal) we now see that climate change is a real and present danger. Why would we not perform a new assessment with our new knowledge in mind? Or better, an entirely</p>	<i>See below for the response. Continued below in CT-395 cont.</i>

						<p>new idea.</p> <p>One of the key goals of the Bradford Bypass project is to reduce traffic on the local road network around the corridor, moving the traffic currently traveling through the towns and municipalities within the region onto the new highway corridor.</p> <p>Yes, I know that too, however it has been brought to the attention of the government that the 407 highway is underused, and as densification could occur instead of sprawl onto farm, green, wetlands, we would not experience the traffic challenges we are anticipating without thought to different tactics to address "progress".</p> <p>This will provide more roadway capacity for local residents. The new corridor will remove the majority of longer distance trips including trucks from the local road network.</p> <p>Again, the infrastructure already in place could be enhanced, and thinking densification rather than sprawl would also reduce the need for residents to travel so far by car to their place of work - not to mention public transit infrastructure to help in this area as well.</p> <p>The proposed freeway reduces congestion within the local road network. Reductions are observed on corridors including Highway 11 / 1 (Bridge Street), Bathurst Street, Holland Landing Road, Yonge Street, Queensville Sideroad, Doane Road, Mount Albert Road, Green Lane, and Simcoe County Road 88 / Holland Street, among other roads.</p> <p>See above.</p> <p>MTO is also undertaking 15 environmental studies to update and document environmental conditions, identify, and</p>

						<p>evaluate potential impacts of the project and recommend mitigation measures to reduce potential impacts and meet current environmental legislative requirements.</p> <p>I am telling you, science is telling you that you don't need environmental assessments with the knowledge that brake dust, more salt, fossil fuel processing and burning will destroy our environment. It's quite clear.</p> <p>There was MTO roadwork done in my municipality where hundreds of trees were taken down, no residents informed, and no transparency regarding impact on water systems or biodiversity. (Work done beside a lake) and when I emailed and called to ask, a response I received was the municipality was informed three times. Which was true but vital information was not shared any of these times. Forgive me if I am not quick to rely on the MTO for proper assessments or transparency. No offence to those at MTO doing their very best for our future.</p> <p>This includes documentation on Climate Change which is currently underway.</p> <p>Will the public be informed <i>before</i> preliminary infrastructure begins? And how?</p> <p>The assessment will be in accordance with MECP's Climate Change Guide (Considering Climate Change in the Environmental Assessment Process, 2017), and will consider the project's expected production of GHG emissions and impacts on carbon sinks, as well as the resilience or vulnerability of the undertaking to changing climatic conditions.</p> <p>But, we already know the climate impact of putting more cars on the road with existing vehicles all burning fossil fuels</p>	

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>accommodating the fossil fuel industry (electric cars will be financially out of reach for most of us for quite a while) which is what will help expedite our downfall regarding ecosystem collapse. Less cars is the correct path. This project induces demand.</p> <p>Findings will be summarized in the Draft Environmental Impact Assessment Report (EIAR), and available for public review.</p> <p>Where would someone like me find that and how will I know when it is available?</p> <p>Seriously- EIAR, MECP, EAP2017, 15 environmental MTO studies, Design Study and Project specific assessment according to Ontario Regulation 697/ are not on my radar and I will not be taking the time to monitor them, despite my immense concern of the government unnecessarily paving natural lands and putting our future at risk. I don't have the time, and ai don't want to. I just want to know my government is looking out for my children's and their children's future which is clearly not the case. 417, paving the Greenbelt, Bradford Bypass, Holland Marsh... development, induced demand- all unnecessary with different plans.</p> <p>We note your comments regarding the need for the project as well as climate change.</p> <p>Thank you for that. I still question it.</p> <p>The Technically Preferred Route for the Bradford Bypass was approved through the 2002 Environmental Assessment.</p> <p>Yes, as stated, and deemed obsolete.</p> <p>This alignment is technically preferred for a freeway in terms of highway network expansion, ease of construction, relationship to provincial and municipal land use planning</p>	

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>(Official and Transportation Master Plans, <i>Places to Grow Act</i>), as well as having fewer negative impacts to residential and natural areas when compared to other route options considered.</p> <p>Development will need all</p> <p>Kids of infrastructure. Maybe the highway itself is that case, but with the ensuing development that will follow and continue- that is NOT the case.</p> <p>To view the full list of studies being conducted, please visit the overview page on the Project Website (https://www.bradfordbypass.ca/overview/).</p> <p>Thank you. I will be honest- I do not want to have read environmental studies. You are responding to my grave concern about the reason for building this project and it has nothing to do with assessments. It has everything to do with WHY.</p> <p>Is it to placate developers who support this government? Is it to add development to increase the profit for the province regarding the economy? Is it to accommodate the influx of immigrants coming to Ontario to help with the skilled labour shortage? Is it to help the residents along the corridor get to the Barrie/Toronto GGH area for work?</p> <p>None of these is as important as keeping farmlands intact, wetlands untouched, natural habitats left alone. There are other alternatives.</p> <p>Regarding your comment referencing Highway 407, even with all currently planned transportation and transit investments, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). For Ontarians in 2051, average travel speeds are</p>	

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>expected to be 16 per cent slower when compared to 2016.</p> <p>If we have implemented sustainable transit, built with density in mind, and stopped the threat of a 3 degree global temperature increase- the slower ride in will be worth it.</p> <p>I drive that route- have for years. So I am not just talking for talking sake.</p> <p>There are alternatives and when we are just told this week by the IPCC Report that we are screwed unless we take drastic action NOW- I say- let's do something and that starts with scrapping new highways that will induce demand especially when the sprawl starts because of this highway.</p> <p>Significant population growth is projected for both Simcoe County and the Regional Municipality of York. The Bradford Bypass has been proposed as a response to this dramatic growth in population and travel demand in the area,</p> <p>Please See above.</p> <p>including the forecasted increase in congestion on key east-west roadways linking Highway 400 to Highway 404. The proposed location for the Bradford Bypass was also identified in A Place to Grow: Growth Plan for the greater Golden Horseshoe (2020).</p> <p>See above and I happen to have read most of that plan and it is NOT the answer to the climate crisis. Quite the opposite.</p> <p>The purpose of the Bradford Bypass is to improve connectivity to the region as well as to provide capacity to accommodate future demand in the region. The new freeway will relieve congestion on existing local roads between Highway 400 and Highway 404 and support urban development in Simcoe County</p>	

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>and York Region. It will also provide a northern freeway connection between Highway 400 and Highway 404.</p> <p>Spend the money on public transit. Why not public transit? We can emulate Europe. Trains to transport goods as well.</p> <p>The travel time savings are calculated by comparing two scenarios: one scenario with the Bradford Bypass ('Build') and the other without ('No-Build'). The 407ETR is included in the transportation model under both scenarios. The model shows that the majority of the users of the Bradford Bypass are either destined to or originate from the nearby communities. The impact from the 407 between the Build and No-Build scenarios is insignificant.</p> <p>That is not what I have read if the 407 is subsidized or allotted to trucks/ transport/etc.. I will research again.</p> <p>As your contact information is already on the Project Contact List, you will continue to be notified through email of future milestone events including filing of the Draft and Final Environmental Impact Assessment Reports (EIARs) and other updates for this study.</p> <p>Thank you. I am truly appreciative. However I think all Ontarians should be briefed. Most don't even know this project is being considered. They should be informed.</p> <p>If you have any other questions, please feel free to reach out to the Project Team at your earliest convenience. You can reach the Project Team via email at projectteam@bradfordbypass.ca, toll free at 1-877-247-6036, or by visiting the Project Website at www.bradfordbypass.ca if you have any additional questions.</p>

CT-395 Cont.	████	To: Project Team From: ██████████	Email: ██████████	Project Opposition	March 24, 2023	<p>May I add some proof from the provincial government that my concerns represent the majority, based on a survey not made widely Public, by the Ministry of Finance before the budget was tabled.</p> <p>"As part of its public consultation for the 2023 budget to be presented on Thursday, the Ontario Finance Ministry posted a survey on its website. The survey was not widely publicized, but there were almost 8,400 responses."</p> <p>A concerned citizen, ██████████ asked the Finance Ministry if they were planning to post the results. When they said no, I filed a FOI request to prise the information out. The FOI staff responded and a few days later sent me an Excel file with the raw data.</p> <p>The question about transportation and infrastructure is fascinating because there have been sharp differences here between the PCs and the opposition.</p> <p>Asked to give two top priorities, 60 % selected building or improving public transit, 43 % chose improving traffic congestion in urban areas, and 41 % cited building infrastructure for biking. However, only 19 % chose highways that cut down on commute time</p> <p>(the rationale 4 the proposed Highway 413), and 12 % selected improving access to the 400 series HWYs (the rationale for the Bradford Bypass). To combine this & the previous question, infrastructure isn't a high priority, & within infrastructure, public transit far outranks HWYs</p> <p>Often in a survey, what isn't asked is as important as what is. The survey does not include any of the following words or phrases: climate change, environment,</p>	<p>Hello ██████████</p> <p>Thank you for your interest in the Bradford Bypass Preliminary Design Study and project-specific assessment of environmental impacts, undertaken in accordance with Ontario Regulation 697/21.</p> <p>Please see the following reply to your questions raised in emails from March 23, 2023 and March 24, 2023:</p> <ol style="list-style-type: none"> Why would we not perform a new assessment (In reference to 2002 Environmental Assessment) with our new knowledge in mind? Or better, an entirely new idea. <p>. In accordance with Ontario Regulation 697/21 , an Environmental Conditions Report (ECR) was prepared to provide an update to changes that have occurred in the Study Area in the years since the 2002 Approved Bradford Bypass Environmental Assessment was completed and describes any changes to the Technically Preferred Route as a result. The ECR provided an assessment and evaluation of the impacts that any changes would have on the environment and provided a description of measures to mitigate any negative impacts on the environment.</p> <p>The environmental impact assessment studies are ongoing and will further assess impacts within the Study Area and propose measures to mitigate potential negative environmental impacts. . Results of the studies, including commitments to future work, will be summarized in a Draft and Final Environmental Impact Assessment Reports (EIARs) per O. Reg. 697/21, to be completed in 2023. Commitments and anticipated permits and approvals identified in the studies will be carried forward to subsequent Detail Design and construction phases.</p> <ol style="list-style-type: none"> it has been brought to the attention of the government that the 407 highway is underused, and as densification could

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
						<p>renewable, green energy or Greenbelt. The word education also never appears,</p> <p>I wonder if the results from a survey done by the government should make the team stop and reassess. After all, it is the citizens' taxes that are paying for the project, and if they want priorities to go to healthcare and affordable housing, and inflation control, perhaps putting billions into these new highway projects should be re-thought. Thank you for reading.</p> <p>I hope you consider what I wrote. Have a pleasant weekend.</p>	<p>occur instead of sprawl onto farm, green, wetlands, we would not experience the traffic challenges we are anticipating without thought to different tactics to address "progress".</p> <p>As noted in previous correspondence, the impact from Highway 407 on the Bradford Bypass between the Build and No-Build scenarios is insignificant due to the distance between Highway 407 and the Bradford Bypass Study Area.</p> <p>3. the infrastructure already in place could be enhanced, and thinking densification rather than sprawl would also reduce the need for residents to travel so far by car to their place of work- not to mention public transit infrastructure to help in this area as well.</p> <p>Travel time savings were calculated using an area-wide transportation model (with a 2041 horizon year) that compared scenarios with and without the Bradford Bypass corridor in place for various key origin and destination pairs within the region. It also included all existing and planned transit services and initiatives, including the Barrie Line and GO Transit Lines.</p> <p>As noted in previous correspondence, even with all currently planned transportation and transit investments, road congestion will continue to increase across the Greater Golden Horseshoe (GGH). For Ontarians in 2051, average travel speeds are expected to be 16 per cent slower when compared to 2016.</p> <p>4. Will the public be informed before preliminary infrastructure begins? And how?</p> <p>Those included on the Project Contact List will continue to be notified through email of future milestone events. Additionally, newspaper ads will be made available, and brochures distributed to those</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>in the study area via Canada Post. Information will also be placed on the Project Website.</p> <p>5. we already know the climate impact of putting more cars on the road with existing vehicles all burning fossil fuels accommodating the fossil fuel industry (electric cars will be financially out of reach for most of us for quite a while) which is what will help expedite our downfall regarding ecosystem collapse. Less cars is the correct path. This project induces demand.</p> <p>All transportation infrastructure regardless of mode induces demand. People use the options available to them.</p> <p>Induced demand includes a number of elements – people change mode choices, switch routes, adjust live-work locations, or make “new” trips because of a new facility. Given the substantial growth anticipated in the region, the road capacity will still be required, in addition to investment in transit. Road capacity can be managed and utilized in efficient ways and vehicles can be designed to have lower environmental impacts.</p> <p>As part of the Bradford Bypass study, an Air Quality Impact Assessment is being undertaken to determine the relative contribution to ground level pollutant concentrations of specific current or future source emissions at receptor sites using modelling techniques.</p> <p>The Ministry will endeavor to minimize the air quality and greenhouse gas emission impacts of the project wherever technically feasible. Operational mitigation strategies may include vegetation plantings or other types of screening/barriers to decrease ground level dispersion of particulates. In addition, the proposed eventual addition of High Occupancy Vehicle lanes will promote the use of carpooling and aid in reducing congestion..</p>

Reference #	Assigned to:	To/From /Organization	Format (Email, Phone, Fax)	Topic / Theme Discussed	Date Comment/ Question/ Request Received	Comment/ Question/ Request	PROJECT TEAM RESPONSE
							<p>The increasing uptake of low-carbon and electric vehicles, new technologies and stringent fuel emission standards may also provide future benefits to air quality.</p> <p>6. Where would someone like me find the Draft EIAR and how will I know when it is available?</p> <p>As you are included on the Project Contact List, you will be notified through email of the publication of the Draft and Final Environmental Impact Assessment Reports (EIARs). The Draft EIAR will be made available for public review on the Project Website. Please also see the response to Question #4 regarding the newspaper ads and brochures.</p> <p>7. Maybe the highway itself will have fewer negative impacts, but with the ensuing development that will follow and continue- that is NOT the case.</p> <p>As part of the Bradford Bypass, the Project Team is carefully assessing and evaluating all impacts and will continue to work with Indigenous communities, environmental agencies, municipalities and stakeholders to identify measures to avoid and mitigate any potential impacts.</p> <p>8. Thank you. I will be honest- I do not want to have read environmental studies. You are responding to my grave concern about the reason for building this project and it has nothing to do with assessments. It has everything to do with WHY. Is it to placate developers who support this government? Is it to add development to increase the profit for the province regarding the economy? Is it to accommodate the influx of immigrants coming to Ontario to help with the skilled labour shortage? Is it to help the residents along the corridor get to the Barrie/Toronto GGH area for work?
